The edible animal products group employed considerably more workers during April than in March, largely owing to the seasonal expansion of fishing operations. Abattoirs, however, showed rather less activity. Employment in slaughtering and meat packing plants generally at Hull and Montreal in the province of Quebec showed very minor changes, although in one instance in the latter centre there was a moderate increase in staff. Abattoirs and meat product plants at Toronto on the whole were busier, and slight improvement was indicated in employment in such concerns at Peterboro. Cheese and butter factories and dairies at Ottawa and Toronto also afforded increased employment. At Elmwood and Winnipeg, Man., reductions in personnel were reported by manufacturers of meat products. At Calgary, however, the meat industry absorbed a slightly greater number of persons. Dairies and butter and cheese factories at Edmonton were not quite as busy as in March. In the Maritime provinces the fishing and fish canning and smoking industries engaged very much larger staffs on account of seasonal activity, and increases in employment on a smaller scale were also registered by similar concerns in British Columbia.

The re-opening of several tobacco factories temporarily closed for repairs or inventory purposes caused employment in the industry to show some revival during April. At Montreal, tobacco factories were somewhat slacker and cigar and tobacco plants also afforded less employment. On the other hand, the tendency in the city of Quebec was upward. Manufacturers of malt liquors in Montreal reported minor improvement. Conditions in tobacco factories in Ontario varied, but there was a small net increase in employment. At Hamilton slightly increased activity was indicated, while at Toronto the movement was unfavourable. The production of malt liquors at Walkerville employed a smaller working force than for several months.

IRON AND
STEEL
PRODUCTS

Considerable fluctuation was reported by concerns in the iron and steel group during April. The re-opening of the railway car shops temporarily shut down at the close of March caused large increases in staffs during the early part of April, but several of the locomotive shops again closed down at the end of the latter month, causing heavy declines in employment. In Nova Scotia very much smaller pay rolls were reported in the Sydney rolling mills. Steel furnaces at Sydney Mines also showed less activity. The shipyards at Halifax were not as busy and the production of railway cars and parts at New Glasgow absorbed a considerably smaller working force than in March. There was, moreover, a decided decline in employment in forging mills in the latter centre. In Quebec the movement was favourable on the whole, although local variations were reported in different centres. Steel shipbuilding and repairing yards at Montreal were somewhat busier, while at Sorel and Three Rivers there were minor declines in employment. The locomotive shops at Montreal re-opened early in April and afforded fair employment during the month. The production of railways cars and parts in the same centre showed considerable curtailment. Engine and boiler works in Montreal employed fewer workers than in March; foundries and machine shops and rolling mills also were slacker. On the other hand, forging mills in the same city were very much busier. The production of stamped and enamel ware and of hardware in Montreal showed a minor increase. Agricultural implement factories at Terrebonne reported reductions in personnel. Practically no change in the situation was recorded by manufacturers of hand tools at Rock Island, of general plant machinery at Sherbrooke, and of structural iron and steel fabrication at Lachine. Stationary steam engine and boiler works at Montmagny were decidedly busier than in March, although employ-

ment was not yet normal. The production of sewing machines at St. John's showed a small increase. Fire arm factories in Quebec city were busier. On the other hand, iron and steel fabrication plants at Longue Point showed reductions in staffs. Further general improvement in the situation was reported in Ontario in the early part of April, but at the close of the month, shut downs in the railway car shops affected employment materially. Automobile works at Chatham, Ford, Oshawa, and Walkerville on the whole were decidedly busier. Agricultural implement manufacturers at Brantford, Hamilton, Smith Falls and Toronto also registered increases in staffs. Plow manufacturing in Brantford, however, showed a decline. The production of stationary steam engines and boilers at Brantford, Galt and Toronto was in slightly lesser volume. Small hardware factories at Ingersoll, Brockville and Hamilton were somewhat busier. Improvement was also reported in the volume of employment afforded in heating appliance works at Guelph and Toronto while at London staffs remained stationary. The production of hand tools at Dundas declined to some extent, while in St. Catharines no change in the situation was recorded. Cast iron pipe plants at Guelph registered increased activity, and wrought iron pipe plants at Welland were busier. Manufacturers of general plant machinery at Hamilton and Toronto employed larger working forces than for several months, while at Galt and Fort William they maintained the same staffs as in March. Structural iron and steel fabrication at Walkerville engaged rather more workers than in the preceding month although the payroll reported was below normal. At Hamilton such plants showed a minor decline in activity. The production of wire and wire goods at Hamilton was in considerably greater volume than in March. On the other hand, steel furnaces in the same city were less fully employed. Railway car factories at Ottawa showed a minor re-

duction in personnel; at Hamilton on the other hand there were increases in personnel. Shipyards at Kingston and Midland showed considerable curtailment in operations while at Toronto there was a large increase in staff. Wire, rope and cable factories at Leaside registered greater activity than for many months. Forging mills at Swansea were decidedly slacker and at Oshawa there was an insignificant increase in payroll. The production of trade machinery at Peterboro employed a larger working force than at any period in this year although the plants were not yet working to capacity. Sheet metal works at Oshawa were busier. Employment in rolling mills at Sault Ste. Marie declined considerably, while the rolling mills in Toronto employed their usual working force. Sheet metal products at Toronto showed a fair-sized contraction. Safe and vault factories in the same city were not as busy as in the preceding month. Manufacturers of bicycles and motor cycles at Weston reported increased activity. Not much change in the situation as reported during March occurred in the iron and steel industries in Manitoba. The production of structural iron and steel fabrication at Winnipeg employed approximately the same staffs as in the former month. The Selkirk rolling mills, however, were busier. In British Columbia employment in iron and steel was in less volume than for some months. Reductions in personnel occurred in the shipyards at Vancouver and Victoria.

NON-FERROUS METAL PRODUCTS

Minor fluctuations only were reported in this group during April.

Brass, bronze and copper foundries in Montreal reported insignificant additions to payrolls, and copper wire plants in the same city were somewhat busier. On the other hand, can factories in Maisonneuve indicated slightly reduced payrolls. The production of jewellery at Montreal and Sherbrooke employed rather fewer workers than in March. In Ontario

also small local fluctuations were reported. The production of brass, bronze and copper articles at Hamilton and Sarnia experienced a slight falling-off. Nickel and copper refining and smelting plants at Copper Cliff maintained practically the same level of employment as in the last few months. Silver and copper refineries at Port Colborne, however, were not as busy as in March. The production of aluminium ware at Toronto eased off to some extent. Lead, tin, zinc and copper factories in the same centre, on the other hand, reported larger payrolls than in any month since November of last year, while silverware works retained their usual staffs. Copper smelting and refining in British Columbia showed slight improvement, especially at Anyox.

LEATHER PRODUCTS

The downward movement that employment in the leather industries has experienced for several months continued to be in evidence during April. Net reductions in personnel were recorded by boot and shoe manufacturers in Montreal, although some firms had enlarged their payrolls. In the city of Quebec on the other hand a rather more favourable tendency was indicated. Boot and shoe factories in St. Hyacinthe reported reduced activity on a moderate scale. The production of harness and saddlery in Montreal engaged a larger working force than at any time since November. In Ontario there were local variations also, but the downward trend predominated. Tanneries at Toronto and Kitchener indicated increased activity, while at Newmarket and Oshawa contractions were reported. The production of harness and saddlery at Acton also declined. Boot and shoe manufacturers in London, Perth, Preston, Hamilton and Toronto registered minor additions to staffs. At Galt, on the other hand, there was a decided falling-off in production and reductions on a smaller scale were recorded at Aurora and Tilsonburg.

RUBBER
PRODUCTS

Employment in the rubber industries generally was in less volume during April than in March. Rubber footwear concerns at Granby, Que., were not as busy as in March and at Montreal there was a decided contraction in employment, partly on account of a shutdown in a large factory. The production of tires and miscellaneous rubber and elastic goods in the latter centre declined to some extent. In Ontario the movement was rather less favourable also. Footwear factories at Guelph and Merriton employed larger working forces than in the preceding month, although the staffs indicated were still below normal. Tire factories at Toronto and Guelph were more fully employed than in the preceding month, while in Kitchener less activity was indicated. Manufacturers of rubber and elastic goods at Toronto on the whole were busier, but at Bowmanville slight declines in staffs were reported.

LUMBER
PRODUCTS

Continued expansion in the employment afforded in sawmills was reported during April, and further improvement on a more moderate scale also occurred in furniture and other wood-using factories. In Quebec, increased activity was indicated by sawmills at Sayabecffi planing and moulding mills at Montreal and Port Etchemin were also busier. Furniture factories at Beauharnois indicated a minor reduction in personnel; at Coaticook an insignificant gain was reported, while at Cowansville staffs remained stationary. Considerable improvement in the situation was reported in the shipyards at Sorel and Levis, in both of which centres larger working forces were employed than at any preceding period in 1922. Match factories in Hull reported a minor increase. The production of cork goods in Montreal employed approximately the same staffs as in March. In Ontario, sawmills increased their pay rolls considerably, especially at Arnprior, Fort Frances, Pembroke,

Rockland and Keewatin. Box and shoox factories at Toronto showed some expansion while at Pembroke there was a minor falling-off in production. Refrigerator factories at Brantford were busier. Furniture plants at Newmarket and Stratford registered slight declines in employment, and billiard table and material concerns in Toronto were not as fully employed as in March. Carriage and wagon works at Orillia recorded considerably larger staffs than for many months past and a slight increase in personnel was reported at Chatham. Washing machine and wringer works at London indicated smaller staffs than in March. Seasonal expansion was registered by Manitoba sawmills, increased activity being registered in several centres, notably The Pas. The tendency in British Columbia was favourable also. Lumber mills at Golden, Fraser Mills, Vancouver and Wardner were decidedly busier, while at Chemainus practically the same level of employment as in March was reported.

PULP AND
PAPER
PRODUCTS

Employment in pulp and paper products continued to increase during April. In Nova Scotia there were minor gains in paper mills at Murray, but at Liverpool there was an insignificant reduction in staff. At Chatham, N.B., larger staffs were reported in the pulp mills than in any month to date in this year. At St. John there was a slight increase in activity, while at Bathurst employment declined to some extent. In the province of Quebec, there was a small decrease in employment, largely owing to a partial shutdown in a paper mill at Three Rivers. At Hull, Windsor Mills, Donnacona, Cap Magdeleine, East Angus and Bagotville there were reductions in personnel on a much smaller scale. At Chandler, Chicoutimi, Kenogami and La Tuque, on the other hand, increased activity was indicated in pulp and paper mills. In Ontario there were fluctuations in different centres but the movement on the whole

was slightly unfavourable. At Cornwall, Ottawa, Espanola, Hawkesbury and Smooth Rock Falls some expansion was reported in the production of pulp and paper. On the other hand, at Sault Ste. Marie, Iroquois Falls, Sturgeon Falls and Thorold smaller payrolls were reported than in March. Paper product factories at Toronto were scarcely as busy. In Manitoba employment remained very much on the same level as in the preceding month. In Winnipeg minor increases and decreases in printing shops offset each other. In Saskatchewan and Alberta printing and publishing houses maintained practically the same staffs as in March. Pulp and paper mills in British Columbia were decidedly busier, especially at Ocean Falls and Powell River, while at Port Alice there was a small decline in payroll. The printing trades in Vancouver reported increased business, while at Victoria no change in the situation occurred.

TEXTILE PRODUCTS

The textile trades on the whole afforded less employment during April than in March, although increased activity was indicated in some centres. In Nova Scotia the cotton mills at Yarmouth and the hosiery mills at Truro reported larger payrolls than at any time in this year. In New Brunswick the cotton mills at Milltown were busier than in the preceding month but at Marysville and St. John there were slight reductions in staff. In the province of Quebec the situation showed little change when compared with the March reports. The production of cotton in Montreal eased off to a very slight extent; at Sherbrooke, Three Rivers, Montmorency Falls and Magog there were also minor decreases in personnel. The cotton mills at Valleyfield, however, were rather busier. Women's clothing factories at Montreal employed larger working forces than at any period in this year. Manufacturers of men's furnishings in that city also reported increased activity. At St. John's, however, there was a

slight contraction in employment in such factories. Insignificant changes were recorded by thread factories at Montreal and St. John's. The production of corsets in Quebec city declined. The silk and woollen mills at Sherbrooke were not quite as busy as in March. Hosiery and knit goods factories at St. Hyacinthe registered decided improvement. Felt manufacturers at Lachute Mills reported the same level of employment as in February and March. Employment in textile industries in Ontario showed a decidedly downward tendency. The woollen mills at Carleton Place were not as actively employed as in March. The production of silk and silk goods at Brantford and St. Catharines was in smaller volume than during the preceding three months. Employment in felt goods factories at Kitchener also declined. Hosiery and knitting mills at Carleton Place, Perth, St. Catharines and St. Thomas were somewhat busier. Men's clothing factories at Hamilton recorded small reductions in personnel while at Toronto the situation remained unchanged. Women's garment plants in the latter centre maintained their usual level of employment. Milliners in Toronto reported a considerable decrease in activity. Awning, tent and sail plants in Toronto and Ottawa also employed smaller working forces than during the preceding month. Corset manufacturers in the former city were somewhat slacker. The production of carpets and rugs at Toronto declined, while at Guelph no change in the situation was indicated. Men's clothing factories in Toronto employed rather more workers on the whole although some concerns were not as active as in March. Hosiery and knitting mills in Toronto were decidedly busier, but at Hamilton reductions in staffs were recorded. At Paris the knitting industry also showed a minor decline, while at Dunnville improvement was registered. Woollen yarn and cloth concerns at Almonte, Hespeler and Peterboro engaged a larger working force than in the preceding month. At

Toronto and Preston employment in such factories remained on the March level. Cotton yarn and cloth mills at Hamilton were busier, and a slight improvement was also recorded at Welland. On the other hand, at Cornwall the mills were slacker. Cordage works at Welland reported a more favourable situation, but at Brantford no change was indicated. Bedding plants at Toronto reported a minor reduction in staff.

MINERAL PRODUCTS

Employment in the mineral products group showed some improvement during April, there being additions to staffs of a general nature. In Nova Scotia considerable improvement was recorded in oil refineries at Dartmouth, although the working forces were still below normal. The Montreal oil refineries maintained their normal payrolls. In Ontario rather more activity was indicated by manufacturers of petroleum products at Sarnia. At Welland, on the other hand, there was a minor decline in activity. Practically no change in the situation was reported at Ioco, B.C. The production of oxygen and acetylene gases at Welland declined slightly. Cynamid plants at Niagara Falls were decidedly busier. Plants producing coke and gas in Toronto registered a substantial increase in personnel. Baking powder factories in the same centre were somewhat more fully employed than in March.

CLAY, GLASS AND STONE

Further expansion in employment occurred in this group during the month under review, glass, cement and brick factories all sharing in the favourable movement. In Montreal several glass manufacturers reported a considerable increase in activity, but in one firm there was a fair sized reduction in staff. Cement plants in the same city indicated considerable extension of operations. In Ontario, glass factories at Hamilton reported some curtailment, but at Wallaceburg there was an increase in employment on a

larger scale. The production of building glass at Toronto remained practically on the March level. In the province of Ontario the cement trade was not quite as busy as in the preceding month, there being reductions in personnel at the cement works in Belleville and Port Colborne.

CHEMICALS

The tendency indicated by employers in this group during April was favourable, although the increases in employment were not particularly pronounced. Explosive factories in Montreal were slightly busier, as were also ammunition plants at Brownsburg, Que. Paint works in the former centre also reported increased employment. The production of soap at Toronto showed an increase. Drug factories at Walkerville, Ont., were somewhat more fully employed also.

ELECTRICAL APPARATUS

The improvement manifested in this group during March was not maintained in April, and fair size reductions in employment occurred, although some centres registered considerably more activity. In Montreal the movement was decidedly favourable. At Hamilton, Ont., the production of electrical appliances declined to some extent. At Toronto and Stratford there were also reductions in staff, while at St. Catharines increased employment was indicated.

ELECTRIC CURRENT

Employment in electric current plants was in smaller volume during April than in March. In Montreal the trend was downward. The situation in Ontario showed very little change, staffs at Hamilton and Toronto and other cities remaining practically on the March level. In Winnipeg, Man., there was a minor increase in employment, additions to staffs made by one establishment slightly more than offsetting reductions in another. In Vancouver, B.C., considerable expansion was indicated.

MISCELLANEOUS. PRODUCTS

The production of roofing materials at Montreal showed a considerable increase. Surgical supply houses in the same centre, on the other hand, were decidedly less fully employed. Window shade and appliance factories at Lachine afforded the same volume of employment as during February and March. The production of photographic apparatus at Toronto declined. Plumbers' supplies manufacturers at London were busier. Broom and brush concerns in Ontario afforded more employment, on the whole than in March. There were slight increases in activity at Hamilton and Toronto, while at Port Elgin there was a minor reduction in staff. Employment in this industry at St. John, N.B., also decreased to some extent.

Construction

Considerable expansion of a seasonal character was reported by the construction and maintenance departments of the Canadian Pacific, Grand Trunk and Canadian National railways during April. These three railways together employed over 6,000 more men than had been on their payrolls at the end of March. The Canadian Pacific absorbed over 3,700 of these additionally employed workers, the Grand Trunk reinstated approximately 100 persons and the Canadian National Railways added practically 2,400 men to their construction and maintenance staffs.

The value of the building permits issued in 56 cities during March aggregated \$9,160,889 as compared with \$4,216,463 in February, and with \$6,609,782 in March of last year. All provinces registered increases in the value of the building contemplated in comparison with the preceding month, the gains in Ontario, Quebec and British Columbia being especially pronounced. The spring extension of operations reported by building contractors during March continued also during April, the increases being, in fact, on a larger scale.

In Nova Scotia building firms at Halifax afforded slightly more employment. At St. John, N.B., there was also a minor increase in activity. In the city of Montreal considerable increases in employment were recorded in the building trades. On the other hand, at Sherbrooke there was a slight reduction. The tendency in Toronto, Hamilton, London, Kingston, Kitchener, Windsor and New Liskeard was favourable. The construction of public highways in Ontario absorbed considerably more men than in March, although the staffs engaged on such work were not as large as in April of last year. Building contractors in Winnipeg were busier. In Alberta the construction of roads at Banff employed fewer men than in the preceding month. The building trades at Vancouver and Penticton, B.C., were more fully engaged than in March.

Transportation

The gross earnings of the Canadian National Railway during April amounted to \$8,035,358 as compared with \$9,956,693 in the preceding month. Information respecting the month of March, which was not available for insertion in the April issue of the LABOUR GAZETTE, shows that the gross earnings of the Canadian Pacific Railway during March were \$13,847,627 as compared with \$11,303,693 in the preceding month, and with \$14,705,727 in March, 1921. The volume of employment afforded by the Canadian Pacific, Grand Trunk and Canadian National railways in operation declined during April as compared with March. The operating departments, (which included general offices, trainmen, engine crews, station employees, sleeping, parlour and dining car employees) reduced their staffs by approximately 800 workers during the month, the contractions in employment being largest in the Maritime provinces. The Canadian Pacific decreased its working force by approximately 600 employees, and the Canadian National released over 400 men, while, on the other hand, the Grand Trunk added over 100 workers

to its payroll. Local transportation companies indicated increased activity during April. In Montreal and the city of Quebec the situation remained unchanged. In Toronto considerable improvement was indicated, while additions to staffs on a much smaller scale occurred at London and Ottawa. The Hamilton street railway maintained the March level of employment. In Winnipeg there was a slight decline in activity. The Edmonton electric railways were somewhat busier. In Vancouver, B.C., there was also a large increase in employment on the street railways.

Trade

Employment in retail and wholesale establishments increased considerably

during April as compared with March. In Montreal the general tendency in retail shops was favourable, although some concerns reported slightly reduced staffs. In Ontario employment increased largely at Toronto, while Ottawa stores were somewhat busier also. At Regina the sales force of one establishment was greatly curtailed, but by other firms the situation was reported unchanged. The movement in Calgary was upward and slight improvement was indicated also at Winnipeg. Small additions to staffs were registered by wholesale houses in Montreal. In other cities, however, employment in wholesale trade remained practically on the March level.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

Proceedings from the Month of April with Text of Board's Report, etc.

DURING the month of April the Department received a report from one Board of Conciliation and Investigation established to deal with a dispute between members of the Association of Canadian Building and Construction Industries, Ottawa Branch, and certain of their employees being members of Local No. 428, International Hodcarriers, Building and Common Labourers' Union of America.

Applications received.

During the month applications for the establishment of Boards of Conciliation and Investigation were received as follows:

(1) From certain employees of the municipality of Saanich, B.C., being members of the Saanich Employees' Protective Association. The employer being a municipality, a Board could be established only upon the joint consent of the disputants. Consent to the establishment of a Board had not been re-

ceived from the municipality at the end of the month.

(2) From certain employees of the Toronto and York Radial Company being linemen, wiremen, train despatchers, operators, helpers, etc., members of the Canadian Electrical Trades Union, Toronto. This application for a Board was subsequently withdrawn, the employees having decided to draw up and present a new schedule to the company.

(3) From certain employees of the London Street Railway Company, being motormen and conductors, barn, shop, line and trackmen, members of Division No. 741, Amalgamated Association of Street and Electric Railway Employees of America. A board was established, Mr. F. H. McGuigan, Toronto, Ont., being appointed on recommendation of the company and Mr. Frank McKay on the recommendation of the employees. The appointment of a chairman was under consideration at the close of the month.

Other Proceedings under the Act.

(1) On April 5, the Board of Conciliation which had been established to deal with a dispute between certain coal companies of Nova Scotia and their employees, and which had submitted its report in January, was instructed, under Section 29, paragraph 2 of the Act, to reconvene for the purpose of dealing with different aspects of the dispute, which had been the subject of discussion and question in Parliament and elsewhere. The Board met accordingly in Halifax on April 11. On the following day telegrams were received by the Minister of Labour from Messrs. U. E. Gillen and James Ling tendering their resignations from the Board. The resignations were accepted, and the Board was declared by the Minister to be defunct. On April 12, a new Board was constituted under Section 63a of the Act, which provides for the creation of a Board when it seems to the Minister expedient, without application of either of the parties to the dispute. This dispute affects the Dominion Coal Company, the Nova Scotia Steel and Coal Company, and the Acadia Coal Company, subsidiaries of the British Empire Steel Corporation, and certain of their employees being members of District 26, United Mine Workers of America. The Board was composed as follows: Mr. John E. Moore, St. John, N.B., appointed on the nomination of the employers, Mr. Isaac D. McDougall, Inverness, N.S., appointed on the nomination of the employees,

and Mr. D'Arcy Scott, Ottawa, chairman, appointed by the Minister in the absence of a recommendation from the other two members of the Board.

(2) In the case of a dispute between the Algoma Eastern Railway Company and employees of various classes, members of Division No. 4, Railway Employees' Department, American Federation of Labour, a Board was completed by the appointment of Mr. F. H. McGuigan, Toronto, Ont., on behalf of the employers and in the absence of a recommendation from the company, and of Mr. W. T. R. Preston, Port Hope, appointed chairman, in the absence of a recommendation from the other two members of the Board. Mr. Fred Bancroft, Toronto, had been already appointed on recommendation of the employees.

(3) A Board was established to deal with a dispute between the Ottawa Electric Railway Company and certain of its employees, being members of Division 279, Amalgamated Association of Street and Electric Railway Employees of America. Mr. George D. Kelley, Ottawa, was appointed a member on the recommendation of the company. Mr. Charles J. Tulley, Ottawa, was appointed on the recommendation of the employees concerned, and Mr. Alex Smith, Ottawa, was appointed chairman in the absence of a recommendation from the other two members of the Board.

Report of Board in Dispute between employers, members of the Association of Building and Construction Industries, Ottawa Branch, and certain of their employees, being hod carriers and building labourers.

A report was received from the Board established to deal with the dispute between members of the Association of Canadian Building and Construction Industries, Ottawa Branch, and certain of their employees being members of Local No. 428, International Hod-carriers, Building and Common Labourers' Union of America. The Board was com-

posed as follows: Mr. D'Arcy Scott, Ottawa, chairman, appointed by the Minister in the absence of a recommendation from the other two members, Messrs. G. A. Crain and Martin Ryan, nominees of the employers and employees respectively. The report was unanimous and contained recommendations as to the settlement of the dispute.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a difference between members of the Association of Canadian Building and Construction Industries, Ottawa Branch, employers, and certain of their employees, being members of Local No. 428 International Hodcarriers, Building and Common Labourers' Union of America.

To the Hon. James Murdock, M.P.,
Minister of Labour.

Sir:

The undersigned members of the Board of Conciliation and Investigation herein beg to report as follows:—

The Board held its organization meeting on April 3rd and sat for the purpose of hearing evidence and preparing this report on April 5th, 6th, 7th, 10th, 11th, 12th, and 13th.

In addition to statements on behalf of the interests they represent made by two members of the Board, Mr. G. A. Crain for the builders and Mr. Martin Ryan for the labourers, the following witnesses gave evidence before the Board: Messrs. J. S. C. Adamson, Hugh J. Graham, G. B. Greene, Geo. A. Rich, A. W. E. Hellyer, J. Gariepy, Tom Moore, Alex. MacAtee, Wm. McClancy, Hy. Glass and John Henderson.

The unanimous awards in the arbitrations between the builders and the carpenters, and the builders and the bricklayers where it was agreed in each case that a reduction of 5 cents an hour should be made in present wages were considered.

Evidence was submitted to show that there was still a large number of labourers out of employment and that others were working 9 hours a day for 30 cents and 35 cents an hour.

A number of new jobs are shortly to be started and the volume of unemployment will soon be greatly reduced, if not entirely absorbed.

Builders' labourers do not get steady employment. They are laid off from time to time on account of wet weather during the building season and they are frequently out of work in the winter.

While the cost of living has been reduced in the last twelve months no reduction has yet been made in the important item of rent and the cost of living is still about 50 per cent in excess of what it was before the war.

The Board while recognizing the present excess supply to the demand for labour wishes to perform the duty placed upon it by the law and render "substantial justice" in this matter. We feel that notwithstanding the low rates of wages paid in some cases that the labourers who will be affected by this award should get a fair living wage in reasonable relationship in the wage of the skilled labourers of the crafts with which they work in carrying on building operations.

The labourers contend that there should not be a cut in their wages this year and that the rate of 50 cents per hour to which they agreed last year should continue in effect. On the other hand the builders offer 40 cents per hour although before the Board was formed they were in friendly negotiations willing to give as high as 45 cents per hour.

In addition to the 5 cent cut per hour that the bricklayers and carpenters have agreed to, the cost of material has been considerably reduced since last year.

The Board is of the opinion that if a fair reduction is made in the labourers' wage in addition to the reductions in the cost of building already referred to, that it will have the effect of restoring public confidence in the reasonableness of building costs and lead to a greater volume of construction during the present year which will insure steady employment for builders' labourers.

The undersigned are of the opinion after carefully considering all matters submitted for their consideration that substantial justice would best be done

in this case if a reduction of 5 cents per hour was made in the rate of the labourers' wage which was agreed to last year. That is it should be reduced from 50 cents to 45 cents per hour. This rate of 45 cents to become effective on May 1st, 1922, and remain in force for one year.

There should be time and a half pay for any time over nine (9) hours a day on all work except in the case of re-enforced concrete construction where straight time only shall be paid.

We desire to express our sincere appreciation of the reasonable attitude taken before the Board by both parties in this case and the courtesy and extreme fairness with which they at all times treated each other.

All of which is respectfully submitted.
Dated at Ottawa, April 13th, 1922.

(Sgd.) D'ARCY SCOTT,
Chairman.

(Sgd.) G. A. CRAIN.

(Sgd.) M. RYAN.

COST OF LIVING ADJUSTMENT OF WAGES OF VANCOUVER ISLAND COAL MINERS

THE Cost of Living Commission appointed on January 21, 1919, to determine every three months the changes in the cost of living for coal miners on Vancouver Island, and to report the amount by which wage rates should correspondingly be increased or decreased, forwarded its report to the Department of Labour for the quarter ending March 31, 1922.* The Commission consisted of Mr. Matthew Gunness, representative of the miners; Mr. Tulley Boyce, representing the operators; and Mr. D. T. Bulger, Fair Wages Officer of the department of Labour, Chairman.

As in previous investigations, forms were sent out to the merchants and dealers with whom the majority of miners were accustomed to trade in the various localities. The forms contained the same list of groceries, provisions, meats, etc., that was used on previous occasions. The method of computing the changes for the period under review was the same as used for previous adjustments, namely, to determine the percentage of increase or decrease, as the case may be, of prices of March 31 over December 31, for groceries, provisions, meats, etc., and to add a further two-fifths of this increase (or decrease) as an equivalent to cover similar increases (or decreases) in clothing, etc. An increase of 2.88 per cent was ascer-

tained, which amounted to an increase in wages of 8½ cents per day where the base rate was \$3 per day, and 9 cents per day where the base rate was \$3.15, the increase in wages to become effective May 1, 1922, and to apply to all underground service, clerical and office employees.

Retail price lists were received from general merchants and retail dealers in meats in the towns of Nanaimo, Ladysmith, Cumberland, Courtenay, South Wellington, Union Bay, and Cassidy.

Sharp increases were noted in molasses, pickles, flour, corn meal, (yellow) evaporated peaches, apricots, fresh beef, mutton, veal. Slight increases were noted in jam, peas, barley, sago, canned peas, canned tomatoes, lunch tongue, brooms, soaps, vinegar, lard, ham and bacon, tea, cream of tartar, figs (evaporated), prunes, matches, and pork. Slight decreases were noted in syrup, beans, canned beans, canned salmon, canned corn beef, flours, oats, standard oatmeal, cookies, cheese, coffee, raisins. Sharp decreases were noted in sugar, canned roast beef, butter. No changes were noted in s.w. and brown beans, rice, tapioca, canned corn, milk, flavour extracts, currants.

*For previous orders see LABOUR GAZETTE, February, 1922, page 183, and various preceding issues.

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1922

TEN strikes, involving 15,308 workpeople were reported as having commenced during April. There were in existence at some time or other during the month 24 strikes, involving 17,478 workpeople and an estimated time loss of 381,135 working days, as compared with 19 strikes, involving 2,309 workpeople and 58,943 working days in March, 1922; and 29 strikes, 4,453 workpeople and 63,480 working days in April 1921. The time loss occasioned by the 10 new strikes which began in April was 329,035 working days, while a loss of 52,100 working days is charged to the 14 strikes which commenced prior to April. Five of the strikes commencing during April terminated during the month, leaving the following 19 strikes, affecting 17,071 workpeople on record on April 30; coal miners, District 18, Alta. and B.C.; painters and decorators, Quebec; painters and plumbers, St. Catharines; sheet metal workers, Toronto; employees of steel and coal companies, Sydney; gauge men, Sydney; composers, Montreal; composers, Vancouver; photo engravers, Montreal; photo engravers, Ottawa; composers, Montreal; composers, and pressmen, Ottawa; composers, Toronto; composers, Winnipeg; composers, Halifax; composers, Hamilton; clothing workers, Montreal; weavers, St. John, and longshoremen at Montreal.

Disputes by Industries

The following is a review of disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

LUMBERING.—One strike, involving 8 employees and resulting in a time loss of 112 working days, occurred at Calgary during the month. On April 1, millwrights in the employ of three firms went on strike as a result of wages being decreased. This strike lasted about four-

teen days when it was finally settled by direct negotiations, the men accepting the reduction in their rates. Work was resumed about April 19.

MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—About 12,000 coal miners in District 18 struck on April 1 in protest against reductions in the wage schedule. The agreement expired on March 31, but the negotiations reached a decisive point on March 2, when, at a joint conference, demands for a new agreement were submitted by the District 18 Scale Committee of the United Mine Workers of America. These demands included the adoption of a six-hour day, the maintenance of the existing basic day wage and an increase of 25 per cent on all contract mining rates; failing this increase, the miners demanded the abolition of the contract system.

The counter-proposals submitted by the operators at the re-convening of this conference were that the contract rates should revert to the scale of 1915, plus 22 per cent, this making a reduction of between 20 and 25 per cent. The reductions proposed in the basic day rate schedules were from \$6.89 to \$3.60 for underground labour; \$6.58 to \$3.25 for surface labour; and from \$7.50 to \$4.50 for the miners' minimum day rate.

On March 22, a Board of Conciliation was appointed by the Department of Labour and its efforts were supplemented by the efforts of officials of the Department to adjust the problem. The parties in dispute remained at deadlock, and the strike resulted on April 1, remaining un-terminated at the end of the month.

RAILWAY, CANAL AND HARBOUR CONSTRUCTION.—Operating and hoisting engineers to the number of 36 went on strike in Vancouver on April 15, when their demands for increased wages were refused. Settlement of this strike was effected through the mediation of the

STRIKES AND LOCKOUTS DURING APRIL, 1922

Industry or occupation	Particulars	Number of employees affected	Time loss in work-days
Strikes commencing prior to April, 1922			
BUILDING AND CONSTRUCTION— Sheet metal workers, Toronto, Ont.	Commenced January 2. Against a reduction in wages. Terminated.	100	2,400
METALS, MACHINERY AND CONVEYANCES— Employees of steel and coal companies, Sydney, N.S.	Commenced November 22, 1920. For increased wages and improved working conditions. Terminated.	150	3,600
Gauge men, Sydney, N.S.....	Commenced June 9. In sympathy with employees of the steel and coal companies. Terminated.	16	384
PRINTING AND PUBLISHING— Compositors, Montreal, Que.	Commenced June 14. Objection of men to perform work that came from shop where strike existed. Terminated.	25	600
Compositors, etc., Vancouver, B.C...	Commenced May 2, 1921. For increased wages and 44-hour week. Terminated.	39	936
Photo engravers, Montreal, Que....	Commenced May 2, 1921. For shorter hours. Terminated.	30	720
Photo engravers, Ottawa, Ont.....	Commenced May 2, 1921. For increased wages and 44-hour week. Terminated.	9	216
Compositors, Montreal, Que.....	Commenced July 1. For increased wages and 44-hour week. Terminated.	370	8,880
Compositors and pressmen, Ottawa, Ont.	Commenced June 1. For increased wages and 44-hour week. Terminated.	215	5,160
Printers, Toronto, Ont.....	Commenced June 1. For increased wages and 44-hour week. Terminated.	863	20,712
Printers, Winnipeg, Man.	Commenced July 1. Alleged lockout following refusal of employers to renew agreement. Terminated.	235	5,640
Compositors, Halifax, N.S.....	Commenced May 2, 1921. For shorter hours. Terminated.	48	1,172
Compositors, Hamilton, Ont.....	Commenced May 2, 1921. Alleged violation of agreement by employers. Terminated.	10	240
CLOTHING— Clothing workers, Montreal, Que....	Commenced February 17. In protest against a change in working conditions. Terminated.	60	1,440
Garment workers, Montreal, Que....	Commenced December 19. Against increase in working hours and employment of non-unionists. Settled by replacement of strikers. Work resumed April 1.
MISCELLANEOUS— Waiters, Hamilton, Ont.....	Commenced March 1. In sympathy with the waiters on strike in Toronto. Information received indicates employment conditions no longer affected.
Waiters, Toronto, Ont.	Commenced February 27. In protest against the employment of waitresses. Information received indicates that conditions ceased to be affected about March 26.
Strikes commencing during April, 1922			
LUMBERING— Millwrights, Calgary, Alta.....	Commenced April 1. Against a reduction in wages. Settled by negotiations; work resumed April 19.	8	112
MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.— Coal miners, District 18, Alta., and B.C.	Commenced April 1. Against a reduction in wages. Terminated.	12,000	288,000
RAILWAY, CANAL AND HARBOUR CONSTRUCTION— Operating and hoisting engineers, Vancouver, B.C.	Commenced April 15. For increased wages. Settled by mediation of the Department of Labour; work resumed April 25.	36	288
BUILDING AND CONSTRUCTION— Bricklayers and masons, Windsor, Ont.	Commenced April 1. Against a reduction in wages. Settled by negotiations; work resumed April 24.	40	760
Bricklayers, masons, plasterers and carpenters, Calgary, Alta.	Commenced April 1. Against a reduction in wages. Settled by mediation of the Department of Labour; work resumed April 28.	168	4,032
Painters and decorators, Quebec, Que.	Commenced April 24. Against a reduction in wages. Terminated.	170	1,020
Painters and plumbers, St. Catharines, Ont.	Commenced April 1. Against a reduction in wages. Terminated.	70	1,680
TEXTILES— Weavers, St. John, N.B.....	Commenced April 12. Against a reduction in wages. Terminated.	42	630
TRANSPORTATION— Teamsters, Toronto, Ont.....	Commenced April 1. Against a reduction in wages. Work resumed April 10, when strikers were replaced by other workers.	155	1,085
Longshoremen, Montreal, Que.....	Commenced April 17. Against a reduction in wages. Terminated.	2,619	31,428

Department of Labour and work was resumed at the rate of wages prevailing prior to the strike.

BUILDING AND CONSTRUCTION.—Five strikes, involving 548 employees and resulting in a time loss of 9,892 working days, were reported in this group. Four new strikes affecting different crafts of the building trades commenced during the month, the cause in all cases being in protest against reductions in wages. Two of these disputes terminated during April, leaving the strikes of sheet metal workers at Toronto, painters and decorators, at Quebec, and painters and plumbers at St. Catharines, in existence at the end of the month.

CLOTHING.—Information received during the month respecting the strike of garment workers in existence in Montreal since December 19, was to the effect that the company had replaced the strikers. One other strike, that of clothing workers at Montreal, remained un-terminated at the end of the month.

TEXTILES.—On April 12, a strike of weavers occurred at St. John, involving 42 workpeople and resulting in a time loss of 630 working days. This strike was the result of a reduction in wages and remained un-terminated at the end of the month.

TRANSPORTATION.—Two strikes, involving 2,774 employees with an estimated time loss of 32,513 working days, took place in this group during the month. On April 1, teamsters in the employ of two firms at Toronto went on strike against a reduction in wages, and their places were filled by other workers. At Montreal on April 17, longshoremen to the number of 2,619 struck owing to a reduction being made in their wages. Negotiations were carried on but no settlement was arrived at, and the strike remained in existence at the end of the month.

MISCELLANEOUS.—Information received concerning the strikes of waiters at Toronto and Hamilton indicates that in both cases employment conditions have ceased to be affected.

STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING MARCH, 1922

THE following details with regard to strikes and lockouts in the United Kingdom during March, 1922, based on returns from employers and workpeople, are taken from the April issue of the *British Labour Gazette*.

NUMBER, MAGNITUDE AND DURATION.—By far the most important trade disputes, involving a stoppage of work, which began in March were those in the engineering and shipbuilding industries. The number of workpeople involved in these two disputes, as nearly as can be estimated at present, was 240,000. In addition, 46 smaller disputes were reported to the Department as beginning in March, as compared with 66 disputes in the previous month, and 42 in March, 1921. In these 46 disputes about 13,000

workpeople were involved. In addition to the numbers involved in new disputes, about 24,000 workpeople were involved in 53 other disputes which began before March and were still in progress at the beginning of that month. The total number of new and old disputes in progress in March was thus 101, involving about 280,000 workpeople, and resulting in a loss during March of about 3,500,000 working days.

CAUSES.—In addition to the engineering and shipbuilding disputes, 23 other disputes, directly involving about 3,000 workpeople, arose out of proposed reductions in wages; 7, directly involving 3,000 workpeople, on other wages questions; 4, directly involving 2,000 workpeople, on details of working arrange-

ments; 4, directly involving 1,000 workpeople, on questions respecting the employment of particular classes or persons; and 8, directly involving 1,000 workpeople, on other questions.

RESULTS.—During March settlements were effected in the case of 16 new disputes, directly involving about 4,000 workpeople, and 22 old disputes, directly involving about 6,000 workpeople. Of these disputes 12, directly involving 1,000 workpeople, were settled in favour of the workpeople; 11, directly involving 3,000 workpeople, in favour of the employers; and 15, directly involving 6,000 workpeople, were compromised. In the case of 8 disputes, directly involving about 3,000 workpeople, work was resumed pending negotiations.

The following table classifies the disputes by groups of trades and indicates

the number of workpeople involved [whether directly or indirectly] at the establishments concerned, and the approximate time lost during March in all the disputes in progress:—

Groups of Trades	Number of disputes in progress in March			Number of workpeople involved in all disputes in progress in March.	Aggregate duration in working days of all disputes in progress in March.
	Started before March 1.	Started in March.	Total.		
Building	11	6	17	1,000	18,000
Mining and quarrying	8	8	16	10,000	130,000
Metal, engineering and shipbuilding	10	14	24	254,000	3,218,000
Textile and clothing	3	5	8	3,000	23,000
Transport	5	5	10	1,000	10,000
Agriculture	4	1	5	3,000	41,000
Other trades	10	6	16	3,000	48,000
Employees of public authorities	2	3	5	2,000	29,000
Total, March, 1922	53	48	101	277,000	3,517,000
Total, February, 1922	49	66	115	33,000	316,000
Total, March, 1921	63	42	105	45,000	839,000

CONVENTION OF DIVISION NO. 4, RAILWAY EMPLOYEES DEPARTMENT OF THE AMERICAN FEDERATION OF LABOUR

APPROXIMATELY 150 delegates, including the Canadian grand lodge officers of the affiliated organizations and fraternal delegates from the Stationary Firmermen and Oilers and the Clerks and Freight Handlers' International Unions, attended the fourth biennial convention of Division No. 4 of the Railway Employees' Department of the American Federation of Labour, which was held at Winnipeg on March 27 to April 1, 1922, under the chairmanship of Mr. R. J. Tallon, president of the Division. Several of the affiliated organizations, such as the Machinists, Boilermakers, and Carmen held conventions prior to or during the large convention.

The financial report of the secretary for the period from October 1, 1920 to March 1, 1922 showed cash on hand at the beginning of the period amounting to \$18,890, and on March 1 amounting to \$26,807. For the year ending Decem-

ber 31, 1921, the total receipts amounted to \$26,602 and the expenditures to \$17,199. The schedule committee, it was reported, had successfully conducted schedule negotiations with the Railway Association of Canada for all of the shopmen employed upon the Canadian railways.

The convention decided to allow each of the affiliated crafts' unions to assign up to three members on the schedule committee, in place of one as formerly, the cost of one member to be borne by the Division and of the additional members by each craft. The constitution was also changed to allow a reduction in the per capita tax from ten cents per member per month, to five cents. It was decided to move the headquarters of the Division from Winnipeg to Montreal so as to have the headquarters located where the Railway Association of Canada had its headquarters. The conven-

tion was opposed to a proposal of the Railway Association to alter the agreement to provide straight time for Sundays and holidays, in place of time and one-half as at present for men who are assigned to work seven days per week. The convention proposed many changes in the existing agreement, the principal being for the forty-hour week in all main shops. It was also decided to ask for an equivalent increase over the existing wage rates, as asked for by shopmen in the United States. A resolution was adopted condemning the alleged policy of the Dominion government in contracting for the repair of freight cars by private plants paying a lower scale of wages than that obtaining on the rail-

roads, and while the Canadian National Railways' shops were working short time and with depleted staffs. It was decided that steps should be taken to ensure that a representative of the employees be placed upon the board of management of the Canadian National Railways. Another resolution was adopted asking the federal government to carry on the work of industrial scientific research, and that a suitable appropriation be voted for the successful carrying on of the work.

The election of officers resulted in the return of the former officers with R. J. Tallon as president, Frank McKenna as vice-president, and Charles Dickie as secretary-treasurer.

CONVENTION OF THE INTERNATIONAL SEAMEN'S UNION OF AMERICA

THE twenty-fifth annual convention of the International Seamen's Union of America, the report of which has recently been received, was held at Chicago, Ill., from January 9 to 24. About twenty-five delegates were present. The president Mr. Andrew Furuseth occupied the chair.

The Secretary-Treasurer reported a decrease in membership from 115,000 in 1920 to 50,000 in 1921, the decline being attributed to the world-wide industrial depression which prevented a large percentage of their members from earning a livelihood at their regular calling. The Canadian Seamen's Union, The Sailors, Firemen and Cooks' Union of Canada, an affiliated organization, declined in numbers from 1,200 in 1920 to 700 in 1921. The receipts for 1921 amounted to \$45,506 and the disbursements to \$69,331. On January 9, 1922, the cash on hand was \$13,241. He commended the work of the People's Legislative Service Bureau for information supplied in connection with a lockout of seamen both in the Atlantic and Pacific districts, which had enabled the Union to have introduced in the United States Senate

a resolution calling for an investigation of the lockout. This Bureau, he stated, was organized by "friends of labour in the Senate and the House of Representatives and other public-spirited citizens" for the purpose of "gathering evidence concerning investments, earnings, dividends and surplus of companies or corporations seeking legislation to crush organized labour, thereby reducing wages." The report dealt also with wages in the Great Lakes district and pointed out that the Board of Conciliation and Investigation appointed by the Canadian Department of Labour in May, 1921, had in its report recommended a \$99 rate for wheelmen on Canadian vessels, and that the Lake Carriers' Association had cut the American rate to \$85, while in 1920 the rate for American wheelmen was \$20 more than the Canadian rate.

A new constitution was adopted which included among its provisions the election at the annual meeting of a legislative committee of five, whose duty it shall be to watch legislation in the United States Congress and in foreign countries for the purpose of guarding

the interests of seamen. A committee in accordance with this provision was elected. A resolution to withdraw from the American Federation of Labour was not concurred in, and it was decided not to attend a conference for the establishment of a Marine Transport Department in the Federation, as proposed in a resolution submitted to the American Federation of Labour at its Denver convention. In response to a request from the Canadian seamen's union for financial assistance, a resolution was adopted to pay out of the international funds to the Canadian union an amount not exceeding \$100. The convention decided that the international union should continue its efforts to promote through the various national unions of seamen, in all countries, the passing of laws similar to the American Seamen's Act, by every maritime nation. It was opposed to the new manning scale recently issued by the United States Shipping Board, declaring that it was contrary to the law and that it arbitrarily reduced the number of men to be carried in each department of the crew according to the size of the respective vessels and without any consideration of other conditions and circumstances that had been factors in determining a vessel's minimum scale. The former method of having the scale determined by local inspectors of the Steamboat Inspection Service was stated to be in accordance with the law and had in no instance provided for more men than were "necessary for the safe navigation of the vessel." A resolution was adopted protesting against making safety a secondary issue to a policy of economy. Among other resolutions adopted were the following: that no funds of any district or local union entering upon a strike without comply-

ing with the constitutional provisions or without the consent of the district committee and the executive board shall be used to pay any strike benefits, payments to pickets, or payments to officers of such districts or local unions as wages; that they oppose any ship subsidy on the ground of its proven ineffectiveness in promoting a merchant marine and in building sea power, and favour any just mail subsidy on the grounds that such is not a subsidy but payment for work performed. A resolution asking that the union be instructed to work for the franchise of the seamen, permitting them to vote without registration, was thought to interfere with state rights, and it was recommended that the matter be referred to the different districts to the end that the proper bills be drafted and introduced in the different state legislatures. With reference to compensation for seamen, the recommendation of the Committee on Legislation was adopted to the effect that in any compensation bill that may be drafted, the term "seamen" should include fishermen; the term "vessel" should cover fishing vessels; "wages or earnings" should include the earnings of fishermen working on shares; all present rights of seamen should be safe-guarded, including rights to payment of wages and other earnings, care and cure, and the right to bring suit in the courts for damages in lieu of compensation.

Mr. Andrew Furuseth was re-elected president, and Mr. T. A. Hanson, 355 N. Clark street, Chicago, Ill., secretary-treasurer. The number of vice-presidents was reduced from eleven to seven.

The next convention will meet in New York city on January 8, 1923.

AGENDA OF FOURTH INTERNATIONAL LABOUR CONFERENCE

THE Fourth Session of the General Conference of the International Labour Organization (League of Nations) will open at Geneva on October 18, 1922. The agenda as settled by the Governing Body is as follows:

1.—Revision of Part XIII of the Treaty of Versailles, and the corresponding Parts of the other Treaties of Peace:

(a) With a view to the reform of the constitution of the Governing Body [of the International Labour Office.]

(b) With a view to the modification as regards the periodicity of the Sessions of the Conference.

2.—Communication to the International Labour Office of statistical and other information regarding emigration and immigration, and the repatriation and transport of emigrants.

In communicating this agenda to the governments that are members of the International Labour Organization, M. Albert Thomas, the Director of the International Labour Office explained the circumstances under which it was adopted by the Governing Body. It was decided to include item 2, regarding emigration in order to give effect to a resolution adopted by the International Emigration Commission last August and laid before the conference at its last session. It was considered inadvisable to attempt to deal, without further preparation, with all the complex and delicate questions on which resolutions were adopted by that Commission, but the Governing Body was of opinion that the question of the communication by the Governments of statistical and other information relating to emigration might be usefully considered by the Conference as a preliminary to the consideration at a later date of other emigration problems.

With regard to item (1) respecting the revision of Part XIII of the Treaty of Versailles, it was recalled by the Director that paragraph (a) of this

item, respecting reform of the constitution of the Governing Body, was included in the agenda of the Third Session of the Conference, and it was re-included in the agenda of the Fourth Session in conformity with the desire expressed by the Conference.

With regard to paragraph (b) of this item, respecting the periodicity of the Sessions of the Conference, the Director suggested that without any amendment of Part XIII of the Treaty, it might be possible to find a solution of the difficulties which led to the suggestion that sessions of the Conference should be held at longer intervals. The general opinion of the Governing Body was that it was desirable not to overload the agenda of the sessions of the Conference, but that an adequate interval should be allowed to members of the International Labour Organization for dealing with previous decisions of the Conference. It was also suggested that the sessions of the Conference might be divided into two classes alternating from year to year, one in which draft conventions and recommendations might be adopted, and the other in which note would be taken only of results already obtained and difficulties encountered in the application of its decisions and any general questions regarding the working of the International Labour Organization would be settled. It was with this suggestion in mind that this agenda contains one item only with regard to which the conference may adopt a draft convention or recommendation.

In addition to the above items the conference will deal with the following questions affecting the general working and activity of the International Labour Organization, namely (a) the revision of the Standing Orders; (b) the election of the Governing Body; (c) the report on the unemployment crisis and on the dis-

tribution of raw materials which the International Labour Office has been requested to prepare; (d) a proposal to insert in the general articles of future

draft conventions provisions which would render possible their amendment as regards details of application; and (e) the General Report of the Director.

LEGAL DECISION RESPECTING ENFORCEMENT OF RECOMMENDATIONS OF BOARDS OF CONCILIATION UNDER INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

AN important legal decision was recently delivered by Mr. Justice Orde in the High Court of Ontario defining the conditions under which a recommendation of a Board of Conciliation under the Industrial Disputes Investigation Act, 1907, may be made a rule of Court and enforceable as such, in accordance with Section 62 of the Act. The case arose on the application of an order made by Local Division 846 of the Amalgamated Association of Street and Electric Railway Employees of America with reference to the Niagara, St. Catharines and Toronto Railway Company. The circumstances leading up to this application were as follows:

On November 1, 1920, the Niagara, St. Catharines and Toronto Railway Company entered into an agreement with certain of its employees, members of Local No. 846 of the Amalgamated Association of Street and Electric Railway Employees of America. The agreement was to be binding until October 31, 1921, and thereafter, subject however, to revision after September 30, 1921, on thirty days' notice from either party. By Clause 1 of the agreement the company agreed to treat with the properly accredited officers and committees of the employees on all grievances and disputes that might arise between the company and employees "and failing to reach an agreement these shall be settled by arbitration under the Industrial Disputes Act."

Subsequently certain differences arose between the company and its employees and in accordance with the agreement the matters in dispute were referred to

a Board of Conciliation under the Industrial Disputes Investigation Act, 1907. The majority of the board in its report made certain recommendations concerning the questions at issue which had to do with an application for reinstatement of three discharged employees, payment for lost time from suspension of two employees, payment for back time for one man, and for seniority affecting another man. (The majority and minority reports of the Board were printed in the September, 1921, issue of the LABOUR GAZETTE).

As the company did not carry out these recommendations the men made application to the High Court of Ontario for an order declaring that the award of the Board of Conciliation was binding upon the parties and for such other order as might seem just. The application was based on Section 62 of the Industrial Disputes Investigation Act, 1907, which reads "Either party to a dispute which may be referred under this Act to a board may agree in writing, at any time before or after the board has made its report and recommendation, to be bound by the recommendation of the board in the same manner as parties are bound upon an award made pursuant to a reference to arbitration on the order of a court of record; every agreement so to be bound made by one party shall be forwarded to the Registrar, who shall communicate it to the other party, and if the other party agrees in like manner to be bound by the recommendation of the board, then the recommendation shall be made a rule of court on the application of either party and shall be enforceable in like manner." Section 64

of the Act provides that no Court "shall have power or jurisdiction to recognize or enforce or to receive in evidence any report of a board..... as against any person or for any purpose except in the case of the prosecution of such person for perjury." The applicants, however, claimed that clause 1 of the agreement, providing for the settlement of disputes by arbitration under the Act, brought the report of the Board within the provisions of Section 62 and entitled them to enforce the recommendations of the Board.

It was held by the Court that a mere agreement to submit matters in dispute to a Board under this Act was not in itself sufficient to bring into play the provisions of Section 62: otherwise all submissions to a board would be enforceable, and Section 64 would be nugatory. Section 62 must necessarily refer to some definite agreement that the recommendations of the Board shall be binding in the same manner as an award made pursuant to a reference to arbitration on the order of a court of record. The word "arbitration," as used in the agreement,

referred merely to the submission of the matters in dispute to investigation by a board under the Act. To hold that the use of this one word was deliberately intended to bring into operation all the provisions of Section 62 was to assume something practically inconceivable. No one deliberately intending that Section 62 should be made applicable could have failed to provide specifically for it. If the parties did not intend, by use of the word "arbitration" to bring Section 62 into operation it should not be given any such sweeping effect because of any technical meaning the word might have.

Other difficulties in the way of the applicants were mentioned. How certain of the recommendations could be "enforced" by a judgment of a court at all might be open to serious question and some question might be raised as to the *locus standi* of the particular applicants who sought to enforce the report on behalf of others who were not themselves before the Court. It was therefore declared that the motion should be dismissed and with costs if demanded.

MINIMUM WAGE LEGISLATION IN CANADA

The Journal of Political Economy for April, 1922, contains an exhaustive article on the Minimum Wage in Canada, prepared by Mrs. Kathleen Derry, of London, Ont., and Mr. Paul H. Douglas, of the University of Chicago. The article has been reprinted in pamphlet form and the Department has obtained a limited number of copies which are available for distribution. It is interesting to note that Mrs. Derry, who is an authority on Canadian labour questions, was a member of the Canadian delegation at the International Labour Conference held at Washington in 1919, and also a delegate to the International Congress of Working Women held at Washington in the same year.

The authors preface their study by a brief inquiry into the reasons of the

rapid spread of minimum wage laws in Canada as compared with the United States. Among these reasons they note the support given to the movement by organized labour in this country while American labour officials were either hostile or apathetic. In the United States, moreover, such legislation is said to be hampered to some extent by the rigidity of the constitution and by the greater centralization of industrial power. The minimum wage is now firmly established in five Canadian provinces, namely Alberta, British Columbia, Manitoba, Ontario and Saskatchewan, and is likely to be put into effect before long in Nova Scotia and Quebec. The legislatures of these latter provinces have already enacted minimum wage laws.

The special characteristics of Canadian minimum wage legislation are found by the authors to be contained in the following points: (1) The minimum scales are fixed with reference to the necessary cost of living rather than to the capacity of the industry to pay; (2) Minimum wages are confined to female workers and minors, the only exceptions to this rule being the minimum wage provisions of the Alberta Factories Act, now abrogated, and the special provisions of minimum wages for coal miners under an amendment to the British Columbia Coal Mines Regulation Act; (3) While some Canadian laws make no provision for minimum hours, experience shows that it is impossible permanently to consider wages apart from hours; (4) Advisory boards or conferences play a less important part in Canada than in the United States; (5) Provision is commonly made under Canadian laws for variations of scale in relation not only to particular industries, but to particular localities; (6) A growing tendency is noticeable, especially in the west towards a common level in the wages scales fixed by different provinces; (7) Experience shows that the minimum wage, as fixed by law, has not so far shown any tendency to become the maximum wage of the class of workers concerned, but the wages of the lower paid workers have shown some advance.

The pamphlet concludes with the recommendation that the powers of the boards in Ontario and Quebec be extended to include hours of work as well as wages, and that further efforts should be made in all provinces to force employers to stabilize production and employment, suggesting a penalty differential wage for short time as an effective check on employers who show a bad record in regard to unemployed workers. "Manitoba and British Columbia," the authors state, "have at least pointed the way along which future progress should proceed."

In explanation, the authors note that while the early attempts of British Columbia to enforce weekly minimums, rather than hourly rates, was checked by legal opinion, Manitoba has, in the main, carried out such a system and has thus fully protected the employee from the losses incident to irregular employment during the week. British Columbia has, in its regulation of amusement places, provided higher hourly rates for those employed less than thirty-six hours a week than for those employed more.

The pamphlet contains some interesting tables showing at a glance the principal provisions of the various provincial laws, and an analysis of the regulations issued up to the early months of the current year.

RECENT LABOUR LEGISLATION IN MANITOBA

THE second session of the sixteenth legislature of Manitoba opened on January 12 and continued until April 6, 1922. Some measures of labour interest were enacted. In March the Committee of Supply of the Legislature, cut down the yearly appropriation for the Manitoba Joint Council of Industry to one dollar, but later in the session, on the representation of the Government that the Council had done and would continue doing good work in preserving industrial peace in the Province, this appropriation was restored, less a reduc-

tion of \$1000 in the salary of the chairman.

Several measures were enacted to relieve the condition of distress prevailing in certain agricultural districts and in the cities and towns of the Province. Municipal Councils were given powers to borrow limited amounts of money for seed grain and fodder purposes. Another act enabled Councils to authorize their officials, when receiving during 1922 any sums in payment of taxes for previous years, to remit the penalty incur-

red under the Assessment Act by persons in arrears. Special facilities were created for the relief of returned soldiers, their dependents, widows or orphan children, of the burden of unpaid taxes, the municipality being empowered, on proof of the good faith of the applicants, to exempt such persons from taxes, or to cancel the arrears of taxes previously due, up to a maximum amount of \$75. Soldiers in receipt of military pensions, however, are only entitled to receive exemption of a proportion of this amount equal to the ratio of their disability to total disability. If a municipal council should be in doubt regarding the merits of an applicant the matter may be referred to a county court judge for decision. An amendment to the Distress Act exempted from seizure under a landlord's warrant of distress a number of essential articles, including bedding, apparel, stove or other domestic implements, provisions for 30 days, tools and other necessities up to the value of \$300. Another measure for the benefit of war veterans was an act enabling a municipal council holding any money borrowed from the Province under the Housing Act to make advances at any time to any totally disabled veteran, his wife, or widow, for the purpose of erecting a home, up to the full value of the land

and building. The Winnipeg Charter of 1918 was amended to enable the city to issue housing loans to residents, and as a security to take out mortgages on the land on which houses are erected.

The Welfare of Children Act co-ordinated existing welfare organizations in order to avoid overlapping in their spheres of work. The act of 1915, establishing a Provincial Bureau of Labour as a branch of the Department of Public Works, was amended so as to permit the Bureau to be attached "to such other department as the Lieutenant Governor in Council may determine."

An act was passed ratifying the two agreements entered into at Ottawa, on November 12, 1920, and on September 7, 1921, respectively, between the Government of the Dominion and the Governments of Manitoba and Saskatchewan, advancing money for the purposes of the Lignite Utilization Board. Under the earlier of these agreements the Dominion Government agreed to contribute \$140,000 and the two Provincial Governments \$70,000 each for the balance of the development expenses and capital cost of the organization. The second agreement provided for a further advance by the Dominion of \$140,000, and by the two Provinces of \$35,000 each.

RECENT DEVELOPMENTS IN VOCATIONAL EDUCATION IN CANADA

DURING the fiscal year ended March 31, 1922, the Dominion Government expended \$710,276 for the purpose of assisting the provinces to develop their programmes of vocational education. This represents an increase of 22.5 per cent over the expenditures for the previous year, but fails to indicate the growth of the work throughout the Dominion.

Under the provisions of the Technical Education Act, grants are paid by the Dominion Government to the provinces for the purpose of promoting vocational education of secondary grade, that is,

training which fits for useful employment in the trades, commercial occupations and homemaking. Under this Act the Dominion Government, through the Department of Labour, undertakes to bear a half share of expenditures entailed by the provincial governments, on work which comes within the provisions of annual agreements between the Minister of Labour and the Premier or Minister of Education for each province. Not all of the provincial expenditures are taken into account when paying grants, and no account is taken of the additional expenditures made by the local communities in which the work is carried on.

No grants are paid for agricultural education, assistance for such purposes being received from the federal Department of Agriculture under the terms of the Agricultural Instruction Act, which provides \$1,100,000 per year to be allocated to and spent by the provinces in developing educational work of value to farmers. The amounts mentioned here are exclusive of money expended on agricultural work.

In Prince Edward Island the federal grants received during the year amounted to \$7,141, or nearly three times the amount for the previous year. These grants constituted one-third of the provincial expenditures in connection with the Charlottetown Agricultural and Technical High School which has been in operation since December, 1920. The rapid growth of this school augurs well for the future of vocational education in the province.

Nova Scotia received grants amounting to \$32,558, representing an increase of 35 per cent over the previous year. The work in this province has been established for a number of years, but due to the assistance received from the federal government it has made rapid progress during the past two years. The outstanding development during the past year was the organization of a Provincial Department of Correspondence Instruction, connected with the office of the Director of Technical Education. During the first two months of operation over 100 students were enrolled from different parts of the province, and many requests for enrolment were received from people in other provinces. Various courses in general education, homemaking, commercial subjects and industrial work have been prepared and are distributed from Halifax. New courses are being developed to meet the special requirements of the students, and this department is sure to grow at an increasing rate until it covers the whole province with a variety of courses suited to the needs of all classes of students who cannot attend the established schools or for whom no such classes have been provided.

Progress in New Brunswick has been somewhat retarded owing to local difficulties in one or two localities, but the policy of basing developments on the information disclosed by comprehensive surveys of local conditions and needs has been adopted and the future of the work is assured. Despite these temporary setbacks, the federal grants for the year, amounting to \$22,160, were more than twice those of the previous year. The new composite school being constructed at Edmundston at a cost of \$175,000 is the first of its type in the province, but it is expected that others will be built in the near future. This school will accommodate both elementary and secondary grades in academic and vocational work and provide manual training for boys and domestic science for girls who do not take the regular vocational work.

The province of Quebec has carried on without a director of Technical Education during the year but the work has continued to grow. The new boys' technical school in Hull is nearing completion and should be occupied this coming fall. Expenditures from the federal grant amounted to \$114,651, being approximately the same as for the previous year.

In Ontario the work has continued to grow at a very rapid rate despite the fact that for the past two years the province has spent more than sufficient to use up the whole of the money available under the provisions of the federal Technical Education Act. The money paid to the province during the past year amounted to \$378,174 but the total provincial expenditures which might have been shared by the federal government on an equal basis amounted to over \$800,000, an increase of 27 per cent over the previous year. In Ontario all new developments are based on surveys made by provincial experts, showing the exact educational needs of the locality. A new technical school has been built at Sault Ste. Marie. A composite high school, costing approximately \$700,000, which will accommodate both academic and vo-

cational work, is nearing completion at Sarnia. A technical school to cost approximately \$800,000 is being built in Windsor. A new branch school to cost about \$500,000 is to be built in Toronto. An extensive addition to the Hamilton Technical and Art School is in course of construction. Plans are under way for new buildings and additions in several other centres, and the students desiring to enroll are still greatly in excess of the available accommodation in many places.

Manitoba being essentially an agricultural province has not yet developed an extensive programme of vocational education, but manual training, domestic science and prevocational work are being developed in connection with the established school systems, and the work is rapidly spreading throughout the province. The growth during the year is indicated by the increase of 180 per cent in grants received from the federal government which amounted to \$21,174.

Conditions in Saskatchewan are similar to those of Manitoba, but the province has not yet appointed a director to organize and supervise the work. Legislation has been enacted making provision for the development of vocational work, and a good start in commercial work has been made in five centres. Grants from the federal government last year amounted to \$13,665, an increase of approximately 300 per cent over the previous year.

The work in Alberta is further advanced than in the other prairie provinces, and for the past two years all available money from the federal grants has been used up. Last year these grants amounted to \$82,606, but the provincial government expended a total of \$761,891, which does not include expenditures during the period January to March, 1922, amounting to \$112,690. The greater part of these expenditures was in connection with the new Institute of Technology which is nearing completion in Calgary. This provincial institution will be the distributing centre for vocational education throughout the province. Correspondence courses and short term intensive courses are the special features being developed to meet the needs of the scattered population. This

work has been conducted in temporary quarters formerly occupied by the Department of Soldiers' Civil Re-establishment, and has already spread over the greater part of the province.

The growth of the work in British Columbia is indicated by the increase of 27 per cent in federal grants, which grants amounted to \$37,944.

The new schools opened the previous year in Victoria, Vancouver and New Westminster have grown rapidly, and the correspondence work and evening class work throughout the province has been steadily increasing. Special attention has been paid to the development of commercial work, although a good foundation is being laid for industrial training, the immediate need for which is principally in the lumbering, fishing and mining industries.

There has been a very marked development in evening class-work in every province and considerable difficulty has been experienced in securing competent teachers to undertake this work. There are not sufficient trained teachers to properly staff the existing day schools, and the work is suffering from lack of adequate training facilities for teachers. Efforts to establish a central training institution for Canada have been unsuccessful and the provinces have not yet organized permanent schools for training teachers specially for this work. Summer schools are being conducted in New Brunswick, Ontario, Manitoba and British Columbia, but these do not provide sufficient instruction for those teachers now employed in the schools and make no provision for those who wish to take up the work. Despite this great handicap, however, the work is being developed along sound practical lines and the federal assistance rendered the provinces has made it possible to provide useful training for many who for various reasons are unable to secure university education or who have failed to obtain sufficient general education to fit themselves for promotion in their chosen work. The demand for this type of education far exceeds the supply, and much remains to be done both in improvement and extension before the demand can be satisfied.

LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA

Reports by Dominion Bureau of Statistics on (a) Leather Boot and Shoe Industry, 1920; (b) Flour Milling Industry, 1920; (c) Baking Industry, 1920; (d) Hosiery and Knit Goods Industry, 1920.

THE Dominion Bureau of Statistics has recently issued preliminary reports for the calendar year 1920 on the leather, boot and shoe industry; the flour milling industry; the baking industry, and the hosiery and knit goods

industry. Previous reports in this series relating to other industries have been outlined in the April issue of the LABOUR GAZETTE and in various other issues.

The Leather Boot and Shoe Industry during 1920

A report on the leather boot and shoe industry of Canada for 1920 issued by the Dominion Bureau of statistics contains statistics of 173 factories, of which 93 were in Quebec, 66 in Ontario,

5 each in British Columbia and New Brunswick, and 4 in Nova Scotia.

The following table gives the principal statistics for Canada and the provinces:

Provinces	Factories	Capital	Employees	Salaries and wages	Cost of materials	Value of products
	No.	\$	No.	\$	\$	\$
Nova Scotia.....	4	1,244,938	200	149,913	525,161	818,517
New Brunswick.....	5	1,402,498	496	493,844	1,787,637	2,774,475
Quebec.....	93	20,547,535	7,735	8,701,278	25,952,470	42,816,953
Ontario.....	66	10,806,200	4,664	4,689,647	11,567,513	19,739,326
British Columbia.....	5	345,795	185	170,588	458,814	667,903
CANADA.....	173	34,347,026	13,230	14,205,270	40,291,595	66,817,174

Comparative statistics for the years 1919 and 1920 are given in the accompanying table:

Items	1920	1919
Factories reporting.....No.	173	161
Capital invested.....\$	34,347,026	38,680,581
Salaried employees—		
Male.....No.	1,176	1,437
Female.....No.	415	394
Salaries paid.....\$	3,194,620	2,927,037
Wage earners—		
Male.....No.	7,188	8,318
Female.....No.	4,451	5,192
Wages paid.....\$	11,010,650	10,323,707
Cost of materials.....\$	40,291,595	40,523,696
Value of products.....\$	66,817,174	63,319,128

The number of employees in 1920 with their salaries and wages is shown in the following tables:

Provinces	Employees on salaries			Employees on wages		
	Male	Female	Salaries	Male	Female	Wages
	No.	No.	\$	No.	No.	\$
Nova Scotia.....	22	1	38,800	127	50	111,113
New Brunswick.....	44	19	121,331	311	122	372,513
Quebec.....	645	185	1,861,077	4,242	2,660	6,840,203
Ontario.....	459	207	1,166,027	2,407	1,591	3,523,620
British Columbia.....	3	3	7,385	101	28	163,293
CANADA.....	1,176	415	3,194,620	7,188	4,451	11,010,650

Classes of employment	Number of employees		Salaries and wages
	Male	Female	
Superintendents and managers.....	451	34	\$ 1,585,140
Clerks, typists, etc.....	725	381	1,600,480
Wage earners, average No.	7,129	3,916	10,889,233
Outside piece-workers.....	59	535	121,417
Totals.....	8,364	4,866	\$14,205,270

The average number of days worked per factory during 1920 was 244.1. The average number of days worked on part time was 30, and the average number of days a factory was idle was 29.9. The average number of hours worked per

day was 9, and the average number of hours per week was 51.1.

A classification of the average number of wage earners on the pay-rolls of the companies reporting, according to their weekly wages is given below:

Groups of weekly wages	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
Under \$5 per week	154	2	36	47	498
\$5 but under \$10	615	1,0	84	151	1,945
\$10 but under \$15	1,133	1,2	33	36	2,425
\$15 but under \$20	1,162	6	7	5	1,788
\$20 but under \$24	1,018	2	9	2	1,244
\$24 but under \$28	1,003		3		1,066
\$28 but under \$30	299				301
\$30 and over....	1,316	7	1		1,329
Totals.....	6,700	3,4	173	241	10,506

The Flour Milling Industry during 1920

The report of the Dominion Bureau of Statistics on the flour milling industry of Canada during 1920 covers the operations of 1,332 individual plants, of which 617 were situated in

Ontario and 457 in Quebec. The following table contains the principal statistics of the industry by provinces for the calendar year 1920:

Provinces	No. of mills reporting	Capital	Em- ployees	Salaries and wages	Cost of materials	Value of products
	No.	\$	No.	\$	\$	\$
Nova Scotia	32	247,751	44	37,846	555,307	692,898
Prince Edward Island	24	184,294	29	15,571	442,898	577,043
New Brunswick	50	517,515	83	79,636	1,361,559	1,674,091
Quebec	457	12,416,887	1,074	1,315,360	29,114,147	34,090,774
Ontario	617	35,083,288	3,817	4,453,498	115,911,508	135,055,616
Manitoba	44	7,252,366	724	903,793	23,834,742	27,235,314
Saskatchewan	45	4,394,904	620	807,800	14,962,761	17,053,491
Alberta	58	6,826,608	553	763,197	17,862,802	20,863,880
British Columbia	5	2,005,369	141	194,803	1,700,822	2,012,554
CANADA.....	1,332	68,838,927	7,085	8,571,504	205,746,546	239,255,461

Compared with 1919, the total number of persons engaged in the industry showed a decrease of 316, but salary and wage payments showed an increase for the year amounting to \$488,234.

The following table shows the number of employees of different classes, their sex and aggregate salaries and wages:

Classes of employees	Number of employees		Salaries and wages
	Male	Female	
Superintendents and managers.....	403	7	\$1,255,842
Clerks, typists, etc.....	822	304	1,462,322
Wage earners, average No.	5,373	176	5,553,340
Totals.....	6,598	487	\$8,571,504

The number of employees classified by sex according to their weekly wage earnings as at December 15, 1920, is shown below:

Groups of weekly wages	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
Under \$5 per week	3		1		4
\$5 but under \$10	61	8	3		72
\$10 but under \$15	537	98	7		642
\$15 but under \$20	1,112	28			1,140
\$20 but under \$24	916	16			932
\$24 but under \$28	1,775	4			5,714
\$28 but under \$30	326				326
\$30 and over....	819				819
Totals.....	5,549	154	11		5,714

The total days the 1,332 mills were in operation during the year was 261,278, an average of 196.15 days per mill. The

average hours worked per day were 9.41 and the average hours per week were 56.22.

The Baking Industry in Canada during 1920

The report of the Dominion Bureau of Statistics on the baking industry in Canada during 1920 is confined to establishments producing bread and other baking products, but excluding biscuit and confectionery factories. The number of individual plants reporting during

the year was 1,769, of which 737 were in Ontario, 599 in the province of Quebec and 118 in British Columbia.

The principal statistics of the industry for the year are shown in the following table:

Provinces	No. of plants	Capital	Em- ployees	Salaries and wages	Cost of materials	Value of products
Nova Scotia	41	\$ 616,253	272	\$ 249,167	\$ 909,524	\$ 1,366,228
Prince Edward Island	6	7,000	11	6,850	37,321	68,385
New Brunswick	29	219,966	150	115,226	556,798	840,235
Quebec	599	7,968,943	3,019	3,189,874	11,459,101	18,196,283
Ontario	737	10,066,473	4,657	5,473,125	18,624,873	28,900,821
Manitoba	67	1,557,438	613	794,283	1,541,728	3,972,503
Saskatchewan	86	941,751	323	370,563	1,212,957	1,945,272
Alberta	86	823,645	338	450,740	1,426,072	2,402,181
British Columbia	118	1,421,175	657	872,623	2,470,761	4,118,725
CANADA	1,769	23,612,654	9,940	11,522,456	38,239,135	61,800,633

As compared with 1919 there was an increase of \$9,387,833 or about 17.91 per cent in the value of the products, and an increase of \$1,054,561 in the capital invested.

The following table shows the number of employees of different classes by sex and the amount paid in salaries and wages.

Classes of employment	Number of employees		Salaries and wages
	Male	Female	
Sup.rintendents and man- agers	337	26	\$ 849,437
Clrks, typists, etc.	502	305	892,738
Wage earners, average No. Outside piece-workers	7,616	1,053	9,752,213
	80	21	28,065
Totals	8,535	1,405	11,522,456

The following table presents the number of employees by sex classified according to their weekly earnings as on December 15:

Groups of weekly wages	Over 16 years		Under 16 years		Total em- ployees
	Male	Female	Male	Female	
Under \$5 per week	48	44	52	13	157
\$5 but under \$10	290	290	68	21	669
\$10 but under \$15	612	430	24	15	1,081
\$15 but under \$20	953	238	9	5	1,205
\$20 but under \$24	1,339	43	2		1,384
\$24 but under \$28	1,712	13	27	3	1,755
\$28 but under \$30	554	5			559
\$30 and over	2,239	22	7		2,268
Totals	7,747	1,085	189	57	9,078

Each plant was in operation on an average about 285 days on full time, 6 or 7 days on part time, and on an average of 21 days the plants were idle.

The Hosiery and Knit Goods Industry in Canada during 1920.

An advance report on the Hosiery and Knit Goods Industry in Canada for the year 1920 has been issued by the Dominion Bureau of Statistics. The number of individual plants covered by the report was 127 as compared with 114 in

1919. Of the 127 plants, 90 were in the province of Ontario, and 22 in the province of Quebec.

The principal statistics of the industry for the year are shown in the following table:

Provinces	No. of plants	Capital	Em- ployees	Salaries and wages	Cost of materials	Value of products
	No.	\$	No.	\$	\$	\$
New Brunswick and Nova Scotia.....	4	3,153,092	760	556,069	1,443,859	3,005,586
Quebec	22	6,461,391	2,216	1,699,569	5,509,011	9,110,506
Ontario	90	30,441,449	10,724	7,768,009	24,050,872	39,917,878
Manitoba	3	393,266	146	190,687	477,850	793,031
Saskatchewan and Alberta.....	4	69,731	40	25,095	41,439	81,829
British Columbia	4	377,490	176	156,076	238,505	623,875
CANADA.....	127	40,896,419	14,062	10,395,525	31,761,536	53,532,705

In comparison with the capital invested in the industry in 1919, there was an increase of \$500,679 in the item of land, building and fixtures; of \$2,196,927 in machinery and tools; of \$1,420,755 in materials and stocks on hand, and in cash trading and operating accounts of \$2,628,465, the total capital showing an increase of \$6,746,826.

The following table shows the number of employees of different classes by sex and the amount paid in salaries and wages:

Classes of employees	Number of employees		Salaries and wages
	Male	Female	
Superintendents and managers	296	13	\$ 1,040,670
Clerks, typists, etc.....	325	300	830,057
Wage earners, average No.	3,674	8,589	8,433,186
Outside piece-workers.....	4	858	91,612
Totals.....	4,302	9,760	\$10,395,525

The following table presents the number of employees by sex classified according to their weekly earnings as on December 15:

Groups of weekly wages	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
Under \$5 per week	9	107	4	14	134
\$5 but under \$10	150	1,506	69	248	1,973
\$10 but under \$15	492	3,819	73	155	4,539
\$15 but under \$20	805	1,884	18	26	2,733
\$20 but under \$24	578	345	1	2	926
\$24 but under \$28	464	63	527
\$28 but under \$30	115	14	129
\$30 and over....	494	10	504
Totals.....	3,107	7,748	165	445	11,465

Each plant was in operation on an average about 274 days on full time, and 11 days on part time with about 19 days of idleness. The average hours per day worked was 8.78.

REPORTS OF SAFETY ORGANIZATIONS

THE third annual report of the Canadian Safety League and the eighth annual report of the Ontario Safety League are contained in a bulletin recently received by the Department. The Canadian league during the year 1921 distributed many thousands of safety bulletins throughout the various provinces, except Ontario and in the Yukon. It includes in its membership the cities of Calgary, Edmonton, Granby, Halifax, Montreal, Quebec, Regina, Shawinigan Falls, St. Jerome, St. John, Sydney, Three Rivers, Vancouver, Winnipeg, the Ontario Safety League (although an older organization), the Manitoba Safety League, established in 1920, and the Shawinigan Falls Safety League. The re-

port commends the energetic work of the Shawinigan Falls Safety League, which, it states, might well serve as a model for similar local safety organizations and may lead to the formation of a Quebec Safety League. The work in Ontario is undertaken by the Ontario Safety League. Safety literature was sent to the provincial cabinet, members of the legislature, Trades and Labour Councils, Canadian Clubs, Empire Clubs, Rotary Clubs, Kiwanis Clubs, and others and also to mayors, school boards, magistrates, police and fire chiefs, public libraries, and the board of trade and Chambers of Commerce in various cities. Bulletins dealing with industrial hazards were issued each fortnight to hundreds

of industries throughout the province. A Safe Drivers' Club was formed during the year and the safety patrol work of the Schools was extended to a number of additional schools. The report contains a leaflet describing the prone pressure method of resuscitation from drowning. Copies of the leaflet may be had on application to the Ontario Safety League at 189 Church Street, Toronto.

Mr. J. F. H. Wyse holds the dual positions of general manager of the Ontario league and organizer and engineer of the Canadian league.

Joint Safety Convention

"To prevent accidents is vastly better than to compensate them", was the motto of a joint safety convention held at Toronto on April 4 and 5, under the auspices of the Canadian Manufacturers' Association, the Ontario Department of Labour, the Ontario Workmen's Compensation Board, Ontario Safety League, Ontario Pulp and Paper Makers' Safety Association, Electrical Employers' Association, Lumbermen's Safety Association, and Industrial Accident Prevention Associations.

Dr. P. E. Doolittle, vice-president of the Ontario Safety League, in opening the general discussion laid special emphasis on the laws of immigration, stating that it was easier to prevent accidents where English-speaking people were employed. Mr. S. Price, chairman of the Ontario Workmen's Compensation Board stated that the Board was sending out 500 compensation cheques daily, that the daily benefits averaged \$21,000 last year and totalled \$6,189,000, and during the seven years of administration \$28,000,000 had been paid for benefits. Among 450,000 workmen employed in 1921 there were 45,191 accidents, and the average compensation was \$185. Less than one-third of these accidents had occurred from machinery, over 10,000 had resulted from the handling of objects and materials, while falls had contributed to nearly 4,000. The serious consequences of infection were

pointed out; in packing-house cases, 25 per cent of the injuries resulted in blood poisoning. The prevalence of accidents among new employees, Mr. Price said, had shown education to be a prime factor in reducing accidents, and he suggested that employers and foremen should be patient in instructing new employees and should see that they were familiar with their surroundings. The state of mind and attitude of the workers, foremen and superintendents, he claimed, had a definite bearing on the accident hazards, and he emphasized the importance of proper surroundings and physical conditions, efficient organization and orderly arrangement of factories, and provision for first-aid treatment and appliances for resuscitation from shock. Miss Muriel Mackay, the chairman of the sub-committee on Industrial Nursing of the public health section, Canadian National Association of Trained Nurses, said that five of the Canadian universities, including Toronto, provided special courses for women wishing to be industrial nurses. The industrial nurse dealt with conditions in the places of employment and visited the homes of the workers to promote better health in the home surroundings. Her duties required co-operation with the executive management, the foremen on the works and with the workers themselves. Dr. Starr, professor of surgery at Toronto University, said that in industrial work the greatest number of injuries occurred to the arms and legs, and the seriousness of injury to tendon and bone was not sufficiently known to ordinary members of the profession. He advocated a post-graduate training for those specializing in industrial surgery, and suggested that manufacturers combine to provide scholarships for this purpose. A director of surgical research for the province in connection with the Compensation Board would, he thought, act with advantage as counsel in cases which under present conditions were universally too long in convalescing. Mr. J. R. Shaw, vice-president of the Canadian Manufacturers' Association, thought that

increased compensation rates was the cause of increased accidents in 1919 and 1920. He was in favour of increasing compensation to 75 per cent, provided the workmen would contribute 20 per cent of the rates charged. He also thought that compensation should be extended to the agricultural classes. The insurance companies, he said, defined agricultural labour as an extra hazardous risk. Mr. William Varley, of the Trades and Labour Congress, thought the increase in accidents in 1919 and 1920 was due to returned men being re-

established industrially. He pointed out the dangers of elevators in public buildings, hotels and industrial plants. In the last 18 months, he said, these had been responsible for 12 deaths, 110 serious injuries and 125 persons slightly injured. In Philadelphia where an interlocking system was compulsory there had been no deaths reported. The Chief of the Toronto police force stated that of the 826 members of the Toronto police force, 820 had passed examinations qualifying them in first-aid for accident cases.

MEETING OF THE CANADIAN COUNCIL OF IMMIGRATION OF WOMEN

THE Canadian Council of Immigration of Women convened at Ottawa on March 22 to 24 under the presidency of Mrs. Agnes Dennis of Halifax. The provinces of Ontario, Quebec, Manitoba, Saskatchewan, British Columbia and Nova Scotia were represented, and also fourteen national organizations, including the Trades and Labour Congress of Canada.

The Honourable Charles Stewart, Minister of the Interior outlined a plan which he stated was under consideration in the event of the federal government handing over the natural resources to the provinces, when immigration would become more of a provincial question. The plan entailed the appointing by each provincial government of two special immigration officers, one man and one woman, who would be called together at frequent periods in a Dominion Conference.

Reports from hostels showed much good work accomplished in caring for the women immigrants. In the West the time for domestic workers to stay at the hostels free of charge had been extended from twenty-four to forty-eight hours. The hostels also reported much follow up work among the girls passing through their hands. Halifax reported that two women were now in attendance at the

port upon arrival of boats to assist women immigrants, and that a nursery had been organized in connection with the Red Cross for the care of children.

Objections were raised to certain agencies or bodies bringing into the country as domestics girls unfitted and untrained for domestic work, about 70 per cent of whom, it was stated, eventually drift into the factories. Referring to the recommendation of the International Labour Conference at Geneva for the formation of a Women's Department of Immigration, it was stated that Canada, Australia and Denmark had carried out this recommendation.

Among the resolutions adopted was one dealing with the future of the Council in which it was pointed out that a system of hostels had been established, that a Women's Division of the Department of Immigration has been inaugurated and was in active operation, that the work at the ports has been uniformly and thoroughly developed, and "whereas the system of follow-up work in connection with the hostels has been decentralized and taken over by the provincial agencies; and, whereas the Minister has declared his intention of asking the provincial government to appoint men and women to consult concerning immigration with the federal

The report states that the output during 1921 of structural materials, such as cement, lime, building stone, sand and gravel, brick and other clay products, was less than in the preceding year, being \$1,903,799 as against \$2,176,460.

With the exception of the year 1920 the net coal output for 1921 was larger than any other year since 1912, or than any previous year except 1910.

The aggregate value of the colliery products in 1921 was \$12,836,013 which nearly equalled the year's metalliferous products of \$13,153,598. The following table shows the number of men employed in the collieries of the province during the year:

	Under-ground	Above ground	Total
White men:—			
Supervisors and clerks	256	172	428
Miners	2,250	2,250
Helpers	120	120
Labourers	1,108	762	1,871
Mechanics and skilled	441	680	1,121
Boys	114	139	253
Indians:—			
Labourers	3	3
Japanese and Chinese			
Miners	160	160
Labourers	270	402	679
Total men employed	4,722	2,163	6,885

The number of tons mined per under-ground employee was 544 as compared with 643 in the previous year. Mining machines produced 132,864 tons of coal, or 5.16 per cent of the whole, while in 1920 the percentage of machine-mined coal was 5.51.

The fatalities in and around the coal mines during the year totalled ten; six were due to falls of rock and four to mine cars and haulage. The ratio of accidents per 1,000 persons employed was 1.45 as compared with a ratio of 2.67 in 1920 and of 4.81 for the last ten years. In 1920 there were 17 fatal accidents. The number of tons of coal mined for each fatal accident during 1921 was 256,963 tons as compared with 158,633 tons in 1920. There were no explosions and no serious mine fires in 1921, and it is stated that instruction in mine rescue work was actively and effectively maintained at the different rescue stations during the year and that up to the present time 499 men have qualified and secured certificates from the Mines Department for this work.

There were three fatalities in the metalliferous mines of the province in 1921. Two of these were due to falling ground and one to mine cars and haulage. There were 2,099 persons employed in and around metalliferous mines, a decrease of 1,242 compared with the previous year when five fatalities occurred. The ratio of fatal accidents per 1,000 persons employed was 1.43 as against 1.54 in 1920. The ratio for the last ten-year period was 2.89. It is stated that for four years in succession there have been no fatal accidents from explosions of powder. The output of ore from the metalliferous mines during 1921 was 1,562,645 tons compared with 2,178,187 tons in 1920. The number of tons of ore mined for each fatality in 1921 was 520,881 tons, compared with 435,637 tons in 1920, an increase of 85,244 tons.

BRITISH UNEMPLOYMENT INSURANCE ACT, 1922

IN the April issue of the LABOUR GAZETTE on page 423 a summary is given of the British unemployment insurance laws which were enacted in 1921. On April 12 the Unemployment Insurance Act, 1922, became law, its provisions dating back to April 6. The new Act amalgamates the rates of contribution

and the rates of benefit under the Unemployment Insurance Acts, 1920 and 1921, and the Unemployed Workers' Dependants (Temporary Provision) Act, 1921; and makes emergency provision for the payment of unemployment benefit until the end of June, 1923.

The weekly rates of contribution as amalgamated under the new Act are (a) for men, 9d. from the employee and 10d. from the employer; (b) for women, 7d. from the employee and 8d. from the employer, (c) for boys, 4½d. from the employee and 5d. from the employer, (d) for girls, 4d. from the employee and 4½d. from the employer. The State contributes 6¾d. for men, 5¼d. for women, 3⅞d. for boys and 3⅝d. for girls. The rates of benefit which were in operation under the previous Acts are continued, the new combined benefit beginning from April 17 for persons who have exhausted their previous benefit. From April until the end of October next fifteen weeks' benefit is to be allowed, which, in the case of "uncovenanted" benefit (*i. e.* benefit not dependent on the number of contributions paid), is to be distributed in periods each amounting in the aggregate to five weeks, with an interval of five weeks between the periods of benefit. From November next to the end of June, 1923, twelve weeks' benefit is to be allowed, with discretionary power, under certain conditions, to give two further extensions of five weeks each. The uncovenanted benefit will be

granted, subject to those statutory conditions and disqualifications which do not depend on the payment of contributions, if it appears to the Minister that, having regard to all the circumstances of the case, it is expedient in the public interest that a person should be allowed to receive it. The applicant must, however, prove (a) that he is normally in insurable employment; (b) that he is genuinely seeking, but unable to obtain, whole-time employment; and (c) either that not less than twenty contributions have been paid in respect of him, or that he has since the end of 1919 been employed for a reasonable length of time in employment which is now insurable. In the case of ex-Service men who are so employed, or who were too young to be so employed, before becoming engaged in war service, this last requirement does not apply. The rights of persons whose qualification for benefit is derived from the payment of the number of contributions required under the permanent provisions of the Acts are not affected. The power of borrowing from the Treasury is increased from £20,000,000 to £30,000,000.

UNEMPLOYMENT INSURANCE PLANS IN THE UNITED STATES

SEVERAL types of unemployment insurance are now in existence in the United States, where they have been devised and instituted by industrial organizations for the benefit of their workers. Two of these plans are described in the following article, which is based on information given in recent issues of the *American Labour Legislation Review*.

A plan for preventing and compensating unemployment has been in effect in the ladies' garment industry at Cleveland, Ohio, during the past few months. According to Mr. William J. Mack, the "Impartial Chairman" of the industry, "while practically every other centre is in the midst of a bitter fight, the manufacturers and the Union in Cleveland

are working out jointly and harmoniously various phases of this experiment, which our experience has convinced us is fundamentally sound, progressive and constructive." Under this plan, which is known as the "Cleveland plan," each manufacturer guarantees to his regular workers twenty weeks of work during each half year, the workers bearing the burden of the other six weeks. (The agreement for 1922 provides a guarantee of forty-one weeks for the whole year instead of twenty weeks each half year). For the "unemployed" portion of the guaranteed weeks the manufacturer must pay his employees at the rate of two-thirds of their respective minimum wages, with, however, the following limi-

tation, that no manufacturer is liable to his employees for more than $7\frac{1}{2}$ per cent of his total direct labour pay-roll for the six-months' period. Each employer is required to deposit with the Impartial Chairman each week an amount equal to $7\frac{1}{2}$ per cent of his total direct labour pay-roll, together with an employment report of his regular workers, showing the time they are laid off and the time they absent themselves voluntarily. The fund of each manufacturer is kept separate, and at the end of the period of six months each receives back what remains of his fund after all payments have been made for unemployment. Notwithstanding trade depression many manufacturers received back a substantial part, and some received back all of their unemployment funds. Workers who are in receipt of unemployment pay are not forbidden to engage in outside work. At the request of the manufacturers standards of production are fixed in relation to wages. What constitutes a fair rate of production is determined by industrial engineers under the supervision of the Impartial Chairman. A new feature in connection with these standards is that they are installed under the supervision of the Union and the Manufacturers' Association, and that the industrial engineers who fix them are selected and paid jointly by both parties. The standards are based upon the time of the average worker. Those workers who reach the standard of production are allowed 10 per cent above the minimum scale of their class, and others receive more or less, but none receive less than the minimum scale. The arrangement thus provides a guarantee of production on the part of the workers, and the workers in their turn are relieved of the burden of uncertain employment.

Another plan for insuring workers against unemployment was described in the issue of the *American Labour Legislation Review* for March 1921. This plan was at that time in operation in two plants in New York state and in three in the southern states. The New York

plants were the Rockland Finishing Company, Inc., at West Haverstraw and the Dutchess Bleachery, Inc., at Wappingers Falls. The unemployment funds of these companies forms an integral part of their whole plan of industrial management. Control is vested in three boards; a Board of Operatives, a Board of Management, and a Board of Directors. The Board of Operatives is elected annually by secret ballot of all employees, and controls all matters which directly concern the workers, including unemployment insurance funds, sick benefits, savings, education and recreation. This Board also takes charge, through a sub-committee, of the housing of employees, fixing rentals, making repairs, and generally managing the mill village. The Board of Management, composed of three members appointed by the Board of Operatives and three appointed by the company, settles all questions of mill management. To it controversies concerning hours, wages, conditions of employment and discharge and such disputes are referred. The Board of Directors reserves those powers not delegated to the other boards, their control extending over financial and other matters beyond the experience of the operatives. The workers, however, are represented on this Board by one member who is elected by the Board of Operatives. Three of the four other members represent the company, and one represents the public, or local community.

The Unemployment Fund forms part of the sinking funds which are organized under this plan. Two sinking funds are set up, designed to steady the "wages" both of capital and of labour. The sinking fund for capital consists of 15 per cent of the earnings over and above capital's "wage" of 6 per cent, and is intended to make up the deficit below 6 per cent in the earnings of lean years. The second sinking fund is called the Unemployment Guarantee Fund, and also consists of 15 per cent of the net earnings remaining after the payment of the "wages" of capital and labour.

Workers on a weekly or hourly basis of wage receive half their normal pay out of the fund during periods of unemployment. The regulations under which this fund is administered are made entirely by the Board of Operatives. The regulations in force at the Dutchess Bleachery provide that

In case the plant or any department of the plant is closed temporarily on account of business depression or other cause not within control of the operatives, when the fund amounts to \$50,000 or more, each operative on the regular pay-roll shall receive half pay for all time lost under the 48-hour week, overtime not included. This amount of \$50,000 is understood to bear a ratio to the pay-roll and it will be in order to increase this amount in case of an appreciable increase in the pay-roll.

In case of short time, when the fund amounts to less than \$50,000 each operative on the regular pay-roll shall receive half time for all time lost under 35 hours per week, overtime not included; but in no case shall a person receive less than 24 hours' pay per week, until the fund is used up. All over \$60,000 in the Employees' Sinking Fund at the end of the year to be distributed *pro rata*, as soon as practicable, to all officers and employees of the Company, in accordance with the following rules: (a) any operative dis-

charged for crime or continued neglect of duty shall forfeit the full amount of his or her share of the sinking fund, it being understood that any operative who feels that he or she has been unjustly discharged may appeal his or her case through the Board of Operatives to the management and to the Board of Management; (b) Any operative leaving without due notice of one week, or satisfactory agreement with his or her foreman shall forfeit the full amount of his or her share of the Sinking Fund; (c) to participate in any of the benefits of the Employee Sinking Fund, an operative must have been in the employ of the Company at least two consecutive months during the year.

A similar unemployment insurance fund exists at the plant of the Dominion Manufacturing Company. The results achieved by the plan during a period in which unemployment was more severe than ever before on record, are summarized as follows: "Notwithstanding this fact [of severe unemployment] the testimony both from representatives of the operatives and from the managers of the plants is unanimously to the effect that the unemployment funds have so far adequately protected the operatives."

RECENT DECISIONS OF THE UNITED STATES RAILROAD LABOUR BOARD RESPECTING WORKING CONDITIONS ON RAILROADS

DURING recent months the United States Railroad Labour Board has issued decisions in connection with the revision of the rules as to hours of labour and working conditions, in addition to those issued between July and the middle of December, 1921, mentioned in the LABOUR GAZETTE for January on page 77. The cases before the Board in this connection are briefly described in the issue of the *Monthly Labour Review* for April 1922 (published by the United States Department of Labour) on pages 107-8, as follows:—

The most far-reaching of the board's decisions since that determining wages [Decision No. 147; reprinted in the LABOUR GAZETTE, July 1921] have been those relative to hours of service and working conditions of railway employees outside the engine and train service. Decisions have been rendered fixing

hours and working conditions for the shop crafts, including blacksmiths, machinists, boiler makers, etc.; the maintenance-of-way employees and railway shop labourers; the railway steamship clerks and freight handlers; the railway signalmen; the firemen and oilers; telegraphers; train dispatchers, supervising mechanics, and the expressmen. Previous rules and regulations covering these classes of employees were promulgated by the Director General of Railroads while the roads were under Federal control. Some of the rules were later agreed upon between the Railroad Administration and the workers, and comprised the so-called national agreements. Such agreements existed between the Railroad Administration and the shop crafts represented in the railway employees' Department of the American Federation of Labour, the maintenance-of-way employees, the steamship clerks, the firemen and oilers, and the signalmen. The American Railway Express Co. also concluded an agreement with its employees. Certain conditions of service of the other classes of the above-mentioned em-

ployees were determined either by direct order of the Director General of Railroads or through the regional directors who functioned during the Federal operation of the railways.

With the transfer of the roads from public to private control, various disputes arose concerning the rules and regulations governing working conditions. In accordance with the terms of the transportation act such disputes which could not be settled by the representatives of the carriers and their employees were appealed to the Railroad Labour Board. The determination of these matters has necessitated the revision of the war-time regulations.

In its decisions the Board has retained the principle of collective bargaining and union recognition. The most important changes involve payment for overtime work, and for intermittent service, the removal of the inhibition against piecework, and the elimination of certain craft restrictions, making less rigid the division of duty between crafts. All of the decisions provide that eight hours shall constitute a day's work, and that all hours worked beyond this number shall be considered overtime. This requirement is fixed by the Adamson law. Payment of punitive rates — for overtime work, however, does not begin until after the ninth or tenth hours, the shop crafts alone retaining the provision for punitive overtime rates for the ninth hour.

The Board has ruled that certain matters regulated by the national agreements may

not be covered to advantage in all localities by rules of general application. Such matters have been remanded to the carriers and their respective employees for further consideration. Rules governing promotions, discipline and grievances, seniority, vacations, and sick leave with pay are for the most part within this category.

In August, October and November in Decisions No. 222, Addenda No. 3 and No. 6 thereto, the rules as to working conditions in shops were covered. On December 12, in Decision No. 501, working conditions as to conditions for maintenance of way employees were covered. On January 23, Decision No. 630 revised the agreement between the railroads and the Brotherhood of Railway Steamship Clerks, Freight Handlers, Express and Station Employees. Decision No. 721, dated February 18, applied to rules for train dispatchers; Decisions No. 722 and No. 723, dated February 16, to railway express employees; Decision No. 725, dated February 12, to firemen and oilers; Decision No. 726, dated February 27, to railroad supervisors of mechanics; Decision No. 757, dated March 3, to railroad telegraphers.

THE COAL STRIKE IN THE UNITED STATES

Senate Committee's Report on West Virginia Coal Fields

THE general strike of coal miners in the United States, the origin of which was set forth in the April issue of the LABOUR GAZETTE on pages 405 and 406 continued throughout April, and was unteminated at the end of the month.

A bill was introduced in the United States Congress to establish a Commission of Inquiry for the coal industry. The House of Representatives Committee on Labour conducted hearings on the bill. On April 4, the chairman of the committee, sent the following telegram to officers of various coal operators associations and other mine operators:

Labour Committee, House of Representatives, have been holding hearings on Bland

Bill (H. R. 11022) in reference to coal strike. John L. Lewis, president of United Mine Workers of America, in testifying before committee, stated that his organization would meet representatives of operators in Central Competitive Field, exclusive of western Pennsylvania and southern Ohio, if enough tonnage is represented in the meeting to justify negotiations. House Committee on Labour have instructed chairman to notify you of conference to be held in Washington beginning April 10, providing operators agree, for the purpose of meeting the representatives of Mine Workers organization as the first step in an effort to settle the nationwide coal strike. Kindly wire answer at the earliest possible moment as to whether your association is willing to participate in conference.

For various reasons the operators declined to attend the proposed conference.

Some expressed their willingness to attend a meeting covering the whole of the Central Competitive Field, others objected to a joint wage conference under any circumstances, pointing out that the legality of such interstate conferences had been challenged and the matter was still before the courts. Representatives of the anthracite miners and operators had entered into negotiations in New York on March 15, the operators having stated that they were willing to continue the practice of dealing with the United Mine Workers of America as representing the workers. No new agreement was reached up to the end of April, but negotiations were continued. In the third week of the month the United Mine Workers claimed to have 80,000 non-union miners on strike, and they predicted that in the last week of April they would add 25,000 more non-unionists to the ranks of the strikers. The new territory affected by the strike was principally in central Pennsylvania. The mining regions of the southern states generally appear to have been little affected. During the fourth week of the strike the production of coal slowly increased but the consumption of coal was still about double the amount being produced. The Coal Bureau of the United States Chamber of Commerce in a statement covering the situation on April 22 estimated that there was a weekly deficit of 4,600,000 tons. To cover this deficit there were 48,650,000 tons in storage. If there was no further increase in production in the non-union fields, in the opinion of the Coal Bureau, a shortage would be felt early in June.

Senate Committee's Report on West Virginia Coal Fields

Last June the United States Senate Committee on Education and Labour was authorized by the Senate to make an investigation of conditions in the coal fields of West Virginia, where a strike had been in existence for a long time accompanied by many acts of violence and disorder. The report of the committee which has recently been is-

sued is stated to have been written by Senator Kenyon chairman of the committee, and to contain his personal views, although three other members of the committee while holding different views on certain points, were in general agreement with the chairman. The report found that there had been violations of law on both sides of the controversy. Various schemes for the attainment of industrial peace were discussed. While industrial conferences since the war had been disappointing since they had failed to secure an agreement or a sanction for the practical application of a code for industrial relations, nevertheless the committee believed that a code had actually been developing through the practical adjustment of industrial disputes. This code as applied to coal mines was formulated by the committee as follows:

1. Coal is a public utility, and in its production and distribution the public interest is predominant.

2. Human standards should be the constraining influence in fixing the wages and working conditions of mine workers.

3. Capital prudently and honestly invested in the coal industry should have an adequate return sufficient to stimulate and accelerate the production of this essential commodity.

4. The right of operators and miners to organize is recognized and affirmed. This right shall not be denied, abridged, or interfered with in any manner whatsoever, nor shall coercive measures of any kind be used by employers or employees, or by their agents or representatives, to compel or to induce employers or employees to exercise or to refrain from exercising this right.

5. The right of operators and of miners to bargain collectively through representatives of their own choosing is recognized and affirmed.

6. The miners who are not members of a union have the right to work without being harassed by fellow workmen who may belong to unions. The men who belong to a union have the right to work without being harassed by operators who do not believe in unionism. The organizations have a right to go into non-union fields and by peaceable methods try to persuade men to join the unions, but they have no right to try to induce employees to violate contracts which they have entered into with their employers; and the operators, on the other hand, have the right by peaceable means to try and persuade men to refrain from joining the unions.

7. The right of all unskilled or common labourers to earn an adequate living wage sufficient to maintain the worker and his family in health and reasonable comfort, and to afford an opportunity for savings against unemployment, old age, and other contingencies is hereby declared and affirmed. Above this basic wage for unskilled workers differentials in rates of pay for other mine workers shall be established for skill, experience, hazards of employment, and productive efficiency.

8. The right of women to engage in industrial occupations is recognized and affirmed; their rates of pay shall be the same as those of male workers for the same or equivalent service performed; they shall be accorded all the rights and guarantees granted to male workers, and the conditions of their employment shall surround them with every safeguard of their health and strength and guarantee them the full measure of protection which is the debt of society to mothers and to potential mothers. Few women are engaged in any way in mining, but it may be as well to announce this proposition as to pass it by.

9. Children under the age of 16 years shall not be employed in the industry unless permits have been issued under State authority.

10. Six days shall be the standard work week in the industry, with one day's rest in seven. The standard workday shall not exceed 8 hours a day.

11. Punitive overtime shall be paid for hours worked each day in excess of the standard workday.

12. When a dispute or controversy arises between operators and mine workers, there should be no strike or lockout pending a conference or a hearing and determination of the facts and principles involved.

As a means of applying this code it was suggested that a tripartite board consisting of representatives of operators, miners and the public be established, charged with the application of the principles of the code but without the power of compulsion or enforcing decrees or orders, this being left to the force of an enlightened public opinion.

DISPUTES IN THE BRITISH ENGINEERING AND SHIPBUILDING INDUSTRIES

A LOCKOUT of members of the Amalgamated Engineering Union by firms affiliated with the Engineering and National Employers' Federations of Great Britain began on March 13, and continued during April. The dispute was the result of the rejection by the union in January of a provisional agreement proposed by the employers. This agreement sought to bind the union not to interfere with the right of employers to exercise managerial functions in their establishments, the employers on their part agreeing not to interfere with the proper functions of the trade unions. It also provided that the employers should have the right to decide where overtime was necessary, the workpeople or their representatives being entitled to bring forward, under the provisions of the overtime and night shift agreement of September, 1920, any cases of overtime they might desire discussed. The executive of the union explained that "the only so-called managerial function which the men challenge is the right of

the employers to determine whether or no the men shall work overtime on ordinary production work." Several meetings of representatives of both parties were held without arriving at a settlement. On March 9, the Federation of Engineering and Shipbuilding Trades, the Federation of General Workers and the National Union of Foundry workers, comprising in all 47 separate unions, which had also been asked by the employers to endorse similar proposals, proceeded to take a ballot of their members upon them. On March 24, the result of the ballot was announced which showed 49,503 in favour of accepting the employers' proposals and 164,759 against acceptance. Negotiations were continued, and on the following day it was announced that a basis for a conference had been agreed on. Clause 1 of the memorandum embodying the basis for a conference affirmed the right of the employers to manage their own works and the right of the unions to exercise the proper functions of trade unions.

Clause 2 provided that in the exercise of these rights the parties should have regard to the provisions for avoiding disputes of April 17, 1914, and the shop stewards and Works Committees agreement of May 20, 1919, or to such other procedure as might be agreed on. At a conference of all the unions it was resolved to accept the principles of Clause 1, and to accept Clause 2 as a basis of discussion. The employers were asked to suspend the posting of notices of lockouts to the unions other than the Amalgamated Engineering Union, and to give consideration to the position of the latter union. The employers, however, would only agree to suspend the notices if the "basis of conference" memorandum were accepted in full, and in the case of the Amalgamated Engineering Union, they were not prepared to withdraw the lockout notices already in operation. The negotiations having reached a deadlock the employers posted notices on March 30 locking out the members of the other unions as from April 6. On April 4, a new basis for negotiation was accepted by all the unions except the Amalgamated Engineering Union, and the new lockout notices were suspended. Negotiations were renewed on April 10, but a dead-

lock was again reached on April 14, and on April 25 a general lockout was declared.

A Court of Inquiry was appointed by the Government under the Industrial Courts Act, but it had not completed its hearings at the end of April.

The Shipbuilding Employers' Federation had given notice of their intention to reduce the war bonus to the extent of 16s. 6d. on March 15, but this notice was suspended in view of negotiations that were proceeding. The employers then proposed withdrawing 10s. 6d. on March 29 and 6s. at the end of April. This proposal was not accepted by the delegates of the Federation of Engineering and Shipbuilding Trades, and the negotiations broke down. The employers posted notices of these reductions on March 22 and the Federation then decided to take a ballot of their members on the acceptance or rejection of these terms. On April 4, the result of the ballot showed a large majority against them and the delegate conference of the Federation decided that their members should cease work on March 29. This dispute continued throughout April without settlement. According to the *British Labour Gazette* about 240,000 workers were involved in these two disputes in March.

EFFECT OF REDUCED HOURS ON OUTPUT AND EFFICIENCY

THE effect of reduced hours on output of work is discussed in "Industrial Fatigue and Efficiency," by H. M. Vernon, M.D., investigator for the Industrial Fatigue Research Board of England. (E. P. Dutton and Co., New York). In this book Dr. Vernon has gathered together present-day knowledge concerning industrial fatigue and its influence on efficiency so far as workshop practice is concerned.

The question of output in relation to hours of work is now under debate in the United States, in connection with the dispute in the cotton textile industry, one of the issues being a demand by the

manufacturers for a return to the 54-hour week in mills where the 48-hour week is now in effect.

Of the experience of reduced hours in the textile industry in Great Britain Dr. Vernon writes:

In Great Britain. . . the chief inspector of factories reports (1918) that when the hours were reduced from 55 to 49½ a week, the output in some factories (at Macclesfield) showed a reduction proportionate to about half the reduction of hours, and in one factory there was practically no reduction in the output of the looms, as the weavers kept so much better time. In Scottish factories, again, a similar reduction of hours caused an almost proportionate fall of output in carding, but a

smaller fall in spinning, whilst in "finishing" there was no reduction of output. Time-keeping was said to have improved greatly. At a Yorkshire thread works a reduction of hours from 55½ to 49½ at first caused output to fall in proportion to the reduction of hours, but it gradually rose during the four subsequent years till it reached the old maximum, which has been maintained ever since. No information is vouchsafed as to the cause of the very gradual rise of output, other than that time-keeping improved. Presumably there were some improvement of plant and organization, and some speeding up of machinery.

In Wales a firm reduced the hours of work from 52½ to 49½, and the result was so satisfactory in the weaving department that the system was extended to the spinning department.

The day workers were told that if the output was not reduced their wages would be maintained at the old level. Time-keeping immediately improved, and it is considered that the output is now fully up to that previously obtained. On the other hand the Belfast employers were universally of the opinion that the output of the spinners will be reduced almost *pro rata* to the reduction of hours, though the weavers are in very different case.

It is to be remembered that the whole of the above-recorded evidence relating to cotton manufacture was furnished by employers, and in many instances it is undoubtedly vitiated by the fact that the comparison of output was made immediately after and before the change of hours.

FAIR WAGE CONTRACTS, APRIL 1922

DURING April the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to one fair wage contract which was awarded by the Department of Public Works. This contract contains the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to the supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS

Repairs, renewals, scraping, etc., to
Dredge P.W.D. No. 110, Departmental

Dredging Fleet, Lauzon, Quebec. Name of contractor, Davie Shipbuilding and Repairing Company, Limited, Lauzon, Quebec. Date of contract, April 19, 1922. Amount of contract, \$3,807.

POST OFFICE DEPARTMENT

The following is a statement of payments made in April for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of orders	Amount of orders
Making metal dating stamps and type, and other hand stamps and brass crown seals	\$ 817.12
Making and repairing rubber stamps, daters, etc.....	205.13
Supplying mail bag fittings.....	4,650.00
Making up and supplying letter carriers' uniforms, etc.....	1,893.55
Repairing letter boxes, etc.....	306.70
Satchels	478.82
Stamping ink, pads, etc.....	235.40
Scales repaired.....	304.75

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages, hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule the rates of wages for the principal classes of labour are given, with other information of general interest.

Manufacturing—Lumber and its Products

CALGARY, ALTA.—CERTAIN SAWMILLS AND CALGARY CARPENTERS' DISTRICT COUNCIL. Agreement in effect from May 1, 1922 to May 1, 1923.

Minimum wages for carpenters in mill work, per hour, 65 cents; first class bench hand, 79 cents, bench foreman with superintendent to be authority for defining same.

Hours per day, 9, with 5 on Saturdays. Overtime, until midnight, and until 5 p.m. Saturdays, time and one-half; thereafter and Sundays and holidays, double time. No work on Labour Day except to save life or property. Night shifts, eight hours' work on nine hours' pay.

One hour's notice from either side before dismissal or leaving work.

Building and Construction

TORONTO, ONT.—TORONTO STONE CUTTERS' ASSOCIATION, AND TORONTO LOCAL

AND DISTRICT No. 4. INTERNATIONAL CUT STONE CONTRACTORS' AND QUARRYMEN'S ASSOCIATION. Agreement to be in effect from May 1, 1922 to April 30, 1923.

Purpose of agreement—to prevent strikes and lockouts and facilitate a peaceful adjustment of grievances and disputes.

Employers to employ as stone cutters for pneumatic and hand cutting only union members, provided skilled men are furnished. Otherwise employers may employ stone cutters as they see fit, who shall make application to join the association.

Wages: Per hour—90 cents. Hours of labour, eight per day with four on Saturdays—forty-four per week. Overtime only in cases of absolute necessity: first two hours, time and one-half; thereafter, double time.

Suitable accommodation to be provided for the men, with sun shades in summer.

Parties to arbitrate all differences and grievances without any strike or lockout. Each party to elect an arbitration committee of three members. These on failure to agree shall select an umpire, whose decision shall be binding.

One apprentice to five or less journeymen, and one additional to each additional five, but never more than three apprentices to a shop. Term of apprenticeship, four years. Wages to be as mutually agreed upon.

Workmen may work for whomever they see fit. Employers may employ or discharge whomsoever they see fit.

Either party wishing to alter terms of the agreement must give one month's notice of desired change prior to expiration of the agreement.

WINNIPEG, MAN.—TYNDALL STONE PRODUCERS' ASSOCIATION OF WESTERN CANADA, AND JOURNEYMEN STONECUTTERS' ASSOCIATION OF NORTH AMERICA.—Agreement to be in effect from March 8, 1922 to December 31, 1922.

This agreement has been slightly altered from the form in which it was effective as from August 21, 1921, in which form it was summarized in the January, 1922, issue of the LABOUR GAZETTE, page 83.

The changed and additional clauses are as follows:

Wages: Per hour—journeymen stonecutters, 95 cents; planemen, 75 cents; lathemen, 75 cents; carvers, \$1 per day above stonecutter's pay.

Employers to give preference of employment on planers and lathes to all *bona fide* planemen now residing with in the local jurisdiction.

CALGARY, ALTA.—CALGARY CONTRACTORS' ASSOCIATION, AND CALGARY CARPENTERS' DISTRICT COUNCIL. Agreement to be effective from May 1, 1922 to April 30, 1923.

Minimum rate; Per hour—journeymen carpenters, 80 cents.

Hours per day 8, with 4 on Saturdays. Night shift 7 hours' work, 8 hours' pay.

Overtime, until midnight and until 5 p.m. on Saturdays, time and one-half; thereafter, double time. Sundays and holidays, double time; no work on Labour Day.

One hour's notice to be given before dismissal or leaving work.

No union member to work for any one outside the Contractors' Association at less than union rates. Contractors' Association to have privilege of examining all agreements.

An agreement to be negotiated during month of January, 1923.

In case of disputes, a committee of three members from each party to be appointed to investigate and try to settle same, settlement to be binding on both parties.

Public Utilities.

HAMILTON, ONT.—HAMILTON CATARACT POWER, LIGHT AND TRACTION COMPANY, LIMITED, AND ITS SUBSIDIARY AND AFFILIATED COMPANIES, AND CERTAIN OF ITS EMPLOYEES, MEMBERS OF THE INTERNATIONAL UNION OF STEAM AND OPERATING ENGINEERS, LOCAL 700. Agreement to be in effect from March 1, 1922 to December 31, 1922, and thereafter on 30 days' notice of change or termination.

East End Power Station.—Hours per day: shift employees, 8 (6 days per week), repairmen, 9 (6 days per week).

Each man paid on monthly basis to be allowed 7 days' holidays on maximum pay.

Overtime, first four hours for shift men, time and one-half; first three hours for repair men, time and one-half; double time for all when over twelve hours in any twenty-four. Sundays and holidays, double time, but this not to apply to men working on regular shifts.

De Cew Falls Power Station and Sub-Station Departments:—Shift employees, 8 hours per day, 6 days per week—except at Station S and St. Catharines, where hours and days shall remain as at present.

Where 3 shifts are worked, "Revolving Watch" to be observed, two weeks being maximum period of shifts.

Shift employees requested to work overtime to be paid as follows: first 4 hours, time and one-half; thereafter double time.

Relief operators to be journeymen, and to be paid for no less than 6 days per week.

General Conditions:—Hours of labour for other than shift employees, 9, with 5 on Saturdays. Overtime until 10 p.m., time and one-half. Thereafter and Sundays and holidays, double time.

Seniority of service with efficiency to be basis of promotion for shift employees. In reduction of staff, last man employed to be first laid off, and in re-employment, men laid off, if they so desire, to be re-employed according to seniority, retaining seniority rights.

Assistant operators failing promotion after 3 years' service to be paid as first assistant operators.

Shift employees after six full months' service, one full week's holidays with pay per year.

A journeyman operator to have had at least 3 years' experience in operation of an electrical generating station or sub-station. An apprentice operator is an employee having had less than three years' experience.

In case of any employee suspended or discharged, company to grant an interview to grievance committee. Man if not at fault to be reinstated and paid for time lost.

Company not to discriminate against employees for being union members.

Differences between employees and the company to be submitted through a properly accredited committee of employees to the General Superintendent, and if they cannot agree, to the General Manager. In event of failure to adjust any dispute, no cessation of work to take place until the highest officials of the Union and the General Manager have endeavoured to arrive at a settlement.

A committee of not less than three or more than five employees to meet General Superintendent once a month to confer on matters affecting the welfare of the employees and the company.

Wages—East end power station: Per month—Engineers, \$124.50 to \$159.00;

pump men, \$117.75; stoker men, \$106.50. Per hour—locomotive crane engineers, 75 cents; elevator man, 60½ cents; repairmen, 56 and 70 cents; electrician, 70 cents. Per month—operators, \$101 to \$129.

De Cew Falls Power Station—Per month: operators in charge, \$145.25; wheelmen, \$101 to \$123.75; relief man, \$131.

Sub-Station "A"—Per month: operators, \$90 to \$129. All other sub-stations, \$101.00 to \$118.25.

Relief operators, per month, \$124.

Sub-station maintenance men: Per hour—foremen, 70 cents; others, 45 to 64½ cents. Terminal station: Per month—foreman, \$120, helper, \$110.

Transportation—Electric Railways

HAMILTON, ONT.—DOMINION POWER AND TRANSMISSION COMPANY, AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, DIVISION No. 107, SHOP EMPLOYEES. Agreement to be effective from February 16, 1922 to December 31, 1922, and thereafter on 30 days' notice in writing of termination or alteration.

Company through properly accredited officers to treat with employees, members of the Association, through their representatives.

Hours per week, 55.

Overtime and legal holidays, time and one-half. Sunday work, 7 cents per hour extra.

Disputes to be submitted through representatives of the Association to the General Superintendent and if no agreement is reached, General Manager to be called in.

In case of any member of the union being suspended or discharged, Company to grant an interview to the Grievance Committee, and man if found not to be at fault to be reinstated and paid for time lost.

Wages: Per hour—Machinists, 52½ cents; machinist helpers, 44½ cents; blacksmiths, 51½ cents; blacksmith's helpers 44½ cents; painters, 57½ cents; carpenters, 52½ cents; pitmen, 43½ and 47½ cents; controller men 47½ cents; car placers, 39 and 44½ cents; car cleaners, 40 and 42½ cents; store men, 44½ cents.

HAMILTON, ONT.—HAMILTON STREET RAILWAY COMPANY, AND THE AMALGAMATED ASSOCIATION OF STREET RAILWAY EMPLOYEES OF AMERICA, No. 107. Agreement to be in effect from February 16, 1922 until December 31, 1922, and thereafter on 30 days' notice of termination or alteration.

Company to treat with employees members of Association through representatives.

Wages: Per hour—conductors and motormen—first year, 38 cents; second year, 42 cents; third year and thereafter, 48 cents.

Overtime and legal holidays, time and one-half; Sunday work which is not overtime, 7 cents extra per hour.

Two hours to be minimum time per run.

Hours per day in train service, for regular men, minimum, 8; maximum 9½.

Extra and relief men to be paid a guaranteed minimum wage of \$8. per week. On an extra man failing to report, company not to be required to pay this wage.

Men on snow-plows, sweepers and sand-cars to be supplied with overalls and paid 5 cents extra per hour. Men training students, 25 cents extra per day or part of day. Work for extra men to be divided as nearly as practicable equally between them.

Motormen and conductors to hold promotion in accordance with continuous age in the service, and to have right of selection of run in accordance with age in the service.

Ne regular man to be compelled to do extra work after finishing his day's run if spare men are available.

Men in service for one year to be supplied with uniform, company paying one-half. After two years' service, one uniform per year to be furnished free. Uniform overcoats to be furnished not oftener than once in two years.

If any member of the association is suspended or discharged, company's representatives to grant an interview to grievance committee. Man if not at fault to be reinstated and paid for time lost.

Differences or disputes to be submitted through Union representatives to the General Superintendent, and if the two parties cannot agree, to the General Manager.

HAMILTON, ONT. — HAMILTON AND DUNDAS STREET RAILWAY COMPANY, HAMILTON RADIAL ELECTRIC RAILWAY COMPANY, HAMILTON GRIMSBY AND BEAMSVILLE ELECTRIC RAILWAY COMPANY, AND THE BRANTFORD AND HAMILTON ELECTRIC RAILWAY COMPANY, AND DIVISION 876, AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA. Agreement to be in effect from February 16, 1922, until December 31, 1922, and thereafter on thirty days' notice of change or termination.

Company not to discriminate against any employee for being a union member. Company officers to treat with employees through their representatives, and if adjustment is not satisfactory, appeal to be made to the General Manager.

Employees suspended or dismissed to receive a hearing and if charge is not sustained to be reinstated and paid for time lost.

Employees to have choice of runs in order of seniority.

Trainmen to have one day off every two weeks.

Trainmen in service for one year to be supplied with a uniform suit, company paying half cost; after two years' service of trainmen, uniforms to be given free.

Regular crews after finishing runs not to be required to do extra work if extra men are available.

Passenger trainmen to receive 25 cents extra per day or part day when training students.

Nine hours to constitute a day's work for men called for extra work. Hours of regular trainmen on regular freight and passenger runs, 10 per day.

Wages, per hour—trainmen—1st 6 months, 33 cents; 2nd 6 months, 38 cents; 2nd year, 42 cents; thereafter, 48 cents. Overtime, time and one-half.

PORT ARTHUR, ONT.—PUBLIC UTILITIES COMMISSION OF THE CITY OF PORT ARTHUR—Schedules of wages and working conditions, not signed or accepted verbally by employees, but in effect from March 16, 1922.

Port Arthur Civic Railway, Transportation Department.

No change has been made in the working conditions from those in the agreement as effective from June 16, 1920, summarized in the LABOUR GAZETTE for July, 1920, page 904.

The new wage schedule is as follows: Per hour—conductors and motormen, first six months, 45 cents; next eighteen months, 47½ cents; over two years, 50 cents; operators on one man cars, 3 cents extra per hour.

Car Barn Employees.

The working conditions are the same as those in the agreement as effective from June, 16, 1920, summarized in the LABOUR GAZETTE for July, 1920, pages 903-4. The new wage schedule is as follows: carpenter, machinist, 57½ cents; painter, 55 cents; pit men 47½ and 53 cents; new employees and labourers, 40

to 45 cents; night barn foremen, \$115 per month, assistant, \$100 per month.

Civic Schedules.

MEDICINE HAT, ALTA.—SCHEDULE OF WAGES FOR THE YEAR 1922—Per month—Chief Civic officials, \$125-\$225.

City Treasurer's and Assessor's Departments; Accountants and Cashiers, \$135-\$180; Machine operators, \$110 and \$142.50; Stenographers, clerks, etc., \$70-\$120.

Police Department: Constables, \$107.50-\$125; Sergeants and detectives, minimum, \$135; Pound keeper, \$115; Uniforms, greatcoats, boots, gloves, etc., supplied.

Fire Department: Assistant chief, \$135; Captain, \$125; Lieutenant, electrician, \$120; foremen, drivers, \$100 to \$110; Uniforms, mackinaws and caps supplied.

Electrical Department: journeymen 80 cents per hour.

Power plant: Per month—engineers, \$157.50 and \$215; labour, 50 cents per hour.

Public Works Department. Per month—Stenographer, \$80; janitor, \$110; public works foremen, \$130-\$170; stablemen, \$100; carter, pipe layers, \$115; street cleaners, \$105. Per day—labourers, \$4; teamsters (ten hours) \$5.

Sanitary Department: Per month—Scavengers, etc., \$115-\$120; caretaker, \$80-\$100.

Gas Department: pipe fitters, lamp repairers, \$120; labourers, \$4 per day.

Parks Department—parks foremen, \$125; market master, \$80; market cleaner, \$75; parks labourers, per day \$4.

REGINA, SASK.—SCHEDULE OF WAGES FOR YEAR 1922.

Heads of Departments, Per month, \$208.33-\$416.66.

Treasurer's Branch, Per month: Cashiers, accountants, bookkeepers—

\$100.00-\$166.66; stenographers and clerks, \$75-\$135.

Light and Water Department: operators, \$75-\$100; trained clerks, \$75-\$135.

Assessor's Branch: clerks, \$100.00-\$166.66; cashier, \$120; stenographers, \$90 and \$100. Stores Department: clerks, \$125 and \$150; storekeeper, \$125; warehouseman, \$100. Solicitor's Department: stenographers, \$85 and \$90. City Clerk's Department, stenographers, \$75 and \$115.

Engineer's Branch: engineer's assistants, \$175 and \$200; instrument man, \$150; bookkeeper, \$110; stenographer, \$90; foremen, \$150 per month and 55 cents per hour. Sewage disposal labour, 47 cents per hour, 60-65 hours per week. Civic labour, 45-50 cents per hour, 60-hour week.

Health Department—Inspectors, \$120 and \$150; clerks, \$100 and \$125; nurses, \$148.53; superintendents, \$135 and \$150. Per hour—teamsters, scavenging labour and street cleaning labour—50 cents; blacksmiths, 55 cents; carpenters, 65 cents.

Parks Department — foreman, gardener, \$125 per month; labourers, 45 cents per hour.

Power Department—Per month — Time keeper, \$110; Meter readers,

\$105, \$110, \$125; engineers, \$164.40 and \$225.00; stoker operators, \$132; firemen, \$124.80; conveyormen, \$138.30; repair men, \$132.60-\$163.20; labourers, \$116.60-\$120.65; plant electrician, \$164.40; linemen, \$167.20 groundmen, \$124.60; meter installers, \$156; meter repairers, \$166.40; street light attendants, \$154.20.

Fire Department: Per month—Captains, \$130-\$145; firefighters, \$100-\$125.

Street Railway Department: Monthly men, \$90-\$200. Per hour conductors and motormen, 40-55 cents; motor conductors, Sundays and holidays, time and one-quarter; overtime, time and one-half. Machinists, 60 cents, carpenters, 65-75 cents; blacksmiths, 67 cents; painters 62 cents; pitman, 60 cents; car cleaners, 48 cents; trackmen, 50 cents; switchtenders, 52 cents; groundmen, 65 cents; armature winders and electric repair men, \$170 per month.

Police Department — Per month—Inspectors, \$185 and \$200; detectives, \$165; sergeants, \$165; patrol sergeants, \$155; constables, \$120-\$145; patrol drivers, \$130 and \$140; clerks, \$115. Waterworks—Meter repairer and plumber, \$150; Meter repairers, \$100 and \$130; turn-on men, \$125. Per hour —skilled labourer, 55 cents; labourers, 52½ cents; teams, 90 cents.

EMPLOYMENT CONDITIONS IN CANADA FROM JANUARY 16, 1922 TO APRIL 15, 1922, AS REPORTED BY EMPLOYERS

EMPLOYMENT as reported by employers during the period January 16 to April 15 experienced considerable fluctuation, but on the whole the tendency was favourable, although the improvement was not very pronounced. The most decided changes during the period under review were caused by the temporary closing and re-opening of the railway car shops, supplemented by heavy seasonal declines in logging. On the other hand, employment in the manufac-

turing industries generally increased, and building construction showed considerable expansion towards the end of the quarter.

The upward movement indicated in recent reports is shown graphically in the accompanying chart. The lowest point it reached during the quarter under review was at the end of January, the index number having declined to 78.9 at that time. Slight

but steady improvement was registered during February and until the latter part of March, when the closing of the locomotive shops again caused the curve to fall, although not as steeply as at the close of January. Revival was indicated, however, during the succeeding two weeks, and at the end of the period under review the curve attained the high-

There was a net increase of 4,980 workers in the staffs maintained by these firms. An analysis of the returns by districts shows that British Columbia, Quebec and Ontario reported considerable improvement in the situation. In the Maritime provinces no change was recorded, while in the Prairie provinces the tendency was distinctly downward,

NOTE:—The curve is based on the number of employees actually at work on the last day of each half-month as reported by the firms making returns in comparison with the number of employees reported by the same firms on January 17, 1920.

est point reached in 1922, the index number standing at 82.1. Employment during the first quarter of this year was on a somewhat lower level than during the corresponding part of 1921, the index number for every half month in the quarter having been several points lower than for the same period of last year.

Returns received by the Dominion Headquarters of the Employment Service of Canada from some 6,100 firms indicated the following net changes during the period under review:—

Half month ending	Increase in staff	Decrease in staff	Percentage of change
Jan. 31	14,610	2.27
Feb. 14	19,951	3.12
Feb. 28	1,67725
Mar 15	1,961	.29
Mar. 31	10,400	1.57
Apr. 15	10,323	1.57

partly on account of contractions in coal mining and in railway transportation, construction and maintenance.

The most decided increases in activity were those of a seasonal-character reported in saw mills. The gains in such establishments, together with additions to staffs on a smaller scale which occurred in furniture and other wood using factories, provided work for approximately 5,800 additional men. Increases of practically the same magnitude were recorded in iron and steel, the automobile industries in Ontario particularly showing improvement. Expansion on a large scale was also registered in textiles, largely in the garment, hosiery and knitted goods and thread, yarn and cloth divisions. The commencement of seasonal operations in fishing and also in fish canning and smoking establishments during the latter part of the quarter

caused considerable increases in employment, especially in the Maritime provinces. There were also some gains in British Columbia. Pulp, paper, tobacco, chemical, glass, brick, cement, electrical apparatus and electric current factories enlarged their working forces substantially during the quarter. Apart from the manufacturing industries increased activity was indicated by telephone companies; shipping and stevedoring concerns added considerable numbers to their crews, and building contractors also reported a very much more favourable situation.

Pronounced contractions in employment occurred in logging during the quarter under review, approximately 11,700 men having been released by the concerns making returns. The bulk of these decreases were reported in Ontario. Losses in personnel on a very much smaller scale were registered in coal mining, railway transportation, highway construction and also in boot and shoe factories. The tendency in the leather group has been steadily downward since the end of January, the decline occurring largely in Ontario and Quebec. Practically all the losses on public high-

ways took place in Ontario during the early part of the six weeks under review. All provinces shared in the contractions in railway transportation, those in the Prairie district, however, being decidedly the most extensive. Employment in coal mining fluctuated considerably during the quarter in both Eastern and Western coal fields, but the losses in Alberta were very much larger than elsewhere. Activity in the trade group declined during the period, though the tendency during the later weeks was decidedly more favourable.

At the close of the quarter under review, employment in the lumber, leather, rubber and textile industries, in the mining of metallic ores, on street railways and cartage, and in shipping and stevedoring was on a higher level than during the corresponding period of last year. In all other groups the situation was slightly less favourable, especially in iron and steel, non-ferrous metal products, and in the communication industries.

A summary of employment conditions during the period March 16 to April 15 appears also in the regular monthly article on page 464 of this issue.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA DURING THE FIRST QUARTER OF 1922.

REPORTS from the offices of the Employment Service of Canada indicate a considerable expansion in the volume of business transacted during the first three months of 1922 as compared with the same period a year ago. The number of applications for work increased slightly, there being approximately 5 per cent more applications during the first quarter of 1922 than during the same period of the preceding year. The volume of employment offered showed a gain of about 15 per cent over the report of last year. Placements effected in regular employment registered a decline of approximately 17

per cent, but the number of placements made in casual work increased more than 60 per cent over that reported during the corresponding period of 1921.

The accompanying chart, which presents the returns from the offices on the basis of daily averages over half-month periods, shows that the curves of vacancies and placements, although marked by considerable fluctuations, have mounted steadily since the close of 1921. This would indicate a slight betterment in employment, which may be expected to continue during the following weeks. A comparison with the reports of last year

shows that the early spring expansion in industry was more gradual during the latter part of the period under review than during March, 1921, when the number of positions offered and filled increased very rapidly. At the end of March, 1922, vacancies and placements were at a level considerably lower than

were effected, of which 39,402 were in regular employment and 26,668 in casual work. This may be compared with 47,649 placements in regular employment and 16,623 in casual work effected during the corresponding period of 1921. Of the placements made in regular employment during the period under re-

at the same time a year ago. Applications for employment increased to a marked extent during the early part of January when the federal, provincial and municipal relief schemes, involving registration at the employment offices, came into operation. During the latter part of the period, however, there was a slight falling-off in the number of applications.

During the period January 1 to March 31, 1922, the offices reported that 71,362 references to positions were made and that a total of 66,070 placements

were effected, of which 39,402 were in regular employment and 26,668 in casual work. Vacancies notified by employers to the Service numbered 76,226, of which 54,061 were for men and 22,165 for women, as compared with a total of 66,302 during the first quarter of 1921. The number of applications registered at the offices was 121,722 (98,520 of men and 23,202 of women), as compared with 115,640 during the corresponding period of last year.

A summary of the work of the offices for the month of March, 1922, may be found elsewhere in this issue.

UNEMPLOYMENT IN TRADE UNIONS DURING QUARTER ENDING
MARCH 31, 1922, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with the situation reported during the quarter ending March 31, 1922. At the end of January, the percentage of idleness stood at 13.9, which was slightly over 1 per cent less than in December, 1921. During the following two months further moderate improvement was registered, and at the end of March, 9.6 per cent of the members reported were out of work. During the first month of the corresponding quarter in 1921 unemployment was in practically the same ratio as for January of this year, but slackness continued to increase during February and March, and at the end of the latter month the percentage of idleness stood at 16.5. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades, or who are idle because of sickness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions

making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the unions reporting.)

Considerable improvement as compared with the preceding three months occurred during the first quarter of this year in the manufacturing industries, particularly in the garment and iron and steel trades. The situation reported by unions of mine workers was slightly more favourable, but the building trades continued dull.

The accompanying chart shows the curve of unemployment as reported by trade unions by quarters for 1916-17-18 and by months for 1919-20-21 and to March of this year. The curve has followed a downward course since the beginning of the year, after a sharp upward movement during the last two months in 1921. In this decline the curve pursued an opposite direction from that

indicated during the same quarter of last year, when unemployment increased considerably.

The percentages of unemployment in New Brunswick and Quebec were somewhat smaller than elsewhere during the quarter under review, while unions in Manitoba and British Columbia reported proportionally more slackness than the other districts. In Ontario there was more idleness during January and February than in the last three months of 1921, but some improvement was indicated during March. Quebec, Ontario, Saskatchewan and British Columbia recorded a more favourable situation than in the same quarter of 1921. Elsewhere varied conditions were indicated. Manitoba and Alberta, however, were the only districts to show more slackness at the close of March than during the same month in 1921. Table 1 on this page summarizes the returns by provinces and Table 2 on page 519 shows the percentage of unemployment reported in the different groups of industries.

TABLE 1.—PERCENTAGE OF UNEMPLOYMENT IN TRADES UNIONS BY PROVINCES.

Mar. 1922	9.46	7.14	7.72	8.32	14.08	11.02	10.12	17.74	9.63

During January slightly more unemployment than in the same month of 1921 was reported by unions in the manufacturing industries, particularly in iron and steel. On the other hand, garment workers and leather workers were rather more fully employed. The transportation industries as a whole were slightly busier, some slackness among steam railway employees being offset by increased activity in the shipping and stevedoring trades. In the building and construction industries considerable unemployment was reported during January 1922, the percentage being slightly higher than in January, 1921.

During February unions in the manufacturing group registered considerable improvement, there being nearly 4 per cent less idleness than in the corresponding month of last year. The garment trades were somewhat busier and in iron and steel the situation was very much more favourable. In pulp and paper (including printing and publishing) and leather and glass, however, the percentages of unemployment exceeded those reported in February, 1921. Employment for unions in the building and construction group was brisker than during the corresponding period of last year, although the change was slight. In transportation approximately 3 per cent less unemployment was recorded, steam railway employees were somewhat busier and the shipping and stevedoring group also showed further improvement. Fishermen, lumber workers and loggers registered less idleness than in February, 1921.

Unemployment in the manufacturing industries declined during March, and was less than during the corresponding period of last year. Pulp and paper mill workers were busier and more decided reductions in unemployment were reported by unions in the textile and iron and steel industries. Leather workers, printing tradesmen, and cigar and tobacco makers, however, were a good deal slacker. Minor improvement as compared with the returns for March of

last year was registered in building construction and also by steam railway employees. Fishermen, on the other hand, were less fully employed.

The accompanying tabulations (Table III) show in some detail the returns for the month ending March 31, for which

month 1,480 unions, with a combined membership of 157,639 members, reported 15,173 of their members as unemployed, a percentage of 9.6. The table also gives the general percentages of unemployment in the various trades and industries for January and February.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS ISSUED DURING JANUARY-MARCH, 1922.

EMPLOYMENT in the building trades, as indicated by the value of the building permits issued in 56 cities, showed a decline during the quarter ending March 31, 1922, as compared with the preceding three months, although a more favourable tendency was evidenced in the last month of the quarter. There was, however, an increase in comparison with the corresponding quarter of last

year. During January there was a contraction of 43 per cent as compared with December; the total for February was approximately 44 per cent higher than in January, while in March the value of the building permits issued showed a further gain of 117 per cent. The value for that month was higher than in March of any year since 1914, but it was lower than in October and November of

last autumn. The total value of the building authorized during the three months under review was \$16,310,387 as compared with \$25,278,652 for last October, November and December, and with \$12,211,227 in the first quarter of 1921. There was, therefore, a decrease of \$8,968,265 or 35 per cent in the building permits issued in the former comparison, and an increase of \$4,099,160 or 34 per cent in the latter.

During January, New Brunswick, Ontario, Alberta and British Columbia showed increases in the volume of building contemplated as compared with the same month of the preceding year. The increase of \$347,522, or 28 per cent, in Ontario was the most pronounced and represented largely increased activity in

Toronto. The decreases in the other provinces were comparatively slight, that of \$88,550 in Manitoba being the largest.

The value of the permits issued during February continued to show expansion in Ontario, where there was an increase of 108 per cent over the figure for the same month last year. In that province the building authorized was valued at \$2,714,446, or over 64 per cent of the total for the 56 cities. In this comparison Toronto showed the most decided gain, while increased activity on a large scale was also indicated in several other Ontario cities, notably Hamilton, Kitchener and Port Arthur. In addition to the gains in Ontario, the value of the permits issued in New Brunswick and Mani-

toba also exceeded that reported for February, 1921. There was, however, a decided falling off in the building anticipated in Quebec, and somewhat smaller declines occurred in Nova Scotia, Saskatchewan, Alberta and British Columbia.

During March, there was a pronounced increase in the amount of building contemplated as compared with the same month of the preceding year. Ontario, with permits valued at \$5,974,676, or over 65 per cent of the total for 56 cities reporting, showed a 51 per cent gain over March, 1921. Quebec, New Brunswick, Alberta and British Columbia also registered considerable expansion in the value of building authorized. In Nova Scotia, Manitoba and Saskatchewan, however, there were reductions. The value of the permits issued in Toronto was over a million dollars higher than in the same month of last year. In Montreal, Que., Port Arthur and Windsor, Ont., and Point Grey and Vancouver, B.C., there were also large increases in anticipated building.

The accompanying table shows in detail the value of the building permits issued by months during the first quarter of this year. The thirty-five cities for which a continuous monthly record has been kept since 1910 are marked by asterisks.

A comparison in some detail between the statements for March and those for February may also be found on page 466 of this issue.

PRICES, RETAIL AND WHOLESALE, IN CANADA, APRIL, 1922

THE changes in prices during April were less than for some time, except for seasonal movements, and tended to confirm previous indications that the general downward movement so pronounced from May, 1920, to July, 1921, and less steep thereafter, was near its end at levels approximately fifty per cent above 1913 prices, and that future changes would be the result of conditions in the markets for the various commodities rather than of a general upward or downward influence as has been the case generally since July 1914. Raw materials and farm products continued to show a tendency to rise and fall sensitively according to market conditions, as had been experienced during recent months, and manufactured goods began to show similar tendencies, indicating that the downward movement in these also was nearing the end. In retail prices of foods, the movement was slight except for a seasonal decline in eggs, milk, and potatoes and an upward turn in meat prices, a reaction from the low prices at the beginning of the year. Fuel and rent showed little change. Retail prices of clothing and boots for the spring also indicated little further change.

The index number of wholesale prices was down to 225.0 for April as compared with 225.6 for March, 253.7 for April, 1921; 353.1 for April, 1920; 231.1 for April, 1917; and 136.7 for April, 1914. The chief changes for the month were increases in grain and fodder, livestock and meats, and dairy products, with slight decreases in fresh fish, some fruits and vegetables, metals, building materials, and in raw furs. A special index number including fifty of the more important articles included in the Departmental index number, 20 foods, 15 raw materials, and 15 manufactured goods, based upon price levels in 1913 as 100, was practically unchanged at 147.8 for

April as compared with 148.1 for March; 148.4 for February; 148.0 for January; 147.2 for November; 164.9 for April, 1921; and 249.8 for April, 1920.

Somewhat similar tendencies appeared in other countries, conditions in the United States being much the same as those in Canada, while in Great Britain for the first time since early in 1920, there was an upturn in wholesale prices. Other index numbers of wholesale prices in Canada indicated the same tendencies in prices as the Departmental index number, as may be seen in the table of wholesale prices index numbers for various countries in the next succeeding article. The Bank of Commerce index numbers of wholesale prices in Canada including 24 articles mainly exported and the other 24 articles mainly imported showed a rise in the former and a fall in the latter. The index number of Professor H. Michell, covering 40 commodities, was down slightly.

In retail prices the average cost of a list of 29 staple foods in sixty cities was \$10.26 at the beginning of April as compared with \$10.54 at the beginning of March; \$12.28 in April, 1921; \$15.99 in April, 1920; \$10.77 in April, 1917; and \$7.51 in April, 1914. The chief changes for the month were substantial decreases in eggs, milk, and potatoes. Meats averaged slightly higher, except veal. Coal, wood, coal oil, and rent were practically unchanged.

The table of retail prices and rentals shows the prices at the beginning of April of over one hundred staple foodstuffs and groceries, of coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity and every ef-

fort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these have been published each month since the beginning of 1910, the figures being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts chiefly occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910.

The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but

more fruits, fresh and canned vegetables, etc., so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month; the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for the corresponding month back to 1913.

Retail Prices

Meats averaged slightly higher in sympathy with the higher markets for live-stock as a result of the scarcity of stock due to heavy marketing in the preceding autumn owing to feed shortage. Sirloin steak averaged 28.8c per pound as compared with 28.3c in March, the price averaging higher in all of the provinces except Saskatchewan. In round steak the increase was not so general. In rib roast advances occurred similar to those in sirloin steak. Shoulder roast and stewing beef showed little change. Veal averaged 19c per pound as compared with 19.7c in March, the price averaging lower in all of the provinces except British Columbia, Alberta, and Manitoba. Mutton averaged 27.4c per pound as compared with 26.6c in March, the prices averaging higher in each province except Saskatchewan and Alberta. Lamb was also $\frac{1}{2}$ c higher in the average, the advance being general. Fresh pork averaged $\frac{1}{2}$ c per pound higher, at 30c, there being slight advances in the averages for the eastern provinces. Pork chops and mess pork also showed slight advances. Breakfast bacon, not sliced, averaged 41.3c per pound as compared with 40.5c in March, and 39.3c in February, the advance being general

throughout the country. Boiled ham averaged 62.5c per pound as compared with 59.8c in March and 59c in February. In fish, cod steak, haddock, and finnan haddie showed little change. Halibut averaged slightly higher for the Dominion but was slightly lower in New Brunswick, Quebec, and Saskatchewan. Fresh whitefish was lower in some of the cities in Ontario and Quebec. Lard averaged 22.5c per pound as compared with 21.5c in March and 20.8c in February, there being a general advance throughout the Dominion.

Eggs, fresh, averaged 33.5c per dozen as compared with 50.7c in March, 56.2c in February, and 71.2c in January. Milk averaged 12.4c per quart as compared with 12.7c in March, 15c in February, and 15.3c in January. The price fell in Three Rivers, Sherbrooke, St. John's, Kingston, Guelph, St. Thomas, and Victoria. Butter, dairy solids, averaged higher than in March by 7c per pound, dairy prints, by 8c per pound, and creamery prints, by 1.4c per pound, there being slight increases in most of the cities with decreases, however, in some. Cheese showed little change on the whole.

Bread, flour, and rolled oats were steady. Corn meal, barley, and tapioca were unchanged. Canned vegetables were unchanged but onions averaged higher. Potatoes were down, being lower in each province except British Columbia. Prunes and evaporated apples were higher but raisins and currants were slightly lower. Jam and marmalade averaged slightly lower. Sugar averaged 8.4c per pound in April as compared with 8.6c in March, 8.8c in February, and 9.2c in January. Black tea averaged slightly higher. Cream of tartar averaged lower. Laundry starch and soap were steady.

Anthracite coal fell in St. Hyacinthe, Niagara Falls, St. Catharines, Hamilton, Brantford, Galt, Guelph, Kitchener, Stratford, and Chatham. Bituminous coal was also lower being down at Halifax, Galt, Kitchener, Moose Jaw, and

Edmonton. Wood was slightly lower. Rent was unchanged.

Wholesale Prices

GRAINS AND FODDER.—Wheat, No. 1 Manitoba Northern, had fallen to \$1.37 per bushel at the end of March, a decrease of 10c for the month, but during April more than recovered, rising to \$1.49. Ontario winter wheat rose from \$1.37 to \$1.60 at Toronto. Barley was up from 64c to 69c per bushel at Winnipeg and oats from 47c to 53c. Corn at Toronto advanced from 73c per bushel to 76c. Flaxseed at Winnipeg was up from \$2.23 to \$2.49 per bushel. Hay at Montreal was \$1. per ton higher at \$30.

ANIMALS AND MEATS.—Cattle at Winnipeg were up from \$6.75 per hundred pounds to \$8.00. Choice steers at Toronto advanced from \$8.00 to \$8.50 per hundred. Dressed beef, hindquarters, rose from 18c per pound to 22c. Hogs advanced from \$12.50 per hundred pounds to \$13.24 but fell back to \$12.50. Dressed hogs fell from 19c per pound to 18c. Sheep advanced from \$9 per hundred pounds to \$10 but fell back to \$9. Poultry was steady.

DAIRY PRODUCTS.—Butter, creamery prints, at Toronto advanced from 43c per pound to 46c at the beginning of April but fell back to 43c at the end of the month. Dairy butter rose from 36c to 38c. Cheese was down from 17c per pound to 16c. Fresh eggs at Montreal rose from 33c to 35c per dozen, but fell back to 31c.

FISH.—Halibut fell from 15c per pound to 12c on the Atlantic coast. The spring catch of the Lunenburg fleet was reported to be comparatively large and the price was expected to be between \$7.00 and \$8.00 per quintal. The early lobster catch was reported light but prices were high. The market for dry fish in the West Indies continued good but the market for pickled fish continued dull.

FRUITS AND VEGETABLES.—Bananas, lemons, and oranges were slightly lower. Evaporated apples and prunes advanced 1c per pound but raisins were lower. Potatoes declined at Montreal from \$1.05 per bag to 95c. Canned tomatoes were higher.

MISCELLANEOUS FOODS.—Rolled oats declined slightly. Winter wheat flour was easier. Sugar was down 75c per hundred pounds. Glucose and molasses were lower. Maple sugar came on the market at 17c-18c per pound.

TEXTILES.—Raw cotton was slightly lower. Some lines of manufactured cottons were reduced between 5 per cent and 10 per cent. Gingham, however, advanced. Jute and hessians advanced slightly. Flax fibre was down from 30c per pound to 28c.

HIDES, LEATHER, BOOTS, AND SHOES.—Calfskins declined from 10 per pound to 8c. Leather and boots were steady.

METALS AND IMPLEMENTS.—Iron, galvanized sheets and tin plates declined. Steel bar advanced. Antimony, copper, lead, nickel, zinc, and tin declined but silver advanced.

FUEL AND LIGHTING.—Anthracite and bituminous coal were steady.

BUILDING MATERIALS.—The lumber market was steady. Lead pipe was slightly lower. Linseed oil declined from \$1.08 to 98c per gallon. Turpentine advanced from \$1.27 to \$1.30. Paris green fell from 32c to 31c per pound.

HOUSE FURNISHINGS.—Glass tumblers were again lower, the decline being 5 per cent.

DRUGS AND CHEMICALS.—Caustic soda was down from 51½c per pound to 5c and soda ash from \$2.85 per hundred to \$2.75.

MISCELLANEOUS.—In raw furs, mink skins were down from \$15 each to \$13. Malt advanced from \$1.03 per bushel to \$1.05. Newsprint paper was down from 3¾c per pound to 3½c. Pulp, ground wood, was down from \$35-40 per ton to \$30-40. Crude rubber advanced from 16c per pound to 17c.

PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movement of prices in other countries as compared with Canada.

The index numbers of retail prices which are listed are from official sources unless otherwise stated. The authorities for the wholesale price index numbers are named in all cases.

United Kingdom

WHOLESALE PRICES

The Board of Trade index number of average prices for March (taking prices for 1913 as 100) was 163.3, showing a reduction of 1.2 per cent in the general level compared with February. The rate of fall from month to month showed a continued decline. The March level for food was 1.5 per cent below that of February. Industrial materials declined 1.0 per cent of our groups showing decreases and the cotton group an increase of 2.3 per cent. The index numbers of the *Economist* and of the *Times*, however, showed higher levels for April than for recent months.

COST OF LIVING

At the beginning of April the official index number for cost of living showed the following percentages above 1913: food, 73; rent, 55; clothing, 160; fuel, 115; sundries, 95; and all items 82. For the month there was a marked decline in the prices of eggs, while milk, fish and bacon also became considerably cheaper. There were substantial advances in prices of butter and British mutton, and smaller increases in those of frozen mutton, bread and flour, sugar and tea. For the beginning of May, the following percentages above 1913 prices have been reported: Food, 72; rent 53 to 54; clothing, 140; fuel, 110; sundries, 95; and all items, 81, thus showing a

slight drop in the average for all items and in each group except sundries.

France

The official index number of wholesale prices, basis 1901-1910=100, stood at 362.6 for April as compared with 355.0 for March and 354.2 for February. During March the index for foods rose nearly 4.8 per cent above the February level, while the index for industrial materials dropped 3.4 per cent.

In Paris the retail prices for 13 articles in March averaged 194 per cent above 1914 levels as compared with a level 207 per cent higher in February.

Belgium

The official index number (unweighted) of retail prices of articles at Brussels, April, 1914=100, showed a decrease of 4 points or .97 per cent in February from the level of prices in January. The index number for the same 56 articles for the Kingdom dropped 1.8 per cent during the same month. The index of wholesale prices in Belgium in February compared with prices in January was 97.

Holland

RETAIL PRICES

The official index number of retail prices, published by the Central Bureau of Statistics, covering 29 articles—three washing materials, one fuel and the remainder mainly foods—on the base 1893=100, was 185 in February showing a decrease of 2 points or 1.1 per cent from the level of the previous month.

WHOLESALE PRICES

The official index number of wholesale prices of 53 articles, base 1901-1910=100, stood at 185 in February, an increase of 2 points, or 1.1 per cent above

*For South Africa, Australia and New Zealand base is taken as 1000 instead of 100. *a*. Average for year. *b*. Quarter beginning in specified month. *c*. 230 commodities, 1890-1909; 272, 1910-1914; 271, 1915-1922. *d*. New index number is joined to old index number (38 commodities) and all converted to base 1913-100. *e*. The commodities in these two new index numbers are in the one case articles chiefly exported; in the other case, articles chiefly imported. *f*. First of month. *g*. Middle of month. *h*. End of month. *j*. Monthly average.

the level of January. The index number for foods alone increased 1.7 per cent during the period under review.

Finland

COST OF LIVING

The official index number of cost of living in Finland, base July, 1914=100, was 1102.2 in February as compared with 1055.1, in the previous month, and increase of 4.5 per cent. For the first time, however, a separate item for taxes appears, the index number for which is 2093.4. Foods alone dropped during the month about .7 per cent, and other items remained practically stationary.

Italy

COST OF LIVING

The index number of cost of a budget of food, clothing, rent, heating, light and sundries for a family of five persons at Rome, (the first half of 1914=100) was 425.87 for February, a decrease of 4 points or nearly 1 per cent from the level for January. Food, clothing and sundries declined slightly, heating and rent showed no change while lighting increased nearly 13 per cent, owing to the increased cost of electricity.

India

COST OF LIVING

The official index number of cost of living in Bombay shows for March no change from the level of the previous month. On the base, July 1914=100, the index is 165 both in February and March. Foods increased one point, fuel and lighting declined 5 points, or nearly 7 per cent and clothing increased 8 points or 5.5 per cent. House rent remained the same.

New Zealand

WHOLESALE PRICES

The official index number of wholesale prices of eight groups of commodities, base 1909-13=100, is at 1872 for

February, the lowest level since September, 1919, and 2.2 per cent below the index for January, 1922. During the month under review the chief decrease was one of 16 per cent in agricultural products. Slight decreases were shown in all other groups.

RETAIL PRICES

The official index number of retail prices of three food groups (59 articles) base 1909-13=100, is 1549 for February, a decrease of 25 points, or 1.6 per cent from the level of the previous month. The groceries group has shown a fall of 60 points, due to a decrease in price of potatoes, the dairy products group a rise of 5 points, due to an increase in the price of eggs, which was largely counteracted by a fall in the price of milk. The meat group prices have remained almost stationary.

United States

WHOLESALE PRICES

The index number of wholesale prices for March compiled by the Bureau of Labour Statistics showed an increase of one point or two-thirds of one per cent from the level in February. Farm products showed an increase of 1½ per cent; food, fuel, building materials, chemicals and house furnishing goods showed no change. The groups, cloths and clothing, and metals and metal products, prices in March declined slightly. The group of miscellaneous commodities showed an increase of 2 per cent.

The Federal Reserve Board's index number of wholesale prices is now computed from 100 wholesale price quotations. The revised figures are given in this issue. The index number for March was 147, an increase of one point, or .7 per cent over the revised figure for February. Imported goods and domestic goods each advanced one point; raw materials and consumers' goods increased two points, but producers' goods dropped one point.

Gibson's average index number of prices of 22 articles of food for April was

73.5, an increase of only .2 points, nearly .3 per cent above the average for March. This is the highest level reached in the past twelve months.

Dun's general index number for April 1, was \$166.263, and for May 1, \$166.096, a decrease of 2 per cent for the period from March 1 to April 1, and an increase of 1.1 per cent during the succeeding month. All groups with the exception of the dairy and garden produce group were higher on May 1 than a month earlier, the most pronounced advance being one of 5.5 per cent, in breadstuffs. The clothing class shows practically no change, metals advanced considerably, and the miscellaneous group slightly.

The index number of the wholesale prices of foods calculated by the Annalist, New York, was 182.710 for the middle of April as compared with 179.893 for April a year ago.

COST OF LIVING

The United States Bureau of Labour Statistics has issued a report on changes in the cost of living in 32 cities in the United States, showing changes by percentages over 1913 levels, down to

March, 1922. Food averaged 38.7 per cent higher; clothing, 75.5 per cent; rent, 60.9 per cent; fuel and light, 75.8 per cent; house furnishings, 106.2 per cent; miscellaneous items, 103.3 per cent; and all items 66.9 per cent.

An index number of the changes in the cost of living in Massachusetts has been calculated by the Special Commission on the Necessaries of Life showing the following percentage increases over 1913 levels by March, 1922; Food, 35.4 per cent; clothing 76.5 per cent; shelter (rent) 62.5 per cent; fuel and light 72.8 per cent; sundries 74 per cent; and all items combined 55.6 per cent.

A calculation of the percentage changes in the cost of living in the industrial centres of the United States has been made and published by the National Industrial Conference Board, an organization maintained by the various employers' associations in the United States, and shows the following percentage increases over 1913 levels for March 1922: food 39 per cent; shelter 65 per cent; clothing 54 per cent; fuel and light 74 per cent (fuel 84 and light 55); sundries 74 per cent; and all items combined 54.7 per cent.

IMMIGRATION DURING THE FIRST QUARTER OF 1922

THE following statements compiled from information furnished by the Department of Immigration and Colonization give details as to the total number of immigrants into Canada during the first quarter of 1922. For purposes of comparison the figures for the previous quarter and for the corresponding quarter of 1921 are also given.

During the fiscal years from 1915 to 1922, inclusive, the total numbers of immigrants into Canada were as follows:

Fiscal year	Total immigrants
1915-16.....	48,537
1916-17.....	75,374
1917-18.....	79,074
1918-19.....	57,702
1919-20.....	117,336
1920-21.....	148,477
1921-22.....	89,999

The table on page 544 gives the nationality, sex, occupation and destination of all immigrants who entered Canada during the quarter under review.

IMMIGRATION TO CANADA DURING THE FIRST QUARTER OF 1922

Period	Great Britain and Ireland	From U.S.A.	Other Countries	Totals
1922				
January	467	1,003	975	2,445
February	509	1,078	596	2,183
March	1,504	2,670	1,374	5,548
First quarter, 1922....	2,480	4,751	2,945	10,176
Fourth quarter, 1921..	4,217	5,191	4,575	13,983
First quarter, 1921....	7,232	7,979	5,379	20,590

RECENT LEGAL DECISIONS AFFECTING LABOUR

ON page 486 of this issue a summary is given of a legal decision given in the High Court of Ontario with reference to the enforcement of recommendations of Boards of Conciliation and Investigation appointed under the Industrial Disputes Investigation Act, 1907.

Minor may sue father for wages promised if free from parental control. No appeal to Supreme Court of province allowed.

A youth of seventeen years brought an action against his father in Alberta for wages earned during the time he was working for his parent. He was awarded \$273.75 and costs by a justice of the peace. This judgment was confirmed on appeal to the District Court. The father then appealed to the Supreme Court of Alberta. From the evidence given before this Court it appears that the plaintiff, a son of the defendant, had left home when he was fifteen years old owing to a dispute with his father, and worked for another farmer who paid him \$75 a month. According to the trial judge he was at that time an able-bodied young man, as competent as though of age. The son's evidence that he had a hiring agreement with his father when he returned to his father's house was accepted by the Court.

Two points were considered by the Supreme Court: (1) Does an action lie under the circumstances, the plaintiff being the minor son of the defendant? (2) Does an appeal lie in such a case from the judgment of the District Court judge? As to the first question, the Court held that it could not be said the plaintiff was still under the control and

The two legal decisions which are summarized below have reference to the right of a son to sue his father for wages, and to the liability of an employer for injury to a customer through the negligence of an employee.

in the custody of his father, but he was quite competent to look after and support himself, and the fact that he remained away a year earning his own living showed that the father did not consider it necessary to look after him. If a child enters, as he can do, into a valid contract of service with his parent for the payment of wages, the parent will not be entitled to retain such wages, but the child will be able to maintain an action for them against his parent. If the father emancipates the child from his control, every right to his earnings would at once cease to exist. With regard to the second point it was held that there was no appeal to the Supreme Court, as the Criminal Code of Canada provided that "When an appeal against any summary conviction or order has been lodged in due form... the Court appealed to shall try, and shall be the absolute judge as well of the facts as of the law." This part of the criminal code is made applicable and becomes in fact a part of An Ordinance respecting Masters and Servants. It is remarked that "cases of this nature are undesirable and rare. The presumption is in favour of the father and magis-

trates should be careful to see that the evidence in support of the plaintiff's claim is very clear and satisfactory."

Employer liable for injury to customer caused by negligence of employee

A customer one day bought a parcel to the warehouse of an express company some time after the office was closed. The weighing clerk accepted the parcel and while he was writing a receipt for it, another clerk threw him a parcel. The weighing clerk not being ready did not catch it, and the parcel struck a mop, the handle of which flew up and struck the mouth of the customer, knocking out a tooth. The customer brought an action against the company to recover damages. In the trial court the action was dismissed. The plaintiff then appealed, and the case was heard in the Court of Appeal of Saskatchewan. The Court held that the plaintiff was in the warehouse as an invitee, a term which included persons on the business premises of the occupier, with his assent, engaged in a transaction of common interest to both parties. A decision from

The appeal was therefore dismissed with costs.

(*Alberta—Scheffner vs. Scheffner.*)

another case was quoted in which the court held that such a visitor, using reasonable care on his part for his own safety, was entitled to expect that the occupier should on his part use reasonable care to prevent damage from unusual danger which he knows or ought to know.

It was held that the defendant company's employee was guilty of an act of negligence when he threw an article to another employee before ascertaining that the latter was ready to catch it, and when the invitee was standing near the employee to whom it was thrown.

The judgment of the lower court was therefore set aside and the plaintiff was awarded \$190 damages with costs.

THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE JAMES MURDOCK

DEPUTY MINISTER—F. A. ACLAND.

Volume 22

JUNE, 1922.

Number 6

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

This issue of the LABOUR GAZETTE contains the usual monthly articles relating to industrial conditions, strikes, wage agreements, prices, etc. It also contains condensed reports of the proceedings of two recent trade union conventions, of the new regulations respecting immigration into Canada and a number of articles of general industrial interest, including a recent decision of the United States Supreme Court on the Child Labour Tax law, and summaries of recent laws respecting employment of children and workmen's compensation in the United States.

At the beginning of May the percentage of unemployment among the members of local trade unions stood at 10.4, as compared with 9.6 at the beginning of April, and with 16.3 at the beginning of May, 1921. Considerable short time was again reported by many of the organizations making returns. During April, according to statements received from over 6,000 employers, the employment situation showed considerable improvement as compared with March, there being steady and large increases in activity during the month. Employment was practically on the same level as during April of last year.

The average cost of the weekly family budget of 29 staple foods in 60 cities was \$10.22 at the beginning of May, as compared with \$10.26 at the beginning

of April; \$12.25 in May, 1921; \$16.65 in May, 1920; and \$7.43 in May, 1914. In wholesale prices the index number stood at 226.1 for May, as compared with 225.0 for April; 247.3 for May, 1921; 356.6 for May, 1920, (which was the highest point reached); 284.1 for May, 1919; and 136.3 for May, 1914.

The time loss due to industrial disputes during May was less than during April, 1922, but greater than during May, 1921. There were in existence during the month 30 strikes, involving about 13,186 workpeople with an estimated time loss of 278,160 working days. Ten of these strikes were reported as having commenced during May. Four of the strikes commencing prior to May and seven of the strikes commencing during May terminated during the month, leaving 19 strikes involving 9,807 workpeople on record at the beginning of June.

Proceedings under the Industrial Disputes Investigation Act

During the month of May the Department received reports of two Boards of Conciliation and Investigation established to deal with disputes between (1) the Ottawa Electric Railway Company and certain of its employees being members of Division 279 Amalgamated Association of Street and Electric Railway Employees of America, and (2) the Domi-

nion Coal Company, the Nova Scotia Steel and Coal Company, and Acadia Coal Company, members of the British Empire Steel Corporation, and certain of their employees respectively, being members of District 26, United Mine Workers of America.

Four applications were received for the establishment of Boards, and in three cases Boards were established. The personnel of another Board which had been established in the previous month was completed.

Jottings

Conventions of the following Canadian and international labour organizations will be held during the months of July and August, 1922:

Canadian Carpet Weavers' Beneficial Association, at Toronto, Ont., in July.

International Steel and Copper Plate Engravers' League, at Chicago, Ill., on July 3.

International Alliance of Bill Posters and Billers of United States and Canada, at Kansas City, Mo., on July 3-8.

International Broom and Whiskmakers' Union, at St. Louis, Mo., on July 10.

Glass Bottle Blowers' Association of the United States and Canada, at Bellaire, Ohio, on July 10.

International Stereotypers' and Electrotypers' Union, at Cincinnati, Ohio, on July 17-22.

International Plate Printers' and Die Stampers' Union of North America, at Ottawa, Ont., on July 17.

International Union of Mine, Mill and Smelter Workers, at Denver, Colo., on August 7.

International Photo-Engravers' Union of North America, at Chicago, Ill., on August 21 to 26.

An important Order in Council, dated June 7, 1922, relating to the Fair Wages policy of the Dominion Government, is being printed and issued as a supplement to this number of the LABOUR GAZETTE. The purpose of the Order in Council is to provide more effective measures to secure the observance of the Fair Wages policy. To this end the provisions in government contracts for the

protection of the workmen employed are made as nearly uniform in terms and administration as possible.

The second bulletin of a series on Vocational Education has recently been issued by the Department of Labour, Ottawa. The bulletin contains the following articles: "Essentials in a System of Vocational Training", "Correspondence Instruction in Nova Scotia", and "The Vocational Library—Mathematics". The bulletins are being prepared and issued by the Department in compliance with a resolution adopted at the National Conference on Technical Education held in October, 1920.

The Ontario Legislature on May 31 appointed a select committee of its members to inquire into and hear representations from municipalities and persons interested in the subject of town planning and housing legislation. This committee will sit during the recess.

A tentative scale of wages for women operatives in the textile industries was issued during May by the Ontario Minimum Wage Board. A public hearing was held by the Board in Toronto early in June for the purpose of considering any suggested changes in the scale as proposed. The new order, like the earlier orders of the Board, provides minimum scales which vary according to the locality, the highest rates being fixed for Toronto, with lower rates for the less populous centres. Full particulars of the order will be given in a future issue of the LABOUR GAZETTE.

A regulation recently issued under the Quebec Motor Vehicles Act authorizes the principal of a technical school to issue a motor machinist's license to any person who holds a chauffeur's license and is engaged in repairing vehicles in a licensed garage, provided such person can prove his competency by practical demonstrations before a technical school instructor. This license entitles its holder to have his name, with statement of qualifications, forwarded by the Provincial

Automobile Bureau to automobile clubs, and car owners in the province.

A report of the superintendent of neglected children for Saskatchewan shows that on December 31, 1921, there were 519 mothers' pensions in force in the province, 475 of which were being paid to widows and 44 to mothers whose husbands were incapacitated and unable to make proper provision for their families. The amount of payroll for the month of December was \$13,745 and the average per family \$26.50. Since the Mothers' Pensions Act came into force in February, 1918, 688 pensions have been granted, amounting to \$249,203 and affecting 2,361 children.

Announcement is made of the reappointment by President Harding of three members of the United States Railroad Labour Board, whose terms of office recently expired, for full five year terms. These members are: Mr. Arthur O. Wharton of the Labour group; Mr. G. W. W. Hanger of the public group; and Mr. J. H. Elliott of the management group. It is also announced that at an executive session of the Board on April 27, Mr. Ben W. Hooper, former governor of Tennessee and member of the public group was elected chairman to succeed Judge R. M. Barton, also of Tennessee, who has served as chairman since the organization of the board two years ago. Mr. G. W. W. Hanger was elected to succeed Mr. Hooper as vice-chairman.

Officials of the Associated Industries of Kansas, an employers' organization, have announced that proceedings will shortly be taken in the United States Supreme Court to enjoin the Industrial Court from enforcing its recent order fixing the minimum wage for women in laundries and factories at \$11 a week, and in mercantile establishments at \$10.50. The previous minimums were \$10.50 and \$9.50.

It is stated that the Australian government is taking steps to recruit in England 6,000 boys between the ages of 15 and 18 years for apprenticeship to South Australian farmers, under government guardianship. The boys are wanted to replace Australian soldiers killed in the war. Each boy will be paid four shillings a week for pocket money, the remainder of his earnings being placed to his credit in the State treasury, where it will earn 4½ per cent interest until the whole sum is turned over to him when he attains his twenty-first year. This amount would assist him in becoming an independent farmer.

In Denmark, a recent law permits the State to distribute annually 250,000 crowns to municipal and private agencies for the establishment of day nurseries, trade schools and vacation colonies for school children.

The Norwegian parliament on March 27 passed without amendment a bill providing for compulsory arbitration in labour disputes. The labour representatives in parliament were asked not to vote against the bill in view of the tremendous and increasing volume of unemployment. The law remains in force for one year.

Under the Indian Factories Amendment Acts recently passed by the Indian legislature, the hours of labour are reduced from 72 to 60 a week for adult workers, with a maximum of 12 hours in any one day, while for children the maximum is fixed at six hours a day. The minimum period of rest is increased from half an hour to one hour; and Sunday work, except in certain cases, is forbidden. The minimum age for juvenile employment is raised from 9 to 12. The government is strengthening the inspection staff to enforce these new regulations. This law comes into force on July 1, 1922.

Distribution of emergency unemployment relief in Canada By an order-in-council dated March 18, 1922, an extension was allowed in the period of the operation of the Dominion scheme of

emergency unemployment relief, which would otherwise have ended on March 31. (LABOUR GAZETTE, February, 1922, page 192). The new order stated that, since winter conditions would probably continue in some parts of the Dominion until April 15, it was desirable to extend to that date the period of Dominion aid to municipal unemployment relief works and similar work in unorganized districts, and to extend until April 30 the period of Dominion aid to municipalities in the direct relief of the unemployed generally, and particularly of the returned soldiers, of their districts. By the terms of an order-in-council dated May 6 the federal grant may be continued beyond April 30 in the case of Manitoba, in which province exceptional conditions exist.

Convention of government labour officials of United States and Canada. The ninth annual convention of Governmental Labour Officials of the United States and Canada was held at Harrisburg,

Pennsylvania, from May 22 to 26. The president Mr. Frank E. Wood, Commissioner of Labour and Industrial Statistics, Louisiana, who occupied the chair, outlined the purposes of the association of government labour officials. He said that membership was limited to officials of the departments of labour of the federal and state governments and Canadian provinces, and that their aim was to review and discuss legislation to safeguard all workers and reduce accidents to the minimum, without overlooking the rights of employers and the public. Among the subjects dealt with at the convention were the following: child welfare; inspection, safety and sanitation; employment; mediation and conciliation; compensation legislation; mi-

nimum wage and hours of labour; and rehabilitation and medical supervision. Mr. H. C. Hudson of the Ontario Employment Service Bureau gave a lantern talk on the Employment Service of Canada.

Reports from twenty states showed that child labour and workmen's compensation laws were being strengthened. Amendments to the compensation laws were being made in fourteen states. Reference was made by Dr. C. B. Connelley, Commissioner of the Pennsylvania Department of Labour to the recent decision of the Supreme Court of the United States declaring unconstitutional the Federal child labour tax law. He stated that this decision had placed child labour legislation squarely before the states. In order to secure the proper administration of labour legislation, he said, it was clearly the duty of the States to make their own laws in the interest of the industries and workers. The laws should make specific provisions for enforcement, and divided responsibility in administration should be prevented.

New employment services in the United States. During 1921 legislation was enacted in a number of states of the United States respecting

public employment services. The state of Illinois provided for the establishment of free employment offices in towns of 25,000 population as well as in the larger cities. In Nebraska the establishment of employment offices by newly created welfare boards was authorized. A free employment service was created in North Carolina under the department of labour and printing; besides the usual employment service the department will give vocational guidance to minors, investigate causes of unemployment and make suggestions for a legislative remedy. North Dakota created a free employment service under the department of agriculture and printing, and provided for co-operation with federal and local offices.

12-hour day in United States steel industry President Harding held a conference during May with forty-one executives of United States steel companies

in order to discuss with them informally the possibility of completely abolishing the 12-hour working day in the steel industry. The 12-hour day was one of the causes of the steel strike of 1919. The President sought by means of this conference to bring the steel companies to accept voluntarily the 8-hour day, with three shifts for plants operating continuously. After the conference the steel companies authorized Judge E. H. Gary, chairman of the Board of the United States Steel Corporation, in his capacity as president of the iron and steel industry, to appoint a committee of five members,—this committee to devise ways and means to meet the President's request. Shortly after this action was taken, the Bureau of Labour Statistics of the United States Department of Labour issued a report on changes in the hours of labour in the iron and steel industry in the United States during the ten years ending 1920. This report shows that 63 per cent of the blast furnace workers were still in 1920 working 12-hour shifts for either seven or six days each week. In the ten years under review the employees who worked 12 hours a day for 7 days a week decreased in number from 75 per cent to 29 per cent of the total working force; eleven per cent, however, of all blast furnace employees continued to work a 12-hour day for six days each week, and 23 per cent for six and seven days alternately. The 8-hour day was extended in the same period to about 17 per cent of the employees working seven days, and to one per cent of those working six days each week. In the steel making department over 75 per cent of the Bessemer converting employees continued in 1920 to work the 12-hour shift for either six or seven days a week, while 22 per cent were on 8-hour shifts. About 50 per cent of the open hearth furnace employees were still employed for 12 hours a day, and 30 per cent worked 8-hour shifts. Twelve-hour shifts were the

rule for 60 per cent of the rail mill and blooming mill employees, for over 50 per cent of those in the bar mills, and for 20 per cent of those in the puddling mills.

Technical education for workers in paper mills

Facilities are being provided in the United States and Canada for the technical instruction of workers in pulp and paper mills in all branches of the industry up to the production of the manufactured product. Some years ago the organizations of technical men in the industry in the two countries appointed a joint executive committee, which drew up plans for the preparation of suitable text books. The sum of \$40,000 was raised with the assistance of the American Pulp and Paper Association, representing the manufacturers in the United States, and the Canadian Pulp and Paper Association. The series of books is to be in five volumes, of which the first two have already appeared and the others are approaching completion. Volume 1 contains the following sections: Arithmetic, Mathematical Applications, How to Read Drawings, and Elementary Physics. Volume 2 deals with Mechanics and Hydraulics, Elementary Electricity and Elements of Chemistry. Volume 3 takes up the Manufacture of Pulp and Volumes 4 and 5, the Manufacture of Paper. The various sections are written by experts, and revised by an editorial board in order to adapt them for use in correspondence courses. They are issued either in bound volumes, or in the form of study papers of about 50 pages each. At least five paper mill towns in Canada are said to be conducting or planning classes in which these text books will be used, and several Canadian companies are helping their men to purchase the books on the installment plan. The text is distributed in Canada by the *Pulp and Paper Magazine*, Gardenvale, Que., and in the United States by the Technical Association of the Pulp and Paper Industry, 18 East 41st Street, New York City.

In the United States steps have been taken by the Federal Board for Vocational Education and the American Pulp and Paper Association, to establish training classes for foremen in paper mills. A training course for foremen has been conducted at Erie, Pa., by federal and state authorities, and similar courses are being conducted by the large paper mills in the states of New York, Massachusetts and Wisconsin.

Miners' blindness due to defective lighting

A sub-committee of the British Medical Research Council in a report on miners' nystagmus, an eye disease con-

fined to workers in coal and ironstone mines where safety lamps are used, expresses the opinion that the essential factor in the production of the disease is deficient illumination; and that other factors such as position during work, accidents, alcoholism, infection, malnutrition, hereditary predisposition, and errors of refraction are of secondary importance only; while depth of workings, thickness of seams, and the ordinary gaseous impurities in mine air have no direct influence on the disease. The defective illumination, they state, is due to the low illuminating power of the safety lamps used by coal miners, to the distance these lamps are placed from the object the miner has to look at, and to the great absorption of light by the coal and the coal-dust covered surfaces. As incapacity due to nystagmus is rare among coal miners working with open lights, they recommend that everything possible should be done to bring the standard of illumination of safety-lamp pits up to that of open-light pits. To this end the candle-power of safety lamps should be increased to two or three candle-power (the average illumination of the coal face of this type is stated to be about .018 foot-candle), or adaptable electric light should be used. At parts of the pit other than the coal-face visibility can be increased by white-washing, as well as by stone-dust-

vention of explosions). The committee recommend that both workman and employer should be granted power to appeal to the medical referee, at intervals of not less than six months, to assess the incapacity present. In 1919, it is stated, 6,449 miners in Great Britain received compensation because of the disease and over 80 per cent of the cases came from coal-face workers.

The Committee state that the prevailing belief that nystagmus causes permanent damage to, or even total loss of, sight is entirely erroneous.

Increased working hours in Holland and Switzerland

A bill to modify the Labour Act of 1919, which established a 45-hour week for industrial workers in Holland, has been recently introduced by the Dutch Minister of Labour. The earlier Act established an 8-hour working day five days each week, with five hours on Saturdays. The new measure will add half an hour to each working day, making a weekly average of 8 hours a day with a rest day on Sunday. The minister may also, as the result of joint representations from both parties, or at his own discretion, allow overtime to be worked, provided that the total number of hours worked shall not exceed 48 per week throughout the year. In factories working continuously with three shifts, each employee may be employed for 56 hours each week without a Sunday rest. This latter clause is provisional until October, 1924. For the building trade the minister proposed a 10-hour day and 55-hour week during the period from April 1 to October 1. The workers in the building trades have protested against this innovation. The Netherlands Federation of Trade Unions instructed its executive to take every possible measure "to keep the reaction in check".

Under the Swiss Factory Act as amended June 27, 1919, the Federal Council was empowered to authorize a weekly maximum duration of work of

52 hours if and so long as this is justified by urgent necessity, particularly if, through the application of provisions fixing a 48-hour week, an industry runs the risk of being unable to withstand foreign competition on account of the duration of the working hours in other countries. In accordance therewith an Order was issued on April 4, 1922, extending the weekly working hours to 52 in certain branches of industry. For wood-sawing, carpentry and brick and tile making this extension will remain in force until the middle of October next, for specified branches of the embroidery trade until the end of the current year, for the linen trade up to the end of June, and for straw plant working up to the end of May.

Strike of Chinese seamen at Hong Kong Early in the present year the Chinese Seamen's Union at Hong Kong declared a strike

with the object of obtaining an increase in wages. In the course of a dispute a military order was issued declaring the Seamen's Union an unlawful society, and their hall was closed by the government. Nearly all the other guilds in Hong Kong declared their intention to support the seamen if this order was not revoked, and a little later all guildsmen stopped work. Immediately after the general strike took place, steps were taken to bring the seamen's strike to an end, and on March 5 an agreement was signed granting substantial increases to the striking seamen. The agreement covered all the steamship lines touching at Hong Kong and involved an increase of from 15 to 30 per cent. An unusual feature of the agreement was provision for the granting of half pay to all the seamen from the date they left work at the commencement of the strike until they should return to work; but if positions were not available for men ready to return to work then half pay shall continue for any unemployment period not exceeding five and a half months after the general return to work. The owners also agreed to assist in inaugu-

ating a system of engaging crews that would minimize as far as possible any irregularities that might exist in connection with the pay of seamen.

Oriental Seamen's Union It has recently been announced that Japanese and Chinese seamen are to be admitted to membership in the International Seamen's Union of America and its affiliated organizations, which will establish branch unions in the principal seaports of China and Japan and immediately launch a campaign of organization among oriental seamen. It is stated that this is the first time in the history of the American labour movement that a union chartered by the American Federation of Labour has admitted orientals, although workers of Chinese and Japanese nationality have repeatedly applied for membership.

Workers' pensions in France In a recent issue of *L'Usine* published in Paris, France, an account is given of certain workers' pension plans which have been established by a number of French manufacturers. Most of these plans have for their object the encouragement of long service and thrift, and special provisions with respect to contributions are made for employees with large families. A typical plan adopted by M. Marcelot, director of iron works at Eurville is described. Contributions from the workmen are based on their yearly wages, the minimum contribution of employees being one per cent. The owners contribute an equal amount during the first ten years of service. During the next ten years of service the employers contribute 1½ per cent and after 20 years, 2 per cent. If an employee contributes to the pension fund more than the minimum, the employers increase their proportion. For a worker contributing 2 per cent of his wages the owner gives 3 per cent for the first ten years, 3½ per cent for the second ten years and 4 per cent

after twenty years' service. Heads of families with four children under 14 years are relieved of half their contributions, the owners making up the amount; and those with five children have no payments at all to make. A workman entering on this plan at 45

years of age with earnings of 4,000 francs a year, and contributing one per cent would receive an annual pension of 250 francs at retiring age. One who followed the plan from the age of 15 would receive a pension of 1,240 francs, or 2,730 francs if he contributed 2 per cent of his wages.

GENERAL REVIEW OF THE INDUSTRIAL SITUATION

I.—The Labour Market, Strikes, Prices.

The Labour Market

EMPLOYMENT as reported by employers showed a distinctly upward movement during April, in spite of the marked fluctuations caused by the opening and closing of the railway car shops, which affected several thousand employees. The level of employment was very much the same as that indicated by the firms making returns for April of last year. Unemployment as reported by trade unions was very slightly more prevalent than at the end of March, but the situation compared favourably with the corresponding period in 1921. A further increase was registered in the daily average of business transacted by the office of the Employment Service during the early part of April, there being gains in the vacancies notified, the applicants placed, and also in the number of persons applying for work.

EMPLOYERS' REPORTS

The volume of employment as reported by employers showed a decidedly upward trend during April, a great deal of the increases being due to the spring expansion in the out-of-door industries. The tendency in all provinces was favourable throughout the month, but the additions to staffs in Quebec and Ontario greatly exceeded those reported elsewhere. Employment during April was practically on the same level as during the same month of 1921, the index number being less than one per cent below that indicated for April of last year.

The most pronounced increases in activity during the month under review occurred in railroad construction and maintenance; employers in that industry added over 6,000 men to their staffs largely in the Prairie provinces. The gains reported in saw mills were also extensive, providing work for approximately 5,800 persons, of whom Ontario mills absorbed a large proportion. Building construction was very much more active, and highway construction also employed a substantially larger number of workers. Towards the latter part of April the logging industry showed considerable expansion especially in Quebec; this gain however, was of a temporary character representing river driving operations. The recommencement of the extension and improvement work begun last autumn on the Toronto municipal street railway caused large additions to staffs in the local transportation division. Increases in employment on a smaller scale than in the groups mentioned above occurred during April in fish canneries, (mainly in the Maritime Provinces) in pulp, paper, tobacco, glass, brick and cement plants and in petroleum refineries. The mining of metallic ores and of non-metallic minerals other than coal, also showed expansion. Employment in the iron and steel industries was in somewhat lesser volume during April, chiefly on account of the shut-down in the railway car shops. Some depression was also recorded in agricultural implements. The textile in-

dustries were slacker during April than for several previous months, especially in the garment, thread, yarn and cloth divisions. The tendency in coal mining was unfavourable, reductions in employment being recorded in Nova Scotia, especially in the early part of the month; while in Alberta and parts of British Columbia an industrial dispute involving many mine workers caused the situation to be unsettled. The operating departments of the railways reported some contraction in staffs, especially in the Maritime provinces.

As previously stated the situation as reported by employers during April was very similar to that indicated by the firms making returns for April of last year. Considerably more activity, however, was registered by boot and shoe manufacturers, electric current plants in street railways and cartage, shipping and stevedoring and highway construction and maintenance. Gains on a smaller scale were reported by manufacturers of lumber and its products, textiles, clay, glass and stone products. On the other hand, less favourable conditions were recorded in the iron and steel group, in communication, trade, electrical apparatus and non-ferrous metal products and in logging.

TRADE	Unemployment as in-
UNION	dicated by returns ta-
REPORTS	bulated from 1,412 trade
	unions with an aggre-

gate membership of 141,505 members showed a minor increase at the end of April, although the situation was very much more favourable than during the same period in 1921. The percentage of unemployment stood at 10.4 for the period under review as compared with 9.6 in the preceding month and with 16.3 in April of last year. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades, or who are idle because of sickness, or as a direct result of strikes or lockouts, are not consider-

ed as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based it should be understood that such figures have reference only to the organizations reporting.) Unions in New Brunswick Ontario and Saskatchewan registered slightly smaller percentages of idleness than in the preceding month, while in all other provinces less activity was indicated. As compared with the returns for April, 1921, Manitoba alone reported increased dullness; in Alberta practically no change occurred, while elsewhere the percentages of unemployment were rather smaller. Unions in the manufacturing industries showed slightly less activity than in March, largely on account of reduced employment for garment workers and in the miscellaneous manufacturing industries. On the other hand, smaller percentages of idleness were recorded by unions in the tobacco, pulp, paper, printing, publishing, furniture, textile and leather industries. Slight improvement was indicated in the iron and steel group, especially by boiler makers, railway carmen and pattern makers. The mining industry showed an increase in unemployment. The Nova Scotia coal miners were slacker, and conditions in the coal fields of Alberta and in parts of British Columbia were unsettled on account of the miners' strike in existence at the end of April. Asbestos miners in Quebec and quarry workers in Nova Scotia reported practically the same percentages of idleness as in March. The building trades were considerably busier during April, an indication of seasonal activity. Improvement was recorded by members of all trades in the industry with the exception of bridge and structural iron workers electrical workers and granite and stone cutters. Bricklayers, masons and plasterers, carpenters and joiners, painters and decorators and plumbers, especially reported increased activity as compared with March. A slightly smaller percentage of idleness was indicated

in the transportation group. Steam railways afforded rather more employment and street railway employees were very much busier. On the other hand, the shipping and stevedoring trades were not as fully employed as in March. Lumber workers and loggers reported a larger percentage of unemployment, while fishermen were somewhat busier. Hotel and restaurant employees, theatre and stage hands, and unclassified workers indicated a rather more favourable situation. Barbers and stationary engineers, however, were not as actively engaged as in March.

EMPLOYMENT OFFICE REPORTS Reports from the offices of the Employment Service of Canada for the month of April, 1922, show that 30,913 persons were referred to employment, and that 21,778 were placed in regular and 7,391 in casual work. Of the placements in regular employment, 19,175 were of men and 2,603 of women. Applications for employment during the period totalled 39,432, of which 30,795 were from men and 8,637 from women. The number of vacancies notified by employers to the Service was 26,524 for men and 9,928 for women, a total of 36,452. Considerable expansion was noted in the volume of business transacted by the offices as compared with the preceding period, while a comparison with the reports of a year ago showed a decrease in the daily transactions.

During the first half of April, 1922, the average number of applications made daily to the offices was 1,554, as compared with 1,462 during the latter half of March and with 2,154 during the first half of April of last year. Vacancies notified to the Service averaged 1,392 daily, as compared with 1,115 during the latter half of March and with 2,272 during the same period of 1921. The average number of placements effected daily was 1,119, of which an aver-

age of 797 was in regular work. At the end of March of this year placements averaged 912 daily, and during the early part of April a year ago the average number of placements per day was 1,763.

During the latter half of April, applications for work increased considerably over the previous period, reaching an average of 1,889 daily. During the corresponding period of last year applications averaged 2,034 daily. The average number of vacancies reported to the offices was 1,796 daily, as compared with 2,172 during the latter half of April, 1921. Compared with the preceding period placements again showed an increase, an average of 1,432 being effected daily during the latter half of the month. Placements in regular employment during this period averaged 1,110. A decline is shown when comparison is made with the reports for the corresponding period of last year when the average number of placements was 1,705 daily.

BUILDING PERMITS AND CONTRACTS AWARDED Employment in the building trades, as indicated by the value of the building permits issued in 56 cities during

April showed a further decided increase. The aggregate value of the buildings authorized rose from \$9,160,889 in March to \$14,082,170 for the month under review, an increase of \$4,921,281, or 53.7 per cent. The permits issued during April exceeded those reported for the corresponding month of last year by \$1,818,406, or 14.8 per cent, the value for April, 1921, having stood at \$12,263,764. British Columbia alone recorded a decline in the amount of building contemplated during April as compared with the preceding month, all other provinces indicating considerable increases. Of these gains, those registered in Quebec and Ontario, which in each case exceeded \$1,000,000, were the largest. As compared with the figures for April,

1921, New Brunswick, Quebec, Ontario and Manitoba reported considerable expansion in the volume of building contemplated. Of the decreases indicated in the remaining provinces, that in Alberta was the most pronounced. Of the larger cities, Montreal, Toronto and Winnipeg recorded increases in the value of the building permits issued as compared with the preceding month and also with April of last year. Vancouver reported a decline in the former and an increase in the latter comparison. Of the smaller centres, Moncton, St. John, Hamilton, London, Ottawa and Stratford registered decided gains in both cases.

According to the *Canadian Building Review* issued by MacLean's Building Reports, Limited, the value of the contracts awarded during April totalled \$29,428,400 as compared with \$13,465,000 in March and with \$21,622,000 in April of last year. Of the total for the month under review \$726,400 was to be spent in the Maritime provinces, \$22,578,800 in Quebec and Ontario, and \$6,113,200 in the four Western provinces. This would indicate that approximately 77 per cent of the contracts were awarded in Quebec and Ontario, less than 3 per cent in the Maritime district and not quite 21 per cent in the Western provinces. A further analysis of the returns shows that \$12,472,200 was to be used for residential purposes, \$8,203,300 for business erections, \$3,176,400 on industrial buildings, and \$5,576,500 on engineering contracts.

Strikes

The loss of time on account of industrial disputes during May was less than during April, 1922, but greater than during May, 1921. There were in existence at some time or other during the month 30 strikes involving about 13,186 workpeople with an estimated time loss of 278,160 working days, as compared with 24 strikes, involving 17,478 workpeople and 381,135 working days in

April, 1922; and 56 strikes, 9,323 workpeople and 175,889 working days in May, 1921. On May 1, there were on record 20 strikes, affecting 12,541 workpeople. Ten strikes were reported as having commenced during May, the same number as commenced during the previous month. Four of the strikes commencing prior to May and seven of the strikes commencing during May terminated during the month, leaving 19 strikes involving 9,807 workpeople on record at the beginning of June.

Prices

The movement in wholesale prices in May was marked by a slight upward turn. The index number stood at 226.1 for May, as compared with 225.0 for April; 247.3 for May, 1921; 356.6 for May, 1920, (which was the highest point reached); 284.1 for May, 1919; 243.8 for May, 1917; and 136.3 for May, 1914. Nearly all of the groups showed slight advances, but the seasonal decline in dairy products continued, although eggs were upward. The chief increases were in western grains, cattle and beef, fish, raw cotton, jute, pig iron and steel billets, silver, coke, linseed oil and turpentine.

In retail prices the average cost of a list of twenty-nine staple foods in sixty cities was \$10.22 at the beginning of May as compared with \$10.26 at the beginning of April; \$12.25 in May 1921; \$16.65 in May, 1920; \$11.82 in May, 1917; and \$7.43 in May, 1914. The total for food, fuel, and rent averaged \$20.57 for May as compared with \$20.66 for April, \$22.84 for May, 1921; \$26.44 for May, 1920; \$21.67 for May, 1919; \$18.50 for May, 1917; and \$14.21 for May, 1914. In foods the chief changes were increases in beef, butter, flour, evaporated apples and prunes, while decreases occurred in mess pork, bacon and lard, eggs, milk, cheese, sugar, and potatoes. Coal and wood were slightly lower. Rent showed little change.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

Proceedings for the month of May, 1922, With Texts of Boards' Reports

DURING the month of May the Department received reports of two Boards of Conciliation and Investigation established to deal with disputes between (1) the Ottawa Electric Railway Company and certain of its employees being members of Division 279 Amalgamated Association of Street and Electric Railway Employees of America and (2) The Dominion Coal Company, the Nova Scotia Steel and Coal Company, and Acadia Coal Company, members of the British Empire Steel Corporation, and certain of their employees respectively, being members of District 26 United Mine Workers of America. Four applications were received for the establishment of Boards.

Applications received

During the month of May applications for the establishment of Boards of Conciliation and Investigation were received as follows:—

(1) From employees of the Corporation of the City of Moose Jaw, Saskatchewan, being members of Civic Employees' Federal Union No. 9. This dispute not falling within the direct scope of the Industrial Disputes Investigation Act, a Board could be established only with the consent of both parties to the dispute. The consent of the city council of Moose Jaw having been received, a Board was established composed as follows: Mr. W. E. Knowles, K.C., Moose Jaw, chairman, appointed by the Minister on the joint recommendation of the other two members of the Board, Mr. R. H. Chadwick, Moose Jaw, appointed on the nomination of the men, and Mr. W. D. McIntyre, Moose Jaw, appointed on the nomination of the City.

(2) From the employees of the Winnipeg Electric Railway Company, being members of the Gas Workers' Union of Winnipeg (Independent). A Board was

established composed of Mr. W. H. Trueman, K.C., Winnipeg, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. C. E. Dafoe and R. S. Ward, of Winnipeg, appointed on the recommendation of the Company and the workmen respectively.

(3) From employees of the Corporation of the City of Moose Jaw, Saskatchewan, being civic firemen members of the City Fire Fighters' Union, Local No. 151. As this dispute did not fall within the direct scope of the Act a Board could only be appointed with the consent of both parties to the dispute. The city council of Moose Jaw gave its consent and a Board was established, Mr. W. D. McIntyre, Moose Jaw being appointed on the nomination of the City, and Mr. Edgar H. Cooke, Moose Jaw on the recommendation of the men. The chairman of the Board had not been appointed at the end of the month.

(4) From the employees of the Inverness Railway and Coal Company, represented by the Eastern Trust Company, Halifax, being members of Locals Nos. 4,512 and 5,163, District 26, United Mine Workers of America. The Board had not been established at the end of the month.

Other Proceedings Under the Act

A Board was completed in May in the case of a dispute between the London Street Railway Company and certain of its employees being members of Division No. 741 Amalgamated Association of Street and Electric Railway Employees of America. Mr. J. M. McEvoy, London, was appointed chairman by the Minister of Labour in the absence of a joint recommendation from the other members of the Board, Messrs. F. H. McGuigan, Toronto, and Frank McKay representing the Company and the men respectively.

Report of Board in dispute between the Ottawa Electric Railway Company and certain of its employees

A report was received from the Board established to deal with the dispute between the Ottawa Electric Railway Company and certain of its employees being members of Local Division No. 279 Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: Mr. Alexander Smith, chairman, and Messrs. George D. Kelley and Charles J. Tulley, representing the Company and the employees respectively. The report was signed by the chairman and Mr. Kelley and contained recommendations as to a means of settlement of the dispute. A minority report was presented by Mr. Tulley.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Ottawa Electric Railway Company and certain of its employees being members of Division 279, Amalgamated Association of Street and Electric Railway Employees of America.

Ottawa, Ont., May 18, 1922.

To the Hon. James Murdock, M.P.,
Minister of Labour, Ottawa.

Sir,

The Board of Conciliation and Investigation on the Industrial Disputes Investigation Act, 1907, appointed by you on April 18, 1922, is composed as follows: Alexander Smith, Ottawa, Chairman; George D. Kelley, Ottawa, representing the Ottawa Electric Railway Company, and Charles J. Tulley, Ottawa, representing the employees. Immediately upon receiving notice of their appointment on Wednesday, April 19, the members of the Board took the oath of office and made arrangements to proceed with their duties.

On Thursday, April 20, the Board, through the courtesy of the mayor and

other officials of the City of Ottawa, arranged to hold its sittings in the City Hall, and at 2 pm. met in Mr. Smith's office, at 48 Sparks Street, to consult as to methods of procedure, when it was decided that persons willing to present information to the Board would be quite free to come forward, and that summons or subpoenas would not be necessary to be issued unless special circumstances arose.

On Friday, April 21, the Board met at 11 a.m. at the City Hall, all the members being present. The chairman read the Order to the Board of yourself, as Minister of Labour, appointing the Board, and also correspondence bearing on the application of the employees for "wage increase on the hourly rates of wages, and reduction in the regular hours of daily labour."

The employees present were: F. W. McRae, President, Ed. O'Connor, Secretary, W. P. Jennings, International Officer, all of Ottawa, and W. J. Davey, John Dale and W. F. Page were also in attendance, but the first three were the actual representatives of the employees.

The company's representatives were: F. D. Burpee, J. M. Ahearn and A. J. Tobin, all of the city of Ottawa.

Discussion immediately took place upon the scope of the reference in which Messrs. Tulley and Kelley joined. The company, through Mr. Burpee, asked that to the demand made by the employees there should be added consideration of wages, hours of work and working conditions. The chairman ruled that under the circumstances it would be necessary for him to consult the Minister of Labour, and adjourned until 11 a.m. of the next day, Saturday, April 22, at the same time suggesting that the parties themselves might mutually consent to the widening of the instructions, so that there would be no dispute on procedure or detail.

Both parties to the Board acted on the chairman's suggestion and in due course he received a communication from each side, and these communications were submitted by the Board to the Department of Labour Saturday morning, April 22, with the result that a letter under the seal of the Department, signed by yourself, dated Ottawa, April 22, 1922, was received by the chairman, authorizing the widening of the investigation. This met the written representations of both parties to the application.

Pursuant to adjournment the Board met on Saturday, April 22, in the City Hall. The employees submitted the draft agreement as of May 1, 1922. This agreement is filed as Exhibit (1). On behalf of the company a copy of the agreement entered into between the parties on the 29th day of May, 1920, as of the first day of May, 1920, and subsequently by agreement extended in 1921, until the 30th of April, 1922, was filed as Exhibit (2). Those interested then proceeded to discuss the clauses of these agreements as occasion would suggest, leaving for future consideration any clause that bore upon the hours of labour, the rate of wages and the cost of living.

The Board did not consider it absolutely necessary to employ a registrar or a stenographic reporter. After the Board had been sitting some days, the employees decided to secure the services of a stenographic reporter, and the Board took occasion to bespeak for copies of the reports of the proceedings for some of the days, but would not be responsible for any of the original work, original copy, or for any copies that the Board would not wish to take. This was stated openly at the sittings of the Board, and agreed to by the representative of the employees and not objected to by any others.

Before the Board had proceeded far at its first meeting the question of admission of the press came up and, in the hearing of the press representatives

present, the chairman remarked that these gentlemen would be free to come and go when they pleased, and if any inaccuracy occurred in their brief reports, the same could be referred to at the next meeting and adjusted. The reports in the press appeared to be helpful to the representatives of the parties.

During the discussion it was evident that many of the details in the management of the company could be much better dealt with by consultations between the employees and the company than by written agreement or binding clauses. Several details of this nature were freely discussed during the sittings of the Board, and probably two of these might be termed "New Features," namely, "heaters in the vestibules for the motorman and conductor," and "some extra supply of clothing for the men generally." The Board is of the opinion that the company and the men themselves can adjust these matters in due course better than embodying any directions in an agreement.

On behalf of the men, reports, resolutions and opinions commending the 8 hours a day were presented and discussed, but these were not followed by evidence to support the application of a work-day of 8 hours in the operation of the Ottawa Street Railway Company, although the chairman from time to time clearly intimated that the decision of the Board would be largely determined upon the information submitted regarding the Ottawa Street Railway Company and operations.

Sections of the Ontario Railway Act, being Chapter 185 of the Revised Statutes of Ontario, 1914, were cited and filed as exhibits. The only section of this exhibit filed that applies to street railways is section 271 of the said Act. The same reads as follows:

271.—(1) The Board may regulate the hours during which conductors and motormen, employees of a street railway company, may be required or permitted to work, but in no case shall an employee be permitted to work more than six days in a week or ten hours per day, and, whenever practicable and reasonable, such

ten hours' work shall be performed within twelve consecutive hours.

(2) The power conferred by subsection 1 may be exercised notwithstanding the provisions of any agreement between a municipal corporation and a railway company as to hours of labour.

(3) Every company which, and every director, superintendent, manager or officer of a company who contravenes the provisions of any order of the Board, made under the authority of subsection 1, or contravenes any of the provisions of this section, shall, for each contravention, incur a penalty of not less than \$100, nor more than \$250, recoverable under *The Ontario Summary Convictions Act*. 3-4 Geo. V., c. 36, s. 271.

In addition to the representations made by the employees, their representative on the Board pressed very cordially for consideration of this section in dealing with the application of the 8-hour proposal without overtime. The matter of fixing the hours of labour on the Ottawa Electric Railway Company is within the authority of the Board of Railway Commissioners for Canada, as Section 6, Chapter 53, Statutes of Canada, 1892; Section 7, of the Statutes of Canada, 1894, and Section 5, of Chapter 82, of the Statutes of Canada, 1889, as well as Section 4, Chapter 106, of the Statutes of Canada, 1866, and Section 2, of Chapter 45, of the Statutes of Ontario, 1868, would clearly determine. The Acts of 1866 and 1868 are cited merely to indicate the origin of the legislation governing the Ottawa Electric Railway Company.

While the Board of Railway Commissioners for Canada has jurisdiction, its authority is subject to Section 6, of Chapter 53, of the Statutes of Canada, 1892, which provides that the operation of the Ottawa Electric Railway Company within the Province of Ontario shall be subject to the Statutes of Ontario. This authority is confirmed by subsequent legislation.

The jurisdiction of the Board of Railway Commissioners was unanimously upheld by the Board of Railway Commissioners for Canada, in a judgment delivered by Sir Henry Drayton, Feb-

ruary 10th, 1919. In a reply also to an inquiry the Secretary of the Ontario Municipal Board, in a communication to the Secretary of the Ottawa Railway Employees' Union, dated July, 1919, stated that the Ontario Railway Municipal Board had never exercised any jurisdiction over the Ottawa Electric Railway Company.

Subsequent to the Drayton judgment, the question of the jurisdiction of the Board was subject to confirming decision by the Supreme Court of Canada, March 8, 1920, and on March 17, 1920, Honourable F. B. Carvell, Chief Commissioner of the Board, issued an order which was unanimously agreed to fixing the rates.

The Board of Railway Commissioners for Canada, however, must exercise its jurisdiction in the operation on that portion of the Ottawa Electric Railway Company's line in Ontario subject to the statutes of Ontario (see Chapter 53 of the Statutes of 1892 and subsequent Acts as well as the foregoing decision.)

The terms of Section 271 of Chapter 185, of the Revised Statutes of Ontario, 1914, have never then been called into operation by either the employees of the Ottawa Electric Railway Company, and from this it would appear that both parties prefer to have the matter of hours of labour adjusted by agreement between themselves. So long as the Board of Railway Commissioners for Canada are not called upon to regulate the hours as empowered by the Act, no steps would be taken by the Board to do so. In this regard, however, it might be stated that, in the consideration of the present arrangement of 9 hours per day, it would appear that the spread within such time as performed is too great, and the Board would suggest, and strongly recommend, that an effort be made by arrangement between the parties to reduce the spread.

On Monday, May 1, and on Tuesday, May 2, at the sittings of the Board in the City Hall, the matter of the cost of

living was discussed. Mr. Bolton, of the Labour Department, was present on May 1 and dealt with comparative tables showing the cost of living. These comparative statements are not absolute, they were submitted more for contrast and comparison. The result of his examination was to the effect that the cost of living had been reduced by a shade over 24 (twenty-four) per cent. The representatives of the employees wished to have further opportunity to present other tables, and this opportunity was taken on Tuesday, May 2. The comparative tables of the employees did not differ widely from those submitted by Mr. Bolton, although they indicated a higher cost of living. They were also by way of illustration. The difference in the comparative statements for a yearly period, between these and those submitted by Mr. Bolton, was not wide. The employees, however, contended that reduction of the cost of living would not be 24 (twenty-four) per cent, although no definite percentage was put forward by them. It should be clearly stated that these comparative statements are not definite as to actual cost of living, but are used as comparisons in a general way to show the percentage of increase or decrease. In this regard they were said to be fairly accurate.

The Board is of the opinion that the cost of living has decreased in accordance with the opinions expressed and tables submitted, but, at the same time, it is of the opinion that the wages cannot automatically be decreased in keeping, so to speak, with these comparative statements, because in the helps to make living agreeable there is required something more than the actual necessities for daily sustenance—something in addition to that is essential. Whilst the Board, therefore, recommends the decrease of wages, in doing so, it is taking into consideration the changed conditions of not only the cost of living, but also the cost of operation and maintenance, and capital and tangible assets of the company. The recommendation of the Board regarding wages does not

cover all the details suggested by the employees, but any details not mentioned in the agreement submitted, in the opinion of the Board, should be adjusted in conference between the employees and the railway company, in accordance with these general outlines and specific suggestions.

The Board has no expression of opinion on higher or lower rates or fares to be charged, as the question was not before the Board, except very incidentally, nor was the public represented in this regard. Besides, this is a matter within the jurisdiction of another tribunal—the Board of Railway Commissioners.

The Board of Conciliation and Investigation held ten open sittings at the City Hall and at these the company and the employees were given ample opportunity to press their views. Time and again the chairman suggested that, in addition to the general information which the men were submitting, they deal particularly with details in so far as the relations with the company were concerned. There was little response to these suggestions, as evidently details are a matter of mutual adjustment between the parties themselves from time to time. However, the chairman felt it his duty to impress this phase upon those present.

The last open sitting was on Tuesday, May 2. The Board adjourned to meet in the Molson's Bank Chambers on Wednesday, May 3, for further discussion amongst its members. Meetings were held May 3, 6, 8, 9 and 10, in the Molson's Bank Chambers, all the members of the Board being present on each occasion.

At the meeting on May 10, Messrs. Tulley and Kelley suggested that, as they could not agree on certain phases, the chairman draft a report for further consideration in accordance with his understanding of the discussions to date, the same to be fully considered by the Board later. The Board also met on May 16, 17, 18 and 23, and considered

carefully a draft of this report and a draft agreement, both prepared by the chairman on the discussion that had preceded, and subsequently each of the other members of the Board furnished the chairman with suggestions and recommendations; these, just as verbal conversations between members of the Board, were, for use similar to conversations and for personal guidance, to assist the members themselves in their deliberations.

The report of the Board of Conciliation and Investigation, in the form of an agreement between the employees and the company, is herewith submitted as Exhibit (3) to this general outline by the Board, and we recommend that matters not covered by specific wording in the agreement be adjusted by consultation between the employees and the company in the light of the foregoing observations. The findings of the Board on the scale of wages is made on the understanding that the company withdraws its objection to entering into any agreement and instead agrees to continue this scale for one year from May 1, 1922.

(Sgd.) ALEX. SMITH,
Chairman.

(Sgd.) GEORGE D. KELLEY,
Representing the Company.

(CHAIRMAN'S LETTER TO BOARD
MEMBERS)

Ottawa, Ont., May 23, 1922.

George D. Kelley, Esq.,
Representing the Company,
and

Charles J. Tulley, Esq.,
Representing the Employees,
Ottawa, Ont.

Dear Sirs,

In the matter of the Board of Conciliation and Investigation in re Ottawa Electric Railway Company and its employees, of which you are members, I, as agreed amongst ourselves as members of the Board, herewith submit to each of you my report for your very early consideration. I trust the Board in its findings will be unanimous.

I hereby call the Board to meet in my office, 48 Sparks Street, Ottawa, at three o'clock this

afternoon of Tuesday, May 23, at which hour the report as submitted or with any suggestions or amendments will be signed. Failing unanimity, however, each is to be free to present whatever statement or report he may deem advisable.

This letter and the attached report and agreement (Exhibit 3) are to be considered part of the record of the proceedings of the investigation.

Yours faithfully,
(Sgd.) ALEX SMITH,
Chairman.

EXHIBIT I.

Agreement entered into (in duplicate) this the first day of May, 1922, between the Ottawa Electric Railway Company, hereinafter called "the Company", Party of the first Part, and the Ottawa Electric Railway Employees' Union, being Division 279, of the Amalgamated Association of Street and Electric Railway Employees of America, hereinafter called "the Association", Party of the second Part.

Witnesseth:—That the following wage schedule and working conditions shall take effect and be binding upon the parties hereto, and shall govern all employees of the Company referred to herein.

WAGE SCHEDULE.—The wage schedule and working conditions submitted herewith, shall be binding on the Company and its employees from the first day of May, 1922, until changed by the parties hereto, either parties desiring to change same or open up the agreement or wage schedule shall notify the other party in writing of the desired change at least thirty (30) days before the expiring of same. Rates of wages shall be paid from and after May 1st, 1922, during the life of this agreement.

SECTION 1.—The Company agrees that all employees affected by this agreement, if they so desire, may become and remain members of the Association during the life of this agreement in accordance with the constitution and by-laws of the Association in order that all questions and grievances may be dealt with by one head, and that the standing of the employees with the Company shall not be affected by the fact of their membership in the Association.

SECTION 2.—The Company agrees to meet and treat through their properly accredited officers, with the officers or representatives of the Association upon all questions and differences that may arise during the term of this agreement, including dismissal after suspension.

SECTION 3.—Employees who are members of any committee, or officers of any Association of the employees or delegates to conventions

of such Association, shall be entitled to leave of absence and shall retain their full seniority rights and upon retirement from such office, committee, or delegation shall have their place in the Company's employ they would have occupied had no leave been granted.

SECTION 4.—The Company agrees that employees shall not be censured in public for disobedience of rules. If the offence is a serious one, the employee at fault will be placed under suspension and a careful investigation of the case made by the Company. If after an investigation of the case made, the said employee is found not guilty of the charge against him, he shall be reinstated to his former position and paid for all lost time. Incompetency, drunkenness, dishonesty, and repeated violation of the rules of the Company will be sufficient cause for dismissal from the service, but no employee shall be dismissed at any time without a full investigation and removal of all doubt as to guilt. No dismissal shall take place until one week after suspension.

SECTION 5.—All promotions or transfers in all departments shall be based upon merit and seniority, and without discrimination.

SECTION 6.—When through slackness of work a reduction of staff becomes necessary in any department men shall be laid off in the following order, last on, first off; last off, first on. Employees being laid off under this cause shall leave an address with the Company and notice of resumption of work shall be given by the Company to the men by mailing advice to such address. If the men do not appear to resume their positions within seven (7) days the same shall be deemed to be vacant.

SECTION 7.—No employee other than those covered by Section 3, shall be granted leave of absence exceeding thirty (30) days in any one year unless agreed to by both parties.

SECTION 8.—The Company shall post a list of the conductors and motormen in order of seniority in the conductor's and motormen's waiting room, together with a Run Guide on which shall be posted the regular day, relief and swing runs and the time paid for each. No run on the Run Guide shall pay less than eight (8) hours. Conductors and motormen shall have the right to choose such runs as they may prefer in order of seniority, the senior man on the list to have first choice and so on down until all have chosen. Booking Inspector to co-operate with a representative of the Association. This rule shall apply to all regular day runs, relief runs, and regular swing runs that are listed on the Run Guide. Booking shall be conducted by an official appointed by the Company. Choosing of runs shall take place every three months or at such other times as operating conditions make it necessary for another selection of runs.

Any man refusing or failing to select a run in the time given shall be assigned to one by the official in charge of the booking in accordance with his seniority.

SECTION 9.—When motormen and conductors have selected or have been assigned to runs regularly scheduled and a portion of such runs is cancelled, they shall be paid the full time such runs would have paid had full run been completed for one day, or until notified by the Company that the schedule is changed.

SECTION 10.—Eight (8) hours shall constitute a day's work for all employees in all departments performed on week days, Sundays and all legal holidays, and shall be completed in ten (10) consecutive hours. No schedule run shall pay less than eight (8) hours. No employee shall be compelled to do extra work in excess of his regular day's work of eight (8) hours. All work performed in excess of eight (8) hours shall be paid for at the rate of time and one-half at the prevailing rates, including work on sand-cars, sweepers, and snow-ploughs.

SECTION 11.—Extra runs shall be service not regularly scheduled on the Run Guide, being such other work as cannot be foreseen and cannot be provided for by the regular time table. No extra run shall pay less than four (4) hours. Breaks in any run not exceeding one hour shall be paid continuous time.

SECTION 12.—All spare men shall be guaranteed a minimum of eighty-five (\$85.00) dollars a month except as herein provided. That no miss shall be marked against them at the regular reporting time of six (6) days each week. All spare men having no misses charged against them, or who are not away on account of sickness, or who are not on leave of absence (except the weekly day off) will be guaranteed forty-two dollars and fifty cents (\$42.50) each pay period of one-half month as a minimum wage. If the time that has been credited to them does not amount to \$42.50 the difference will be paid to them on the regular pay days. A miss will not be charged against any man who fails to report at 5.50 a.m. on week days, or 7.20 a.m. on Sundays if he has worked until 11.00 p.m. or after the night previous.

SECTION 13.—Whenever cars are delayed so that a motorman or conductor cannot reach his reporting place on time no miss shall be marked against him, but if he arrives before his car goes out he shall be allowed to take it.

SECTION 14.—Uniform clothing for motormen and conductors shall consist as follows: Summer: Full suit, coat, vest and trousers. Winter: Conductors—full suit, overcoat and trousers every year. Motormen—trousers every year, overcoat every second year.

SECTION 15.—All motormen and conductors shall be so provided, the Company to pay full cost of such clothing for all men in their service over one year, and half the cost for those in the service first year. Said uniforms are to be supplied not later than the first of May and of October each year. After any article of clothing has been in the possession of a motorman or conductor for a period of thirty (30) days, it shall become his absolute property, providing he has been in the employment of the Company for one year. All caps and badges to be supplied by the Company without charge. In the event of an employee damaging or destroying his uniform in the execution of his duty, the Company shall make good the damage, or supply free of charge an extra uniform if the case warrants it. All winter caps supplied by the Company to be subject to the approval of the Association.

SECTION 16.—Cars shall be sent out each morning and night for the purpose of conveying employees to and from their work. Said cars to be run on Somerset, Bank, Hull, St. Patrick, Sussex, Gladstone Ave., and Preston Lines.

SECTION 17.—Suitable seats shall be provided for both motormen and conductors on all cars; said seats shall be placed in a position where convenient for motormen's and conductor's use in the proper discharge of their duty.

SECTION 18.—All cars shall be properly heated to a reasonable temperature, and shall be fitted with double windows throughout. All cars shall be so fitted from November to March of each year. Heaters shall be placed in both front and rear vestibules of all cars.

SECTION 19.—All employees shall be given free transportation at all times on all lines of the Company.

SECTION 20.—For all accidents reports, conductors and motormen shall be paid for making such reports one-half hour at regular rates.

SECTION 21.—Sunday rates shall be paid for the following statutory holidays:—New Year's Day, Victoria Day, Dominion Day, Civic Holiday, Thanksgiving Day, Labour Day, and Christmas Day.

SECTION 22.—The Company will supply all conductors with tickets and change to the extent of thirty-five (\$35.00) dollars. Students to be supplied with change by the Company. The employees in accepting this amount agree to use it for the purpose of their work on the cars only, and to have the full amount of thirty-five (\$35.00) dollars on their person whenever reporting for work.

SECTION 23.—The Association shall be allowed to post notices of meetings, bulletins, or any other matter of interest to the members of the Association at all car-barns power-stations, wiremen's quarters, starting offices,

and in the motormen's and conductors' waiting rooms.

SECTION 24.—The schedule of running time shall be so arranged as to provide for a lay-up of two minutes at the end of the line on each round trip at all times. Sufficient running time shall be allowed at all times.

Shop and Shed Men.

SECTION 25.—The Sunday rates shall be paid to all employees in this department for work performed on Sundays and legal holidays as specified in Section 21.

SECTION 26.—All employees of this department will be available for emergency work whenever called upon. All special calls for men when off duty shall be paid at the overtime rates; such calls to pay not less than one-half day's pay at the regular rates.

(No no. 27)

SECTION 28.—All shops and sheds shall be heated during the winter months to a reasonable temperature. Wrecking cars shall be equipped with proper protection from the inclement weather, and men shall be supplied with rubber boots and coats when working with wrecking cars.

SECTION 29.—The present regulations governing the conditions of the work and the general conduct of the Company's business are permanent and will not be changed without due notice, permitting the Association an opportunity to discuss them with the Company before any change goes into effect.

SECTION 30.—When an employee is engaged in any two or more classes of work for two days or longer, he shall be paid a maximum rate for the work performed. This does not apply to apprentices.

SECTION 31.—When vacancies occur in shop and shed (day staff) these shall be filled on probation by senior night employees engaged in similar work.

SECTION 32.—The employees in shop and shed shall be classified as follows:—Air Brake and Fare Box Repairer, Machinist, Carpenter, Painter, Glazier, Armature Winder, Armature Assistant, Electrical Trouble and Bench Workers, Pit Men, Pit Helpers, Oilers and Greasers, Car Inspectors, Car Cleaners, Car Changers, Shop Hands and Apprentices.

A common rate of wage will be paid all men employed in each of the above classes, except shop hands and apprentices. When not sufficient work to keep any man employed in the work belonging to his class he will be assigned other work of a similar nature by the foreman.

Wire and Conduit Department.

SECTION 33.—Time and one-half shall be paid for all time worked in excess of eight (8) hours. All special calls for men when off duty shall be paid at time and one-half, Company guarantees such calls will pay at least one-half day at regular rates.

SECTION 34.—When temporary promotions occur on any shift, men filling those positions shall receive the rate of pay that said position calls for.

SECTION 35.—All regular linemen and truck drivers to be furnished with rubber boots, rubber coats, rubber gloves and pliers when needed.

SECTION 36.—All employees except car service men will be available for emergency work whenever called upon. All special calls for men when off duty shall be paid at the overtime rate, such calls to pay not less than one-half day's pay at regular rates.

Track Maintenance.

SECTION 37.—Track maintenance men shall mean employees whose duties are to maintain the track in a safe condition and switchmen employed at switch points. When such employees report and owing to weather conditions are unable to work they shall be paid for all time held on foreman's orders. This section shall not apply to extra men taken on for emergency work in connection with the removal of snow, or to construction gangs.

SECTION 38.—Eight (8) hours shall constitute a day's work to be completed in nine (9) consecutive hours, for all track maintenance and switchmen. All time worked in excess of eight (8) hours shall be paid at the rate of time and one-half. Sunday rate shall be paid on Sundays and all legal holidays specified in Section 21.

SECTION 39.—In the event of day gangs being required to do night work for a period of two nights or less, they shall not on that account be compelled to lose a day prior to the commencement of that night work, and they shall be paid time and one-half for all work in excess of eight (8) hours.

SECTION 40.—When trackmen are employed at drain work during the spring and fall of the year, and conditions demand, such rubber boots shall be supplied by the Company to all men so employed.

Power Plant.

SECTION 41.—Eight (8) hours shall constitute a day's work to be completed in eight consecutive hours, for all employees in the Water Plant and Sub-Stations. Wood mats and proper insulation shall be supplied at all power houses and sub-stations. Rubber gloves, rubber

boots, and aprons shall be supplied to men working in the battery room.

All employees of this department will be available for emergency work whenever called upon. All special calls for men when off duty shall be paid at the overtime rate, such calls to pay not less than one-half day's pay at regular rates.

SECTION 42.—The following rates of wages shall be paid from and after May the first (1st), 1922, until the termination of this agreement in place of the rates provided by the agreement entered into and dated from May the first (1st), 1921.

Motormen and conductors,	
1st year.	55c per hour

ants, Sub-Stations.	65c " "

All overtime shall be paid for at the rate of time and one-half.

All work performed on Sundays and legal holidays, specified in Section 21, shall be paid at the rate of time and one-quarter.

SECTION 43.—This agreement and the provisions therein contained shall take effect from May the first (1st), 1922 to May the first (1st), 1923, and thereafter from year to year, unless either party to this agreement desires a change

in any section or sections thereof. Either party desiring such a change shall notify the other party in writing not less than thirty (30) days prior to May the first (1st) in each year, on such notification the changes desired shall be opened for amendment.

EXHIBIT 2.

Agreement made (in duplicate) this twenty-ninth day of May, 1920. Between The Ottawa Electric Railway Company, hereinafter called the "Company", party of the First Part, and The Ottawa Electric Railway Employees' Union being Division No. 279, Amalgamated Association of Street and Electric Railway Employees of America, hereinafter called the "Association", party of the Second Part.

Witnesseth—That the following wage schedule and working conditions shall be in effect and binding upon the parties hereto for one year from the first day of May, 1920 to the first day of May, 1921, and thereafter from year to year. If either party to this agreement desires a change in any of its provisions, said party shall notify the other in writing not less than thirty days prior to the first day of May in each year. On such notification in writing being received the changes desired shall be open for discussion.

General Clauses Applying to all Departments.

SECTION 1.—The Company agrees that all employees affected by this agreement, if they so desire, may become and remain members of the Association during the life of this agreement, and that the standing of employees with the Company shall not be affected by the fact of their membership in the Association.

SECTION 2.—The Company agrees to meet and treat through their properly accredited officers with the officers and representatives of the Association, upon questions and differences that may arise during the term of this agreement, including dismissal after suspension.

SECTION 3.—Employees who are members of any committee or officers of the Association, or delegates to conventions of the Association, shall be entitled to leave of absence, and shall retain their full seniority rights, and upon retirement from such office, committee or delegation, shall have their place in the company's employ that they would have occupied if no leave had been granted.

SECTION 4.—The Company agrees that employees shall not be censured in public for disobedience of rules. If the offence is a serious one, the employee at fault will be placed under suspension, and a careful inves-

tigation of the case made by the Company. If after an investigation the said employee is found not guilty of the charge against him, he shall be reinstated to his former position and paid for all lost time. Incompetency, drunkenness, dishonesty and repeated violation of the rules of the Company will be sufficient cause for dismissal from the service, but no employee shall be dismissed at any time without a full investigation and the removal of all doubt as to his guilt. No dismissal shall take place till one week after suspension.

SECTION 5.—All promotions or transfers in all departments shall be based upon merit and seniority and without discrimination, but the Company must be the sole judge as to an employee's fitness for such promotion or transfer.

SECTION 6.—When through slackness of work a reduction of staff becomes necessary in any department, men shall be laid off in the following order, last on, first off; last off, first on. Employees being laid off under this clause shall leave an address with the Company, and notice of resumption of work shall be given by the Company to the men by mailing advice to such address. If the men do not appear to resume their positions within seven (7) days, the same shall be deemed to be vacant.

SECTION 7.—No employee other than those covered by Section 3 shall be granted leave of absence exceeding thirty (30) days in any one year without loss of seniority unless agreed to by both parties.

SECTION 8.—All employees shall be given free transportation at all times on all lines of the Company.

SECTION 9.—The Association shall be allowed to post notices of meetings bulletins, or any other matter that may be of interest to the members of the Association, at all car barns, power stations, and in the motormen and conductor's waiting room.

SECTION 10.—Nine hours shall constitute a day's work in all departments with the exception of the Water Power governed by Section 37. No employee shall be compelled to do extra work beyond his regular day's work except as provided in Section 11.

SECTION 11.—All employees except conductors and motormen will be available for emergency work whenever called upon. All special calls for men when off duty shall be paid at the overtime rate, such calls to pay not less than one-half day's pay at regular rates.

SECTION 12.—Work performed in excess of nine hours on all days except Sundays and the legal holidays mentioned in Section 13, shall be paid for at the rate of time and one-half.

SECTION 13.—Time and one-quarter shall be paid for all work performed on Sundays and the following legal holidays:—New Year's Day, Victoria Day, Dominion Day, Civic Holiday, Thanksgiving Day, Labour Day and Christmas Day.

SECTION 14.—The present regulations governing the conditions of work and the general conduct of the Company's business are permanent, and will not be changed without due notice, permitting the Association an opportunity to discuss them with the Company before any change goes into effect.

Conductors and Motormen.

SECTION 15.—The Company shall post a list of the conductors and motormen in order of seniority in the conductor's and motormen's waiting room, together with a Run Guide on which shall be stated the regular day, relief and swing runs, and the time paid for each. No run on the Run Guide shall pay less than nine (9) hours.

Conductors and motormen shall have the right to choose such runs as they may prefer in order of seniority, the senior man on the list to have the first choice, and so on until all have chosen. Motormen to choose first in order of seniority. Run Board to be filled as runs are chosen. Motormen to book until Board is filled. Conductors then by seniority in turn will book and Run Board shall be filled as runs are chosen until all have chosen.

This rule shall apply to all regular, day, relief and swing runs that are listed on the Run Guide. Booking shall be conducted by an official appointed by the Company. Choosing of runs shall take place every three months or at such times as the operating conditions make it necessary for another selection of runs. Any man refusing or failing to select a run in the time given shall be assigned to one by the official in charge of the booking in accordance with his seniority.

SECTION 16.—When motormen and conductors have selected or have been assigned to runs regularly scheduled and a portion of such runs is cancelled they shall be paid the full time such runs would have paid had full runs been completed, for one day, or until notified by the Company that the schedule is changed.

SECTION 17.—All runs shall be classified and listed upon the Run Guide and shall be known as Regular Day Runs, Regular Relief Runs, Swing Runs, Trippers and Extras.

(a) All regular way runs shall be completed within twelve and one-half consecutive hours.

(b) All regular relief runs shall be completed within fourteen and one-half consecutive hours whenever practicable.

(c) All regular swing runs shall have not more than three periods of work. All three-period swing runs shall be completed within thirteen and one-half consecutive hours whenever practicable. Two-period swing runs shall be completed within fourteen consecutive hours.

(d) Tripper runs shall not exceed four hours pay time, and may be coupled to the regular day runs, and shall pay double time rate for time worked.

(e) Extra runs shall be service not regularly scheduled on the Run Guide, and such other runs as cannot be foreseen, and cannot be provided for by the regular time table. No extra run shall pay less than four hours.

SECTION 18.—Conductors and motormen will report at places and time appointed by the Company. All conductors and motormen who fail to so report will have a miss marked against them, except in cases where they report sick or have arranged with the Company to be away from duty. No miss will be marked against any man not reporting at 6 a.m. who has worked a late run the night before.

Whenever the cars are delayed so that a motorman or conductor cannot reach his reporting place on time, no miss shall be marked against him, but if he arrives before his car goes out he shall be allowed to take it.

SECTION 19.—All spare men who have no misses marked against them, or who are not away on account of sickness, or who are not on leave of absence (except the weekly day off) will be guaranteed \$42.50 for each pay period of one-half month, as a minimum wage. If the time that has been credited to them does not amount to \$42.50, the difference will be paid on the regular pay days.

SECTION 20.—Uniform clothing for motormen and conductors shall consist as follows:—

Summer—Full suit (coat, vest and trousers).

Winter—Trousers every year, overcoat every second year.

All motormen and conductors shall be so provided, the company to pay full cost of such clothing for all men in their service over one year, and half the cost for those in the service the first year. Said uniforms are to be supplied not later than the first of May and the first of October each year if possible. After any article of clothing has been in the possession of a motorman or conductor for a period of thirty (30) days, it shall become his absolute property, providing he has been in the employment of the company for one year. All caps and badges to be supplied by the company free of charge. In the event of an employee damaging or destroying his uniform in the execution of his duty through no fault of his own, the company shall make good the damage or supply, free of charge, an extra uniform if the case warrants it. All winter

caps supplied by the Company to be subject to the approval of the Association.

SECTION 21.—Cars shall be sent out each morning and night for the purpose of conveying employees to and from their work. Said cars to be run on Somerset, Bank, Hull, St. Patrick, Sussex, Gladstone Ave. and Preston lines.

SECTION 22.—Suitable seats shall be provided for both motormen and conductors on all cars. Said seats shall be placed in a position where convenient for motormen and conductors in the proper discharge of their duty.

SECTION 23.—All cars shall be properly heated to a reasonable temperature.

SECTION 24.—Conductors and motormen shall be paid one-half hour at regular rates for making accident reports.

SECTION 25.—The Company will supply all conductors with tickets and change to the extent of thirty-five dollars, students to be supplied with change by the Company. The employees in accepting this amount agree to use it for the purpose of their work on the cars only, and to have the full amount of thirty-five dollars on their person whenever reporting for work.

SECTION 26.—The schedule of running time shall be so arranged as to provide for a lay-up of two minutes at the end of the lines on each round trip. Sufficient running time shall be allowed at all time.

SECTION 27.—After a student conductor or motorman has passed his preliminary examination and has been accepted for employment he will be known as a spare man, and will be considered as on probation for a period of four months. At the end of this period he will be subject to a final examination by the Superintendent, and if satisfactory he will be taken on as a permanent employee.

Shop and Shed Men.

SECTION 28.—The repair shop and all sheds shall be heated during the winter months to a reasonable temperature. Wrecking cars shall be equipped with proper protection from inclement weather, and men shall be supplied with rubber coats and boots when working with wrecking cars.

SECTION 29.—When an employee is engaged in any two or more classes of work for two days or longer, he shall be paid a maximum rate for the work performed. This does not apply to apprentices.

SECTION 30.—When vacancies occur in shop or shed (day staff) these shall be filled on probation by senior night employees engaged in similar work, but the Company must be the judge as to the employee's fitness for the vacancy.

SECTION 31.—The employees in shop and sheds shall be classified as follows:—Air brake and fare box repairer, machinists, carpenter, painter, glazier, armature winder, armature winder's assistant, electrical trouble and bench workers, pitmen, pit helpers, oilers and greasers, car inspectors, car cleaners, car changers, shop hands, apprentices.

A common rate of wage will be paid all men employed in each of the above classes, except shop hands and apprentices. When not sufficient work to keep any man employed on the work belonging to his class he will be assigned other work of a similar nature by the foreman.

Line Department

SECTION 32.—When temporary promotions occur on any shift men filling those positions shall receive the rate of pay that said position calls for.

SECTION 33.—All regular linemen and truck drivers to be furnished with rubber boots, rubber coats, rubber gloves and pliers when needed.

Track Department.

SECTION 34.—Track maintenance men shall mean employees whose duties are to maintain the track in a safe condition, and switchmen employed at switch points. When such employees report and owing to weather conditions are unable to work, they shall be paid for all time held on foremen's orders. This section shall not apply to extra men taken on for emergency work in connection with the removal of snow, or to construction gangs.

SECTION 35.—In the event of day gangs being required to do night work for a period of two night or less, they shall not on that account be compelled to lose a day prior to the commencement of that night work, and they shall be paid time and one-half for all work in excess of nine (9) hours.

SECTION 36.—When trackmen are employed at drain work during the spring and fall of the year, and conditions demand such, rubber boots shall be supplied by the Company to all men so employed.

Power Plant.

SECTION 37.—Eight (8) hours shall constitute a day's work to be completed in eight (8) consecutive hours for employees in the water power plant.

SECTION 38.—Wood mats and proper insulation shall be supplied at all power houses and sub-stations. Rubber gloves, rubber boots and aprons shall be supplied to men working in the battery room.

Wage Rates.

SECTION 39.—The following rates of wages shall be paid from and after May first, 1920, until the termination of this agreement, in place of the rates provided by the agreement entered into and dated from August first, 1919

Conductors and Motormen—

First year 49c per hour, second year 51c per hour, third year 53c per hour, fourth year and thereafter 55c per hour.

Repair Shop and Shed Men—

Air brake and fare box repairer, machinist, carpenter, and armature winder.....	60c	per hour
Painter, pitmen, car changers	54c	“ “

Car inspectors.....	48c	“ “
Car cleaners.....	42c	“ “

Apprentices at rates arranged for on employment with 5c per hour increase every six months.

Line Department—

Linemen.....	54c	“ “
Chauffeurs.....	51½c	“ “
Groundmen.....	47c	“ “
Laborers.....	45c	“ “

Track Department—

Trackmen.....	48c	“ “
Laborers.....	45c	“ “
Switchmen.....	42c	“ “

Power Plant—

Dynamo tenders (Main Power Plant).....	60c	“ “
Dynamo tenders (Substations)	53c	“ “

Dated at Ottawa, Canada, this 29th day of May, 1920.

THE OTTAWA ELECTRIC RAILWAY COMPANY.
Manager.

DIVISION No. 279, A.A.S.E.R.R. OF A.
President.
Secretary.

Witness

It is hereby agreed between the parties hereto that the present regulations governing Wages and Working Conditions shall continue in effect and be binding upon the parties hereto for one year, from the first day of May 1921 to the first day of May 1922, and thereafter from year to year. If either party to this agreement desires a change in any of its provisions, said party shall notify the other in writing not less than thirty days prior to the first day of May in any year. On such notification in writing being received the agreement covering Wages and Working Conditions

then in force shall continue until the following May 1st and shall then cease to exist.

Dated this 4th day of April 1921.

THE OTTAWA ELECTRIC RAILWAY COMPANY.

(Sgd.) F. D. BURPEE,
Manager.

THE OTTAWA ELECTRIC RAILWAY
EMPLOYEES UNION.

(Sgd.) F. W. McRAE,
President.

(Sgd.) ED. O'CONNOR,
Secretary.

(Sgd.) W. J. DEEVY.

EXHIBIT B2

O. E. R. Employees' Arbitration.

Filed by Mr. Burpee, April 28th, 1922.

Ottawa, May 26th 1920.

The Honourable G. D. Robertson
Minister of Labour, Ottawa.

In the matter of the Ottawa Electric Railway Company and its employees, members of Division 279 Amalgamated Association of Street and Electric Railway Employees of America.

Sir:—

The Board of Conciliation appointed in this matter and consisting of George D. Kelley, Barrister, of the City of Ottawa, representing the company; Alfred E. Fripp, K.C., M.P., representing the employees; and the Honourable Mr. Justice F. S. MacLennan, Chairman, met in the City of Ottawa on the 28th of May instant and has been in daily session since. The Company was represented by Major F. D. Burpee and Mr. A. J. Tobin and Messrs. William P. Jennings, International Officer, F. W. McRae, E. O'Connor, W. J. Deevy and W. F. Page, appeared for the employees.

The outstanding features of the matter in dispute between the Company and the employees were with reference to the demands made by the employees for; First, Closed shop, or in other words, that all employees should be compelled to join the Association; Second that eight hours should constitute a day's work; Third, that increased rates of pay should be granted by the Company.

After having heard what was said by the representatives of both parties, with reference to the demand that the employees should be obliged to join the Association, the Board has come to the conclusion that it is not desirable that the request should be granted. The Company has no objection to its employees joining the union but desires to leave

them free to join or to remain out of the Union and it has not in the past and will not in the future discriminate against any employee who does not desire to become a member of the Association.

The Company is now working on the basis of nine hours per day paying at overtime rate for all work done in excess of that time. The services rendered by the Company to the public are between 6 a.m. and midnight, covering a period of eighteen hours, and it does not appear to the Board that it would be practicable to introduce the eight-hour day under these circumstances.

On the question of wages, a number of motormen and conductors appeared before the Board and were given full liberty to express their views. The Board has given full consideration to all information placed before it on behalf of the Company as well as on behalf of the employees, and in a schedule annexed hereto has made its recommendations for working conditions and as to the rates of pay which, in the opinion of the Board, should be accepted by both parties.

The whole respectfully submitted,

(Sgd.) GEORGE D. KELLEY,
Chairman.

(Sgd.) F. S. MACLENNAN,
Member of the Board.

(Sgd.) A. E. FRIPP.

EXHIBIT (3)

Agreement made (in duplicate) this day of May, 1922. Between The Ottawa Electric Railway Company, hereinafter called the "Company," Party of the First Part and The Ottawa Electric Railway Employees' Union, being Division No. 279, Amalgamated Association of Street and Electric Railway Employees of America, hereinafter called the "Association," Party of the Second Part.

Witnesseth—That the following wage schedule and working conditions shall be in effect and binding upon the parties hereto for one year from the first day of May, 1922, to the first day of May, 1923, and thereafter from year to year. If either party to this agreement desires a change in any of its provisions, said party shall notify the other in writing not less than thirty days prior to the first day of May in each year. On such notification in writing being received, the changes desired shall be open for discussion.

General Clauses Applying to all Departments.

SECTION 1.—The Company agrees that all employees affected by this agreement, if they

so desire, may become and remain members of the Association during the life of this agreement, and that the standing of employees with the Company shall not be affected by the fact of their membership in the Association or any association.

SECTION 2.—The Company agrees to meet and treat through their properly accredited officers with the officers and representatives of any Association, upon questions and differences that may arise during the term of this agreement, including dismissal after suspension.

SECTION 3.—Employees who are members of any committee, or officers of any association of employees, or delegates to conventions of such associations shall be entitled to leave of absence, and shall retain their full seniority rights, and upon retirement from such committee, office or delegation, shall have their places in the Company's employ that they would have occupied if no leave had been granted.

SECTION 4.—The Company agrees that employees shall not be censured in public for disobedience of rules. If the offence is a serious one, the employee at fault will be placed under suspension, and a careful investigation of the case made by the Company. If after an investigation the said employee is found not guilty of the charge against him, he shall be reinstated to his former position and paid for all lost time. Incompetency, drunkenness, dishonesty and repeated minor violation of the rules of the Company will be sufficient cause for dismissal from the service but no employee shall be dismissed at any time without a full investigation and the removal of all doubt as to his guilt. No dismissal shall take place till one week after suspension.

SECTION 5.—All promotions or transfers in all departments shall be based upon merit and seniority and without discrimination, but the Company must be the sole judge as to an employee's fitness for such promotion or transfer.

SECTION 6.—When through slackness of work a reduction of staff becomes necessary in any department, men shall be laid off in the following order, last on, first off; last off, first on. Employees being laid off under this clause shall leave an address with the Company, and notice of resumption of work shall be given by the Company to the men by mailing advice to such address. If the men do not appear to resume their positions within seven (7) days, the same shall be deemed to be vacant.

SECTION 7.—No employee other than those covered by Section 3 shall be granted leave of absence exceeding thirty (30) days in any one year without loss of seniority, unless agreed to by both parties.

SECTION 8.—All employees shall be given free transportation at all times on all lines of the Company.

SECTION 9.—The association of employees shall be allowed to post notices of meetings, bulletins or other matter of interest to its members at such places as are agreed to by the Company. All bulletins or notices that are not plain announcements of meetings must have the approval of the Company before being posted. The Company reserves the right to grant similar privileges to any other association.

SECTION 10.—Nine hours shall constitute a day's work, in all departments with the exception of the Water Power governed by Section 37. No employee shall be compelled to do extra work beyond his regular day's work except as provided in Section 11.

SECTION 11.—All employees will be available for emergency work whenever called upon. All special calls for men when off duty shall be paid at the overtime rate, such calls to pay not less than one-half day's pay at regular rates.

SECTION 12.—Work performed in excess of nine hours on all days except Sundays and the legal holidays mentioned in Section 13, shall be paid for at the rate of time and one-half.

SECTION 13.—Time and one-quarter shall be paid for all work performed on Sundays and the following legal holidays:—New Year's Day, Victoria Day, Dominion Day, Civic Holiday, Thanksgiving Day, Labor Day and Christmas Day.

SECTION 14.—The present regulations governing the conditions of work and the general conduct of the Company's business are permanent and will not be changed without due notice permitting the employees, or any association of them, an opportunity to discuss such changes with the Company before they go into effect.

Conductors and Motormen.

SECTION 15.—The Company shall post a list of the conductors and motormen in order of seniority in the conductors' and motormen's waiting room, together with a Run Guide on which shall be stated the regular day, relief and swing runs, and the time paid for each. No run on the Run Guide shall pay less than nine (9) hours.

Conductors and motormen shall have the right to choose such runs as they may prefer in order of seniority, the senior man on the list to have the first choice, and so on until all have chosen. Motormen to choose first in order of seniority. Run Board to be filled as runs are chosen. Motormen to so book until Board is filled. Conductors then by seniority in turn will book, and Run Board shall be filled as runs are chosen until all have chosen.

This rule shall apply to all regular, day, relief and swing runs that are listed on the Run Guide. Booking shall be conducted by an official appointed by the Company. Choosing of runs shall take place every three months, or at such other times as the operating conditions make it necessary for another selection of runs. Any man refusing or failing to select a run in the time given shall be assigned to one by the official in charge of the booking in accordance with his seniority.

SECTION 16.—When motormen and conductors have selected or have been assigned to runs regularly scheduled, and a portion of such runs is cancelled, they shall be paid the full time such runs would have paid had full runs been completed, for one day, or until notified by the Company that the schedule is changed.

SECTION 17.—All runs shall be classified and listed upon the Run Guide and shall be known as Regular Day Runs, Regular Relief Runs, Swing Runs, Trippers and Extras.

(a) All regular day runs shall be completed within twelve and one-half consecutive hours.

(b) All regular relief runs shall be completed within fourteen and one-half consecutive hours whenever practicable.

(c) All regular swing runs shall have not more than three periods of work. All three-period swing runs shall be completed within thirteen and one-half consecutive hours whenever practicable. Two-period swing runs shall be completed within fourteen consecutive hours.

(d) Tripper runs shall not exceed four hours pay time, and may be coupled to the regular day runs, and shall pay double time rate for time worked.

(e) Extra runs shall be service not regularly scheduled on the Run Guide, being such other work as cannot be foreseen, and cannot be provided for by the regular time table. No extra run shall pay less than four hours. Breaks in any run not exceeding one hour shall be paid continuous time.

SECTION 18.—All conductors and motormen who fail to report for duty at places and time designated by the Company on the Run Guide or otherwise will have a miss marked against them except in cases where they report sick or have arranged with the Company to be away from duty. No miss will be marked against any man for not reporting at 5.50 a.m. on week days or 7.20 a.m. on Sundays who has worked until 11 p.m. or after the night before.

Whenever the cars are delayed so that a motorman or conductor cannot reach his reporting place on time no miss shall be marked against him, but if he arrives before his car goes out he shall be allowed to take it.

SECTION 19.—All spare men who have no misses marked against them, or who are not away on account of sickness, or who are not on leave of absence (except the weekly day off)

will be guaranteed \$37.50 for each pay period of one-half month, as a minimum wage. If the time that has been credited to them does not amount to \$37.50 the difference will be paid on the regular pay day.

SECTION 20.—Uniform clothing for motormen and conductors shall consist as follows: Summer—Full suit (coat, vest and trousers). Winter—Trousers every year, overcoat every second year. All motormen and conductors shall be so provided, the Company to pay full cost of such clothing for all men in their service over one year, and half the cost for those in the service the first year. Said uniforms are to be supplied not later than the first day of May and the first of October each year if possible. After any article of clothing has been in the possession of a motorman or conductor for a period of thirty (30) days it shall become his absolute property, providing he has been in the employment of the Company for one year. All caps and badges to be supplied by the Company free of charge.

In the event of an employee damaging or destroying his uniform in the execution of his duty through no fault of his own, the Company shall make good the damage or supply, free of charge, an extra uniform if the case warrants it.

SECTION 21.—Cars shall be sent out each morning and night for the purpose of conveying employees to and from their work. Said cars to be run on Somerset, Bank, Hull, St. Patrick, Sussex, Gladstone Ave. and Preston lines.

SECTION 22.—Suitable seats shall be provided for both motormen and conductors on all cars. Said seats shall be placed in a position where convenient for motormen and conductors in the proper discharge of their duty.

SECTION 23.—All cars shall be properly heated to a reasonable temperature.

SECTION 24.—Conductors and motormen shall be paid one-half hour at regular rates for making accident reports.

SECTION 25.—The Company will supply all conductors with tickets and change to the extent of thirty-five dollars, students to be supplied with change by the Company. The employees in accepting this amount agree to use it for the purpose of their work on the cars only, and to have the full amount of thirty-five dollars on their person whenever reporting for work.

SECTION 26.—The schedule of running time shall be so arranged as to provide for a lay-up of two minutes at the end of the lines on each round trip. Sufficient running time shall be allowed at all time.

SECTION 27.—After a student conductor or motorman has passed his preliminary examina-

tion and has been accepted for employment he will be known as a spare man and will be considered as on probation for a period of four months. At the end of this period he will be subject to a final examination by the Superintendent and if satisfactory he will be taken on as a permanent employee.

Shop and Shed Men.

SECTION 28.—All shops and sheds shall be heated during the winter months to a reasonable temperature. Wrecking cars shall be equipped with proper protection from inclement weather and men shall be supplied with rubber coats and boots when working with wrecking cars.

SECTION 29.—When an employee is engaged in any two or more classes of work for two days or longer he shall be paid a maximum rate for the work performed. This does not apply to apprentices.

SECTION 30.—When vacancies occur in shop or shed (day staff) these shall be filled on probation by senior night employees engaged in similar work but the Company must be the judge as to the employee's fitness for the vacancy.

SECTION 31.—The employees in shop and sheds shall be classified as follows:—Air Brake and Fare Box Repairer, Machinist, Carpenter, Painter, Glazier, Armature Winder, Armature Winder's Assistant, Electrical Trouble and Bench Workers, Pitman, Pit Helpers, Oilers and Greasers, Car Inspectors, Car Cleaners, Car Changers, Shop Hands, Apprentices.

A common rate of wage will be paid all men employed in each of the above classes, except shop hands and apprentices; when not sufficient work to keep any men employed in the work belonging to his class he will be assigned other work of a similar nature by the foreman.

Line Department.

SECTION 32.—When temporary promotions occur on any shift men filling those positions shall receive the rate of pay that said position calls for.

SECTION 33.—All regular linemen and truck drivers to be furnished with rubber boots, rubber coats, rubber gloves and pliers when needed.

Track Department.

SECTION 34.—Track maintenance men shall mean employees whose duties are to maintain the track in a safe condition. When such employees report and owing to weather conditions are unable to work, they shall be paid for all time held on foreman's orders. This section shall not apply to extra men taken on

of special and urgent importance "the adoption of an eight-hour day or a forty-eight hour week as the standard to be arrived at where it has not already been attained". This was supported by resolutions passed favourably by the various international and national industrial conventions held since the signing of the Armistice.

Arguments were placed before the Board by the employees indicating that, with only one dissenting voice in two meetings, the Association, comprising 442 men, strongly desire the eight-hour day instituted in Ottawa. The present work-day is too long, the arrangement of the spread, extending as it does over 11, 12, 13, 14 and as high as 15 hours, is too long, making it possible for an unfair distribution of work and an unfair distribution of pay, leading to abuses, not only by the company, but also by the men. To this has been added the speeding up of the work due to increased passenger traffic with less car mileage, the increase of traffic on the streets generally, due to the great increase in automobile use, the growth of the city, and altogether with long hours cause fatigue which not only undermines the health of the men but greatly endangers the safety of the public. Fatigue was shown, by exhibits placed before the Board, to be the cause of the great proportion of deaths among platform men. Out of 806 employees of street railways as reported by the Amalgamated Association of Street and Electric [Railway] Employees of America, who died during the 12 months ending September 30, 1921, 206 died of diseases of the lungs, 131 of diseases of the heart, and 103 of diseases of the kidneys, the three organs

for the health of which platform men are examined.

From the examination of exhibits placed before the Board, both by the men and by the company, it is quite evident that a large proportion of the men are working and being paid for time considerably over ten hours, and the spread of the work-day has instituted conditions which to the large majority of the employees has become intolerable. The situation should have been viewed not only from the standpoint of the men but also from that of the public whose safety largely depends upon the physical condition of the men engaged in an industry which is in such close contact with the general public.

The writer also pointed out to the Board that the present hours of labour as operated in the O. E. Railway were illegal, being contrary to sections of the Ontario Railways Act, being Chapter 185 of the Revised Statutes of Ontario, 1914. Hence the Board should not, while aware of this Act, place any conditions within the agreement which would make it possible for the company to contravene the same.

Other cities of Canada in which the eight-hour day has been instituted for the street railway employees are Vancouver, New Westminster, Victoria, Winnipeg, Calgary, Saskatoon, Port Arthur, Fort William and Toronto.

Exhibit B-1 gives a statement of the wages and hours of a certain motorman as follows:

Yearly earnings.....	\$2,109.00
26 Sundays, 9 hours.....	158.67

Wages, regular rates.....	\$1,950.33
\$1,950.33 at 55c per hour.....	3,546 hours
3,546 hours, 313 working days—11 hours, 19 minutes, per day.	

313 legal working days of 10 hours	3,130	hours
This man worked regular hours...	3,546	"
Sundays worked.....	234	"
Total hours worked for year...	3,780	"
Hours in excess of legal.....	650	"

Number of days of hours worked during the year, 420.

WAGES.

The majority award acknowledges that the cost of living has dropped 24 per cent. I cannot accept this, especially in consideration of the actual budget prepared while the Board was in session. This budget, based on the actual prices obtained from merchants in Ottawa, places the minimum wage for a family of five at \$1,666.37. The average yearly wage that can be earned by platform men at the maximum of 55 cents an hour is about \$1,642. Taking the Labour Department's figures, it was shown by an exhibit placed before the Board that the wages of the men were \$1.56 below the cost of living per week in March last, and the total cost of living for food, fuel and light, clothing and sundries taken from the *Labour Gazette* was shown by exhibit to be \$1,685.72 per year. Had the men been granted the eight-hour day at 65 cents per hour, they could have earned \$31.20 per week, or a total of \$1,622.40 per year, which, according to the figures given above from the *Labour Gazette* would be \$63.32 below the cost of living.

The earning power of the capital in the Ottawa Electric Railway has been consistently large. Capital has always demanded not only a "fair return" but a little more. The time has come in our civilization that labour must demand a "living wage" and more. The representative of the company in evidence presented to the Board stated that he placed capital in the same cate-

gory with labour. The wages of street railway labour prior to the war were generally insufficient from the point of view of the "living wage" and the increases in wages that have taken place since the beginning of the war period have not been greater on the average than the increase in the cost of living.

Labour now demands that it be put on a par with capital to the extent that the "living wage" shall be given at least the same consideration as the "fair return" in all electric railway settlements. It is a fact of tremendous significance in the entire problem that a great body of law and precedents has been built up in support of the "fair return" on the basis of capital's guarantees, while on the other hand laws and precedents in support of the "living wage" have to fight their way to recognition without the support of the courts.

Local transportation service coming as it does within the accepted definition of a public utility is affected by a public interest. It has for its primary purpose the rendering of a public service. The electric railways are constructed, maintained and operated, not primarily for the purpose of enabling capital to find profitable investment; not primarily for the purpose of enabling labour to earn a living; not primarily for the purpose of enabling the management to win the rewards of administration ability; but primarily for the purpose of rendering an essential service to the community. This fact distinguishes the electric railway industry from any and every purely private business, and makes the public interest in the quantity, quality, and continuity of the service rendered and in the charges made for such service paramount.

Heretofore, under the policy of private ownership and operation, capital has assumed the management. Capital, engaged in a public service such as local transportation, enjoys the special guarantee which the governments throw about property interests. It is entitled to a "fair return", subject to the limitation that in no case must the rate charged to the public represent more than the service is reasonably worth. The right of capital to earn a fair return has, in many respects, been limited by the effects of restricted contracts voluntarily entered into with the communities. In case these contractual restrictions are all removed, capital demands, not merely the assurance of a "fair return" upon the investment, but so long as it assumes the management, demands something more, a speculative chance of profit or a special reward for efficiency. If it were divorced from management, capital would ask for nothing save security and a "fair return", which under those circumstances would be the minimum rate of interest required to attract capital to a secure investment. So long as capital manages, labour will have to fight or accept the vicissitudes of periods of unemployment.

The cost of labour as an element in the cost of electric railway service has hitherto been determined primarily by the supply and demand, subject to such adjustments as the employees could enforce through negotiations with the management representing capital, or through the power of the strike. As yet labour has no guarantee of a "living wage" corresponding to capital's limited conditional guarantee of the "fair return", but at the present time labour is properly demanding that, in

the permanent settlement of the electric railway problem, the "living wage" shall receive practical recognition co-ordinate or even precedent to the "fair return" guaranteed to capital. Labour does not to an appreciable extent control or participate in management and therefore, while existing relations continue, it cannot demand more than the fair or "living wage", except under conditions where the law of supply and demand makes the payment of a higher wage necessary. But if labour should assume the management or any effective share in it, it would then logically and necessarily claim the opportunity to earn something more than the "living wage," just as capital now claims upon the same basis the chance to earn something more than the "fair return."

The assumption of management by the public involves definite public recognition and guarantee of the right of labour to the "living wage," reasonable hours and just conditions of work, and will, at the same time, place the employees in the position of civil servants with the advantages and responsibilities which are implied in that relationship. Labour is different from capital. It is a living thing, not inert. The full co-operation, under either public or private management, is necessary to work out a more effective and democratic relationship than has hitherto characterized the electric railway industry.

The solution seems only in the direction of getting rid of capital control in such natural monopolies. The better service to the public as well as the better usage of labour wherever this method

has been established, San Francisco, Detroit, Toronto, as well as in some of the western cities, is apparent through a high standard of wages as well as more ideal conditions of work. Toronto under municipal ownership is maintaining the eight-hour day with rates of wages of 55, 57½ and 60 cents per hour, as against the Board's majority award in Ottawa of 43, 45, 46, and 48 cents with the nine-hour day, a wage which is below that being granted unskilled labour in the city, who are receiving 50 cents per hour.

I do not think that the present wages should have been reduced except in the event of the award of the eight-hour day, under which condition the men showed an excellent spirit in their offer to accept a decrease.

In his budget speech on the 23rd instant the Hon. W. S. Fielding said, after deploring the war-like conditions between capital and labour. "Why cannot labour and capital agree upon tribunals to which disputes can be referred?" Labour is willing to argue their case before tribunals, but their faith in getting anything out of the same is shaken by results such as that under consideration. I say this after alancing the argument and spirit of conciliation of the employees in this case against the haughty, uncompromising attitude of the company

throughout the arbitration. Whereas the employees, who had the reference for the eight-hour day and an increase in wages placed before the Board, were willing to accept a substantial reduction in order to better the conditions of their work, the company's determination for no compromise of any sort influenced the decision of the majority of the Board after nearly a month's debate.

Here is a company enjoying increased passenger traffic, low car-mileage, a very short haul, a nearly straight five-cent fare, an earning power fluctuating from 15 to 24 per cent, and declaring for the last twelve years or more dividends of 15 per cent, and, if under these conditions they cannot maintain a proper standard of living for their employees, the only other alternative is for them to abandon their failure, and the people, whose concern it is to not only secure proper service from the full co-operation of labour, but also to maintain a standard of living commensurate with our civilization must assume the responsibility.

In consideration of the above statement and many other details which would make this report too long, I cannot concur with the finding of my colleagues.

Yours faithfully,
(Sgd.) CH. J. TULLEY.

Report of Board in dispute between the Dominion Coal Company, Nova Scotia Steel and Coal Company and Acadia Coal Company and certain of their employees respectively.

A report was received from the Board established to deal with the dispute between the Dominion Coal Company, the Nova Scotia Steel and Coal Company, and the Acadia Coal Company, being coal companies in Nova Scotia comprised within the British Empire Steel Corporation, and certain of their employees respectively, being coal miners members of District No. 26, United Mine

Workers of America. The Board was composed as follows: Mr. D'Arcy Scott, Chairman, and Messrs. John E. Moore and I. D. Macdougall, representing the Companies and the employees respectively. The report was signed by the Chairman and Mr. Moore and contained recommendations as to a means of settlement of the dispute. A minority report was presented by Mr. Macdougall.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Dominion Coal Company, Nova Scotia Steel and Coal Company and Acadia Coal Company, and certain of their employees respectively, being members of District No. 26, United Mine Workers of America.

Halifax, N.S., May 25th, 1922.

To the Hon. James Murdock,
Minister of Labour,
Ottawa.

Sir,

The undersigned members of the Board of Conciliation appointed by you to investigate the above mentioned dispute beg to report as follows:

The Board held the following meetings: Sydney, N.S., May 4th, 5th and 6th; Glace Bay, May 6th and 8th; New Waterford, N.S., May 9th; and Sydney Mines, N.S., May 10th. On Cape Breton Island the following mines were entered and examined: Dominion No. 2, Glace Bay; Dominion No. 16, New Waterford, and Florence No. 3, Sydney Mines. Many of the houses of the Company, provided for the use of the miners, as well as the stores of the company, were inspected at different points on Cape Breton. The Board adjourned after finishing its sittings on Cape Breton on Wednesday, 10th May, until Wednesday, 17th May, when it held its first sittings on the Mainland at Stellarton, N.S. After the adjournment at the conclusion of the Cape Breton sittings, the Chairman made an inspection of the facilities of the coal companies at Montreal for unloading, storing and selling coal at that port. Sittings on the Mainland were held at Stellarton on the 17th and 18th of May, and at Springhill on the 19th and 20th May. The Albion mine at Stellarton and No. 2 Mine at Springhill were entered and inspected. Inspection was

also made of miners' houses and other facilities of the Company at both Stellarton and Springhill, N.S. Sittings of the Board were held at Halifax, N.S., on the 22nd May to hear final argument, and on the 23rd and 24th of May for the purpose of the preparation of this report.

Your instructions to the Board were that its investigation should include, in addition to the matters set out in the original application, such other matters pertaining to or growing out of the dispute between the mine owners and their employees as may seem proper to the Board. The Board has, therefore, considered and investigated all matters brought to its attention by the employees of the companies from time to time during the sittings of the Board in the different mining centres visited.

We, therefore, desire to deal not merely with the rates of pay in dispute, but with a number of conditions respecting the comfort and well-being of the miners and their families.

MINERS' HOUSES.

The houses supplied by the company¹ as residences for miners at different localities are not in a satisfactory condition. Many of these houses are so old and out of repair that they should be abandoned and pulled down.² This, however, could not be done at present because there is a scarcity of suitable houses now available for the accommodation of the employees.

The company informed the Board that it was developing a scheme to induce the miners to build and own their own houses. To assist in this the Company is prepared to sell the miners property upon which they may build, permitting the purchaser to pay for the property by easy instalments. The

company have also built some new houses at Glace Bay.

The Board is of the opinion that a definite policy, calling for the construction of a definite number of new houses annually for a stated number of years, should be adopted. [We recommend that new houses of a minimum number equal to five per cent of the company houses now occupied by employees at each colliery on Cape Breton be built annually for the next five years.] There is a shortage of houses at present and some employees are living in dilapidated company houses. As the new houses are constructed these old houses can be destroyed. [The houses to be constructed should be detached so as to make them attractive in the hope that miners would buy them and own their houses. We recommend the practice, which is usually followed, of having a garden plot available for cultivation with each house.] This was particularly noticeable at Stellarton, but not so noticeable in connection with the houses at Glace Bay. Wherever possible the miners should be encouraged to go in for gardening. They come out of the mines at 3 o'clock in the afternoon and have a number of hours of daylight which could be well spent in the interesting and useful pastime of gardening.

In visiting the houses the Board has been struck with the fact that in many of the smaller houses there are large families, while in other cases comparatively small families are found occupying the largest houses. [To prevent injury and inconvenience to a large family living in a small house; we recommend that a re-allotment committee be formed at each colliery to endeavour voluntarily to bring about a change of houses among the employees sufficient to supply the largest available houses to the large families which are now living in the smaller houses.]

[It is the duty of the company to keep all its houses occupied by its employees in a habitable condition. Leaky

roofs particularly should be repaired promptly by the company at its own expense.]

Water supply.—Many of the company houses already have water piped to them. [This Board is of the opinion that all habitable houses facing on a street where a water main is laid should be given a water service by the company. This to be put in on condition that the rent of the house be increased to cover the interest and something for a sinking fund on the cost of providing improved conditions in the house.]

Sanitary conditions.—The sanitary condition of many of the houses is unsatisfactory. [The dry-closet in the rear of each house is supposed to be cleaned out periodically but apparently these occasions are not sufficiently frequent. It would be well also for the company to supply at cost sufficient lime, road dust, or other cheap disinfectant to be used frequently in these closets by their tenants.]

Drainage.—There is an open drain usually between the crown of the street and the premises occupied by the miner as well as an open drain in the rear of the miner's premises. [These drains are supposed to be kept cleaned out by the company and graded so that water will flow through them. Until suitable municipal drainage is established these drains should receive more careful attention and be kept in better condition.]

Streets.—Most of the streets upon which the company's houses face in the different localities where there are collieries are owned by the company. The statement is made by the company that it is prepared to turn these streets over to the municipalities in which they are situated, but that the municipalities are not willing to accept them because the ownership of the streets by the municipality will impose a greater demand upon the revenues of the municipality. [The Board is of the opinion that all such streets should be taken

over without delay by the municipalities in which they are situated, and that both water service and sewage system should be installed on the streets by the municipalities interested as soon as these services can be satisfactorily arranged.] While the company has in the past been looking after the supply of water and the maintenance of surface drainage for their houses, we recognize that these services are obligations which more properly belong to the municipalities.

Supplying of coal.—During war time the company limited the quantity of coal to be supplied at any one time to a miner's residence for domestic purposes. This rule is still in effect at Waterford. There is now no reason for its continuance and [the practice elsewhere of supplying all the coal an employee required for his domestic use should be followed at Waterford.]

COMPANY STORES.

There was a good deal of discussion before the Board as to the advantage or otherwise to the miners of the company's stores, as well as the methods of management and the prices charged in the stores. [The Board is of the opinion that the stores are a substantial benefit to the men.] Their prices are reasonable and the stock carried in the stores is suitable and satisfactory for the employees. [We believe that an improvement on company stores would be co-operative stores to be established by the men.]

The only criticism the Board has to offer with regard to the stores is that the system of giving credit to the company's employees and then deducting so much periodically from the employees' pay-envelope on account of the credit he has received in the stores has a tendency to lead to carelessness and extravagances. [It would be better for the men if the stores were carried on on a cash basis and that no credit whatever be given at the company's stores.] This practice, we believe, would

make the miner and his family more frugal in the purchases they made and would make the miner more independent and self-reliant. It would be difficult to at once establish a cash system in the stores particularly in times like the present when a miner's earnings are considerably limited, but we think that the company should gradually work into the practice of selling for cash only in the stores. If the company discontinues allowing credit in its stores it may be a hardship on some men when they are temporarily out of employment, if they have no cash with which to purchase supplies. In that event [we suggest the formation of a loan fund by the Union, to be created by a small contribution monthly from each member of the Union. This fund could be under the control of a committee of the men who would authorize temporary loans out of it to men in need of funds during times when they were temporarily out of employment.] There could be stated conditions which would give the committee more latitude in advancing money to men, particularly to those with a family. These advances, of course, to be paid back with interest when the borrower was earning.

THE MINES.

The list of complaints of unsatisfactory conditions in the mines increased with each sitting of the Board. [Many matters of trivial local application to individual mines were brought before us which can better be adjusted by the parties concerned disposing of them by mutual conference rather than by findings of this Board.] The men in each mine have a Pit Committee whose duty it is to endeavour to adjust differences with the mine management.] The practice is for this Committee to take grievances up with the Mine Manager, and if they cannot be adjusted with him, to appeal to the General Superintendent. This seems to be a satisfactory method of dealing with such matters, except that apparently disputes frequently arise as to what the complaint

was or how it was disposed of. [We recommend that Pit Committees follow the practice of always putting their complaints in writing when presenting them to the Mine Manager, and that the Mine Manager follow the practice of putting his reply in writing,] so that the records of the exact position taken by both parties will always be available. Promptness in attending to complaints will prevent much irritation.

There were a number of matters dealing with mining conditions brought before the Board which apparently had been discussed frequently between the employees and the mine managers, but which had not been disposed of.

Long walks. — In a number of the mines the miner has to travel a long distance after he enters the mouth of the mine before he gets to his working face. Our observations have led us to believe that the long walks in some of the mines result in an appreciable loss of productive labour, which in the interests of both the operator and the industry should be avoided.

[Where practicable, having in view the life of the mine and the cost of installation, we are of the opinion that riding rakes should be established in all mines. These riding rakes should be established not later than June 1st, 1924, and failing this an allowance should be made to all contract coal producers for all distance walked over one mile.]

Pushing boxes. [In all mines, where a box of two ton capacity or greater is in use, the miners should not be expected to push the empty box any distance.] The practice now followed in some mines is for drivers to leave the empty on a switch or siding, then hitch their horse to the full box at the working face and pull it out. [These drivers after pulling out the full box beyond the switch should be required to unhitch, bring their horse back, and place the empty at the working face.] It has been said that in some places there is not sufficient room for the horse to pass the full box to return to the empty. In the laying of tracks

in the future, wider places could be provided adjacent to the switch, where the full box would be left so that the horse could pass the full box in returning to place the empty.

Transporting tools. [In addition to conveying the miner to his work, we think the company should, as far as practicable, help him in transporting his tools on some conveyance provided by the company to a convenient point in the vicinity of his working face.]

Shoving down coal. — There are many new places where a track has not been laid to the working face, and where [the grade is not sufficiently steep to cause the coal to slide down to the box, but where it is necessary for the miner to shovel the coal two or more times before he is able to load it into the box. In such cases there is a special allowance made to the miner for this extra work of two cents a ton. This is not sufficient. For this he should be given an allowance of four cents a ton for this extra work.]

Minimum contract rate. — [In some mines there is no stated rate which a miner is allowed where he encounters "trouble" or material other than coal, which he finds in the working face and which he must remove or else work round. In such places he should be given a minimum day's pay, not less than the rate paid for shift work in that district. This to apply only in cases where the miner is working on a contract basis.]

Room turning. [The Board is of the opinion that for room turning, until the room is widened out to its normal size,] provided that the distance from the place of beginning shall not exceed 15 feet, the regular rate for narrow work should be paid.]

Posting rates. — In some of the mines men do not appear to know, and have difficulty in ascertaining what the correct rates are which should apply to the class of work in which they are engaged. [The company should post up, and maintain posted up, at the mouth of each mine, a statement of all rates applicable

for all services which may be performed by their employees in the mines.]

Lamps.—The company is to be commended for its efforts to establish the most modern type of electric lamp. There are still some mines in which these lamps have not yet been installed. [The Board is strongly of the opinion that all mines should be supplied with the newest type of electrical lamps at as early a date as practicable.]

While it is reasonable for a miner to be called upon to pay for the repair parts for a lamp injured through carelessness, we do not think where a bulb burns out without the exterior glass being broken, or the lamp being in any way injured, that the miner should be called upon to pay for a new bulb.

Local contracts.—[The Board is of the opinion that the principle of substituting contract rates for datal rates in road-laying, driving and landing-tending is a correct one, and that this principle should as far as possible be applied.]

Slueing on sheets.—[There should be a man at all sheets where boxes are slued to help the miner to slue his box. A number of sheets may be looked after by one helper.]

Stoppage of work.—It has been brought to the attention of the Board that stoppage of work in a mine sometimes occurs on account of some trivial dispute between an employee and his superior officer, or because the employee in some manner has been disciplined.

[It is unfair and improper to the other employees of a mine that for one of the reasons above indicated work in a mine should be stopped even for a few hours. Instead of the employees taking any such action they should bring their grievance, through their pit committee, to the attention of the mine manager or the superintendent, and reasonable time should be allowed for a settlement of the grievance.]

THE COAL MARKETS.

Before the war, Nova Scotia coal had three important markets, i.e., (1) Bunkering of Atlantic steamers at Sydney, N.S., Halifax, N.S., and St. John N.B. (2) Maritime provinces domestic and industrial consumption, and (3) the St. Lawrence market.

The bunkering market has been greatly reduced by the steadily increasing use of oil instead of coal as fuel on the Atlantic steamers, and by the cheapness of British coal.

During the war and after, much of the Nova Scotia coal was sent to England and France. The Canadian markets were given secondary consideration, and were only allowed to have a limited supply of coal from Nova Scotia. During this period also the St. Lawrence market was lost to the Nova Scotia coal companies by requisitioning of the coal-freighting fleet by the British Admiralty; by reduction in coal production following heavy enlistment of miners; and by large consumption of coal in the steel works in Nova Scotia in the manufacture of munitions. This resulted in the establishment of a market in Canada for United States bituminous coal, particularly from the non-union fields, where, owing to local conditions, coal can be mined at a lower rate than in the Nova Scotia coal fields.

At the present time the company has only a limited Canadian market for its coal, and in that market it has to meet the keen competition of the coal from both the non-union and union fields of the United States.

Not only are many coal consuming industries either shut down, or are operating only to a limited extent, but some of those that are operating are using United States coal mined by non-union labour, and transported to Canadian ports by water or to a less extent by rail.

Today United States water-borne coal is being used at Halifax, Bathurst, St. John, and Montreal.

☞ The development of electric energy by water power in the vicinity of Montreal has also had the effect of reducing the consumption of Nova Scotia coal in the Montreal market. ☞

The company has on hand at present 50,000 tons of coal at Montreal carried over from last year's output, and large banks of coal in Cape Breton for which it is seeking a market.

THE RATES OF PAY.

At the sittings of the Board at New Waterford a memorial was presented to us by a Miners' Relief Committee composed of citizens of New Waterford. In the memorial the following statement appears on what a fair living wage for a miner should be:

Needless to say, we recognize the important place which belongs to the economic laws of supply and demand in determining the merits of the question under dispute. Nevertheless, ☞ we must remember that the labourer is a human being, not a mere instrument of production, and that his right to a living wage is the first moral charge upon industry. ☞ Moreover, there are few economists today, and none among Christian writers, who would deny that the labourer's right to a living wage is morally superior to the employer's right to interest on his capital. ☞ By a living wage is generally understood, not only sufficient food, clothing and shelter, but also opportunities for self-improvement and for the education of his family, as well as provision of some kind against sickness and old age. Knowing conditions as we do, we have no hesitation in stating that the present wages are not sufficient to enable a workman to maintain a decent livelihood for himself and his family. ☞

☞ The Chairman of the committee on being asked if he included interest on bonds as dividends, said "No", that the committee recognized that interest on bonds advanced for the development of the business, which the company was under a legal obligation to pay, was not included in their idea of dividends, but should receive prior consideration. ☞

☞ This Board agrees with the position taken by the citizens' committee, but we recognize that the remuneration to be paid to the employees must necessarily be governed by the price which the company is able to get for its coal. ☞ It would be quite unreasonable, of course, to expect the company to pay so high a rate of wages as would prevent it from at least paying, not only all costs of mining, transportation and selling its coal, but also its overhead expenses and interest. Where the business of any company is in the nature of a monopoly, and the company to some extent can control the price of the commodity it has to sell, the principle of a living wage, as enunciated above, can more easily be carried out. In the present case, in fixing the highest rate of wage that we think the company can be reasonably expected to pay, we must be guided to a considerable extent by the conditions of the coal market. We feel that we would be doing the miners a grave injustice if we were to fix a rate of wage so high as to prevent the company from being able to market its coal in competition with its competitors, and still pay all necessary expenses. ☞ We are firmly convinced that the chief cause of the unfortunate condition of the employees of the company at present is due to lack of work, ☞ and that the greatest service we can render, not merely to the employees but to the community at large, is to so adjust the differences between the company and its employees as to give the men the largest possible wage without placing obligations on the company which would prevent it finding a fair market for its coal. We have gone carefully over the costs of mining and selling coal, and we are satisfied that the company will not be able to more than pay expenses under present market conditions, if they pay the wages we propose fixing in this report. Any higher rate of pay would mean less work, and, therefore, less money for the men.

The men have asked that the rates of pay fixed by the Montreal Agreement

of 1920, which were in effect prior to the reduction made by the company on the 1st January, 1922, be continued. On that date the company put into effect a reduction in the datal rate from \$3.80 to \$2.44 per day, and a percentage reduction in contract work of about 35 per cent. Subsequently, by the Gillen award, dated January 27th, 1922, the minimum datal rate was increased to \$2.85, and the wages of other men were reduced to 20 per cent below the rates fixed by the McKinnon award of the 15th January, 1920. The men refused to accept the Gillen award, although it was accepted by the company, and rates pursuant to that award were made effective from the 1st January, 1922.

[This Board is of the opinion that too great a reduction in the datal rates was made by the Gillen award. We feel that the smaller the daily revenue of a worker the less any reduction applicable to him should be.] Generally speaking, the living conditions of all miners are the same. [We are of the opinion that the McKinnon award rates, with a reduction of 20 per cent in the wages of all employees, with a minimum of \$3. per day for datal men over the age of 18 years, should be adopted.] On considering rates of pay, we have realized that the company is supplying coal for domestic use to all miners at \$2.25 per ton, and houses at a rental much below the real value.

The Sydney Mines differential. — At Sydney Mines the basis of the remuneration appears to be lower than that existing at other mines of the company. Rates of pay, of course, vary with different conditions at different mines. That is justifiable, but it appears to this Board that in addition to that the whole basis of pay at Sydney Mines is lower than elsewhere. After making due allowances for the recognized varying conditions controlling rates of pay in other mines, [the Board is of the opinion that when production improvement warrants, the basis of rates of pay at Sydney Mines should be increased to put it on

a parity with the basis existing in the mines on the Southern side of Sydney Harbour.]

Rates at Nos. 6 and 7 mines, Springhill.—At the sitting of the Board at Springhill there was considerable argument as to what rates should be fixed for machine running, shooting and loading in the two new mines Nos. 6 and 7 at Springhill. Both parties submitted figures to show what in their position the rates should be for these mines.

We have come to the conclusion that the following rates should be applicable to Nos. 6 and 7 Mines Springhill. These rates are on a parity with the rates for other mines fixed by the Montreal agreement of 1920, and are subject to the same reductions as are provided for other rates in this report:—

Description Narrow work 12' 0" wide height	Machine cutting per ton	Shooting & loading per ton	Total per ton
Over 3' 6" to 4'	\$0.42	\$1.03	\$1.45
" 4' " 4' 6"	0.38	0.97	1.35
" 4' 6" " 5'	0.33	0.92	1.25
" 5' " 5' 6"	0.32	0.83	1.15
" 5' 6"	0.28	0.82	1.10

Bords 14' 0" wide height	Machine cutting per ton	Shooting & loading per ton	Total per ton
Over 3' 6" to 4'	\$0.38	\$0.97	\$1.35
" 4' " 4' 6"	0.34	0.91	1.25
" 4' 6" " 5'	0.30	0.85	1.15
" 5' " 5' 6"	0.27	0.78	1.05
" 5' 6"	0.25	0.75	1.00

Laying of roads and timbering included in these rates.

Sinkings 12' 0" wide
height

Over 3' 6" to 4'	Machine cutting per ton	Shooting & loading per ton	Total per ton
" 4' " 4' 6"	\$0.55	\$1.35	\$1.90
" 4' 6" " 5'	0.51	1.29	1.80
" 5' " 5' 6"	0.46	1.24	1.70
" 5' 6"	0.45	1.15	1.60
" 5' 6"	0.41	1.14	1.55

Laying 3" rails and bailing water by special contract.

5 cents per ton additional for machine cutting on the north side of No. 6 mine.

The Board has carefully examined the average earnings of the various classes of employees and believes that under the scale of rates which it recommends the employees will earn average daily amounts approximately as follows:

Surfacemen.....	\$3.20
Underground men (other than contract coal producers).....	3.30
Contract coal producers.....	5.50

The earnings of many employees will, of course, be very much in excess of these figures.

The adjustment of rates of pay, both datal and by contract, shall apply from the 1st of May, 1922. The new conditions and allowances shall become effective on June 1st, 1922.

No variation, except what may be made by mutual agreement, shall be made in the rates of pay, allowances or

conditions herein provided, except on 45 days' notice in writing by the party desiring the change to the other party.

The undersigned regret that the representative of the employees on the Board has refused to join them in this report. Much time was spent, many concessions were made and strenuous efforts put forth to reach a unanimous finding in this matter, but without avail.

All of which is respectfully submitted.

(Cgd.) D'ARCY SCOTT,
Chairman.

(Sgd.) JOHN E. MOORE,

Minority Report.

In the matter of the Industrial Disputes Investigation Act, 1907, and amending acts, and of the controversy between the British Empire Steel Corporation and its Subsidiary Coal Companies, the Dominion Coal Company, the Nova Scotia Coal Company, the Acadia Coal Company, on the one hand, and the United Mine Workers of America, represented herein by employees of the above-named companies, concerning questions of wages, working conditions, hours of labour, housing, and other kindred subjects.

To the Hon. James Murdock,
Minister of Labour,
Ottawa, Canada.

Sir,

Permit me to submit for your consideration the following Minority Report and Award concerning the controversy above set forth. The Board of Conciliation appointed by your Department carried on an extensive investigation in all the principal mining districts controlled by the British Empire Steel Corporation. This investigation embraced an inspection of surface and underground workings of mines in the Glace Bay, Waterford, Sydney Mines, Stellarton and Springhill fields; also an investigation into the housing and living conditions of the employees, and all

other matters which either of the disputing parties considered relevant. Sitings of the Board for the purpose of hearing evidence from both parties to the dispute were held at Sydney, Glace Bay, Sydney Mines and Waterford, in the Cape Breton district, and Stellarton, Springhill, and Halifax, on the mainland. At those sittings a voluminous amount of evidence, both verbal and documentary, was submitted for the consideration of the Board.

The grievances of the men as presented before your Conciliation Board may be divided into the following categories.

(1) Complaints regarding housing and other living conditions.

(2) Complaints regarding certain working conditions in and about the mines.

(3) Complaints regarding certain practices employed by the Company's stores in the Cape Breton fields.

(4) A general complaint in all coal fields controlled by the British Empire Corporation in regard to a drastic reduction in wages, and a demand for increased remuneration.

With your permission, I shall deal with those grievances and demands in the order herein set down.

Housing conditions. — Housing presents conditions favourable or unfavourable to the development of health, morality, domestic content, and the dignity and joy of life. The most successful rival to the saloon and vicious resort is the home. But where the home is barren, cheerless, repulsive, the glittering street, the hangout and the dive, claim old and young. Only the presence of the good can exclude the bad, and the home is the natural centre of life's virtues and life's values. Hence it is eminently fitting that the housing conditions in our Nova Scotia mining centres should occupy a distinctive place in your Commission's report.

It is but just to the British Empire Steel Corporation to state that it owns a number of good tenements and that the rental is reasonable. Unfortunately though many of the Company's houses, particularly in the Cape Breton field, are a reflection upon the Company and a gross injustice to the miners who are compelled to inhabit them. A number of the houses visited by your Commission had only two small bedrooms. These houses were supposed to accommodate families of eight to ten. One Company tenement, or more properly termed hovel, visited by your Commission in the Glace Bay field, consisted of a small kitchen and two small bedrooms. In this miserable habitation there lived a miner, his wife, his mother-in-law and five young children.

With a view to improving housing conditions in the coal fields controlled by the British Empire Coal Corporation, [I would recommend that a large number of the Company tenements, which are obviously unfit for human habitation, should be destroyed and replaced by suitable and decent dwellings. Where new houses are to be erected, they should be single and not double tenements, and care should be exercised to allow each tenant sufficient ground for the cultivation of a vegetable garden.]

Your Commission found that the Company has been remiss in its duty in the matter of providing adequate and necessary repairs to their tenements. The roofs of many of the Company houses are leaky. This neglect is inexcusable. [The Company should provide proper and necessary repairs at their own expense. I would also strongly recommend that in those cases where the tenants attempt to make their homes a little more attractive by painting and papering the interior, such improvements should be charged up against the rent of those tenements.]

[In many cases kitchens are lacking and the Company should provide them. The Company should also strive to keep their tenements properly fenced, so that some encouragement would be given to the tenants to plant and cultivate gardens.]

Sanitary conditions. — The domestic surroundings and sanitary conditions of the miners' homes were found with few exceptions to be deplorable. [The almost entire lack of a suitable sewerage in the Cape Breton fields, is a menace to the health of the miner and his family. The public good demands that immediate steps be taken to devise and inaugurate a proper and suitable sewerage system.] In the majority of the Cape Breton mining towns it was found that the streets were owned by the Company. When questioned in this regard the Company affirmed its willingness to turn the streets over to the different towns without charge. [I would recommend that the civic authorities of those towns meet with officials of the Company, with a view to arrive at a permanent policy in regard to the ownership and upkeep of these streets.] If this clash of jurisdiction prevents the inauguration of proper sewerage system for the miners, the sooner it is permanently settled the better. The woeful lack of proper sewerage systems at the present time is disgraceful and a distinct menace to public health.]

It was brought to the attention of your Commission that in the Sydney Mines district the water supply was wholly inadequate. In parts of this district water is conveyed in casks and distributed from house to house, cans being hung out on a fence and filled from the water-wagon. The result is that the tenants do not receive an adequate supply of fresh water. [I would recommend that in this, as in all other mining districts, an adequate supply of pure water be furnished and so conveniently located that the miners and their families may avail themselves of it.]

Mining conditions.—Your Commission visited mines in the Cape Breton, Pictou and Cumberland fields. On the whole the mines were found to be in good condition, but it was demonstrated to the Commission that the miners in the different mines have obstacles to contend with which, if removed, would lighten their onerous work and permit them to earn higher wages. In a number of the mines for example, the miners have to walk two and three miles to the working face. This makes it necessary for the miner to rise as early as 5 a.m. in order to be at his working place by 7. And although he may stop working at 3 p.m., he does not get out of the mine until 4 or later, the consequence being that whilst the general public think that the miners are enjoying an eight-hour day, their work day is really one of ten and not eight hours. Those long walks are economically wasteful. They result in a loss of a great deal of what otherwise would be productive labour. When the miners have walked two or three miles over a travelling road which in some cases is both low and dusty, they are in no condition physically to commence the arduous task of producing coal. Your Commission can speak from personal experience in this matter and although we were unable to come to a unanimous decision, I believe we would be of one mind in affirming that the long walks in some of our Nova Scotia mines constitute a good half-day's work. The Company speaks of having a number of pensioners on its pay list. No wonder they

have pensioners, when men have to walk three miles in a bent position before commencing and after completing a heavy day's work. I venture to say that had your Commission to perform for one month what the Nova Scotia miners are expected to do all their lives, we also would be pensioners.

[I would recommend that riding rakes should be provided to convey the men to and from their working places. Until riding rakes are installed in all the mines, miners should receive pecuniary consideration for the labour entailed in those long walks. In this connection I would recommend that for every half mile walked either to or from his working place, the underground worker should receive five cents.]

Pushing boxes.—Universal complaints were heard in respect to shunting boxes. The miners have a perfectly just reason for complaint in this connection. [This is properly the work of a horse and no human being should be asked to do a horse's work.]

Lamps. — [The management is to be commended for introducing the electric lamp in some of its collieries. The results obtained have been excellent, and I would recommend that they be introduced in all the Company's mines.] I feel that the increased output resulting would ere long more than pay for the cost of installation.

Tools. — [It is my opinion that all mining tools, if possible, should be sent into the mine and placed at a convenient location on each landing, and a man appointed to look after all tools and give them out to their owners.]

Wash-houses. — The wash-houses at most of the mines are not all that they should be. I observed that in one wash-house at Glace Bay, there was only one wash-basin for fifteen miners. [A basin should be provided for each miner and the wash-houses should be kept as clean and attractive looking as possible. Additional shower-baths should be provided as they are a great advantage

to the men and would not be expensive to install.]

Company's stores.—Your Commission inspected the Company's stores at Waterford, Sydney Mines and Glace Bay. The Company's stores cannot be reasonably criticised in regard to the prices or quality of the goods sold. [But the system of Company's stores must be condemned in so far as it fosters paternalism and extravagance, and creates a condition in which the miners become absolutely dependent upon the Company. The ideal condition would be to have the men establish their own stores on the co-operative plan.] But if the Company stores are to be continued, [I would recommend that the Company discontinue the system of making weekly deductions from the miner's pay envelope to wipe out accounts at the stores, and that those stores be placed in the same position as other retail stores in the matter of collections and credit.]

Wage rates.—Realizing the absolute need of co-operation in the Nova Scotia coal industry, I made an honest and consistent effort to agree with the other members of the Board upon general wage rates that could be recommended on grounds of justice and expediency. To my mind the evidence submitted by representatives of the men and by citizen's committees before our Board, establish conclusively that the wage rates recommended by the Majority Report of the Gillen Board and accepted and put into effect by the Company are insufficient to maintain a miner and his family in frugal and decent comfort. I was unable to agree with Chairman Scott and Mr. Moore upon the rates which they incorporated in their Report, because I felt, and still feel, that they will not provide a living wage to a large percentage of our Nova Scotia miners. I am bound to say, though, that the production costs submitted by the operators to the Board, although they did not go back as far as I desired them, being only for the year

1921, were higher than I anticipated. Nevertheless, I could find no conclusive argument from production costs or from financial conditions of the corporation to justify me in recommending the wage rates embodied in the Majority Report of the Scott Board. I have consistently, and I think irrefutably, [taken the stand that in periods of depression such as we are unfortunately experiencing, dividends should be sacrificed before the worker should be compelled to accept less than living wages.] And I think I may be pardoned when in this connection I place a higher valuation upon the standard of living, the happiness, the contentment, of our Nova Scotia miners, than I do upon dividends for the British Empire Corporation.

Viewing the question from all angles, and consulting not only the miners' good, but also that of the industry, [I feel that the present minimum datal rate should be increased from \$2.85 to \$3.45, and that the higher datal rates should be reduced 10 per cent below what they were under the Montreal agreement, and that the contract rates at present in force should be increased 18½ per cent, making them 13½ per cent below the contract rates of the Montreal agreement, or 1 per cent below those of the MacKinnon award. Those general wage rates to be retroactive to the 1st January.] Had I been able to obtain a unanimous award, I might have been willing on grounds of expediency to go slightly below the figures herein mentioned. But since we could not come to a unanimous decision, I feel that the rates herein set forth represent the maximum reductions which justice will allow.

Double-shifted places.—[I further recommend that a special consideration of 7c per ton be paid in all double-shifted places.]

Shovelling down in inclines.—The miner should not be compelled to shovel coal more than twenty feet without

receiving consideration. It was found in some mines that miners had to shovel coal three times before it could be loaded in the boxes. The compensation allowed is ridiculously low. [I would recommend the present consideration for this work be done away with and that the Company provide and pay a datal man to assist with this work.]

Slewing boxes on sheets.—[In all cases where boxes must be slewed on sheets the Company should provide and pay the wages of a datal man.]

Trouble.—[Where a miner encounters trouble and is consequently unable to make his average contract wage, he should be paid a minimum datal wage of \$5.00.]

Differential in Sydney mines district.—It was brought to the attention of your Commission that the general wage rates paid in the Sydney Mines District have always been lower than the general wage rates in other districts controlled by The British Empire Corporation. Whilst there may have been some excuse for this in the past, it was clearly established before your Board that there is no legitimate excuse for it at the present time. [I therefore recommend that the wage rates prevailing in the Sydney Mines district shall henceforth conform with the general wage rates prevailing in other sections of District 26.]

Bonus in Pictou County fields.—[Your Commission found that in Pictou County fields a bonus was paid to the men based on increased cost of living. On the 1st January last, the Company discontinued paying the bonus. After a consideration of the relative merits and demerits of the case I recommend that the bonus be continued.]

Room turning.—[In room-turning I recommend that the regular narrow work prices be applied until the room is widened out to its normal width.]

Local contracts.—[It is my opinion that all local contracts which existed during the period of the Montreal agreement, should be recreated, subject to a reduction of 14 per cent.]

Shippers and trimmers.—[I would recommend that those employees be put on a weekly basis and paid \$26. per week. I would also urge upon the Company the desirability of providing as far as possible, steady work for those men in or about the mine during the winter time since their occupation is seasonal.]

Nos. 6 and 7 Springhill.—[I have purposely omitted any reference to machine rates in Nos. 6 and 7 mines at Springhill, having been given to understand that this matter was satisfactorily adjusted at a meeting between President Baxter and J. J. McDougall.]

I understand that the reason why Chairman Scott and Mr. Moore recommended the wage rates embodied in their Majority Report, was not that they considered them to represent a living wage, but rather because they considered them the maximum rates which the Company could afford to pay at the present time. [A statement given out to the public by Mr. Roy Wolvin, President of the British Empire Corporation, which appeared in the press on May 15th under the heading "Steel Company's Earnings over Four Millions," and being the financial statement of the British Empire Steel Corporation for the eight and a half months of its existence, would not seem to bear out the contention of my colleagues on this Board.]

Permit me also to briefly refer to the fact that when the British Empire Corporation was organized some eight and a half months ago, it was heralded throughout the land as an industrial organization that would result in great economy and in the most efficient production. Today we are told that this organization which was inaugurated to promote industrial efficiency is unable to pay living wages to its employees. In respect to the British Empire Corporation it would seem that the people of Nova Scotia, particularly the miners, may well exclaim "Efficiency, what crimes have been committed in thy name."

I have the honour to be, Sir,

Yours respectfully,

(Sgd.) I. D. MACDOUGALL,

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1922

TEN strikes, involving 645 workpeople were reported as having commenced during May. There were in existence at some time or other during the month 30 strikes, involving 13,186 workpeople and an estimated time loss of 278,160 working days, as compared with 24 strikes, involving 17,478 workpeople and 381,135 working days in April 1922; and 56 strikes, 9,323 workpeople and 175,889 working days in May, 1921. The time loss occasioned by the 10 new strikes which began in May was 8,533 working days, while a loss of 269,627 working days is charged to the 20 strikes which commenced prior to May. Four of the strikes commencing prior to May and seven of the strikes commencing during May terminated during the month leaving the following 19 strikes, affecting 9,807 workpeople on record on May 31; coal miners, District 18, Alberta and British Columbia; bricklayers, masons and plasterers, Calgary; painters, Toronto; plumbers, St. Catharines; employees of steel and coal companies, Sydney, N.S.; gauge men, Sydney, N.S.; moulders, Guelph; photo engravers, Montreal; photo engravers, Ottawa; compositors, Hamilton; compositors, Montreal; compositors, Toronto; compositors, Vancouver; compositors, Winnipeg; compositors and pressmen, Halifax; compositors and pressmen, Ottawa; clothing workers, Montreal; and theatre employees at Calgary.

Disputes by Industries

The following is a review of disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—The strike of about 7,538 coal miners throughout District 18 which was carried over from the previous month's record remained un-

minated at the end of May. The Conciliation Board appointed under the Industrial Disputes Investigation Act with Mr. W. E. Knowles, K.C., Chairman, still continued to hold sittings throughout the District. The time loss during the month amounted to 195,988 working days.

BUILDING AND CONSTRUCTION.—During May there were 11 strikes in existence in this group, involving about 727 workpeople and resulting in a time loss of 12,556 working days. Seven new disputes were reported during the month, the cause of the dispute in each case, with one exception, being a proposed reduction in wages. In the case of the bricklayers at Prince Albert increased wages were demanded. At the close of the month three strikes were still in existence, namely, bricklayers, masons and plasterers at Calgary; painters at Toronto and plumbers at St. Catharines.

METALS, MACHINERY AND CONVEYANCES.—One new strike was reported during the month, that of about 12 moulders at Guelph, who objected to a proposed reduction in their wages and an increase of one hour being made in their working day. This strike remained in effect at the end of the month.

PRINTING AND PUBLISHING.—Ten strikes, involving 1,867 workpeople and resulting in a time loss of 48,542 working days represented the standing in this group for the month. The strikes for the 44-hour week still remained un-terminated in Halifax, Hamilton, Montreal, Ottawa, Toronto, Vancouver and Winnipeg.

TEXTILES.—With respect to the strike of weavers at St. John, N.B., which was carried over from the previous month's record it was reported, early in May, that conditions were no longer affected, the strikers being replaced by other workers.

STRIKES AND LOCKOUTS DURING MAY, 1922

Industry or occupation	Particulars	Number of employees affected	Time loss in working days
MINES, QUARRIES, CLAY PRODUCTS, ETC.—			
Coal miners, District 18, Alta., and B.C.	Strikes commencing prior to May, 1922. Commenced April 1. Against a reduction in wages. Underminated.	7,538	195,988
BUILDING AND CONSTRUCTION—			
Bricklayers, masons and plasterers, Calgary, Alta.	Commenced April 1. Against a reduction in wages. Underminated.	9	234
Painters, St. Catharines, Ont.....	Commenced April 1. Against a reduction in wages. Settled by negotiations; work resumed May 8.	30	180
Painters and decorators, Quebec, Que.	Commenced April 24. Against a reduction in wages. Information received indicates employment conditions no longer affected.	170	4,420
Plumbers, St. Catharines, Ont.....	Commenced April 1. Against a reduction in wages. Underminated.	40	1,040
Sheet metal workers, Toronto, Ont.	Commenced January 2. Against a reduction in wages. The men accepted the employers' terms; work resumed about the end of April.
METALS, MACHINERY AND CONVEYANCES—			
Employees of steel and coal companies, Sydney, N.S.	Commenced November 22, 1920. For increased wages and improved working conditions. Underminated.	150	3,900
Gauge men, Sydney, N.S.....	Commenced June 9. In sympathy with employees of steel and coal companies. Underminated.	16	416
PRINTING AND PUBLISHING—			
Photo engravers, Montreal, Que....	Commenced May 2, 1921. For shorter hours. Underminated.	30	780
Photo engravers, Ottawa, Ont.....	Commenced May 2, 1921. For increased wages and 44-hour week. Underminated.	9	234
Compositors, Hamilton, Ont.....	Commenced May 2, 1921. Alleged violation of agreement by employers. Underminated.	51	1,326
Compositors, Montreal, Que.....	Commenced June 14, 1921. Objection of men to perform work that came from shop where strike existed. Underminated.	16	416
Compositors, Montreal, Que.....	Commenced July 1, 1921. For increased wages and 44-hour week. Underminated.	370	9,620
Compositors, Toronto, Ont.....	Commenced June 1, 1921. For increased wages and 44-hour week. Underminated.	862	22,412
Compositors, Vancouver, B.C.....	Commenced May 2, 1921. For increased wages and 44-hour week. Underminated.	39	1,014
Compositors, Winnipeg, Man.....	Commenced July 1, 1921. Alleged lockout following refusal of employers to renew agreement. Underminated.	224	5,824
Compositors and pressmen, Halifax, N.S.	Commenced May 2, 1921. For shorter hours. Underminated.	51	1,326
Compositors and pressmen, Ottawa, Ont.	Commenced June 1, 1921. For increased wages and 44-hour week. Underminated.	215	5,590
CLOTHING—			
Clothing workers, Montreal, Que....	Commenced February 17. In protest against a change in working conditions. Underminated.	60	1,560
TEXTILES—			
Weavers, St. John, N.B.....	Commenced April 12. Against a reduction in wages. Strikers were replaced and work resumed May 8.	42	252
TRANSPORTATION—			
Longshoremen, Montreal, Que.....	Commenced April 17. Against a reduction in wages. Settled by mediation of the Mayor of Montreal. Work resumed May 6.	2,619	13,095

STRIKES AND LOCKOUTS DURING MAY, 1922.—(Continued).

Industry or occupation	Particulars	Number of employees affected	Time loss in working days
Strikes commencing during May, 1922.			
BUILDING AND CONSTRUCTION—			
Bricklayers, Prince Albert, Sask.....	Commenced May 15. For increased wages. Settled by negotiations; work resumed May 29.	26	286
Bricklayers, Saskatoon, Sask.....	Commenced May 1. Against a reduction in wages. Settled by negotiations; work resumed May 24.	35	735
Electricians and helpers, Montreal, Que.	Commenced May 23. Against a reduction in wages. Settled by negotiations; work resumed May 27.	82	246
Millwrights and carpenters, Winnipeg, Man.	Commenced May 2. Against a reduction in wages. Settled by negotiations; work resumed May 22.	175	2,975
Painters, Toronto, Ont.....	Commenced May 15. Against a reduction in wages. Unterminated.	100	1,400
Plumbers, Fredericton, N.B.....	Commenced May 1. Against a reduction in wages. Settled by negotiations; work resumed May 11.	10	90
Plumbers and steamfitters, Edmonton, Alta.	Commenced May 1. Against a reduction in wages. Settled by negotiations; work resumed May 23.	50	950
METALS, MACHINERY AND CONVEYANCES—			
Moulders, Guelph, Ont.....	Commenced May 4. Against a reduction in wages and increased working hours. Unterminated.	12	276
LEATHER—			
Shoeworkers, Montreal, Que.....	Commenced May 17. Against a reduction in wages. Settled by negotiations; work resumed May 29.	140	1,260
MISCELLANEOUS—			
Theatre employees, Calgary, Alta..	Commenced May 8. Against employment of non-unionists. Unterminated.	15	315

LEATHER.—Shoeworkers at Montreal to the number of 140 went on strike May 17, against a reduction being made in their wages. Negotiations were carried on and a settlement arrived at whereby the men resumed work May 29.

TRANSPORTATION.—One strike, involving 2,619 employees and resulting in a time loss of 13,095 working days was carried over from the previous month's record. This was the strike of longshoremen at Montreal which commenced

about April 17. Several conferences were held and finally a settlement was brought about by the mediation of the Mayor of Montreal, the men accepting the reduction in wages proposed by the employers and resuming work on May 5.

MISCELLANEOUS.—Fifteen theatre employees at Calgary declared a strike on May 8, owing to the employment of non-unionists in the theatre. This strike remained unterminated at the close of the month.

STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING APRIL, 1922

THE following details with regard to strikes and lockouts in the United Kingdom during April, 1922, based upon returns from employers and workpeople, are taken from the May issue of the British *Labour Gazette*.

NUMBER, MAGNITUDE AND DURATION.
—The number of trade disputes involv-

ing a stoppage of work, reported to the Department as beginning in April, was 38, as compared with 48 in the previous month, and 44 in April, 1921. In these new disputes about 11,000 workpeople were directly involved and 1,000 indirectly involved (*i.e.*, thrown out of work at the establishments where the

disputes occurred, though not themselves parties to the disputes).

The stoppages which began in March in the engineering and shipbuilding trades continued throughout April, and are estimated to have involved about 240,000 workpeople. In addition, about 15,000 workpeople were involved, either directly or indirectly, in 56 smaller disputes which began before April and were still in progress at the beginning of that month. The total number of new and old disputes in progress in April was thus 96, involving about 267,000 workpeople, and resulting in a loss during April of nearly 5,800,000 working days.

CAUSES.—Of the 38 disputes beginning in April, 16, directly involving about 2,800 workpeople, arose out of proposed reductions in wages; 8 directly involving about 3,700 workpeople, on other wages questions; 4, directly involving 1,400 workpeople on questions respecting working hours; 4, directly involving 2,500 workpeople, on details of working arrangements; and 6, directly involving 800 workpeople, on other questions.

RESULTS.—During April settlements were effected in the case of 11 new disputes, directly involving about 4,600

workpeople, and 23 old disputes, directly involving about 9,900 workpeople. Of these disputes 2, directly involving 200 workpeople, were settled in favour of the workpeople; 14, directly involving 5,600 workpeople, in favour of the employers; and 18, directly involving 8,700 workpeople, were compromised. In the case of 5 disputes, directly involving about 1,600 workpeople, work was resumed pending negotiations.

The following table classifies the disputes by groups of trades:—

Groups of Trades	No. of disputes in progress in April			Number of workpeople involved in all disputes in progress in April.	Aggregate duration in working days of all disputes in progress in April.
	Started before April 1.	Started in April.	Total.		
Building	8	3	11	500	7,000
Mining and quarrying	14	9	23	17,000	154,000
Metal, engineering and shipbuilding...	19	15	34	244,000	5,573,000
Textile and clothing...	4	3	7	1,000	13,000
Transport	3	3	6	1,000	9,000
Other trades	7	2	9	2,500	18,000
Employees of public authorities	3	3	6	1,000	17,000
Total, April, 1922....	58	38	96	267,000	5,791,000
Total, Mar., 1922....	53	48	101	277,000	3,517,000
Total, April, 1921....	54	44	98	*1,191,000	*23,802,000

*A general dispute in the coal mining industry was in progress in April, 1921.

THE COAL STRIKE IN THE UNITED STATES

THE general strike of coal miners in the United States which began on April 1 continued throughout May with no signs of an early settlement. The circumstances that led up to this dispute and the chief events in connection with it that took place during April have been set forth in the April and May issues of the LABOUR GAZETTE.

Negotiations between representatives of the anthracite miners and operators continued during May. In reply to certain demands submitted by the miners, the operators submitted an agreement

providing for a decrease amounting to 18 per cent in contract rates below the rates established by the United States Anthracite Coal Commission in August, 1920; a reduction in day rates of \$1.20 per day or per shift; and the reduction of day rates of boys by 72 cents per day. It was further provided that the agreement should last for five years subject to annual wage adjustments through a joint committee meeting on February 1, which should arrange rates to be effective on April 1. Should no agreement be reached by March 1 in any year, the

determination of proper wage rates should be referred to a commission of five persons to be selected by the presiding judge of the United States Circuit Court of Appeals for the Third Judicial District. This proposed agreement was rejected by the miners' representatives on the ground that the wage reductions were too extreme, amounting to an average of 21 per cent, while if such reductions were put into force they would reduce the price to the consumer only by about 5 per cent. The conference then adjourned until June 2 in order to give the operators time to consider the miners' reply. No progress toward a settlement was made in the bituminous fields.

The United Mine Workers claimed that there were few defections from their ranks and that about 100,000 non-union miners had joined in the strike. On the other hand the output of bituminous coal steadily increased, amounting in the eighth week of the strike to 4,866,000 tons, according to the Geological Survey, as compared with 4,484,000 tons in the

preceding week. The output of anthracite coal, however, was negligible. The production of coke also increased slowly amounting to 100,000 tons during the week ended May 20 as compared with 96,000 tons in the previous week. Notwithstanding the strike the spot prices of bituminous coal declined sharply in the last week of May in all the principal markets of the United States and for all varieties, with very few exceptions.

With a view to stabilizing the prices of soft coal, Mr. Herbert Hoover, Secretary of Commerce, invited a number of bituminous coal operators to Washington, and on May 31 discussed the matter with them. After the conference the Secretary announced that \$3.50 per ton was considered a fair maximum spot price for mine run coal from southern West Virginia, Virginia, eastern Kentucky and Tennessee. From \$2.20 to \$2.60 were considered fair prices for Alabama coal. It was arranged that a further meeting would take place early in June to consider prices in the other coal fields.

DISPUTES IN THE BRITISH ENGINEERING AND SHIPBUILDING INDUSTRIES

Conclusions reached by the Court of Inquiry

IN the May issue of the LABOUR GAZETTE an account was given of a lock-out of the British engineering trades up to the time of the appointment by the government of a Court of Inquiry under the Industrial Courts Act. Sir William Mackenzie, K.B.E., K.C., being chosen for the office. The Report of the Court which was issued on May 10, gives an account of the origin of the dispute and recommendations for a settlement. In the view of the Court there were two questions in dispute. The first, affecting all unions, was whether when any change in the workshop conditions is being introduced, it should be introduced and given effect to pending the procedure laid down for avoiding disputes being followed, or whether the

matter should be held up pending such procedure being followed which may be a period extending up to six weeks. The second question, which affected the Amalgamated Engineering Union alone, was whether, when the occasion for working overtime on production work (as distinguished from repair work) arose, the employer alone should decide that it was "necessary" within the limit of 30 hours in four weeks, or whether the employer and the union should agree that it is "necessary." The conclusions of the Court as summarized in the British *Labour Gazette* were as follows:

(1) Overtime.—The general conditions with regard to overtime are settled by the Overtime Agreement of September, 1920, which

allows without restriction the necessary overtime for breakdown repairs, replacements, alterations, trial trips, completion against delivery dates, etc.; and "necessary" overtime on production work up to 30 hours in any four weeks, the rate of payment for overtime being increased to time-and-a-half. The Court concludes that, up to the limit of 30 hours in four weeks, there must be freedom to the management to act in the exercise of their discretion. Beyond the limit, overtime would be open to the suggestion that it is unreasonable.

(2) Managerial Functions.—The employers are willing that the kind of question which has been under discussion during the present dispute should be settled by general national agreement, or determined in accordance with procedure set out by such agreements. This is a view to which the Unions do not take exception.

Information as to a proposed change in the recognized working conditions should be given to the workpeople directly concerned, or to their representatives in the shop; and this information should be available for a limited period before it is proposed that the change should be made, to allow time for discussion.

The opportunity for prior consultation between the management and the men upon proposed changes in the recognized working conditions should be adequate, and should not involve undue delay. If consultation during the limited period above mentioned does not result in an agreement, the management may put the change into operation while the further stages of the Provisions for Avoiding Disputes are followed. Any subsequent agreement should have retrospective effect where appropriate. The opposition to change on the part of the skilled men is due largely to the uncertainty as to their position if displaced thereby. It is suggested that this might be met by readjustments and by providing alternative avenues of employment for the skilled men set free by the change. Engineering is an expanding industry, and an agreement on these lines ought not, in the opinion of the Court, to be difficult.

Negotiations were resumed between the two parties to the dispute but no

settlement had been reached at the end of May.

SHIPBUILDING

A settlement of the dispute between the Shipbuilding Employers' Federation and the Federation of Engineering and Shipbuilding Trades an account of which appeared in the May issue of the LABOUR GAZETTE on page 506, was reached early in May. The dispute arose from a proposal of the employers to reduce the war bonus. This proposal was rejected by a ballot of the members of the Federation of Engineering and Shipbuilding Trades and work was suspended on March 29. On April 11 the men's Federation requested the Minister of Labour to set up a Court of Inquiry. On the following day the Minister saw representatives of the Employers' Federation, and a week later he again saw representatives of both sides. Negotiations between the two parties were resumed on April 25, and as a result the following proposals were submitted to a ballot of the Unions with a recommendation for acceptance:—

(1) The reduction of 10s. 6d. per week which came into operation on the 29th March is to remain in operation on and from that date;

(2) the further reduction of 6s. per week will take effect in two instalments, namely, 3s. per week on and from the 17th May, and 3s. per week on and from the 7th June.

On May 5 it was announced that the ballot showed a majority of 5,034 against acceptance, but as this did not represent the two-thirds majority necessary for the continuance of the stoppage, work was resumed on May 8.

CONVENTION OF THE RAILWAY EMPLOYEES' DEPARTMENT OF THE AMERICAN FEDERATION OF LABOUR

MORE than 500 delegates representing the six mechanical shop crafts, clerks and switchmen employees of the railways in the United States and Canada attended the sixth biennial convention of the Railway Employees' Department of the American Federation of Labour held at Chicago, Ill., from April 10 to 24, under the presidency of Mr. B. M. Jewell. Addresses were delivered by Samuel Gompers, president of the American Federation of Labour; John Fitzpatrick, president of the Chicago Federation of Labour; James O'Connell, president Metal Trades Department, American Federation of Labour; Benjamin C. Marsh, managing director, Farmers' National Council, Arthur O. Wharton of the Railway Labour Board, and others.

The secretary-treasurer's report for the year ended March 31, 1922, showed receipts from donations and assessments for the national agreement defense fund amounting to \$386,674, and expenditures to \$373,564, leaving a balance on hand of \$13,110; per capita tax paid into the general fund had totalled \$96,623, and expenditures \$95,092, leaving a balance in the fund of \$1,531.

The Railroad Re-organization Act of 1920 which created the Railroad Labour Board was criticized by Mr. Gompers who claimed that if the railroad managers receive a rebuff from the Board they immediately go to a friendly court and procure an injunction. President Jewell condemned the Act stating that it had proved unsatisfactory after a fair test by the Department for two years. Mr. Wharton told of the work of the Railroad Labour Board and urged that the shop crafts continue to agitate for the creation of bipartisan boards of adjustment as provided for in the Act.

Government ownership and democratic operation of the railroads with adequate safeguards against wasteful practices by the operators and against the exploiting of the roads by private steel, coal and equipment companies were advocated. A resolution was adopted expressing determination to support the mechanical and shop craft employees on the Pennsylvania Railway system in an effort to force that carrier to comply with the terms of the Railroad Re-organization Act of 1920 and decisions of the Railroad Labour Board. It was decided that two simultaneous strike votes should be taken among the mechanical shop craft employees on all railroads in the United States within sixty days following the adjournment of the convention, unless in the meantime these employees were restored to their former status, wages and working conditions. The strike votes would relate to the matters of (1) the farming out of shops and employees to dummy concerns to evade paying the scale of wages fixed by the Railroad Labour Board and re-establishment of piece work through coercive measures of the managers, and (2) to final acceptance or rejection of the Board's decision eliminating overtime pay for Sunday and holiday work, a practice that has hitherto prevailed on some railway systems for 40 years. Plans were made to create a proper defense fund and in the event of a strike being decided on to arrange for commissaries to feed the strikers and their families for as long as necessary. A resolution was adopted approving the plan for co-operation entered between the sixteen standard railway labour organizations and the United Mine Workers of America and in addition every support possible was pledged to the miners now on strike. The convention endorsed the Conference for Progressive Political Action organized recently in Chicago

and now carrying on a campaign through national headquarters in Washington, and arranged that each member of an affiliated body should receive a statement setting forth the objects of the association and be urged to work for election of senators and congressmen "who will represent the people and not the corporate interests." A resolution was adopted instructing the officers of the Department to extend invitations

to the transportation brotherhoods and all other strictly railroad organizations to become affiliated with the Department. The Brotherhood of Stationary Firemen and Oilers was elected to affiliation.

The following officers were re-elected: president, Bert. M. Jewell; vice-president, J. F. McGrath; and secretary-treasurer, John Scott.

CONVENTION OF THE AMALGAMATED CLOTHING WORKERS OF AMERICA

TWO hundred and fifty-six delegates from the United States and Canada, representing a membership of over 165,000 attended the fifth biennial convention of the Amalgamated Clothing Workers of America at Chicago, Ill., on May 8 to 13. President Hillman, who occupied the chair, spoke of the increased strength and success of the Amalgamated and attributed it to its industrial form of organization. He urged the consideration of the question of seasonal labour and unemployment, declaring that "the men and women who are needed in industry must not be discarded as human wreckage, just because there is an inefficient way of running industry." The secretary-treasurer reported that during the two years the Amalgamated had given \$250,000 to assist outside organizations. It had raised \$2,000,000 toward a Lockout Resistance Fund in the anti-union drive against all American labour; there had been 49 lawsuits against the Amalgamated, including two aiming at its dissolution; 24 injunctions had been issued against the union, and a final settlement of a serious dispute had been effected after six months' strife on terms which the union had offered at the beginning. He spoke of the formation of the Needle Trades Workers' Alliance and its failure to function, and reiterated the Amalgamated's position in favour of complete amalgamation of the needle trade workers into one solid union. It was

also shown that \$170,000 had been raised by the union to relieve the famine in Russia, and a message was read which stated that the union's efforts had resulted in the saving of very many lives.

About 129 resolutions were presented many of which had to do with plans for organization work. One adopted favoured the organization of shipping clerks in the markets where they are unorganized; and declared that in markets where a local organization of shipping clerks exists, agreements should not be entered into with employers without including the recognition of the shipping clerks as *bona fide* members of the organization entitled to its protection and the full co-operation of the other branches of the industry. Another resolution favoured complete consolidation of all unions in the needle trades into one organization with one general executive board, one treasury, and with separate departments for the branches of the industry in which separate unions now function, and instructed the general executive board to take definite steps toward the gradual amalgamation of all the needle trades in the United States and Canada. A resolution with regard to organization work in Montreal, including a general strike if necessary to achieve this aim, was referred to the General Executive Board. Resolutions favouring affiliation with the Moscow International of Trade and Industrial

Unions were not concurred in, but the approaches of the Moscow International to the Amsterdam Federation of Trade Unions for international unity were described as showing a "well defined movement to defend the sacred cause of labour," and a resolution was passed expressing approval of the efforts of a united front of all the labour organizations in the world, and offering the Amalgamated's co-operation in "the fight against organized capital."

The convention decided to launch a \$1,000,000 co-operative enterprise to take over a number of Russian clothing and textile factories and operate them under joint American and Russian workers' administration on a concession from the Soviet government. The concession grants the right to operate clothing and textile factories in Russia. The new organization is to be called the American-Russian Trade Industrial Workers' Association. The capitalization is to be not less than \$1,000,000, open to anyone in \$10 shares, but to be vested in American labour. The convention appropriated \$10,000 for initial expenses and another \$50,000 was authorized for stock purchase for the union. It is expected that the enterprise will pay 7 per cent dividends on the common stock. And should the earnings exceed 10 per cent, such excess shall be applied to the extension of whatever industrial enterprise may be decided upon.

A resolution was adopted extending congratulations to the Chicago membership upon the organization of a bank to be owned by Amalgamated members, and instructing the executive to promote the organization of similar banking and co-operative enterprises by other local bodies of the union. The following resolutions were also adopted: Instructing the general officers to take the steps necessary for the establishment of an unemployment fund; pledging moral and material support to the striking mine workers; demanding the release of all political prisoners; approving for women the principle of equal pay for equal work, and urging that equal op-

portunities be given women in the industry, except in so far as this will interfere with health and the future welfare of the sex; expressing sympathy for the cigarmakers imprisoned in Chicago charged with having violated a strike injunction three years ago; emphasizing the importance of training workers to become efficient shop chairmen, for the training of business officials at shop meetings, in study classes, and in the publications of the organization, in building up the class consciousness, solidarity and effectiveness of the union; recommending the week-work system with standards of production and empowering the executive to put the system into operation as soon as possible; instructing the General Executive Board to make a careful investigation of the question of political action, and after due deliberation make recommendations for political action; instructing the General Executive Board to investigate regarding the establishment of children's day nurseries if advisable; authorizing the General Executive Board to take steps to build a home for the General Office, and to proceed immediately with plans for a tuberculosis sanatorium for Amalgamated members and to present a plan for the financing of such an institution by a special per capita tax; and authorizing local organizations to establish boards of sanitary control where possible. A resolution calling for the election of officers of all local unions annually instead of semi-annually was adopted.

New York city was chosen as the place of meeting for the next convention. Mr. Sidney Hillman and Mr. Joseph Schlisberg were re-elected as president and secretary respectively for the coming two years, and thirty-six members were nominated for the General Executive Board.

Following the convention a meeting of the General Executive Board was held and preparations were made for the first steps in organizing the \$1,000,000 corporation to take over the textile and clothing concession in Soviet Russia.

CONVENTION OF THE ONTARIO LABOUR EDUCATIONAL ASSOCIATION

THE twentieth annual convention of the Ontario Labour Educational Association was held at Guelph, Ont., on May 24. There were 88 delegates present. The president, Mr. James Marsh, Toronto, who is also international representative of the Brotherhood of Carpenters and Joiners of America, occupied the chair.

The financial report showed a balance in the treasury of \$1,233 and expenditures during the year of about \$2,000.

There was criticism of the provincial government's policy respecting the construction of highways, particularly with reference to wages, and a resolution was passed urging that the same rate of wages be paid to these highway workers as prevailed in the regions where the work is being done. Another resolution was adopted which placed the convention on record as standing for entire freedom of speech as long as the speaker kept within the law. A resolution was presented which dealt with the manner of administration of the housing commission in various cities; the city of Hamilton, it was stated, being the only city where the administration had proven satisfactory. A resolution was passed condemning the stand taken by certain members of the Ontario legislature, in-

cluding two labour members, in support of two bills, one respecting the London street railway and the other respecting the London gas supply. The first of these bills gives authority to the Street Railway Company to raise the fares during the three remaining years of its existing franchise; the other sanctions an increase in the rate charged by the City Gas Company for artificial gas. The question of the establishment of a provincial labour paper was referred to the incoming executive, with power to take action on the proposition. A resolution which dealt with the question of holding the annual convention on some other day than a public holiday, such as May 24, was left to be dealt with at the next convention which will be held in Hamilton.

The following officers were re-elected: president, James Marsh, Toronto; vice-president, Dr. J. H. Hett, Kitchener; secretary-treasurer, Joseph T. Marks, Toronto.

The United Women's Educational Federation of Ontario was also in session with about a dozen delegates in attendance. The business conducted was of a routine character. Mrs. W. F. Singer, Toronto, is president; and Mrs. H. G. Fester, Hamilton, is secretary-treasurer.

TWELFTH SESSION OF THE GOVERNING BODY OF THE INTERNATIONAL LABOUR OFFICE

THE Twelfth Session of the Governing Body of the International Labour Office (League of Nations) was held at Rome on April 4 to 7, under the chairmanship of Mr. Arthur Fontaine (France). There were present government representatives from eleven countries, employers' representatives from six countries, and workers' representatives from six countries. Col. David

Carnegie of London, England, represented the Government of Canada as a substitute for the Minister of Labour.

The chairman read an invitation from the International Institute of Agriculture of Rome, asking the Governing Body to attend a meeting to discuss the constitution of a Commission on Agriculture. After a long discussion three

members of the Governing Body were appointed to co-operate with three delegates that had been nominated by the Institute, to examine the methods which might be adopted for the nomination of the other members of the proposed Agricultural Commission and to define exactly its sphere of action. Definite proposals will be submitted to the Governing Body at its next session.

A discussion took place on the Washington Convention respecting Hours of Labour. Delegates from various countries showed that while the principle of the eight-hour day and 48-hour week had been applied to industries in many countries, difficulties had arisen in different countries in ratifying this Convention. The following resolution was unanimously adopted:

The Governing Body, considering that it would still be premature at the present time to decide, in respect of the proposal of the British Government, to place on the Agenda of the Conference the question of a revision, even partial and in relation only to the method of its detailed application, of the Hours Convention, requests the Director of the International Labour Office to continue to obtain as complete and accurate information as possible in order to be able to follow the destinies of the Convention, and to present, as was done last year, an objective report on the subject of the Conference.

At the Eleventh Session of the Governing Body the Director had been requested to inform the Supreme Council of the League of Nations that the International Labour Office was ready to furnish the Genoa conference which was to meet in May with any information or advice in its possession concerning labour and industrial questions, and that the Governing Body had decided that two representatives of each of its three groups together with the Director, should hold themselves at the complete disposal of the Conference. In acceptance of this offer the Italian minister of foreign affairs on behalf of his government requested the International Labour Office to send technical experts to the Genoa conference with a view to giving the conference the benefit of the documentary and other information in

their possession should they be called upon to do so. In dealing with this matter the Governing Body at its Twelfth Session decided to place the delegation under the direction of the Chairman of the Governing Body, and outlined the procedure to be followed by the delegates in the following resolution:

The Governing Body instructs its representatives to the Genoa Conference only to reply to the questions put before them and to furnish information in the name of the International Labour Office when the Chairman has ascertained that the members of the delegation are unanimous with regard to these replies, or with regard to the evidential value of the information. Otherwise the Chairman may inform the conference of the opinion given by each delegate of the office in his individual capacity.

The Governing Body took under consideration the report of the Standing Orders Committee which had been instructed to submit definite proposals concerning the revision of the provisions of Part XIII of the Treaty of Versailles relating to the composition of the Governing Body and the periodicity of the sessions of the conference. After examining the report, the Governing Body adopted the following draft Article to replace Article 393 of the Treaty of Versailles:

The International Labour Office shall be under the control of a Governing Body consisting of thirty-two persons: Sixteen representing the Governments, eight representing the employers, and eight representing the workers.

Of the sixteen members representing the Governments, one each shall be nominated respectively by France, Germany, Great Britain, Italy, Japan and the United States of America.

The ten other members representing the Governments shall be elected by all the Government delegates at the conference. Four members of the ten shall belong to non-European states.

The members representing the employers and the members representing the workers shall be elected respectively by the employers' delegates, and the workers' delegates at the Conference. Two employers' members and two workers' members shall belong to non-European States.

The period of office of the members of the Governing Body shall be.....years.

(The number of years will be fixed later, taking into account the decision of the Conference on the periodicity of the Sessions of the Conference.)

The method of filling vacancies and other similar questions, such as that of substitutes, may be determined by the Governing Body, subject to the approval of the Conference.

The Governing Body shall from time to time elect one of its members to act as its Chairman, shall regulate its own procedure and shall fix its own times of meeting. A special meeting shall be held if a written request to that effect is made by at least twelve members of the Governing Body.

The Governing Body may, when it considers that a question on its agenda is of particular interest to a state which is not represented on the Governing Body, invite the Government of this state to appoint a delegate to take part in the discussions on this question, but without power to vote.

This draft will be submitted to the International Labour Conference of 1922.

As regards the periodicity of the Sessions of the Conference the Governing Body decided to submit to the Governments the two solutions suggested by the Standing Orders Committee:

(a) Revision of Article 389: "The meetings of the General Conference of representatives of the Members shall be held from time to time as occasion may require and at least once every two years".

(b) Maintenance of the present text of Article 389, it being understood that an Advisory Conference and an Executive Conference be held alternately.

A discussion took place with regard to the creation of a permanent Commission to assist the International Labour Office in connection with emigration questions. No action, however, was taken, as the Governing Body was of the opi-

nion that it was not necessary to proceed at once with the constitution of this Commission.

With regard to proposals adopted at a meeting of experts which was held at Geneva on March 2, 3 and 4 to consider questions of disabled men, the following resolution was adopted:

The Governing Body, whilst recognizing the importance for disabled men of the majority of the questions considered by the experts, is of opinion that the credits at its disposal do not at present make it possible to sanction the necessary expenditure in order to carry out their proposals, and instructs the Director to continue investigations and to collect information concerning the points laid down in the programme previously approved by the Governing Body.

The British labour delegate urged the Governing Body to authorize the Director to attempt to secure international agreements concerning prosthesis and medical treatment for disabled men residing outside their own countries, as suggested by the experts. It was decided that this question should be examined at the next session.

The Finance Committee reported a balance on hand of 1,117,016 francs, although certain states members were reported to be in arrears in their payments of contributions. The budget of the International Labour Office for 1923 was fixed at 8,532,712 Swiss francs.

The date of the next meeting of the Governing Body was fixed for Tuesday, July 25, at Geneva. Later sittings will take place at Interlaken.

LABOUR ORGANIZATION IN CANADA IN 1921.

THE eleventh annual report on Labour Organization in Canada, covering the year 1921, which has just been issued by the Department of Labour, shows that trade union membership suffered heavy losses during the year throughout the Dominion. Several reasons are suggested for this decline. Many new members, it is claimed, joined the unions during the war for the purpose of sharing the benefits resulting from collective bargaining, but dropped out later rather than pay the membership dues. Prevailing unemployment also hindered many former unionists from continuing in active membership. During the four years 1916 to 1919 inclusive, union organization advanced steadily, the peak being reached in the latter year with 378,047 members. In 1920 the membership fell to 373,842, but local units still continued to multiply, the number of unions being 2,918, a gain of 71 over 1919. The total membership of all classes of trade unions in Canada at the close of 1921 stood at 313,320, comprised in 2,668 local branches, and indicates losses during the year of 60,522 in members and of 250 in branches. The membership of all classes of organized labour in Canada, as reported to the Department for the past eleven years, has been as follows:

1911..133,132	1915..143,343	1919..378,047
1912..160,120	1916..160,407	1920..373,842
1913..175,799	1917..204,630	1921..313,320
1914..166,163	1918..248,887	

The heaviest losses during the year were borne by the international or continental organizations, which showed a decline of 44,351 in members and 232 in branches. The non-international bodies gained five branches but lost 926 members, while the independent units lost 15,545 members. In the last-named class, the Lumber Workers' Industrial Union alone reported a decline of 13,000 in their membership. The number of branches, with membership in each

group of organizations, in 1921, was as follows:—

	Branches	Members
International	2,223	222,896
Non-international	264	24,480
Independent Units	27	15,644
National and Catholic....	120	45,000
One Big Union	34	5,300
Totals	2,668	313,320

A chapter in the report is devoted to a class of organized wage earners who do not belong to the organized labour movement and include mainly associations of school teachers and government employees. In all there are 41 such bodies having a combined reported membership of 43,298.

The report presents a chart showing in graphic form the relative proportions of the various trade groups represented in the foregoing figures. These proportions are as follows:

Railroad employees' unions...	26.22 per cent
Building trades	9.78 " "
Other transportation unions...	8.75 " "
Public employees, personal service and amusement trades	7.94 " "
Metal trades	7.38 " "
Mining and quarrying.....	6.81 " "
Clothing, boots and shoes....	5.98 " "
Printing trades	2.63 " "
All other trades and general labour.....	24.45 " "

The unclassified membership, which is 24.45 per cent of the total, is unduly high owing to the incompleteness of the reports as to membership received from individual National and Catholic Unions and from the units of the One Big Union.

Benefits Paid by Central Labour Organizations.—Of the 98 international organizations operating in Canada, 75 made payments for benefits, the aggregate disbursements being \$24,089,836, an increase of \$4,626,226, over the amount expended in 1920. The payments for each class of benefit were as follows:—

death benefits, \$9,674,060; unemployed and travelling benefits, \$423,031; strike benefits, \$10,161,987; sick and accident benefits, \$3,081,039; old age pensions and other benefits, \$749,719.

Four of the central non-international organizations made payments on account of benefits, the total being reported at \$20,775, of which \$16,440 was for death benefits. This is the highest expenditure ever made by the head offices of these bodies for benefit purposes.

Benefits Paid by Local Branches.—In addition to the expenditure of the central bodies a statement is also published in the report showing the amount paid in benefits for the year 1921 by local branch unions in Canada to their own

members. The amount disbursed aggregated \$1,503,555, an increase of \$1,179,400 over the previous year. The expenditure for each class of benefit was as follows:—death benefits, \$197,306; unemployed benefits, \$55,557; strike benefits \$1,046,137; sick benefits, \$129,211; other benefits, \$75,344.

The report contains much general information as to the activities of organized labour in Canada as well as references to important labour events in other countries and forms a complete directory of trade unions, containing particulars of every known local trade union in Canada, lists of central organizations and delegate bodies, and the names and addresses of the chief executive officers for the year 1922.

NEW REGULATIONS RESPECTING IMMIGRATION INTO CANADA

NEW regulations governing the admission of immigrants into Canada were issued in May by the Department of Immigration and Colonization. Instead of the money qualification which was established by an Order-in-Council issued in December, 1919 (LABOUR GAZETTE, Feb., 1920, page 106), an occupational test will henceforth be applied to candidates for admission. Preference is given to immigrants from Great Britain and any self-governing British Dominion, and to agricultural and domestic workers. The new regulations prohibit the landing in Canada of any immigrant except:

1. A *bona fide* agriculturalist entering Canada to farm and with sufficient means to begin farming in Canada.

2. A *bona fide* farm labourer entering Canada to follow that occupation and with reasonable assurance of employment.

3. A female domestic servant entering Canada to follow that occupation and with reasonable assurance of employment.

Immigration officers have authority to admit:

(a) The wife and family of any person legally admitted to and resident in Canada who is in a position to receive and care for his dependents.

(b) The national of any country in regard to which there is in operation a special treaty or agreement or convention regulating immigration.

(c) Any British subject entering Canada directly or indirectly from Great Britain or Ireland, the United States of America or any self-governing British Dominion or Newfoundland, who shall satisfy the immigration officer in charge at the port of entry that he has sufficient means to maintain himself until employment is secured.

(d) Any American citizen entering Canada from the United States, provided it is shown to the satisfaction of the Minister of Immigration and Colonization that his labour and service is required in Canada.

Immigrants (excepting those from Great Britain or any self-governing Dominion, or from the United States) are required to show a passport issued by the government of their own country. The passports of immigrants from Europe must be examined and approved by a Canadian government immigration officer stationed in Europe. All others requiring passports must have their passports countersigned by a British consular officer. A fee of \$5 is chargeable for Canadian examination and *visé* of passport.

Asiatic immigrants, except those coming from a country with which there is a special treaty agreement, are required to have \$250 in their possession on landing.

Agricultural Immigrants from Holland and Norway

The Hon. J. G. Gardiner, Minister of Labour and Industries for Saskatchewan, recently announced that in order

to relieve the shortage of farm labour in that province, the provincial government had made arrangements to bring to the prairies contingents of farm labourers from Holland. The immigrants will come direct from the dairy farms and small holdings of the Netherlands, and, with a little training, it is expected that they will become excellent agriculturalists. "It is absolutely necessary," the minister states, "that any farmer desiring the services of any of these immigrants should be in a position to guarantee at least a year's engagement as the men will not be brought to Canada under any other condition." A considerable number of agricultural workers from Holland and also from Norway are already reported as arriving in Canada. The Dominion Government recently opened a central Canadian immigration office at Antwerp in Belgium, and this office is assisting in securing immigrants of the class desired.

LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA

Reports by Dominion Bureau of Statistics on (a) the Building and Construction Industry, 1920; (b) Woollen Textile Industry, 1920; (c) Cocoa and Chocolate Industry, 1920.

THE Dominion Bureau of Statistics has recently issued advance reports for the calendar year, 1920, on the building and general construction industry, the woollen textile industry, and

the cocoa and chocolate industry. Previous reports in this series relating to other industries have been outlined in various issues of the LABOUR GAZETTE.

• The Building and General Construction Industry

The report of the Dominion Bureau of Statistics on building and general construction in 1920 is based on returns received from 1,548 individual contractors, firms or corporations. These

were distributed among the various provinces as shown in the following table, which contains some of the principal statistics of the building and construction industry by provinces:

Provinces	Firms reporting	Capital invested	Em ployees	Salaries and wages	Cost of materials	Value of work done
	No.	\$	\$	\$	\$	\$
Prince Edward Island.....	4	59,311	61	72,944	45,600	131,215
Nova Scotia	180	4,372,486	2,536	3,164,280	2,250,219	8,913,416
New Brunswick	36	1,974,003	630	865,484	632,473	3,132,589
Quebec	260	10,850,613	10,423	11,110,322	9,604,992	28,041,091
Ontario	644	20,405,762	15,067	20,679,309	18,993,214	58,875,753
Manitoba	123	3,691,151	1,879	2,899,486	2,605,659	8,429,577
Saskatchewan	58	1,421,335	916	1,446,131	2,173,685	5,154,199
Alberta	42	1,335,470	1,085	1,328,191	1,653,609	4,238,535
British Columbia	196	3,584,443	2,403	3,292,234	2,427,483	10,024,693
Total	1,548	47,694,574	35,000	44,858,931	40,386,944	126,941,068

In addition to the salaries and wages and costs of materials mentioned in the above table, the cost of contract work amounted to \$21,868,268 and miscellaneous expenses to \$5,123,733.

The average number of persons employed during the year is shown by the following table, arranged according to the various classes of employees:

Class of employees	Number of employees	Salaries and wages
Engineers and architects.....	297	881,047
Superintendents and foremen	1,081	2,800,849
Clerks, timekeepers, draughtsmen, etc.	1,055	1,458,209
Wage earners, average No...	32,567	40,158,776
Totals	35,000	44,858,941

The average number of days in which these plants were in full operation during the year was 228.5, the average days on which they were idle was 75.5, the

average working hours per day was 8.8 and the average per week was 51.4.

The following table shows the average wages per hour and per week paid to members of the various building trades in Canada during 1920.

Occupation or trade	Number reported	Average wages per hour	Average wages per week
	No.	c.	\$
Bricklayers	2,654	100.3	47.86
Plasterers	1,301	95.4	44.71
Structural steel workers	316	88.6	44.20
Masons			
Stone and marble cutters	397	90.9	45.67
Plumbers and steam-fitters	239	87.0	41.05
Roofers	210	80.7	40.47
Carpenters	92	75.9	38.45
Teamsters	10,109	76.1	36.98
Electricians	1,434	72.4	30.79
Painters	177	70.5	36.65
Cement workers.....	769	70.5	35.56
Glaziers	1,010	66.9	34.13
All other tradesmen...	87	66.6	34.76
Labourers	2,574	59.9	31.58
	19,700	52.5	25.96

The Woollen Textile Industry during 1920.

A report of the Dominion Bureau of Statistics on the Woollen Textile Industry in Canada for 1920 covers the operations of 94 establishments classified under three heads: woollen goods, woollen yarns, and wool felts. The number of plants in the various provinces in 1920 is shown below:

Classes of plants	N.B. and N.S.	Que.	Ontario
Goods	7		49
Yarns	4		10
Felts			6
Totals	11		65

The number of persons employed in the industry by classes of employment is shown in the following table:

Classes of employees	Goods	Yarns	Felts	Salaries and wages
Superintendents and managers	135	18	37	\$ 637,042
Clerks, typists, etc.	164	33	57	368,246
Wage earners, average No.	5,235	1,209	434	5,955,079
Outside pieceworkers	70		4	20,996*

In the following table the employees are classed according to weekly wage payments in specified groups, the three branches of the woollen industry being taken together.

Specified wage groups	Over 16 years		Under 16 yrs.		Total employees
	Male	Female	Male	Female	
Under \$5 per week	4	8	1		13
\$5 to under \$10	105	359	73	102	639
\$10 " " \$15	378	1,459	74	67	1,978
\$15 " " \$20	900	725	3	5	1,633
\$20 " " \$24	759	177	4		940
\$24 " " \$28	371	38	2	2	413
\$28 " " \$30	79	2			81
\$30 and over....	410	2	3		415
Totals	3,006	2,770	160	176	6,112

The following table gives preliminary statistics of the industry for 1920:

Statistics	Woollen Goods	Woollen Yarns	Wool Felts
Establishments...No.	66	16	12
Capital investment \$	22,783,128	6,428,991	3,573,100
Employees on salaries	299	51	94
Salaries paid	782,213	109,095	163,980
Employees on wages	5,305	1,209	438
Wages paid.....\$	4,625,302	959,063	371,710
Cost of materials...\$	14,720,413	5,398,098	1,960,619
Value of products...\$	28,018,565	9,153,210	3,516,692

On an average of 265 days the plants producing woollen goods were in full operation, on 8 days they were on part time, and on 31 days they were idle. The woollen yarn mills averaged 252 days on full time, 20 days on part time and 32 days of idleness. The felt mills aver-

aged 228 days on full time, 49 days on part time, with 27 idle days.

For the three classes of plants, the hours worked per day averaged 9, 8.32 and 9.16, and the hours per week 51, 53 and 52, respectively.

The Cocoa and Chocolate Industry during 1920

An advance report of the Dominion Bureau of Statistics on the Cocoa and Chocolate Industry in Canada during 1920 contains statistics of nine establishments, five of which were in Ontario,

three in Quebec, and one in Nova Scotia. The following table gives the principal statistics of the industry according to locality:

Province	No. of plants	Capital	Em- ployees	Salaries and wages	Cost of materials	Value of products
Ontario	5	\$ 3,089,565	No. 632	\$ 637,655	\$ 2,846,726	\$ 4,290,542
Quebec and Nova Scotia	4	2,464,006	768	608,038	2,793,867	4,617,735
Totals	9	5,553,571	1,400	1,245,693	5,640,593	8,908,277

The employees comprised 27 officers, superintendents and managers, 106 male and 45 female clerks, typists, etc., and 561 male and 661 female employees on wages. The wage earners are classified in the accompanying table according to their weekly earnings as at December 15, 1920.

These included 5 male workers and 28 females under 16 years of age. The nine plants operated on an average of 285 days on full time, and about 15 days on

part time with an average of 4 days of idleness. The working hours averaged 8.80 per day or shift and 49.77 per week.

Weekly wage rates	Male	Female
Under \$5 per week.....	7	13
\$5 to under \$10.....	16	396
\$10 to under \$15.....	57	267
\$15 to under \$20.....	177	23
\$20 to under \$30.....	238	3
\$30 and over	32
Totals	527	702

SUMMARY OF IMPORTS AND EXPORTS FOR YEAR ENDING MARCH, 1922

THE following figures, prepared and published by the Department of Customs, show the merchandise imported into Canada for home consumption, and the domestic and foreign mer-

chandise exported from Canada, during the fiscal year 1921-22. Figures for 1920-21 are also given for purpose of comparison.

	1921-22				1920-21			
	Imports		Exports		Imports		Exports	
	Free	Dutiable	Domestic	Foreign	Free	Dutiable	Domestic	Foreign
	\$	\$	\$	\$	\$	\$	\$	\$
Agricultural and vegetable products, mainly foods...	26,984,312	88,285,039	306,677,716	904,695	38,523,482	131,333,959	458,456,598	1,447,098
Agricultural and vegetable products, other than foods	21,860,576	36,144,361	11,136,390	1,826,522	37,743,852	53,480,071	24,468,074	371,447
Animals and animal products	17,975,705	28,670,084	135,798,720	1,434,161	25,314,725	36,407,665	188,359,937	1,433,501
Fibres, textiles and textile products	43,774,130	96,223,007	4,585,987	1,105,798	72,549,700	171,058,642	18,783,884	2,626,801

SASKATCHEWAN MINIMUM WAGE BOARD ORDER No. 4 AMENDED.

THE Saskatchewan Minimum Wage Board issued during May an order modifying in several particulars the existing Order No. 4 governing female employees in hotels, restaurants and refreshment rooms (LABOUR GAZETTE, December, 1921, page 1488). The maximum number of hours of work is extended from 48 to 50 in any one week of six days. The limit of 56 hours remains for establishments which work seven days each week, but the earlier provision that the number of hours in excess of 48 should be regarded as overtime, is omitted. Night employment is forbidden between the hours of 12.30 and 7 a.m.,

instead of between 12 midnight and 7 a.m. In regard to wages the minimum rate remains at \$14 per week but the new order defines the week as of six days instead of 48 hours, and adds that for a week of seven days the rate shall be \$16.50. For kitchen employees the minimum weekly rate is still \$12 for six days, but a minimum of \$14.50 is now fixed for a week of seven days. Learners' and short time workers' rates remain unchanged, the regulation being changed only in regard to the definition of a week as of 6 days instead of 48 hours.

UNITED STATES SUPREME COURT DECISION ON CHILD LABOUR TAX LAW

THE United States Supreme Court has recently delivered a judgment respecting the powers of the Federal Congress to pass a law to prevent the employment of children in factories. A number of attempts have been made by Congress to effect this purpose, but on each occasion the law has been de-

clared unconstitutional by the courts. In 1916, a law was passed prohibiting interstate commerce in the products of child labour. This was declared unconstitutional by the Supreme Court in June, 1918. Congress then attempted to overcome the difficulty by enacting the Child Labour Tax Law which im-

posed an excise tax of 10 per cent upon the net annual profits of any mill, cannery, workshop, factory or manufacturing establishment employing any child under 14 years of age or in a mine or quarry, any child under 16 years of age. This law has also been declared unconstitutional on the ground that it was an attempt on the part of Congress to do indirectly what it had no power to do directly, the regulating of child labour being a matter for the individual states.

The judgment of the Supreme Court which was delivered by Chief Justice Taft is given in full below.

Text of Judgment

SUPREME COURT OF THE UNITED STATES

<p>J. W. Bailey and J. W. Bailey, Collector of Internal Revenue for the District of North Carolina, Plaintiff in Error,</p> <p>vs.</p> <p>The Drexel Furniture Company.</p>	}	<p>In Error to the District Court of the United States for the Western District of North Carolina.</p>
---	---	--

[May 15, 1922.]

Mr. Chief Justice Taft delivered the opinion of the Court.

This case presents the question of the constitutional validity of the Child Labor Tax Law. The plaintiff below, the Drexel Furniture Company, is engaged in the manufacture of furniture in the Western District of North Carolina. On September 20, 1921, it received a notice from Bailey, United States Collector of Internal Revenue for the District, that it had been assessed \$6,312.79 for having during the taxable year 1919 employed and permitted to work in its factory a boy under fourteen years of age, thus incurring the tax of ten per cent, on its net profits for that year. The Company paid the tax under protest, and after rejection of its claim for a refund, brought this suit. On demurrer to an amended complaint, judgment was entered for the Company against the Collector for the

full amount with interest. The writ of error is prosecuted by the Collector direct from the District Court under Section 238 of the Judicial Code.

The Child Labor Tax Law is Title No. XII of An Act entitled "An act to provide Revenue and for other purposes", approved February 24, 1919, 40 Stat. 1057, 1138. The heading of the Title is "Tax on Employment of Child Labor". It begins with Section 1200 and includes eight sections. Section 1200 is as follows:

Sec. 1200. That every person (other than a bona fide boys' or girls' canning club recognized by the Agricultural Department of a State and of the United States) operating (a) any mine or quarry situated in the United States in which children under the age of sixteen years have been employed or permitted to work during any portion of the taxable year; or (b) any mill, cannery, workshop, factory, or manufacturing establishment situated in the United States in which children under the age of fourteen years have been employed or permitted to work, or children between the ages of fourteen and sixteen have been employed or permitted to work more than eight hours in any day or more than six days in any week, or after the hour of seven o'clock post meridian, or before the hour of six o'clock ante meridian, during any portion of the taxable year, shall pay for each taxable year, in addition to all other taxes imposed by law, an excise tax equivalent to 10 per centum of the entire net profits received or accrued for such year from the sale or disposition of the product of such mine, quarry, mill, cannery, workshop, factory, or manufacturing establishment.

Section 1203 relieves from liability to the tax any one who employs a child, believing him to be of proper age relying on a certificate to this effect issued by persons prescribed by a Board consisting of the Secretary of the Treasury, the Commissioner of Internal Revenue and the Secretary of Labor, or issued by state authorities. The section also provides in paragraph (b) that "the tax imposed by this title shall not be imposed in the case of any person who proves to the satisfaction of the Secretary that the only employment or permission to work which but for this section would subject him to the tax,

has been of a child employed or permitted to work under a mistake of fact as to the age of such child and without intention to evade the tax."

Section 1206 gives authority to the Commissioner of Internal Revenue, or any other person authorized by him "to enter and inspect at any time any mine, quarry, mill, cannery, workshop, factory or manufacturing establishment." The Secretary of Labor, or any person whom he authorizes, is given like authority in order to comply with a request of the Commissioner to make such inspection and report the same. Any person who refuses entry or obstructs inspection is made subject to fine or imprisonment or both.

The law is attacked on the ground that it is a regulation of the employment of child labor in the States—an exclusively state function under the Federal Constitution and within the reservations of the Tenth Amendment. It is defended on the ground that it is a mere excise tax levied by the Congress of the United States under its broad power of taxation conferred by Section 8, Article I, of the Federal Constitution. We must construe the law and interpret the intent and meaning of Congress from the language of the act. The words are to be given their ordinary meaning unless the context shows that they are differently used. Does this law impose a tax with only that incidental restraint and regulation which a tax must inevitably involve? Or does it regulate by the use of the so-called tax as a penalty? If a tax, it is clearly an excise. If it were an excise on a commodity or other thing of value we might not be permitted under previous decisions of this Court to infer solely from its heavy burden that the act intends a prohibition instead of a tax. But this act is more. It provides a heavy exaction for a departure from a detailed and specified course of conduct in business. That course of business is that employers shall employ in mines and quarries, children of an age

greater than sixteen years; in mills and factories, children of an age greater than fourteen years, and shall prevent children of less than sixteen years in mills and factories from working more than eight hours a day or six days in the week. If an employer departs from this prescribed course of business, he is to pay to the government one-tenth of his entire net income in the business for a full year. The amount is not to be proportioned in any degree to the extent or frequency of the departures, but is to be paid by the employer in full measure whether he employs five hundred children for a year, or employs only one for a day. Moreover, if he does not know the child is within the named age limit, he is not to pay; that is to say, it is only where he knowingly departs from the prescribed course that payment is to be exacted. Scientists are associated with penalties not with taxes. The employer's factory is to be subject to inspection at any time not only by the taxing officers of the Treasury, the Department normally charged with the collection of taxes, but also by the Secretary of Labor and his subordinates whose normal function is the advancement and protection of the welfare of the workers. In the light of these features of the act, a court must be blind not to see that the so-called tax is imposed to stop the employment of children within the age limits prescribed. Its prohibitory and regulatory effect and purpose are palpable. All others can see and understand this. How can we properly shut our minds to it?

It is the high duty and function of this Court in cases regularly brought to its bar to decline to recognize or enforce seeming laws of Congress, dealing with subjects not entrusted to Congress but left or committed by the supreme law of the land to the control of the States. We can not avoid the duty even though it require us to refuse to give effect to legislation designed to promote the highest good. The good sought in unconstitutional legislation

is an insidious feature because it leads citizens and legislators of good purpose to promote it without thought of the serious breach it will make in the ark of our covenant or the harm which will come from breaking down recognized standards. In the maintenance of local self government, on the one hand, and the national power, on the other, our country has been able to endure and prosper for near a century and a half.

Out of a proper respect for the acts of a coordinate branch of the Government, this Court has gone far to sustain taxing acts as such, even though there has been ground for suspecting from the weight of the tax, it was intended to destroy its subject. But in the act before us, the presumption of validity can not prevail, because the proof of the contrary is found on the very face of its provisions. Grant the validity of this law, and all that Congress would need to do, hereafter, in seeking to take over to its control any one of the great number of subjects of public interest, jurisdiction of which the States have never parted with, and which are reserved to them by the Tenth Amendment, would be to enact a detailed measure of complete regulation of the subject and enforce it by a so-called tax upon departures from it. To give such magic to the word "tax" would be to break down all constitutional limitation of the powers of Congress and completely wipe out the sovereignty of the States.

The difference between a tax and a penalty is sometimes difficult to define and yet the consequences of the distinction in the required method of their collection often are important. Where the sovereign enacting the law has power to impose both tax and penalty the difference between revenue production and mere regulation may be immaterial, but not so when one sovereign can impose a tax only, and the power of regulation rests in another. Taxes are occasionally imposed in the

discretion of the legislature on proper subjects with the primary motive of obtaining revenue from them and with the incidental motive of discouraging them by making their continuance onerous. They do not lose their character as taxes because of the incidental motive. But there comes a time in the extension of the penalizing features of the so-called tax when it loses its character as such and becomes a mere penalty with the characteristics of regulation and punishment. Such is the case in the law before us. Although Congress does not invalidate the contract of employment or expressly declare that the employment within the mentioned ages is illegal, it does exhibit its intent practically to achieve the latter result by adopting the criteria of wrongdoing and imposing its principal consequence on those who transgress its standard.

The case before us can not be distinguished from that of *Hammer v. Dagenhart*, 247 U. S. 251. Congress there enacted a law to prohibit transportation in interstate commerce of goods made at a factory in which there was employment of children within the same ages and for the same number of hours a day and days in a week as are penalized by the act in this case. This Court held the law in that case to be void. It said:

In our view the necessary effect of this act is, by means of a prohibition against the movement in interstate commerce of ordinary commercial commodities, to regulate the hours of labor of children in factories and mines within the states, a purely state authority.

In the case at the bar, Congress in the name of a tax which on the face of the act is a penalty seeks to do the same thing, and the effort must be equally futile.

The analogy of the *Dagenhart* case is clear. The congressional power over interstate commerce is, within its proper scope, just as complete and unlimited as the congressional power to

tax, and the legislative motive in its exercise is just as free from judicial suspicion and inquiry. Yet when Congress threatened to stop interstate commerce in ordinary and necessary commodities, unobjectionable as subjects of transportation, and to deny the same to the people of a State in order to coerce them into compliance with Congress's regulation of state concerns, the Court said this was not in fact regulation of interstate commerce, but rather that of state concerns and was invalid. So here the so-called tax is a penalty to coerce people of a State to act as Congress wishes them to act in respect of a matter completely the business of the state government under the Federal Constitution. This case requires as did the *Dagenhart* case the application of the principle announced by Chief Justice Marshall in *McCullough v. Maryland*, 4 Wheaton 316, 423, in a much quoted passage:

Should Congress, in the execution of its powers, adopt measures which are prohibited by the Constitution; or should Congress, under the pretext of executing its powers, pass laws for the accomplishment of objects not entrusted to the government; it would become the painful duty of this tribunal, should a case requiring such a decision come before it, to say that such an act was not the law of the land.

But it is pressed upon us that this Court has gone so far in sustaining taxing measures the effect and tendency of which was to accomplish purposes not directly within congressional power that we are bound by authority to maintain this law.

The first of these is *Veazie Bank v. Fenno*, 8 Wallace 533. In that case, the validity of a law which increased a tax on the circulating notes of persons and state banks from one per centum to ten per centum was in question. The main question was whether this was a direct tax to be apportioned among the several States "according to their respective numbers." This was answered in the negative. The second objection was stated by the Court:

It is insisted, however, that the tax in the case before us is excessive, and so excessive as to indicate a purpose on the part of Congress to destroy the franchise of the bank, and is, therefore, beyond the constitutional power of Congress.

To this the Court answered:

The first answer to this is that the judicial can not prescribe to the legislative departments of the government limitations upon the exercise of its acknowledged powers. The power to tax may be exercised oppressively upon persons, but the responsibility of the legislature is not to the courts, but to the people by whom its members are elected. So if a particular tax bears heavily upon a corporation, or a class of corporations, it cannot, for that reason only, be pronounced contrary to the constitution.

It will be observed that the sole objection to the tax here was its excessive character. Nothing else appeared on the face of the act. It was an increase of a tax admittedly legal to a higher rate and that was all. There were no elaborate specifications on the face of the act, as here, indicating the purpose to regulate matters of state concern and jurisdiction through an exaction so applied as to give it the qualities of a penalty for violation of law rather than a tax.

It should be noted, too, that the Court, speaking of the extent of the taxing power, used these cautionary words:

(p. 541.) There are, indeed, certain virtual limitations, arising from the principles of the Constitution itself. It would undoubtedly be an abuse of the power if so exercised as to impair the separate existence and independent self-government of the States, or if exercised for ends inconsistent with the limited grants of power in the Constitution.

But more than this, what was charged to be the object of the excessive tax was within the Congressional authority, as appears from the second answer which the Court gave to the objection. After having pointed out the legitimate means taken by Congress to secure a National medium or currency, the Court said (p. 549):

Having thus, in the exercise of undisputed constitutional powers, undertaken to provide a currency for the whole country, it can not be questioned that Congress may, constitutionally, secure the benefit of it to the people by appropriate legislation. To this end, Congress has denied the quality of legal tender to foreign coins, and has provided by law against the imposition of counterfeit and base coin on the community. To the same end, Congress may restrain, by suitable enactments, the circulation as money of any notes, not issued under its own authority. Without this power, indeed, its attempts to secure a sound and uniform currency for the country must be futile.

The next case is that of *McCray v. The United States*, 195 U. S. 27. That, like the *Veazie Bank* case, was the increase of an excise tax upon a subject properly taxable in which the taxpayers claimed that the tax had become invalid because the increase was excessive. It was a tax on oleomargarine, a substitute for butter. The tax on the white oleomargarine was one-quarter of a cent a pound, and on the yellow oleomargarine was first two cents and was then by the act in question increased to ten cents per pound. This Court held that the discretion of Congress in the exercise of its constitutional powers to levy excise taxes could not be controlled or limited by the courts because the latter might deem the incidence of the tax oppressive or even destructive. It was the same principle as that applied in the *Veazie Bank* case. This was that Congress in selecting its subjects for taxation might impose the burden where and as it would and that a motive disclosed in its selection to discourage sale or manufacture of an article by a higher tax than on some other did not invalidate the tax. In neither of these cases did the law objected to show on its face as does the law before us the detailed specifications of a regulation of a state concern and business with a heavy exaction to promote the efficacy of such regulation.

The third case is that of *Flint v. Stone Tracy Company*, 220 U. S. 107.

It involved the validity of an excise tax levied on the doing of business by all corporations, joint stock companies associations organized for profit having a capital stock represented by shares, and insurance companies, and measured the excise by the net income of the corporations. There was not in that case the slightest doubt that the tax was a tax, and a tax for revenue, but it was attacked on the ground that such a tax could be made excessive and thus used by Congress to destroy the existence of state corporations. To this, this Court gave the same answer as in the *Veazie Bank* and *McCray* cases. It is not so strong an authority for the government's contention as they are.

The fourth case is *United States v. Doremus*, 249 U. S. 86. That involved the validity of the Narcotic Drug Act, 38 Stat. 785, which imposed a special tax on the manufacture, importation and sale or gift of opium or coca leaves or their compounds or derivatives. It required every person subject to the special tax to register with the Collector of Internal Revenue his name and place of business and forbade him to sell except upon the written order of the person to whom the sale was made on a form prescribed by the Commissioner of Internal Revenue. The vendor was required to keep the order for two years, and the purchaser to keep a duplicate for the same time and all were to be subject to official inspection. Similar requirements were made as to sales upon prescriptions of a physician and as to the dispensing of such drugs directly to a patient by a physician. The validity of a special tax in the nature of an excise tax on the manufacture, importation and sale of such drugs was, of course, unquestioned. The provisions for subjecting the sale and distribution of the drugs to official supervision and inspection were held to have a reasonable relation to the enforcement of the tax and were therefore held valid.

The Court said that the act could not be declared invalid just because another motive than taxation, not shown on the face of the act might have contributed to its passage. This case does not militate against the conclusion we have reached in respect to the law now before us. The Court, there, made manifest its view that the provisions of the so-called taxing act must be naturally and reasonably adapted to the collection of the tax and not solely to the achievement of some other purpose plainly within state power.

For the reasons given, we must hold the Child Labor Tax Law invalid and

the judgment of the District Court is
Affirmed.

Mr. Justice Clarke dissents.

Proposed Amendment to United States Constitution

Immediately following upon this decision of the Supreme Court a joint resolution was introduced in the United States Senate proposing an amendment to the constitution of the United States conferring upon Congress the power to regulate or prohibit throughout the United States the employment of children under eighteen years of age.

RECENT LAWS RESPECTING EMPLOYMENT OF CHILDREN IN THE UNITED STATES

DURING 1921 a number of laws were passed in the various states of the United States respecting the employment of children.

In Delaware the apprenticeship laws were repealed and provision was made that no court, organization, institution, individual or corporation may bind any minor in any manner whatsoever. This does not include the commitment of the minor to the care and custody of an institution or individual.

In Connecticut the working hours of children under sixteen were limited to 8 hours, on six days in the week, and night employment of these young workers was prohibited. The educational tests for work permits were made more stringent. Children having permits to work were required to attend day continuation schools for part time, instead of night schools as formerly, the hours of such attendance constituting part of the legal maximum working time. Fuller discretionary powers were given to municipal and other local officials in regard to applications for working permits for children.

Michigan, however, cancelled a former provision that time spent in a part

time school should be counted as part of the legal maximum.

Ohio revised its education and child labour laws. Children employed on certificates must attend part-time schools, where possible, even though they have completed eight years of school work. The age limit for school attendance of unemployed children was raised from 15 years for a boy and 16 years for a girl to 18 years for both. Boys and girls over 16 may however be employed in certain irregular occupations without certificates. Certain employments are entirely forbidden for boys between 15 and 16 years old.

In South Dakota the school age limit for children who have not completed eight grades was raised from 16 to 17 years.

Wisconsin provided that attendance at a part-time school, where one exists, should be required of children under 18, who have not had the equivalent of four years at a high school; employers must reduce hours accordingly during the time that the vocational school is in session, if the child employed is attending; no female under 21 may be employed as a "bell-hop".

In California attendance at part-time schools was required of children holding work permits. Minors over 14 may obtain permits to work outside school-time provided the sum of school and working hours does not exceed eight per day. They may, on recommendation of their school principal, be transferred from school to vocational training courses provided in places of employment.

In Montana it was provided that children between 14 and 16 years of age may be exempted from school attendance only on proof that the child's wages are necessary for family support, or that he has completed eight school grades.

New York revised its labour law in regard to child labour, former restrictions, excepting those in regard to factories, now applying only to municipalities of 3,000 population or more, and covering certain specified occupations. Outdoor work, except work of certain kinds, is made lawful for children of any age; formerly such work was allowed only if children were employed by their parents. The school attendance regulations were made more stringent.

A recent ruling of the Industrial Board of Pennsylvania prohibits the employment of minors under 16 years of age on coal dredgers.

RECENT WORKMEN'S COMPENSATION LEGISLATION IN THE UNITED STATES

Compensation for occupational diseases

NUMEROUS amendments were made during 1921 to the various State workmen's compensation laws in the United States. Some of these changes may be noted for the purpose of comparison with Provincial legislation in Canada. The paragraphs which follow are based on a review of labour legislation in the United States in 1921, which appeared in a recent issue of the *American Labour Legislation Review*.

Compensation for occupational diseases as well as accidents was provided in Ohio, Illinois, Minnesota and Porto Rico. The diseases covered by the Ohio law were those resulting from work in which sugar of lead, white lead, lead chromate, litharge, red lead, arsenate of lead or Paris green is used or made. A State occupational disease fund was created to be administered like the accident fund; benefits are not payable if an employee has wilfully concealed the fact that he had contracted disease previously to his engagement; the sum of \$40,000 was appropriated for two years for the purposes of this amendment. Twenty-three occupational diseases were included under the compensation act of Min-

nesota; compensation for disability or death may be claimed if disease was contracted not more than one year before the date of disablement and is payable by the last employer in the same occupation. Previous employment in certain scheduled occupations is presumed to be the cause of a disease common in such employment. Porto Rico also amended its compensation law to cover occupational disease. On the other hand, the former provision in Connecticut that sickness arising from injury shall be deemed a natural consequence of such injury, was cancelled.

Compensation for serious disfigurement was provided in Minnesota. In Wisconsin the basis of payments for disfigurement was changed, the maximum of \$750 being removed, and the amount to be paid fixed at the amount of the average annual earnings of the person disfigured. In Nebraska the allowance of compensation for specific injuries of a permanent character was made additional to temporary disability allowance instead of being in lieu of other benefits.

The scale of benefits was raised in many states. Several laws were amended so as to fix the amount of benefit for total disability at 66 2/3 per cent of the amount of the earnings of the injured employee. This proportion was adopted in a new law which was passed during the year in Missouri, with the limitation, however, that in cases of permanent total disability benefits are reduced to 50 per cent after 240 weeks. On the other hand in Minnesota a previous limit was removed. The 66 2/3 scale was adopted in Maine and Oregon, apparently without qualification. Idaho set the full disability rate at 60 per cent. Ohio provided that death benefits are to continue for eight years instead of six ears. In these and other States the minimum amounts of weekly payments, and the annual maximum amounts were generally increased. The maximum weekly payments for total disability differ widely in the several States; ranging from \$20 in Missouri, to \$13.50 in Idaho.

A new basis for the calculation of compensation for partial disability was introduced in Wisconsin, where the allowance now stands in the same proportion to the weekly rate for total disability as the actual wage loss bears to the average weekly earnings of the injured employee. In Nevada the total compensation for permanent partial disability is limited to a sum amounting to 50 per cent of a month's wages for each one per cent of disability. An unusual provision is the allowance in the same State of \$30. a month so long as an injured employee requires an attendant. Medical benefits vary between \$100 and \$250 and funeral benefits are now generally \$125 or \$150.

In Rhode Island employers are liable for hospital expenses up to \$200; in Utah the amount of medical benefits is determined by the Commission. The Connecticut law takes cognizance of the

standard of living of the employee in estimating the hospital benefit which should be allowed.

The waiting period is now seven days in most States, but in some it is more, as in New Mexico, where it is ten days, and in others it is less. In Minnesota the waiting period was abolished.

Many State laws contain special provisions in regard to the payment of benefits to non-resident aliens. In South Dakota death benefits are not payable to dependents who were non-resident aliens at the time of the death of the deceased. In Utah and Washington only one half the regular death benefits may be paid to such dependents and if the compensation law of the native country of such dependents discriminates to a greater extent against United States citizens, then no compensation is payable. In New Jersey, however, non-resident alien dependents are no longer, as formerly in this state, deprived of death benefits under workmen's compensation.

The question of interstate obligations in regard to workmen's compensation was dealt with in Michigan, where it is now provided that resident employees injured outside the state may benefit under the workmen's compensation act if their contracts of hire were made in the state. A similar difficulty with respect to interprovincial obligations in Canada was mentioned in the LABOUR GAZETTE, November 1921, p. 1336.

In many of the states injured workers are paid compensation directly by their employers, and not by a state administered fund, as in Canada. Many amendments have, therefore, been made recently to existing acts, requiring that employers insure themselves adequately against this risk or prove themselves otherwise capable of meeting accident liabilities.

WAGES IN COAL MINING IN THE UNITED STATES

THE United States Bureau of Labour Statistics made a survey of wages and hours of labour in the coal mining industry in the United States during the fall and winter of 1921-1922, in which data were obtained from representative mines in the principal coal fields. In the bituminous section of the inquiry two hundred mines in eleven states were covered, the data being for a half month pay roll period in October, and in the anthracite section twenty-nine collieries in Pennsylvania were included, the data being for January.

In bituminous mining the primary or basic occupations are hand pick miners, machine miners, and loaders, called contract miners or tonnage workers, who work chiefly at a rate per ton, or sometimes at a rate per mine car load, per yard, or per foot. As few mines were found to have kept records of the hours such piece workers were employed, arrangements were made to secure special information as to the hours worked by these classes. It was found possible to ascertain the number of hours at the coal face or place of work as well as the total time in the mine between the hours of entrance and exit, but not to ascertain the time taken for lunch as the customs of individuals in this respect varied considerably. In the case of time workers, the time on duty, excluding that for lunch, was ascertained in all cases.

For the bituminous section of the inquiry the results are summarized in the accompanying tables. In the cases of tonnage workers the average hours and

earnings per hour are for the time spent in the mine and not for the time spent at the coal face, the differences in the latter case being in time per day about half an hour less and in earnings per hour between six and ten cents more. The number of days in the twelve months ending October 31, 1921, on which the mine was opened was ascertained in the case of each mine, and from this and from the daily earnings ascertained as above for October a calculation was made as to the probable average earnings per year. The report states that all the figures as to earnings and as to days worked indicate something above the average for the industry as a whole due to the fact that in October most mines were working more regularly than would be indicated by the average for the year, and also because the mines covered did not include those which were not operating two days per week during October and therefore excluded many of those which operate most irregularly and in which, consequently, the miners have least employment throughout the year.

The tables showing the results of the inquiry both in the bituminous and anthracite coal mines were compiled from the report of the Congressional Committee on Labour on the hearings with reference to a bill to provide for an inquiry into labour conditions in the coal mining industry. The results of the inquiry into bituminous coal mining were summarized in the April issue of the United States *Monthly Labour Review*.

SUMMARY BY STATES OF EARNINGS OF COAL MINERS IN CERTAIN BITUMINOUS MINES IN THE UNITED STATES, 1921.

FAIR WAGE CONTRACTS, MAY, 1922

DURING May the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to one fair wage contract which was awarded by the Department of Public Works. This contract contains the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to the supplies ordered by the Post Office Department, subject to the regulation for the suppression of the Sweating System, the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS

Supply and installation of disinfectant retorts at Quarantine station Partridge

Island, St. John, N.B. Name of contractor, J. E. Kane and J. S. Parker, St. John, N.B. Date of contract, May 27, 1922. Amount of contract, \$4,400.

POST OFFICE DEPARTMENT

The following is a statement of payments made in May for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of orders	Amount of orders
Making metal dating stamps and type, and other hand stamps and brass crown seals	\$ 651.30
Making and repairing rubber stamps, daters, etc.....	161.67
Supplying mail bag fittings.....	3,214.08
Making up and supplying letter carriers' uniforms, etc.....	3,949.02
Repairing letter boxes, etc.....	44.50
Stamping ink, pads, etc.....	455.94
Scales repaired.....	125.00

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages, hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule the rates of wages for the principal classes of labour are given, with other information of general interest.

Building and Construction

ST. CATHARINES, ONT.—CARPENTERS' AND JOINERS' ASSOCIATION OF AMERICA, LOCAL UNIONS No. 38 AND No. 2632, AND LOCAL CONTRACTORS. Agreement to be in effect from May 1, 1922 to April 30, 1923.

The hours of labour to be 8 per day for five days and four hours on Saturdays; the minimum rate of wages to be 75 cents per hour, all overtime to be paid for as double time. Saturday afternoons, Sundays, Christmas Day, New Year's Day, Victoria Day, Dominion Day, Carpenters' Picnic Day, Labour Day, and Thanksgiving Day to be considered overtime. Master carpenters shall have the right to work on their contracts and shall engage only union men when available. Employers may employ apprentices only when journeymen are employed and may have one apprentice for every five journeymen; apprentices to receive overtime rates similar to those paid to journeymen; foremen to be paid

five cents per hour over union rate. No member of either union will be allowed to work after regular working hours for any person while employed by a recognized contractor. Men employed regularly in contractor's shops to be allowed, if necessary, to work one hour per day overtime on machines at straight time rate; men working on scaffolds fifty feet in height to be paid 5 cents over the regular rate and an additional 5 cents for every twenty feet higher; the business agent of the Union to be privileged to visit the job at any time for the purpose of assisting in carrying out the agreement; any grievance of either party to be submitted to a committee composed of two members of each party. It is provided that three months notice shall be given if either of the contracting parties wish to alter the terms of the agreement at its termination.

EDMONTON, ALBERTA. — PLUMBERS' UNION No. 488 AND THE MASTER PLUMBERS' ASSOCIATION. To be in effect from May 22, 1922, to April 30, 1924.

The hours of labour to be from 8 a.m. to 5 p.m. with one hour off for lunch, five days per week, and 8 a.m. to 12 noon Saturdays; the minimum rate of wages to be 95 cents per hour to April 30, 1923 and 90 cents per hour from May 1, 1923, to April 30, 1924; time and one-half overtime until midnight and double time thereafter. Saturday afternoons time and one-half from noon to five p.m.; double time Sundays, New Year's Day, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, and Christmas Day.

Any member working outside of City shall receive expenses for board and room, also single time while travelling, when sleeper is not provided. When sleeper is provided, members will be paid regular working hours.

Each shop to be allowed one apprentice, and one other for every additional five journeymen, the total not to exceed four in any one shop and no apprentice to be over eighteen years of age at the time of starting; the term of apprenticeship to be five years and for the last year the apprentice to be allowed to work with a kit of tools under the instruction of a journeyman plumber and to receive the regular rate of wages less \$1. per day; a register to be kept of all apprentices by the Secretary of the Union to whom employers agree to send the names of their apprentices and the date of commencement in each case.

No steamfitter to be allowed more than one helper; the members of one branch of the trade are prohibited from working at that of another. The members of the Master Plumbers' Association are to employ only members of the Union, and members of the Union are to work only for members of the Master Plumbers' Association. Wages are to be paid weekly, if by cheque not later than 5 p.m. Friday and if in cash not later than twelve noon Saturday; a copy of the agreement to be posted in each workshop. In case of grievances not being settled between the business Agent of the Union and the Employer, a Committee of not less than two and not more than four of each party to be appointed to settle the same within one week.

The agreement came into force May 22, 1922, to remain in force until April 30, 1924, either party wishing to change to give notice on or before January 31, 1924, changes to be agreed on by February 28, 1924, and in event of no notice being given before January 31, the agreement to remain in force another year.

Manufacturing, Food and Tobacco

EDMONTON, ALBERTA.—BAKERY AND CONFECTIONERY WORKERS' INTERNATIONAL UNION OF AMERICA AND CERTAIN MASTER BAKERS. To be in effect from May 1, 1922 to April 30, 1923; wages to be as follows:

Foremen.	\$35 per week
Doughmen and ovenmen...	33 per week
Bakers and confectioners..	30 per week
Helpers.	24 per week

Jobbers to be paid 75 cents per hour unless engaged by the week.

Hours to be 48 per week; day work to be between six a.m. and 10.30 p.m.; doughmen not to start before midnight.

Rates for overtime and for holidays to be at the rate of time and one-half; no overtime to be charged for work done before a holiday; in event of no day work, night workers to receive \$2 extra per man per week.

Half hour to be allowed for lunch not later than four hours after starting time.

Apprentices to be allowed at the rate of one apprentice or one helper to five journeymen employed and one apprentice or one helper to every additional five journeymen employed, but in cake shops one apprentice or one helper to three journeymen employed and one apprentice or helper where less than three journeymen are employed. Helpers are not to be permitted to work on the bench nor do the work that is generally recognized as that of a baker. Apprentices are not to be under the age of sixteen or over twenty-one years at the beginning of their apprenticeship period and not to receive less than \$12 per week.

No bakery wagon driver to be allowed to do the work of a journeyman baker or confectioner. No local baker to remain in any shop unless a member of the Union, a newcomer to the city to be allowed to work one week providing he has applied to join the Union and has paid his initiation fee.

In event of a dispute arising out of the contract is it provided that workmen in the shop concerned with the assistance of Union officials shall endeavour to effect a settlement with the employer, but that if an agreement be not reached the dispute shall be referred to

an Arbitration Committee consisting of two members of the Union and two employers, none of whom may be concerned in the dispute, the Committee to appoint an independent chairman not a member of the trade; the decision of the Committee to be final; the Committee to be appointed within twenty-four hours

on the request of either party to the dispute.

All negotiations during the life of this agreement to be carried out by executive committee consisting of one baker and confectioner and one master from each shop.

PRICES, RETAIL AND WHOLESALE, IN CANADA, MAY, 1922

IN prices there was a slight upward turn in the index number of wholesale prices resulting from slight increases in nearly all the groups, with a seasonal decline in dairy products, but the retail prices of staple foods again averaged slightly lower.

In retail prices, the average cost of a list of 29 staple foods in 60 cities was \$10.22 at the beginning of May; \$10.26 in April; \$12.25 in May, 1921; \$16.65 in May, 1920; \$13.53 in May, 1919; \$12.66 in May, 1918; \$11.82 in May, 1917 and \$7.43 in May, 1914. No violent fluctuations occurred. In foods, the chief changes were increases in beef, butter, flour, evaporated apples and prunes, while decreases occurred in mess pork, bacon and lard, eggs, milk and cheese, sugar and potatoes. Coal and wood were slightly lower, but rent showed little change.

The Departmental index number of wholesale prices was 226.1 for May as compared with 225.0 for April; 247.3 for May, 1921; 356.6 for May, 1920; 284.1 for May, 1919; 275.8 for May, 1918; 243.8 for May, 1917 and 136.3 for May, 1914. Nearly all the groups averaged higher, but miscellaneous foods and dairy products were lower, changes in the latter group being seasonal. The chief increases were in western grains, cattle and beef, some lines of fish, raw cotton, jute, pig iron, steel billets, silver, coke, linseed oil and turpentine, and some raw furs, while milk, butter and cheese, dressed hogs, bacon and hams, sugar and molasses showed the largest decline.

A special index number, including fifty of the more important articles included in the Departmental index number, 20 foods, 15 raw materials and 15 manufactured goods based upon price levels in 1913 as 100, was slightly higher for May at 148.6 as compared with 147.8 for April; 148.1 for March; 150.1 for December, 1921; 159.5 for May, 1921, and 260.5 for May, 1920.

The table of retail prices and rentals shows the prices at the beginning of May of over one hundred staple foodstuffs and groceries, of coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures being secured at the middle of each month by the correspondents of the LABOUR GAZETTE

(Continued on page 632)

(*) Since 1920 rentals at Calgary for six roomed workmen's houses have ranged from \$20.00 to \$40.00 for houses with good modern conveniences and from \$15.00 to \$30.00 for houses without complete conveniences and less favorably situated.

resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts chiefly occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be

taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruits, fresh and canned vegetables, etc., so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore, made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month; the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous

month and for the corresponding month back to 1913.

Retail Prices

Beef this month showed an increase in the average price following advances in prices for cattle. Sirloin steak was up 1 cent per pound averaging higher in all provinces except New Brunswick and British Columbia. Round steak showed the same increase. Rib roast and shoulder roast were also generally higher. Veal declined in Nova Scotia, Quebec and Ontario, but advanced in the other provinces. Mutton was higher in all the provinces and averaged 28.7 cents per pound as compared to 27.4 cents in April. Lamb also showed a general advance. Fresh roast pork was unchanged from last month in the average, being slightly higher in some localities but lower in others. Pork chops were up one half cent per pound. Mess pork averaged 26.1 cents as compared to 26.6 cents in April. Bacon was down one half cent per pound, being lower in New Brunswick, Manitoba and British Columbia. Boiled ham averaged 60.8 cents per pound as compared to 62.5 cents in April. Changes in fish were slight, cod and halibut were slightly lower while white fish and salt herring were higher. Lard averaged 22 cents per pound in May as compared with 22.5 cents in April. Eggs, fresh, averaged 32.7 cents per dozen in May; 33.5 cents in April and 50.7 cents in March. The largest declines were in Nova Scotia, New Brunswick and Quebec, while small increases were noted in Manitoba and British Columbia. Cooking eggs were practically unchanged, increases in some places being offset by declines in others. Milk averaged 12.1 cents per quart as compared with 12.4 cents in April and 12.7 cents in March. In Saskatchewan, Alberta and British Columbia the price averaged the same as last month, but was down in all the other provinces. Butter, dairy solids, averaged 38.7 cents per pound, being one half cent higher than in April. Dairy prints were also one half cent higher in the average

at 39.7 cents, and creamery prints 0.6 cent higher at 45.5 cents per pound. Increases were general in all the provinces except Quebec which showed declines in most of the cities. Cheese was a little lower on the average at 30.7 cents for old and 27.9 cents for new. Bread was unchanged at 7 cents per pound. Flour and rolled oats showed little change. Rice, tapioca and canned vegetables were unchanged. Onions were lower in all provinces except British Columbia. Potatoes averaged 10 cents per bag lower. The decline was general in nearly all localities. Evaporated apples and prunes were slightly higher. Jam, canned fruit and marmalade were lower. In granulated sugar, there was a general decline, averaging 8 cents per pound as compared with 8.4 cents in April and 8.6 cents in March. Black tea was practically unchanged, while green tea averaged slightly higher. Coffee was down 2 cents to 51.5 cents per pound. Starch and laundry soap were steady.

Anthracite coal averaged lower, having declined in Three Rivers, Ottawa and Regina, but was up slightly in Brantford and Fort William. Bituminous coal was lower in New Glasgow, Three Rivers, Brantford, Winnipeg and Regina. Hard wood was down in Amherst, Three Rivers, Hull and Ottawa. Rent showed little change in the average, but was up in Montreal, London and Edmonton.

Wholesale Prices

GRAINS AND FODDER.—Wheat, No. 1 Northern, at Winnipeg, declined from \$1.49 per bushel at the end of April to \$1.42 in the last week of May. Barley at Winnipeg remained steady throughout the month at 67-69 cents per bushel. Corn at Toronto fell from 77c per bushel to 75c. Oats at Winnipeg advanced from 53c per bushel to 55c. Flaxseed at Winnipeg fell 8c per bushel to \$2.42. Rye at Toronto was steady at 95c. Hay advanced \$1 per ton at Toronto to \$25.

ANIMALS AND MEATS.—Cattle at Winnipeg advanced from \$8.00 per 100 pounds to \$8.50, but later fell to \$7.75.

INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES FOR MAY, 1922, APRIL, 1922, MAY, 1921, 1920, 1919, 1918, 1917, 1916, 1915, 1914 AND 1913.
(Average price 1890-1899-100.)

(*) Preliminary figures. (†) Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

Choice steers at Toronto were steady at \$8.50 per 100 pounds. Dressed beef remained unchanged. Hogs advanced from \$12.50 per 100 pounds at the end of April to \$13.50 at the end of May. Sheep declined from \$9.00 per 100 pounds to \$8.50. Mutton and lamb were steady.

DAIRY PRODUCTS.—Creamery butter at Montreal declined from 36c per pound at the end of April to 30c by the end of May. Creamery prints at Toronto fell from 42c per pound to 36c and dairy from 35c to 30c. Cheese at Montreal fell 3c per pound to 13c. Fresh eggs at Montreal advanced from 31c per dozen in April to 37c in May. Milk at Montreal was down 4c per gallon and at Toronto the price for an 8-gallon can fell from \$2.20 to \$1.80.

FISH.—Latest reports from the Lunenburg fleet indicator that ice had interfered with operations, and the early catch of codfish might not be so large as was expected earlier. Canned lobsters were up 0c per pound, reaching 40c. The catch was expected to be about normal. The market for pickled fish continued dull. Mackerel were reported to be \$2 to \$3 a barrel lower than last year.

FRUITS AND VEGETABLES.—In winter apples at Toronto spies were down \$1 per barrel to \$12. Lemons were up at \$4.50 per box. Bananas and dried fruits were steady at last month's prices. Potatoes at Montreal advanced from 80c per bag to \$1.10. Onions at Toronto were slightly easier, while beans and canned vegetables remained steady.

MISCELLANEOUS FOODS.—Oatmeal fell from \$4.75 per 98-pound bag to \$3.85. Spring wheat flour was steady but winter wheat flour advanced slightly. Sugar was 25c per 100 pounds lower. Glucose

advanced. Molasses was lower at 63c per gallon.

TEXTILES.—A line of knitted woollen underwear was slightly lower. Raw cotton advanced from 18c per pound to 21¼c. Most lines of manufactured cottons were steady. Raw silk, jutes and hessians were higher. Flax fibre was lower at 26c pr pound. Linen rope was also down slightly.

HIDES, LEATHER, BOOTS AND SHOES.—Hides and leather remained practically unchanged.

METALS AND IMPLEMENTS.—Pig iron at Montreal advanced \$1.50-2.00 per ton. Steel billets were also higher at \$38.50-43.50 per ton. Aluminium, antimony, copper, lead and nickel were steady, but quicksilver and spelter were higher. Bar silver advanced 7c per ounce reaching 72c.

FUEL AND LIGHTING.—Bituminous coal at Montreal was \$1.00 per ton lower at \$6.50. Anthracite coal was steady. Connellsville coke at the ovens advanced from \$3.50 per ton to \$6.50. Gasoline was up 1½c per gallon, but coal oil was lower.

BUILDING MATERIALS.—The lumber market was steady for the most part. Shingles at Victoria advanced to \$4.00 per thousand. Wire nails were lower. Copper wire advanced. Linseed oil was up from 98c per gallon to \$1.08. Turpentine and benzine were higher. Shellac was higher at \$4.85 per gallon.

DRUGS AND CHEMICALS.—Alum, bleaching powder and copperas were down slightly. Soda ash declined from \$2.75 per 100 pounds to \$2.60.

MISCELLANEOUS.—In raw furs, muskrat skins were up from \$1.55 each to \$1.75. Malt at Toronto rose from \$1.05 per bushel to \$1.18. Raw rubber was up 1c per pound to 18c.

PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movement of prices in other countries as compared with Canada.

The index numbers of retail prices which are listed are from official sources unless otherwise stated. The authorities for the wholesale price index numbers are named in all cases.

The following extract on the general price situation is from the June issue of *Commerce Monthly*, published by the National Bank of Commerce, New York.

The price situation today is certain evidence of the reduction of stocks and the beginning of a new business cycle. It is probable that the general tendency of wholesale prices of goods ready for consumption is still downward, and retail prices are now rather rapidly working lower in the face of lessened consumption. On the other hand, examination of the prices of raw materials together with certain index numbers for raw materials prepared by various organizations for economic research, shows clearly that the prices of those commodities which were the first to fall are now moving upward into a normal relationship with other classes of prices.

This marks the last stage of the downward price movement which was the immediate result of the disruption of the normal relations between supply and demand following the war, but it is not to be interpreted as justifying the hope of a general rise of prices. Currency deflation is yet to take place in most countries, either directly or indirectly by stopping inflation and allowing population and business to catch up. Price history in the periods following the Napoleonic Wars and the Crimean and the American Civil Wars indicates that a slow downward movement of the general price level for a long time is much more likely than any general upward tendency. Such a movement does not preclude a gradual expansion of business until a normal level of activity has again been reached, but the possibility of it should exert an effective check on speculative activities on the part of manufacturers and merchants.

Great Britain

WHOLESALE PRICES.—The Board of Trade index number for April showed an increase in the general level of wholesale prices for the first time since the spring of 1920. The increase was mainly due to the higher prices for foods, as the industrial materials group was slightly lower than for March though the cottons group and other textiles group were higher. In foods, cereals were lower but meat and fish and miscellaneous foods were higher. The net increase was only one-half of one per cent. In foods the increase was 1.7 per cent while industrial materials were lower by two-tenths of one per cent. It is pointed out that the changes in the various group index numbers show that the wide variations in group levels above 1913 prices have been lessening; the cottons group, for instance, had risen to 611.5 by March, 1920, when the meat and fish group was up to only 233.4, but by April, 1922, cottons had fallen to 173.0 and meats to 171.1.

The fairly moderate variations in recent months appear to indicate an approach to stable conditions in the relations between the materials and crude products of the several groups of trades.

Of the total of one hundred and fifty items included in the compilation, the average prices for April show advances on the averages for March in fifty-three articles and reductions in fifty-eight articles, the remaining thirty-nine items showing no change. The advances include sixteen instances of 5 per cent or more, and in ten of these the increase exceeded 10 per cent. The decreases were over 5 per cent in fourteen cases, and of these five were decreases of over 10 per cent.

The *Statist* index number in continuation of Sauerbeck's figures continued the advance which had commenced in March. As in the case of the Board of Trade

figures, the increase was mainly due to foods which have advanced each month since the beginning of the year. The increase in that period was 14.5 per cent, while for April alone the increase was 5.4 per cent over March. In materials, minerals were slightly higher, but this was more than offset by the declines in textiles and sundries, giving a net decline for this group for the month of 2 per cent from the March levels.

United States

WHOLESALE PRICES.—The index number of wholesale prices for April published by the Bureau of Labour Statistics was unchanged from the figure of 152 for March. Farm products, food-stuffs, clothing, building materials, house furnishings, and miscellaneous commodities were slightly lower, while the remaining groups, fuel and lighting, metals and metal products, and chemicals and drugs were higher. Compared with April a year ago, farm products have increased 10 per cent. All the other groups were lower varying from 1 per cent in building materials to 23 per cent in house furnishings. All commodities decreased only 1.3 per cent during the year.

The index number for April calculated by the Federal Reserve Board in order to reflect business conditions showed the third consecutive advance, being 1.4 per cent above the March level. Compared to a year ago, the April figure was up 2.1 per cent but 45 per cent below the peak of May, 1920. The groups, Goods Produced, Goods Imported, Goods Exported, Raw Materials and Producers' Goods, advanced over March levels but the group Consumers' Goods declined slightly. All groups were higher than a year ago except Producers' Goods which were down 13 per cent, while compared to the peak of 1920 the declines ranged from 43 per cent to 53 per cent.

RETAIL PRICES.—The retail food index issued by the Bureau of Labour Statistics stood at 139 for April (the same

level as for March) as compared with 152 in April, 1921, and 211 in April, 1920. Of the 43 articles, on which prices are secured, 19 increased, 19 decreased and 5 showed no change. The largest increases were in onions, oranges, meats, beans, prunes and granulated sugar. The largest decreases occurred in potatoes, cheese, milk, lard and butter. Bread and flour were unchanged. During the year the percentage decrease in all articles of food combined was 9 per cent. Since April, 1920, the decline has been 34 per cent while compared to April, 1913, the increase is still 42 per cent.

Germany

COST OF LIVING.—The cost of living index published by the Federal Statistical Office was 313 points higher in March than in February, a rise of 15.7 per cent. The food index in March was up 15.6 per cent over the previous month and 165 per cent compared with March 1921. Except butter and eggs and shell fish, which were lower, all other items were up sharply, especially fats, vegetables and potatoes. Bread was 75 per cent higher than in February, beef 43 per cent, sugar 26 per cent, pork 26 per cent, butter 11 per cent, and potatoes 24 per cent.

WHOLESALE PRICES.—The index number of wholesale prices published by the Federal Statistical Office was 1330 points higher in March than in February, a gain of 32 per cent for the month. Foods were up 35 per cent, textiles 30 per cent, metals and petroleum 31 per cent, and fuel 25 per cent. The preliminary figure for April representing prices on the 18th of the month is 6358 showing a gain of 925 points over March or 15 per cent.

Switzerland

COST OF LIVING.—The index number issued by the Union of Swiss Co-operative Stores showed a decline for April of 5.7 per cent from the level of March. Fuel is now the only item that is more than 100 per cent above pre-war levels.

*For South Africa, Australia and New Zealand base is taken as 1000 instead of 100. a. Average for year. b. Quarter beginning in specified month. c. 230 commodities, 1890-1909; 272, 1910-1914; 271, 1915-1922. d. New index number is joined to old index number (88 commodities) and all converted to base 1913-100. e. The commodities in these two new index numbers are in the one case articles chiefly exported; in the other case, articles chiefly imported. f. First of month. g. Middle of month. h. End of month. j. Monthly average.

Fourteen articles are at present less than 50 per cent higher than in 1914, while tea is only 9 per cent, coffee 10 per cent and cocoa 13 per cent. The main decreases this month are in eggs, cheese, pork, and milk, with small decreases in 18 other articles; 17 showed no change, while 8 were higher.

Norway

COST OF LIVING.—The food index number for Norway published in *Sociale Meddelelser* stood at 238 for March as compared with 245 for February, a decline of 3 per cent. The index of the total cost of living stood at 257 in March. This is a decline of 78 points, or 23 per cent, from the peak of December, 1920. Since then foods have fallen 30 per cent, coal and coke 55 per cent, petroleum 38 per cent, clothing 25 per cent, while rent has increased 8.4 per cent.

India

COST OF LIVING.—The official index of the cost of living in Bombay showed for April a decline of 3 points from the previous month. On the base July 1914=100, the number stood at 162 for April, compared with 165 for March. Foods and clothing declined slightly, while fuel and lighting and rent remained unchanged. It is noted that with the exception of rice, bajri and jowari which remained stationary there was a fall in the prices of food grains varying from 5 to 10 points as compared with prices in March. The price of wheat fell 10 points, gram 8 points and turdal, 5 points. Raw sugar, beef, mutton, milk and tea remained at the level of the previous month. There was an increase of 12 and 5 points respectively in the prices of refined sugar and ghee. A fall of 33 and 26 per cent was observed in potatoes and onions respectively.

FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE FIRST QUARTER OF 1922

• **ACCORDING** to information received by the Department, the industrial accident record for the first quarter of 1922 shows 156 fatalities during that period, as compared with 236 accidents in the previous quarter, and 203 in the corresponding quarter of 1921. Of these fatalities 52 occurred in January, 51 in February, and 53 in March, as against 71 in January, 64 in February, and 68 in March of the preceding year. In the building and construction group there were but 8 fatalities reported during the quarter under review as compared with 37 fatalities in the previous quarter. The steam railway service and the mining, non-ferrous smelting and quarrying

groups showed the highest record of fatalities there being 31 reported in the railway group and 30 in the mining group.

In addition to the accidents reported as occurring during the quarter under review, the Department also received information of 10 additional accidents which occurred in the year 1921, making the record of fatalities for that year 918 instead of 908 as previously reported.

The following statement, while it does not necessarily include all the fatal accidents that may have occurred, has been prepared from information received from all sources available:

FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1921

Trade or Industry	Locality	Date	Age	Cause of fatality
AGRICULTURE—				
Farmer.....	Willoughby township, Ont.	Feb. 28	50	Struck by flying metal from cutting-box
Labourer.....	Nanaimo, B.C.....	March 8	Fell to floor of barn when moving hay.
Farmer.....	Puslinch township, Ont.	" 8	Struck by falling tree.
Farmer.....	Meadowville, N.S.....	" 19	60	Struck by falling tree.
Farmer.....	North Rustico, P.E.I.....	" 25	32	While soldering a tank, gasoline torch exploded.
LOGGING—				
Blacksmith.....	White Rock, Ont.....	Jan. 1	35	Cut hand; infection.
Swamper.....	Laforest, Ont.....	" 5	23	Struck by branch of tree.—
Teamster.....	Couchon, Ont.....	" 25	37	Head crushed—no further particulars.
Woodsmen.....	Restigouche Co., N.B.....	" 25	20	Fell from tree.—
Labourer.....	Temiskaming, Ont.....	" 27	25	Crushed by log.
Labourer.....	Laforest, Ont.....	" 29	30	Crushed by log.
Labourer.....	Devon, Ont.....	Feb. 1	53	Fell under horses.
Inspector.....	Vancouver, B.C.....	" 4	66	Caught against roller case.
Feller.....	Elk Lake, B.C.....	" 6	35	Struck by branch from tree.—
Feller.....	Union Bay, B.C.....	" 14	34	Struck by falling tree.—
Woodsmen.....	Clyde River, N.S.....	" 16	Struck by falling tree
Loader.....	Rock Bay, B.C.....	" 20	37	Fell while loading.
Logger.....	Fort Coulonge, Que.....	" 19	68	No particulars.
Logger.....	Laterrière, Que.....	March 1	28	Struck by falling tree.—
Loader.....	Restigouche, Co., N.B.....	" 7	24	Fell off log pile.—
Labourer.....	Swanson Bay, B.C.....	" 13	21	Wharf collapsed—drowned.
Sawyer.....	Flanders, Ont.....	" 14	Struck by tree.—
High rigger.....	Carriiden Bay, B.C.....	" 18	35	Struck by snag.—
Chokerman.....	Topaz Harbour, B.C.....	" 17	37	Struck by falling snag.—
FISHING AND TRAPPING—				
Labourer with fishermen.....	Wheatley, Ont.....	Jan. 26	31	Leg fractured by ice carrier.
Fishermen (2).....	Welley's Point, Ont.....	March 29	Drowned.
MINING, NON-FERROUS SMELTING AND QUARRYING—				
<i>Metallic mining:</i>				
Mucker.....	Anyox, B.C.....	Jan. 3	37	Struck by bar while loosening rock.

Labourer.....	Anyox, B.C.....	" 29	36	Delayed explosion.

RECENT LEGAL DECISIONS AFFECTING LABOUR

THE legal decision which is summarized below has reference to an action brought by an employee in the province of Quebec for damages on account of an accident arising from an unguarded machine. On another page of this issue is given in full a judgment of the Supreme Court of the United States with reference to a Federal child labour tax law.

Employers must protect their workpeople from injury in every possible way.

A workman in charge of a lathe machine engaged in paring down a steel rod was struck in the right eye by a steel filing which caused the loss of the eye. He brought an action in the Superior Court of Quebec at Montreal against his employer for \$5,000 on the following grounds: (1) Use of wrong and improper machine; (2) Workman should have been provided with and forced to use goggles; (3) The machine should have been provided with a guarding apparatus.

The employer denied guilt of negligence but the Superior Court maintained the action for the full amount on the third ground. He appealed the case and it was heard in the Court of King's Bench. On behalf of the employer it was claimed that there were goggles in the establishment which the workers might use if they wished. It was left to them to ask the officials of the company for the goggles. With reference to a guard it was claimed that it was not

customary to have one with this kind of machine, that it would prevent the operator from following the operation closely enough to do perfect work, and that the operator would have to stop work in order to remove the filings as they accumulated, which would cause a loss of time.

It was held by the Court that the fact that as a matter of habit workmen do not wear goggles when engaged in this kind of work, or indeed that there were goggles in the establishment for the use of the workmen who asked for them did not constitute peremptory reasons for the discharge of the employer. The Court was further of the opinion that it was possible to install a screen to intercept the iron filings. It is the duty of the employer, the Court held to protect the workman by all means not only necessary but possible to avoid an accident. He must issue orders to that end and see that they are strictly obeyed. From the moment that it was possible to guard against an accident, and this measure was not taken, the employer was at fault, notwithstanding the fact that such preventive measures were not customary, or might delay the work, or increase the cost of production.

The decision was given in favour of the employee, with two judges dissenting, the judgment of the Superior Court being maintained with costs.

(Quebec—Canadian Vickers, Limited, vs. Smith.)

Order in Council

Relating to the

Fair Wages Policy
of the Government of
Canada

Approved by His Excellency the Governor General,
June 7, 1922.

Issued as a Supplement to THE LABOUR GAZETTE, June, 1922.

THE
WISDOM OF
THE
ANCIENTS

P. C. 1206

*Certified copy of a Report of the Committee of the Privy Council,
approved by His Excellency the Governor General
on the 7th June, 1922.*

The Committee of the Privy Council have had before them a report, dated 30th May, 1922, from the Minister of Labour, stating that he has had under consideration the desirability of adopting more effective measures to secure the observance of what is known as the Fair Wages Policy of the Government of Canada, and submitting as follows in connection therewith:

The policy in question is based on a resolution which was adopted by the House of Commons in March, 1900, in the terms following:

That it be resolved, that all Government contracts should contain such conditions as will prevent abuses, which may arise from the subletting of such contracts, and that every effort should be made to secure the payment of such wages as are generally accepted as current in each trade for competent workmen in the district where the work is carried out, and that this House cordially concurs in such policy, and deems it the duty of the Government to take immediate steps to give effect thereto.

Fair Wages
Resolution,
1900.

It is hereby declared that the work to which the foregoing policy shall apply includes not only work undertaken by the Government itself, but also all works aided by grant of Dominion public funds.

Under the authority of an Order in Council of August 30th, 1907, contractors are required to post in a conspicuous place on any public works under construction the schedule of wages inserted in their contracts for the protection of the workmen employed, and also to keep a record of payments made to workmen in their employment, the books or documents containing such record to be open

Fair Wages
Order-in-Council,
1907.

for inspection by Fair Wages Officers of the Government at any time it may be expedient to the Minister of Labour to have the same inspected.

In conformity with the foregoing, conditions have been inserted in Government forms of contract requiring the observance of current wage rates and providing that in the event of any dispute arising as to what constituted the current rates of wages the same should be determined by the Minister of Labour, whose decision should be final.

An examination of the Fair Wage Clauses of the forms of contract in use in the several Government Departments shows that these differ in various respects. It is desirable that the labour provisions in question should be made as nearly uniform in terms and administration as possible.

The Minister therefore, with a view to securing the purpose desired submits the following recommendations for approval:

Contracts to which "A" conditions apply.

That the conditions following, marked "A," shall be observed by the Department or Departments concerned in connection with all contracts made on behalf of the Government of Canada for the construction or remodelling of public buildings of all kinds, railways, canals, roads, bridges, locks, dry docks, elevators, harbours, piers, wharves, lighthouses, and other works for the improvement and safety of transportation and navigation, rifle ranges, fortifications, and other works of defence, dams, hydraulic works, slides, piers, booms, and other works for facilitating the transmission of timber, and all other works and properties constructed or remodelled for the Government of Canada; also that the like conditions shall, as far as practicable, be observed by the Department or Departments of Canada, in connection with all agreements made by the Government involving the grant of Dominion public funds in the form of subsidy, advance, loan, or guarantee for any of the purposes mentioned; and that returns shall be furnished by the Departments concerned to the Department of Labour showing the nature of all contracts which have been entered into during the month preceding to which these conditions apply, the names and addresses of the contractors, the dates and amounts of the contracts, and the text of the Fair Wages Schedules, if any, inserted in such contracts.

Contracts to which "B" conditions apply.

That the conditions following, marked "B," shall be observed by the Department or Departments concerned in connection with all contracts for the manufacture and supply to the Government of Canada of fittings for public buildings, harness, saddlery, clothing, and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees, mail bags, letter boxes, and other postal stores, and any other articles and things hereafter designated by the Governor in Council; and that returns shall be furnished by the

departments concerned to the Department of Labour showing the nature of all contracts which have been entered into during the month preceding to which these conditions apply, the names and addresses of the contractors, and the dates and amounts of the contracts.

A

(1) In the case of all contracts to which these conditions apply, the Department of the Government concerned shall communicate to the Department of Labour the nature of the proposed contract and the classes of labour likely to be required in its execution. The Department of Labour shall thereupon prepare and furnish to the Department concerned schedules setting forth the rates of wages generally accepted as current for competent workmen of the various classes required in the district in which the work is to be performed or if there be no current rates in the district, then fair and reasonable rates, the same to be recognized as the minimum rates of wages payable to the various classes of workmen employed; and also setting forth the hours of labour fixed by the custom of the trade in the district, or if there be no such custom then fair and reasonable hours, the same to be recognized as the maximum hours during which the several classes of workmen employed shall be required to work, except for the protection of life or property or on due cause shown to the satisfaction of the Minister of Labour. By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Department of
Labour to
prepare
Fair Wages
Schedules.

(2) The following provision shall be inserted in all Government contracts containing Fair Wages Schedules:

Minister of
Labour to
determine
disputes.

In the event of any dispute arising as to the wages or hours to be observed under the Fair Wages Schedule or as to the wages and hours of any class of labour not covered by the Fair Wage Schedule, the same shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the Contractor until the Minister of Labour's decision has been complied with.

(3) In any case where the Department of Labour is unable to furnish schedules of wages and hours for the purpose aforesaid, the Department of Labour may recommend the insertion of a general clause in the terms following:—

General Fair
Wages Clause.

All mechanics, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade in district where the work is carried on, or if there be no custom of the trade as respects hours in the district, then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours, it shall be determined by the Minister of Labour, whose decision shall be final. Payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with. By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or rates actually prevailing, although not necessarily recognized by signed agreements.

Clerks of works
or other in-
specting
officers to
ensure due
observance of
contract.

(4) In all cases where clerks of works or other inspecting officers are appointed by the Government to ensure the due observance of the contract, they shall be specially instructed by the Department concerned to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the Department with which the contract was made.

(5) The following provisions shall also be inserted in all contracts to which these conditions apply:

Fair Wages
Clause or
Schedule
to be posted.

(a) The Contractor shall post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the Fair Wages Clause or Schedule inserted in his contract for the protection of the workmen employed.

Books, &c., of
contractor
open for
inspection.

(b) The Contractor shall keep proper books and records showing the names, trades, and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, and the books or documents containing such record shall be open for inspection by the Fair Wage Officers of the Government at any time it may be expedient to the Minister of Labour to have the same inspected.

(c) The Contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of the contract in respect of work and labour performed in the execution of the contract unless and until he shall have filed with the Minister in support of his claim for payment a statement attested by statutory declaration, showing (1) the rates of wages and hours of labour of the various classes of workmen employed in the execution of the contract; (2) whether any wages in respect of the said work and labour remain in arrears; (3) that all the labour conditions of the contract have been duly complied with; nor, in the event of notice from the Minister of Labour of claims for wages, until the same are adjusted. The Contractor shall also from time to time furnish the Minister such further detailed information and evidence as the Minister may deem necessary in order to satisfy him that the conditions herein contained to secure the payment of fair wages have been complied with, and that the workmen so employed as aforesaid upon the portion of the work in respect of which payment is demanded have been paid in full.

Payment by contractor for labour, &c.

(d) In the event of default being made in payment of any money owing in respect of wages of any workmen employed on the said work and if a claim therefor is filed in the office of the Minister and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of the moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

Power to pay wages in default of payment by contractor.

(e) These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payments for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

(f) With a view to the avoidance of any abuses which might arise from the sub-letting of contracts it shall be understood that sub-letting, other than such as may be customary in the trades concerned, is prohibited unless the approval of the Minister is obtained; sub-contractors shall be bound in all cases to conform to the conditions of the main contract, and the main contractor shall be held responsible for strict adherence to all contract conditions on the part of sub-contractor; the contract shall not, nor shall any portion thereof be transferred without the written permission of the Minister; no portion of the work to be performed shall be done at the homes of the workmen.

Sub-letting, &c.

(g) All workmen employed upon the work comprehended in and to be executed pursuant to the said contract shall be residents of Canada, unless the Minister is of opinion that Canadian labour is not available or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

Workmen to be residents of Canada.

B.

The following provisions shall be inserted in all contracts to which these conditions apply:

Fair Wages
Clause.

(1) All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Fair Wages
Clause to be
posted.

(2) The Contractor shall post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workpeople, the foregoing fair wages clause for the protection of the workpeople employed.

Books, &c., of
contractor open
for inspection.

(3) The Contractor shall keep proper books and records showing the names, trades, and addresses of all workmen in his employ and the wages paid to and time worked by each workman and the books and documents containing such record shall be open for inspection by the Fair Wages Officer of the Government at any time it may be expedient to the Minister of Labour to have the same inspected.

Premises and
work open for
inspection.

(4) The Contractor's premises and the work being performed under this contract shall be open for inspection at all reasonable times by any officer authorized by the Minister of Labour for this purpose; all such premises shall be kept by the Contractor in sanitary condition.

(5) With a view to avoidance of any abuses which might arise from the sub-letting of contracts it shall be understood that sub-letting, other than such as may be customary in the trades concerned, is prohibited unless the approval of the Minister is obtained; contractors shall be bound in all cases to conform to the conditions of the main contract, and the main contractor shall be held responsible for strict adherence to all contract conditions on the part of contractors; the contract shall not, nor shall any portion thereof be transferred without the written permission of the Minister; no portion of the work to be performed shall be done at the homes of the workpeople, or, except as specially provided for under legislative authority, by inmates of penal institutions.

Sub-letting, &c.

(6) All workmen employed upon the work comprehended in and to be executed pursuant to this contract shall be residents of Canada, unless the Minister is of opinion that Canadian labour is not available or that special circumstances exist which would render it contrary to the public interest to enforce this provision.

Workmen to be residents of Canada.

(7) The Contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of the contract in respect of work and labour performed in the execution of the contract unless and until he shall have filed in the office of the Minister in support of his claim for payment a statement attested by statutory declaration showing: (1) the rates of wages and hours of labour of the various classes of workmen employed in the execution of the contract; (2) whether any wages in respect of the said work and labour remain in arrears; (3) that all the labour conditions of the contract have been duly complied with; nor, in the event of notice from the Minister of Labour of claims for wages, until the same are adjusted. The Contractor shall also from time to time furnish to the Minister such further detailed information and evidence as the Minister may deem necessary in order to satisfy him that the conditions herein contained to secure the payment of fair wages have been complied with, and that the workmen so employed as aforesaid upon the portion of the work in respect of which payment is demanded have been paid in full.

Payment by contractor for labour.

(8) In the event of default being made in payment of any money owing in respect of wages of any workman employed on the said work, and if a claim therefor is filed in the office of the Minister and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of the moneys at any time payable by His Majesty under said contract and the amount so paid shall be deemed payments to the Contractor.

Power to pay wages in default of payment by contractors.

The Committee concur in the foregoing recommendations and advise that the same be approved accordingly.

RODOLPHE BOUDREAU,
Clerk of the Privy Council.

NOTE:—The side notes printed above do not form part of the Order-in-Council and are inserted for convenience of reference only.

It is to be understood that where the term "Minister" occurs in the order-in-council, except in the fourth paragraph on page 2, the reference is to the Minister of the Department with which the contract is made.

THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE JAMES MURDOCK

DEPUTY MINISTER—F. A. ACLAND.

Volume 22

JULY, 1922.

Number 7.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

This issue of the **LABOUR GAZETTE** contains a number of articles on matters of special industrial interest, among which may be mentioned a summary of the legislation recently enacted by the Dominion parliament and by the provincial legislatures of Ontario and Alberta, a summary of the proceedings under the Industrial Disputes Investigation Act since 1907, the text of the Dominion order-in-council respecting the draft conventions and recommendations of the Third International Labour Conference, parts of a recent judgment of the United States Supreme Court respecting the liability of trade unions for strike damages, the texts of three important wage decisions of the United States Railroad Labour Board, and a summary of the proceedings of the annual convention of the American Federation of Labour. This issue, of course, also contains the usual monthly articles relating to industrial conditions, strikes, conciliation proceedings, wage agreements, prices, etc.

At the beginning of June the percentage of unemployment among the members of local trade unions stood at 7.4 as compared with 10.4 at the beginning of May and with 15.5 at the beginning of June, 1921. Many organizations, however, continued to report considerable short time. According to returns received from over 6,000 employers, the volume of employment showed a mark-

ed increase as compared with April and the situation compared favourably with that indicated by the concerns making returns for the corresponding month of last year.

The average cost of the weekly family budget of 29 staple foods in some 60 cities was \$10.18 at the beginning of June, as compared with \$10.22 for May; \$11.16 for June, 1921; \$16.92 for June, 1920; and \$7.49, for June, 1914. The total for food, fuel and rent averaged \$20.58 per week for June, as compared with \$20.57 for May; \$21.74 for June, 1921; \$26.81 for June, 1920; and \$14.27 for June, 1914. In wholesale prices the index number stood at 224.3 for June (the lowest point reached since March, 1917), as compared with 226.1 for May; 225.0 for April; 242.6 for June, 1921; 349.3 for June, 1920; and 135.3 for June, 1914.

The time loss due to industrial disputes during June was less than during May, 1922, but greater than during June, 1921. There were in existence during the month 25 strikes, involving about 10,155 workpeople with an estimated time loss of about 254,134 working days. Six of these strikes were reported as having commenced during June. Two of the strikes commencing prior to June and all of those commencing during June terminated during the month, leaving 17 strikes, involving about 9,609 workpeople on record at the beginning of July.

**Proceedings
under the
Industrial
Disputes
Investigation
Act, 1907**

During the month of June the Department received reports of three Boards of Conciliation and Investigation established to deal with disputes between

(1) the Algoma Eastern Railway Company and certain of its employees being members of Division 4, Railway Employees' Department, American Federation of Labour; (2) coal operators being members of the Western Canada Coal Operators' Association and certain of their employees being members of District 18, United Mine Workers of America; and (3) the London Street Railway Company and certain of its employees being members of Division No. 741, Amalgamated Association of Street and Electric Railway Employees of America.

Four applications were received for the establishment of Boards and in two cases Boards were established. In the other two cases the disputes were subsequently adjusted by negotiation, rendering the appointment of Boards unnecessary.

Jottings

Conventions of the following international labour organizations will be held during the months of August and September, 1922:

Trades and Labour Congress of Canada, at Montreal, Que., on August 21.

International Union of Mine, Mill and Smelter Workers, at Denver, Colorado, on August 7.

International Photo-Engravers' Union of North America, at Chicago, Ill., on August 21 to 26.

International Association of Fire Fighters, at Tulsa, Okla., on September 11.

International Typographical Union, at Atlantic City, N.J., on September 11.

United Textile Workers of America, at Fall River, Mass., on September 11.

International Union of Steam and Operating Engineers, at Minneapolis, Minn., on September 11.

International Association of Bridge, Structural and Ornamental Iron Workers, at St. Louis, Mo., on September 11.

International Printing Pressmen and Assistants' Union of North America, at Pressmen's Home, Tenn., on September 18.

International Brotherhood of Electrical Workers, at Montreal, Que., on September 18.

The Imperial Oil, Limited, is stated to have donated a fellowship to Toronto University of the value of \$500 per annum for a limited number of years. This fellowship is open to graduates of universities in Western Canada who wish to pursue post-graduate work at the University of Toronto, and whenever possible is to be awarded to a son or daughter of an employee in western Canada of the Imperial Oil, Limited.

The Winnipeg Housing Commission reports that it now has 168 houses under construction out of a total of 225 houses that it will build this season; and that no more loans will be granted this year as the charter limit of \$800,000 for one year's operations has been reached. It is estimated that 500 more persons would be glad to get loans from the Commission if funds were available.

The Ontario Medical Association recently decided to ask the Ontario government to instruct the Workmen's Compensation Board of the province to confer with a special committee of the Association in order that a new scale of pay for doctors under the Compensation Act might be arranged. Similar action was taken lately by the medical men of Alberta, and the rates were revised as the result of a conference with the Board of that province.

The Franklin Motor Company which has a branch at Windsor, Ontario, recently distributed cash prizes amounting to \$4,000 to 226 of its employees. The prizes were given as a recognition of the efforts made by employees of the company during six months to improve the Franklin car wherever possible and to cut down the cost of production. This is the second contest that

has been held and it is expected that a third will open immediately.

It is announced that the first women's labour temple in the United States is being built at Los Angeles, California. When completed the cost will be in excess of \$14,000. Plans are being formulated for furnishing the building and placing a woman in charge to supply information to members. It will be the home of about 5,000 active workers in the labour movement.

The Massachusetts State legislature has approved the appointment of a special commission to investigate problems relating to unemployment and to the operations of the minimum wage law. The commission is to consist of two members of the Senate, four members of the House and three other persons to be appointed by the Governor. It will report not later than January, 1923.

It is stated in the *Labour Gazette* (Bombay) that the Government of India has decided to accord official recognition to associations of its employees which comply with the conditions set out in the form of rules laid down by the Government. Exception to these rules is made in the case of employees in the police and prison departments.

Announcement has been made that the Indian Government will shortly convene a committee of the Legislative Assembly to draft a Workmen's Compensation Act for India.

Premier Smuts of South Africa is reported to have accepted a proposal submitted to the House of Assembly to appoint a commission to consider the advisability of adopting old age pensions. He pointed out, however, that the financial stringency might make the scheme impossible for the present.

The New Zealand government recently closed the Housing Branch of the Department of Labour for the chief reason that it has not been possible to

build houses at a price which enables them to be let at a rent within the means of the average worker. The "Advances to Workers" Branch will, however, continue to operate. This branch lent over £660,000 to 1,358 workers for the erection of their houses during 1921.

The police department of the prefectural government of Osaka, Japan, has recently increased the number of its staff dealing with labour problems, and decided to allot policemen in the working quarters of the city to deal exclusively with difficulties connected with labour and the workers' movement. A three months' lecture course was arranged for officers assigned to this service, and lectures were given on political economy, social ideas, labour legislation and industrial politics, factory management, the trade union movement, etc.

<p>Annual convention, Trades and Labour Congress</p>	<p>The thirty-eighth annual convention of the Trades and Labour Congress of Canada will be held in Montreal, Que., beginning on Monday, August 21, and continuing in session from day to day until all matters have been disposed of. The official letter calling the convention draws attention to the work of the Congress and the national recognition it now receives as the mouthpiece of organized labour in all legislative matters, and urges that all affiliated organizations be fully represented by their best informed members and thus ensure that the decisions reached will be of the greatest benefit to all. In emphasis the letter states: "The effects of the long continued trade depression and consequent unemployment are undoubtedly being severely felt by our affiliated unions. Adverse conditions demand greater effort and we have every reason to expect that each affiliated body will do its part to make this Convention such as will demonstrate the determination of our movement to continue the fight against reaction and injustice, wherever</p>
---	--

found. Arbitrary wage reductions, in some cases in direct violation of the Industrial Disputes Act; the removal of immigration restrictions in face of the continued serious unemployment; the delay of the Dominion and Provincial Governments in implementing their obligations under the covenant of the League of Nations to give legislative effect to the eight hour day, unemployment insurance and other decisions of the International Labour Office; and other equally important problems are subjects the convention will be called upon to consider."

**Ontario
Government
Savings
Banks**

With a view to encouraging thrift and the securing of funds at a lower rate of interest than would be

possible otherwise, the Ontario government under authority of The Agricultural Development Finance Act, passed by the Ontario legislature in 1921, has lately established a scheme enabling residents in the province to deposit their savings in provincial government offices or sub-treasury branches. Under the Act the provincial treasurer is "empowered to borrow money by means of deposits in any amounts and from any persons or corporations and to open offices for this purpose at such points in the province of Ontario as he may find necessary", and, with the approval of the Lieutenant-Governor in Council, he may from time to time fix the conditions as to interest and repayments which shall govern such deposits provided the rate of interest does not exceed four per cent per annum. The Act came into force on October 4, 1921, and the first savings bank was opened in Toronto on March 1, 1922, since when a number of other offices have been established. The deposits, according to the Act, will be used to finance (a) Loans to members of associations under The Ontario Farm Loans Act, 1921; (b) bonds or debentures issued under The Agricultural Development Act, 1921; (c) bonds or debentures of

or guaranteed by the Dominion of Canada or any province of Canada; (d) bonds or debentures of or guaranteed by any municipality or school section in the province of Ontario.

**Workmen's
housing
in Montreal**

The Metropolitan Commission of the Island of Montreal conditionally approved on

June 14 a building by-law of the municipality of Mount Royal which will enable that township to borrow \$300,000 from the provincial government to build workmen's houses. This loan is made by the province under the terms of the Dominion order-in-council (P. C. 2997) passed on December 3, 1918, for the purpose of affording financial assistance to housing undertakings in the various provinces. The approval of the Commission is conditional upon compliance on the part of the municipality with the following set of rules: (1) that the municipality be authorized to pay the whole cost of all proposed buildings, land not included; (2) that the buildings be erected on lands belonging at present to the municipality or on lands on which the proprietors would accept a second mortgage; (3) that no building be put up on land without water service and sewers, streets and sidewalks; (4) that the site, plans, specifications and cost of buildings be approved by the Commission; (5) that no house shall be built which has not previously been sold; (6) that an instalment of at least 15 per cent be paid in money, or part in money and part in land, represented by the lot on which the house shall be built, the sum not exceeding the municipal valuation; and (7) that contracts be given after notices calling for tenders have been duly published.

The Island of Montreal Metropolitan Commission was incorporated by an act of the Quebec Provincial Legislature in 1921 (chapter 140), to consist of 15 members, the new corporation being given, in addition to the powers

of corporations under civil law, the authority to borrow and guarantee or become security for the loans, debt and obligations contracted by each of its constituent corporations; no municipality under the Commission may contract a loan or issue bonds unless it be specially authorized by a resolution of the Commission to do so. By an amendment passed at the last session of the Legislature the Commission was authorized to effect loans on behalf of a municipality instead of authorizing the raising of a loan by the municipality itself.

**Fair Wage
clause in
Halifax
civic
contracts**

The city council of Halifax, N.S., recently passed the following resolution re-establishing the insertion of a Fair Wage clause in all civic contracts, and fixing a minimum wage of 30 cents per hour for all workmen engaged on such contracts: "Whereas, in June, 1921, . . . the City Council did eliminate the Fair Wage Clause from civic contracts, and approved the reduction of the city workmen's wages 25 per cent, or from 40 cents to 30 cents per hour, thereby permitting contractors to pay the beggarly wage of 25 cents per hour; and whereas such action on the part of the City Council was not in the best interests of our citizens; Be it therefore resolved that the present City Council do approve of and so order that a Fair Wage Clause be inserted in any and all contracts entered into by the city of Halifax, whereby a minimum wage of 35 cents per hour shall be paid, and that city workmen now paid less than 35 cents per hour be increased to that amount, this rate to be established to April 30, 1923." For some years previous to June, 1921, the following by-laws governing the payment of fair wages were in effect: "That competent workmen shall be employed and paid the current rate of wages, such rate to be inserted in the contract. That trade union rate, where craft is organized,

shall be deemed the current and minimum rate in such trade; where there is no trade union rate, workmen shall be paid the generally accepted current rate of wages. No workman shall be required to work longer hours than those fixed by the trade in which he is employed, or longer hours per day than those generally accepted as current in the trade or calling affected."

**Cost of
Canadian
Pacific
Railway Co's
pension plan**

The pension plan of the Canadian Pacific Railway Company was first put into operation in January, 1903. The entire cost of the plan has been borne by the company, which, after an initial contribution of \$250,000, contributed \$80,000 annually for the next eight years, \$125,000 for the following five years, \$200,000 in 1916, and \$500,000 annually from 1917 up to the present time. It is stated that payments made since the establishment of the plan total \$3,349,751. During 1921, the sum of \$452,564 was distributed. At the end of 1921 there were 1,030 persons drawing pensions, of whom 34 were under 60 years of age, 462 between 60 and 70 years, and 534 over 70 years. The balance in the fund at the end of 1921 was \$1,562,476.

**Employee-
stockholders
of Imperial
Oil, Limited**

The annual report of the Co-operative Investment Trust of Imperial Oil, Limited, for the fiscal year shows that about 3,000 of the company's employees in the various marketing and refining centres have purchased Imperial Oil stock. It is stated that the monthly savings from their wages for this purpose is about \$80,000. The Trust is managed by a board of trustees drawn from the employees, with one representative of the board of directors. It has completed two years of a five year period at the end of which it matures. The board bought stock during the first fiscal year at a fixed price of \$96 a share. At the end of the second

year the employee-depositors held 28,094 shares, representing a market value of approximately \$3,230,810. The Imperial Oil, Limited, employs about 6,000 men and women in its marketing and refining centres. In addition to the 3,000 employee-shareholders there are said to be nearly 4,000 outside shareholders of Imperial Oil.

**Institute of
Industrial
Psychology
in Japan**

An institute known as Institute of Industrial Psychology, has lately been established at Tokio, Japan. It is

stated that the purposes of the Institute are: (1) To provide equipment and staff for psychological research work to secure a scientific foundation for industrial management. To carry on this work the institute has a psychological laboratory particularly fitted for investigating efficiency methods; (2) to offer to employment managers adequate training in the psycho-physical nature of the labourer; this instruction to include the history and essentials of scientific management, general and experimental psychology, methods of making mental tests, vocational psychology, practical efficiency methods, econocims, etc.; (3) to send members of the staff to factories upon request; (4) to establish a comprehensive library on industrial psychology, which will be available to anyone for study.

**Bulgarian
Compulsory
Labour Act**

In September last, the chief of the Bulgarian Secretariat to the League of Nations officially requested the International Labour Office, on behalf of the Bulgarian Government, to open an inquiry on the Bulgarian law respecting compulsory labour service, its application and results. The office acceded to the request and asked Mr. Max Lazard to undertake the enquiry, and to postpone it until the spring of this year in order that it might be carried out under the

best possible conditions. Mr. Lazard, who is secretary-general of the French Association for providing against unemployment, and was French Government delegate to the First Session of the International Labour Conference at Washington and technical adviser to the French Government delegates at the Geneva conference, left for Bulgaria in April.

**Clerks' Guild
formed in
Great Britain**

It is stated that the Clerk's Guild, which was formed in Manchester, England, some months ago is now well established, and that recent developments have necessitated the opening of branches of the Guild in Liverpool, Preston, Stoke and other industrial centres. An audit department has been started which undertakes to audit the accounts of business firms. The Guild intends to establish in Manchester a training college for clerks.

**Co-partnership
Housing scheme
in South Africa**

A South African Co-partnership Housing Council has been formed at Cape Town; its objects being: (1) To improve the housing conditions of the people in every practical way, and especially by encouraging the formation of co-partnership tenant companies. (2) To assist in the enactment and enforcement of laws that will prevent the creation of unfit types of dwellings. (3) To interest workers in housing reform. To attain these objects the Council will make its purpose known by means of lectures and publications, and will supply information with regard to material, construction, and other matters of interest to tenant companies or to persons anxious to form such companies. The Council is acquiring a hundred acres of land and proposes shortly to commence building operations of a model character.

Domestic training in France

The French government recently instructed the director of Technical Education to draft a pamphlet "emphasizing the capital importance of domestic training for girls of all classes, but more particularly for girls of the working classes, giving them information as to the way such training is already planned and carried out by certain technical schools." The pamphlet should ex-

plain "the important social need that would be met by domestic training, and should point out the practical advantages to be derived from it by the young woman or mother, and the social consequences of the successful diffusion of rational domestic instruction among the working masses." It is stated that the pamphlet will be given a wide circulation; and when public opinion has been aroused, the government promises to act.

GENERAL REVIEW OF THE INDUSTRIAL SITUATION

The Labour Market, Strikes, Prices

The Labour Market

EMPLOYMENT as reported by employers showed another decided increase in May, there being many gains in practically all the industrial groups. The level of employment during the month was higher than in the corresponding period of last year, the first time for many months that the situation has been favourable in such a comparison. Unemployment as reported by trade unions showed a fairly large decline, the percentage of idleness being very much smaller than that recorded at the end of May, 1921. Declines of a general nature were evident in the volume of business transacted by the offices of the Employment Service during the month under review, there being decreases in the number of vacancies notified, applicants placed and in the number of persons applying for work.

EMPLOYERS' REPORTS

Very pronounced increases in employment were reported by employers during May, the expansion being the largest registered during any month since the record was first instituted in 1919. All provinces shared in the upward movement; the gains in Quebec and Ontario, of course, were the most noteworthy, while considerable additions to staffs were also registered in the

Prairie provinces. For the first time in many months the situation compared favourably with that indicated for the corresponding period of last year, the index number at the end of May standing between two and three points higher than on May 31, 1921.

The advances made in railway construction and maintenance were the largest, providing work for approximately 8,600 additional workers. Of these, over 5,000 men were absorbed by the Canadian Pacific construction department, more than 3,300 were added to the payrolls of the Canadian National lines, while the Grand Trunk increased its working force by rather more than 100 persons. The gains in Quebec, Ontario and the Prairie provinces were the most pronounced, but expansion on a smaller scale also occurred in the other provinces. In addition to the increases in employment in this group, there were very large gains in sawmills and in iron and steel, those in the latter representing recovery from the losses caused by the temporary closing of the railway car shops at the end of April. Increased activity, moreover, was indicated within the iron and steel group by shipyards, notably in Port Arthur, and by rolling mills, largely at Hamilton, Ont., Sydney, N.S., and Montreal. The most pronounced gains in lumber mills occurred

at Campbellton, N.B., Hull, La Tuque, and Calumet, Que., Arnprior, Ottawa, Rockland, Pembroke, Midland and Byng Inlet, Ont., at The Pas, Man., and at Golden, B.C. In the pulp and paper group there was a decidedly favourable movement on the whole, additions to staffs on a large scale being recorded by paper mills at Murray, N.S., at Clark City and Kenogami, Que., at Hawkesbury and Smooth Rock Falls, Ont., and at Ocean Falls, B.C. On the other hand, considerable reductions in payroll were indicated at Swanson Bay in British Columbia. Sugar and biscuit factories, notably in Montreal and Toronto, were considerably busier. Rubber factories at Montreal reported a decided improvement in the situation, several concerns having re-opened after temporary shut-downs. The mining of metallic ores showed an increase, the production of gold, particularly in Ontario at Timmins and Kirkland Lake, employing a considerably larger working force than in April. Further expansion was indicated also in the mining of asbestos, notably at Thetford Mines, Que. The street and electric railways in Montreal and Toronto employed much larger staffs than in preceding months, as did also cartage concerns in the former city. The spring and summer extension of operations in railway transportation caused over 2,100 persons to be additionally employed in that industry, approximately 800 men being added to the staffs of the Canadian Pacific, over 400 to the working forces of the Grand Trunk and more than 500 to the Canadian National lines. The improvement was especially pronounced in Ontario and Quebec. The resumption of activity at the summer ports provided work for a large number of men in the shipping and stevedoring group, especially at Montreal and Quebec city. The construction of public highways, mainly in Ontario, employed a very much larger number of workers than for many months. Employment in the building construction industries was decidedly active, there being increases in payrolls in all provinces. Sherbrooke

and Montreal firms reported considerably larger working forces than in April. At Toronto, Hamilton, Brantford and Port Arthur, the situation also showed distinct improvement. The re-opening of summer hotels, especially in Alberta, provided employment for a large number of persons.

The level of employment in boot and shoe and garment and personal furnishings factories was somewhat lower in May than in April, reflecting to some extent between season dullness in those trades. In the leather group, the declines in employment at Montreal, Quebec and St. Hyacinthe were the largest, the province of Quebec reporting practically all of the shrinkage. On the other hand, the majority of the workers released by firms in the textile group were let out in Ontario, notably at Brockville and Toronto. Retail trade was not as brisk as in April, especially in Ontario and the prairie provinces.

In comparison with the same month in 1921, the situation during May, 1922, was quite favourable. Increased activity was reported in the lumber, textile, chemical, electric current, mining, transportation and construction industries. On the other hand, the level of employment in the logging, communication, service, trade and edible animal products groups was somewhat lower.

TRADE UNION REPORTS

Unemployment as indicated by returns received from 1,423 labour organizations representing 150,505 members showed a fairly large decline at the end of May. The percentage of unemployment again was considerably lower than that reported by the unions making returns for the corresponding month of last year. The percentage of idleness stood at 7.4 for the month under review as compared with 10.4 on April 30, 1922, and with 15.5 for May 31, 1921. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own

trades, or who are idle because of sickness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organisations reporting.) Unions in all provinces except Quebec reported less unemployment than in April, while in that district there was a slight increase in slackness. As compared with the returns for May, 1921, more favourable conditions were indicated in every section of the country, the decrease in unemployment in Quebec and British Columbia being especially marked. Practically the same percentage of unemployment was reported by organizations in the manufacturing industries as in April, but there was decided improvement over May of last year. Workers in the pulp, paper, furniture, and iron and steel groups were considerably busier, and increases in employment on a smaller scale were registered in the boot and shoe industry. On the other hand, unions in the printing and publishing and garment trades were slacker, the unemployment in the latter group being largely due to between season slackness reported particularly by unions in Montreal. The percentage of unemployment in the mining group declined; union workers in Nova Scotia were considerably busier and in Alberta also some improvement was shown, although conditions in that district continued to be unsettled on account of the strike still in existence. Asbestos miners in Quebec and quarry workers in Nova Scotia reported a larger proportion of their members working than in April. Unemployment in the building and construction industries declined still further during May and was very much less prevalent than during May, 1921. Bricklayers, masons and plasterers, carpenters and joiners, electrical workers, granite and stone cutters, plumbers and steamfitters, steam shovel and dredgemen, hod car-

riers and building labourers and bridge and structural iron workers were decidedly busier. On the other hand, the percentage of unemployment reported by painters, decorators and paper hangers was somewhat higher than in the preceding month. All provinces except Quebec shared in the improvement in the building trades, while in that province the level of employment was somewhat lower than in April. Slightly increased activity was indicated in the transportation group. Workers on steam railways and in the shipping and stevedoring divisions were more fully employed, but street railway employees were not so busy. The increase in idleness in the last named branch of the transportation industry occurred largely in Quebec. In some instances considerable short time continued to be reported by the unions making returns. The percentages of unemployment in the fishing, lumber and logging groups were somewhat smaller than in April. Civic employees were a good deal busier and improvement was also registered by hotel and restaurant employees, barbers and stationary engineers and firemen. On the other hand, theatre and stage employees recorded increased idleness on account of the closing of theatres in some centres during the summer months.

EMPLOYMENT

OFFICE

REPORTS

During the month of May, 1922, the offices of the Employment Service of Canada made 30,238 references to employment and effected 35,038 placements. Of these, the placements in regular employment numbered 25,785, (of which 23,008 were of men and 2,777 of women), and in casual work numbered 9,253. Vacancies notified by employers to the Service during the month numbered 41,690, of which 31,018 were for men and 10,672 for women. The number of applications for work registered at the offices was 45,892, of which 35,943 were for men and 9,949 for women. The business of the offices during the month was in greater volume than during the same period of 1921, but com-

pared with the reports for April, 1922 a slight decline was indicated. The following table gives the average number of applications, vacancies and placements made daily by the offices during May, 1922, as compared with the preceding month and with the corresponding period of 1921:

	April, 1922		May, 1922		May, 1921	
	1st half month	2nd half month	1st half month	2nd half month	1st half month	2nd half month
Applications	1,554	1,889	1,772	1,758	1,803	1,642
Vacancies	1,392	1,796	1,619	1,587	1,453	1,331
Placements	1,119	1,432	1,369	1,326	1,307	1,165

PRODUCTION REPORTS

According to the monthly reports issued by the Dominion Bureau of Statistics, the production of pig iron during May declined to the lowest level which has been reached in several years. The tonnage was 23,363, representing a decrease of 9,209 tons from the April production. The record for the corresponding month last year was 56,091 tons. About 73 per cent of the May production was foundry and malleable iron, intended for direct sale, while the remaining 27 per cent, chiefly basic iron, was made for the use of the producing companies. An interesting development was the increase in the output of ferro-alloys. The tonnage of 3,397 was the greatest since January, 1921, when 3,941 tons were reported. The output was augmented by the 2,499 tons of spiegeleisen manufactured for further use. The remainder, comprising 181 tons made in blast furnaces and 717 tons principally 75 per cent and 80 per cent ferro-silicon manufactured in electric furnaces was intended for direct sale. Two blast furnaces at Sault Ste. Marie and one at Hamilton were operated during the month under review, and the number of furnaces in blast remained unchanged.

The production of steel during May registered a further decline of 4,935

tons below the April output of 21,935 tons. The May record of 17,000 tons comprising 15,646 tons of ingots and 1,354 tons of direct castings is the lowest in recent years. The 15,590 tons of open-hearth basic ingots intended for use in the producing plants comprised 92 per cent of the monthly output. The production of the grade in April was 20,499 tons required for a similar purpose. The open-hearth basic and Bessemer castings intended chiefly for sale declined slightly from the output of April. The electric castings on the other hand presented an increase, the quantity intended for use by the establishments reporting was augmented from 53 to 503 tons.

BUILDING PERMITS AND CONTRACTS AWARDED

Employment in the building trades as indicated by the value of the building permits issued in 56 cities showed a further pronounced increase during May, the value rising from \$14,082,170 in April to \$17,765,326 during the month under review, an increase of \$3,683,156, or 26.2 per cent. In comparison with the corresponding month of last year a gain of \$4,363,161, or 32.6 per cent, was reported, the value of the permits issued for May, 1921, having aggregated \$13,402,165. Increases as compared with the preceding month were reported in all provinces, with the exception of New Brunswick, Manitoba and British Columbia, the gain in Quebec of \$1,343,883, or over 51 per cent, being the most noteworthy. Saskatchewan, with permits amounting to \$1,281,431, showed the largest percentage increase, the total being 315 per cent higher than during April of this year. The declines in the provinces mentioned were slight. In comparison with May of last year Prince Edward Island and British Columbia were the only provinces to show contractions in the value of the building authorized. The increase of \$2,041,019, or over 31 per cent, in Ontario was the most marked, while noteworthy percentage increases were reported in New Bruns-

wick and Alberta. Of the larger cities, Montreal and Toronto registered increases in the value of the permits issued as compared with both April, 1922, and May, 1921. Winnipeg and Vancouver showed declines in the former and gains in the latter comparison. Halifax, Moncton, Sherbrooke, Westmount, Fort William, Kitchener, Oshawa, Peterboro, Brandon, Moose Jaw, Regina, Saskatoon, Calgary and Edmonton reported considerable expansion in both comparisons.

According to the *Canadian Building Review*, issued by MacLean's Building Reports, Limited, the value of the contracts awarded during May amounted to \$34,827,300, as compared with \$29,428,400 in April and with \$26,859,500 in May of last year. Ontario and Quebec reported \$27,826,100, or nearly 80 per cent of the value recorded for May, 1922; the Maritime Provinces reported \$1,985,100, or nearly 6 per cent of the total, and the Western Provinces \$5,016,100 or slightly more than 14 per cent. Of the total for May of this year, \$15,633,500 was to be expended on residences, \$11,516,000 in business establishments, \$801,500 on industrial buildings, and \$6,876,300 on engineering contracts.

Strikes

The loss of time on account of industrial disputes during June was less than during May, 1922, but greater than during June, 1921. There were in existence at some time or other during the month 25 strikes involving about 10,155 workpeople with an estimated time loss of about 254,134 working days, as compared with 30 strikes, involving 13,186 workpeople and 278,160 working days in May, 1922; and 50 strikes, involving 10,239 workpeople and 188,020 working days in June, 1921. On June 1, there were on record 19 strikes, affecting 9,729 workpeople. Six strikes were reported as having commenced during June as compared with ten during May. Two of the strikes commencing prior to June and all of those commencing

during June terminated during the month, leaving 17 strikes involving 9,609 workpeople on record at the beginning of July.

Prices

The movement in prices was marked by increases in some lines and decreases in others, the general level showing little change:

The index number of wholesale prices stood at 224.3 for June (the lowest point reached since March, 1917), as compared with 226.1 for May; 225.0 for April; 242.6 for June, 1921; 349.3 for June, 1920; 284.1 for June, 1919; 246.8 for June, 1917; and 135.3 for June, 1914. The fall in the index number was due almost entirely to declines in agricultural products and foods, though these groups showed substantial advances in some articles. The chief changes for the month were substantial declines in western grains, fodders, sheep, some lines of fish, onions, flour, and in linseed oil, and increases in hogs and hog products, dressed lamb, cheese, granulated sugar, wool, raw silk, raw cotton, jutes and hessians, and in hides with smaller increases in cattle and beef, and in metals.

In retail prices the average cost of a weekly list of 29 staple foods in sixty cities was \$10.18 at the beginning of June, as compared with \$10.22 for May; \$11.16 for June, 1921; \$16.92 for June, 1920; \$11.89 for June, 1917; and \$7.49 for June, 1914. The total for food, fuel, and rent averaged \$20.58 for June, as compared with \$20.57 for May; \$21.74 for June, 1921; \$26.81 for June, 1920; \$18.67 for June, 1917; and \$14.27 for June, 1914. The decline in the food budget was due almost entirely to decreases in sugar and in dairy products, except eggs which advanced slightly. Small advances occurred in nearly all the other items, the chief of which were in meats. Fuel was practically unchanged but rent averaged slightly higher.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

Proceedings for the month of June, 1922, with Texts of Boards' Reports.

DURING the month of June the Department received reports of three Boards of Conciliation and Investigation established to deal with disputes between (1) the Algoma Eastern Railway Company and certain of its employees being members of Division No. 4, Railway Employees Department, American Federation of Labour; (2) coal operators being members of the Western Canada Coal Operators' Association and certain of their employees being members of District 18, United Mine Workers of America; and (3) the London Street Railway Company and certain of its employees being members of Division No. 741, Amalgamated Association of Street and Electric Railway Employees of America.

Applications received

During the month of June applications for the establishment of Boards of Conciliation were received as follows:—

(1) From employees of the Montreal Light, Heat and Power Consolidated in the company's gas and electric distribution and maintenance plants, members of various trade unions. A Board was established as follows: Mr. E. McG. Quirk, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, and Messrs. Bernard Rose and Gustave Francq, Montreal, appointed on the recommendation of the Company and employees respectively.

(2) From employees of various shipping companies doing business at the Port of Montreal, being shipliners, members of Local 2098, United Brotherhood of Carpenters and Joiners. A board was established composed as follows: Mr. H. S. Ross, K.C., Montreal, chairman, ap-

pointed on the joint recommendation of the other two members of the Board; Mr. David K. Trotter, Montreal, appointed by the Minister in the absence of a recommendation from the employers, and Mr. J. T. Foster, Montreal, appointed on the recommendation of the men.

(3) From the Montreal Master Plasterers' Association. This dispute not falling within the direct scope of the Industrial Disputes Investigation Act, a Board could be established only with the consent of both parties to the dispute. Shortly after the application was received the dispute was adjusted by negotiation.

(4) From employees of the municipality of Glace Bay, N.S., being members of Federal Union 16570, American Federation of Labour. This dispute not falling within the direct scope of the Industrial Disputes Investigation Act, a Board could be established only with the consent of both parties to the dispute. Shortly after the application was received the dispute was adjusted by negotiation.

Other Proceedings under the Act

In the case of a dispute between the Corporation of the City of Moose Jaw and certain of its employees being members of the Moose Jaw fire department and City Fire Fighters Union, Local No. 151, Mr. William A. Munns, of Moose Jaw, was, on the joint recommendation of Messrs. W. D. McIntyre and Edgar H. Cooke, board members representing the employers and employees respectively, appointed chairman of the Board of Conciliation and Investigation established in this matter.

In the case of a dispute between the Inverness Railway and Coal Company

(as represented by the Eastern Trust Company, Halifax), and certain of its employees, a Board was established as follows: Messrs. G. MacGregor Mitchell, Halifax, N.S., and Isaac D. Macdougall, Inverness, N.S., were appointed on the recommendation of the company and men respectively. Mr. Macdougall sub-

sequently resigned, and on the recommendation of the employees Mr. L. D. Currie, Glace Bay, N.S., was appointed in his stead. In the absence of a joint recommendation from Messrs. Mitchell and Currie, the Minister appointed Mr. John R. Osborne, Ottawa, as chairman of the Board.

Report of Board in Dispute between the Algoma Eastern Railway Company, and certain of its employees.

A report was received from the Board established to deal with the dispute between the Algoma Eastern Railway Company and certain of its employees engaged in various trades and comprised in Division No. 4, Railway Employees' Department, American Federation of Labour. The Board was composed as follows: Mr. W. T. R. Preston, chairman, and Messrs. F. H. McGuigan and Fred Bancroft, representatives of the company and the employees respectively. The report was unanimous and contained a memorandum of agreement signed by both parties to the dispute, binding them to submit the questions in dispute to the committee created by the Canadian Railway Association and Division No. 4, Railway Employees' Department, American Federation of Labour, to hear such disputes.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Algoma Eastern Railway, employer, and various classes of trades, comprising Division No. 4, Railway Employees' Department, American Federation of Labour, employees.

Toronto, June 17, 1922.

Honourable James Murdock,
Minister of Labour, Ottawa.

Sir,

The Board of Conciliation and Investigation authorized by you at the request of the employees aforesaid respectfully report:

Meetings of the Board were held in Toronto and Sudbury at which oral and documentary evidence was offered on behalf of the employees by Messrs. P. C. Benson, J. Ross, H. W. Harper, L. Beuloin and W. Powlesland. The Algoma Eastern Railway was represented by Mr. G. A. Montgomery, President, and Mr. W. H. Farrell, General Manager, of the company.

The issue between the parties was raised by notices being posted by the company of a reduction in wages and changes in conditions of employment. The employees concerned allege that the notice in question is a violation of an agreement that was entered into with the railway, dated October 19th, 1920, in which the following condition appears: ♦

"In consideration of the men withdrawing their demand for back pay from May 1st, as authorized by the so-called Chicago award, we will adopt the working conditions called Rules of Service as made in the agreement between the Canadian Railway War Board and Division No. 4, Railway Employees Department."

The employees contended that the agreement in question was arrived at in consideration of withdrawing their demands for the back pay to which they claimed they were entitled under the Chicago award, on the one hand, and the promised acceptance and adoption by the railway of the working conditions known as the Rules of Service on the other. They further contended that these Rules provide the

course to be taken in order to secure changes in the agreement in question, and that it was incumbent upon the railway to follow the procedure outlined therein before reducing wages or changing the conditions of the employment of those who were parties to this agreement.

The officers of the railway contended that owing to the general depression in business, the cancellation of the agreement and of the conditions contained therein was unavoidable, and presented statements showing a falling off in general receipts incident to the decline in mining operations throughout the district served by the Line. It was also claimed that a reduction had been made in the personnel and salaries of the staff, and other branches of the service. And further alleged that the proposed reduction in wages is an absolute necessity on account of the depleted state of the company's finances. They further claimed that the agreement of October 19th, 1920, was not intended to be in perpetuity, but was naturally subject to amendment under altered conditions, and that this state had now been reached.

At a session of the Board, held in Toronto, May 19, in consultation with representatives of all concerned, Mr. G. A. Montgomery, President of the railway, on behalf of himself and the Board of Directors, expressed willingness to submit the questions in dispute that had been the subject of inquiry by this Board to the Canadian Railway Association in conformity with Rule 183 of Wage Agreement No. 4, which was accepted by the parties concerned as a satisfactory conclusion to the conciliatory efforts between the respective parties, although the President of the Algoma Eastern Railway would not bind himself to accept the conclusions that might be reached by the Railway Association.

The Board of Conciliation was under the impression that the President and General Manager of the railway would abide by the decision or award of the

Railway Association, and accordingly made a report of the situation as offering a solution of the questions involved. The Department did not accept this view and authorized the Board, under date of May 26th, to reconvene and, if possible, secure a final settlement, or make a report on the question at issue. The Board reconvened at Toronto on May 31, and since then continuous efforts were made by the Board to secure an agreement between the parties at issue in this dispute.

Finally an agreement was reached and the following memorandum was signed by the representatives of the railway and the employees, as provided in the Industrial Disputes Investigation Act:

IN THE MATTER OF THE DISPUTE
BETWEEN
THE ALGOMA EASTERN RAILWAY AND
CERTAIN EMPLOYEES.

Mr. Montgomery, President of the Algoma Eastern Railway Company, representing the company, and Mr. Harry Harper, General Organizer of the I. A. of M. and representative of Division 4, Railway Employees Department of the A. F. of L., representing the employees, agree before this Board of Conciliation to Mr. Montgomery's proposal to submit the agreement dated October 19th, 1920, a copy of which is attached hereto, for its interpretation of said agreement to the Committee created by the Canadian Railway Association and Division 4, Railway Employees Department, A. F. of L., to hear such disputes.

And it is further agreed that both parties will accept and be governed by the decision of the body aforementioned.

G. A. MONTGOMERY,
for the company.
H. W. HARPER,
for the employees.

Certified to
W. T. R. PRESTON, Chairman,
F. H. MCGUIGAN,
FRED BANCROFT,
Board of Conciliation.

Toronto, June 15th, 1922.

Following the agreement referred to, the Chairman of the Board communicated by telephone and letter with the Chairman of the Canadian Railway Association, Grant Hall, Esq., Montreal, enquiring whether the Associa-

tion would consider and determine the dispute under the terms of the agreement signed by Messrs. Montgomery and Harper.

In reply, the following telegram was received from the Chairman of the Railway Association:

Montreal, June 16th, 1922.

W. T. R. Preston,
Mossops Hotel,
Toronto.

Your letter received; there will not be any objection to Railway Association representatives acting on joint committee which may be constituted under wage agreement number four with Division No. Four, Railway Employees Department, for adjudication disputes, if matter in question submitted jointly pursuant to terms agreement June fifteenth between Algoma Eastern and their employees. To bring this about it would, of course, be necessary for employees' representatives to submit the matter to the officers of Division Number Four, Railway Employees Department.

GRANT HALL.

This Board of Conciliation having been informed by G. A. Montgomery,

Esq., President of the Algoma Eastern Railway, and H. W. Harper, Esq., representative of the employees, that the decision of the Committee of the Railway Association and Division No. 4 created to hear such disputes as this will be accepted by the said railway company and the said employees of the company in the dispute regarding the wages to be paid, the Board recommends this procedure, and such a decision as a satisfactory settlement between the respective parties.

The Board is assured that Division No. 4, Railway Employees Department, A. F. of L., will hear and determine this dispute under the terms of the agreement signed by Messrs. Montgomery and Harper, June 15th, 1922.

(Sgd.) W. T. R. PRESTON,
Chairman.

(Sgd.) F. H. McGUIGAN,
Member of the Board.

(Sgd.) FRED BANCROFT,
Member of the Board.

Report of Board in dispute between members of the Western Canada Coal Operators' Association and certain of their employees being members of District 18, United Mine Workers of America.

A report was received from the Board established to deal with the dispute between members of the Western Canada Coal Operators' Association of Southern Alberta and South Eastern British Columbia, and certain of their employees being members of District 18, United Mine Workers of America. The report was signed by Mr. W. E. Knowles, K.C., chairman of the Board and Mr. H. Ostlund, K.C., representing the employees. The report contained recommendations for the settlement of the dispute. Mr. R. G. Drinnan, representing the employers, submitted a minority report.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Western Canada Coal Operators' Association, em-

ployers, and certain of their employees, being members of District 18, of the United Mine Workers of America, employees.

Calgary, Alberta,
June 13th, 1922.

To the Honourable James Murdock,
Minister of Labour, Ottawa.

Sir,

A Board of Conciliation and Investigation was applied for on the 21st March, 1922, by Mr. E. G. Williamson, President, and Mr. Robert Peacock, Secretary, of the above mentioned District 18, in the matter of a dispute regarding certain proposed reduction in the rates of pay and other matters, and in pursuance thereof and under your author-

ity the said Board was constituted and composed of, Mr. W. E. Knowles, chairman, Mr. H. Ostlund and Mr. R. G. Drinnan.

The Board met in Calgary on Saturday, April 1, 1922, and, having been duly sworn, held an organization meeting and adjourned. In pursuance of this adjournment the meetings for the purpose of receiving evidence began in the City Hall, Calgary, at 10 a.m. on the 10th day of April, 1922. After taking evidence in Calgary, witnesses were heard in the following places, respectively, (with various adjournments intervening) — Drumheller, Wayne, Canmore, Bankhead, Lethbridge, Fernie and Blairmore, where the taking of evidence was concluded.

Later the Board met at Calgary for the purpose of hearing the argument, or summing up, by the representatives of the respective parties to the dispute.

Following this the formal sittings of the Board ended, and the real work of the Board in an effort to effect conciliation began.

The representatives of the two parties (on the suggestion of the Board) entered into a joint conference, with Mr. Knowles acting as chairman, with a view to ascertaining if any settlement was possible in the light of all the evidence and more mature consideration which had come from the different sittings of the Board.

These informal conferences were attended by approximately twelve representatives from each side and continued for two and one-half days. The best of feeling and a desire to get together, if possible, were manifested at these conferences, but the result was disappointing and the parties separated without any solution to the problem.

Following this the members of the Board went into private consultation for two days to work with a view to arriving at a unanimous decision; the result was all three members of the Board

decided that it was best that there would be a further adjournment, and the same was taken pursuant to which the Board reassembled in Banff on the 10th June, and faithfully struggled with the problem for several days with the result that we have decided that further discussion is profitless, and the Board now proceeds to make its report to you.

You are aware that, on the 31st March last, there expired a two-year agreement under which wages had been paid. You are further aware that many classifications of work are paid for by the day, and others are paid for by contract as to yardage, tonnage, etc., and in addition to these scales of pay, as set out in formal agreement, every one was paid a war bonus or high cost of living allowance of \$1.17 per day, this to each man whether married or single, and also to each boy.

It may be frankly stated that, while the representatives of the employees did not specifically commit themselves to any reduction, yet none took the ground that there should be no reductions. It seemed rather to be conceded that decreases were unavoidable, and the question (which is a difficult one) was how large or small those reductions should be.

The task which the Board has in hand is aggravated by the feature of intermittent employment. The solution of this problem is doubtless one which is not included within the duties of this Board, and yet it is so inseparably linked up with the problem of wages that the Board feels some comments must be made upon this phase of the case. Exhibit 06 filed with the Board, being a statement of days worked by each man during 1921, shows as follows: in the nine bituminous mines the average number of days worked was 197½. In the anthracite mine (there is only one, namely, Bankhead) 256 days. In the Lethbridge lignite mines, of which there are three, the average number of days was 209¾. In the Drumheller field, which is entirely lignite, the average days worked was.

only 128½, and in the Drumheller fields the number of mines is 15.

It may be noted that there are 29 mines, or rather collieries, in the association, and it will be noted that the Drumheller field, where only 128½ days' work was provided for the men, includes 15 of these 29. With regard to the Drumheller field, it must be admitted that even under normal conditions it is a seasonal proposition, but even remembering that the fact remains that during what might be called the operating months, there was, in 1921, a very large part of the time when there was no employment.

The result is that the annual revenue of the miners is in many instances a miserable income. The Board is, of course, not saying that the mine operators are in any way responsible for this; on the contrary, it may be said that they, together with the employees, are suffering from this economic misfortune. The extent to which this intermittent employment exists means, of course, that the mine owner is receiving earnings only intermittently for the capital which he has invested, and the overhead expense for maintenance, etc., which he is compelled to meet. One of the witnesses named Frank Wheatly, a well-known miner of Bankhead, expressed it—"the employees were the victims of a mismanaged industry?"—but he added, "the operators are helpless to control partial unemployment", and when asked his solution said, "the Government must control the industry in this regard".

The Board's view is that, whatever may be the solution of the problem, the fact remains that part-time employment is the curse of the coal industry, and the miners the chief sufferers, and the consumers pay for it.

The troubles seem to be that in both District 18 and the Central Competitive field in the United States, the capacity of production was, during war times, abnormally increased, and that, on re-

turn to more or less normal conditions, the consumption of coal renders opportunity for only partial operation of the mines. The present condition is not economical and results in coal being unreasonably expensive to the consumer. The Board quotes with some sympathy the following words of a certain magazine writer: "But at least the coal operators and unions do something about it. They produce coal and they fight for their interests, and the public pays for the coal—and the fight".

It is to be further noted from the operator's point of view that he has to meet the competition of non-unionized mines where during 1921 the average wages per employee were practically one-third less than the unionized mines. See Exhibit 014.

There is another matter of importance, namely, the severe competition in the Winnipeg market of Eastern American coal, of which a tonnage of 2,236,808 tons was unloaded at Fort William in 1921, and it is the hope of the Board that the adjustment of wages as recommended later in this report may materially contribute to the restoration of this business to the operators and miners of District 18.

We must turn now to what is the main duty of this Board, namely, consider all the circumstances and make findings as to a fair wage. Much evidence was placed before the Board as to the present cost of living as compared with that of other years when wages were arranged. It would appear that at present the cost of living statistics are approximately where they were in the early part of the year 1917. The Board is not disposed to recommend a reduction of the employees' wages downward with mathematical sequence; such a reduction would be too drastic. We do not consider it either fair to the employee or in the interests of the industry generally that a reduction such as this would involve, which would be approximately 45 per cent or 50 per cent, be inflicted at one blow.

You, sir, are aware that considerable of the increases were granted as a result of a certain high cost of living commission which functioned while the cost of living was rising, but never functioned afterwards. Had this commission continued and gradually make adjustments downward it would have required less drastic action now, and would probably have been more equitable and indeed much more pleasant for everybody.

The Board desires further to say that even if the reductions had been, or were to be, made as gradually as possible, this Board would not recommend decreasing in the way which we have described as by "mathematical sequence", for this would involve reducing an employee to his pre-war standard of living which, we think, would be unfair. We subscribe to what we consider wise words of the Canadian Minister of Finance in the House of Commons, May 23, 1922, reading as follows:

We cannot return to pre-war conditions. The workingman's position has advanced. His standard of living is improved—he is unwilling to go back to pre-war conditions, and no one would expect him to be content to do so. He has a right to expect better conditions for himself and his family than in former days.

The adjustment of wages which we propose has been decided on by us after most serious consideration of the representations of both the employer and the employee, and after weighing all the evidence *pro* and *con* and considering the limitations and hazardousness of the miners' occupation, we have reached a finding which is our best judgment in the matter.

In regard to the wages the Board begs to recommend as follows:

- (1) That the war bonus, or high cost of living allowance of \$1.17 per day be discontinued.
- (2) That the agreement signed on behalf of the Western Canada Coal Operators' Association and on behalf of the United Mine Work-

ers of America, District 18, dated June 10th, 1920, be returned to as a basis, and the conditions therein recited (with the exception of the *closed shop*) be continued, and that the rates therein set forth be reduced by 15 per cent.

The Board recommends that the above adjustment of wages prevail for a period of two years from the first day of April, 1922.

Our colleague, Mr. R. G. Drinnan, has read our report and expresses himself as in accord with the same generally. His judgment differs from ours as to what reduction is justified.

We have the honour to be,

Sir,

Yours faithfully,

(Sgd.) W. E. KNOWLES,

(Sgd.) H. OSTLUND.

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of differences between coal operators being members of Western Canada Coal Operators' Association and certain of their employees being members of District 18, United Mine Workers of America.

Calgary, Alberta,

June 13th, 1922.

To the Honourable James Murdock,
Minister of Labour, Ottawa.

Sir:—

As a member of the Conciliation Board appointed by you to investigate the above mentioned dispute, and having failed to agree with the other two members of the Board, I beg to report as follows:—

The wage agreement between the parties to this dispute terminated on 31st March, 1922, after being in effect for

two years. Since then there has been a total cessation of work at the mines involved, owing to failure to arrive at a new agreement.

At a joint conference held in March of this year, the mine workers asked for a renewal of the old day wage rates, twenty-five per cent increase on the contract rates, and a six-hour working day underground. On the other hand the operators offered a new scale of day wage and contract rates based on rates paid in the 1915-1917 agreement with increases from 22 per cent to $36\frac{1}{2}$ per cent added to the basic rates.

The coal industry, or at least those companies operating with union labour, was placed under Government direction at the termination of the 1915-1917 agreement. This Government direction continued from April 1, 1917, to April, 1921, and during that period increases totalling seventy per cent on contract rates and 125 to 165 per cent on day wage rates were put into effect, and remained effective until March 31st, 1922.

Although the mine workers received increases greatly in excess of those granted to employees in other industries in Western Canada, and in which was included a High Cost of Living bonus, when the period of deflation in the cost of living started early in the year 1921 a decline in the wages paid in other industries went into effect, but the wages of the mine workers suffered no reduction because of an agreement made under Government direction and extending to March 31, 1922. It would seem justifiable, therefore, that after benefiting from higher wages for a longer period than the employees in any other industry, the mine workers should agree to a substantial reduction in wages at this late date of readjustment.

The high inflation of wages in the coal industry is, to some extent, responsible for the critical condition in which the coal industry of Alberta and South-Eastern British Columbia has been in for some time back. Our investigation

covered more particularly the year 1921. It was found that all the mines experienced a falling off in business and consequently had only worked part time. This was more pronounced in the domestic coal mines, and in this connection it may be pointed out that, at best, only seasonal employment can be expected in the mines producing domestic coal.

To get the coal industry back to normal, or better still, to place it on a sound economic basis where all connected with the industry can, with due diligence and effort, meet with a fair measure of success, some sacrifices will have to be made. The mine worker, whose interests are identical with those of the industry, must share in bringing about this condition, and the greater his help now, the quicker will be the return to steady employment and more permanent prosperity.

As the 1915-1917 agreement is the last one mutually agreed to between the parties to this dispute, all subsequent agreements being made under Government direction, and when conditions in cost of living and selling price of coal were generally abnormal, I recommend as a fair basis of settlement the following:

- (1) That the day wage and contract mining rates in the 1915-1917 agreement be made the basic rates.
- (2) An increase of twenty-five per cent on all contract mining rates.
- (3) An increase of forty per cent on all outside day wage rates.
- (4) An increase of forty per cent on all underground wage rates.
- (5) That all contract mining rates made subsequent to the 1915-1917 agreement be adjusted to conform to rates in mines in the same districts.

I have the honour to be,

Sir,

Yours faithfully,

(Sgd.) R. G. DRINNAN.

Report of Board in dispute between the London Street Railway Company, and certain of its employees.

A report was received from the Board established to deal with a dispute between the London Street Railway Company and certain of its employees being members of Division 741, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: Mr. J. M. McEvoy, chairman, and Messrs. F. H. McGuigan and G. F. W. McKay, representatives of the company and employees respectively. The report was unanimous and was accompanied by a copy of an agreement which was signed by representatives of both parties to the dispute.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the London Street Railway Company, employer, and certain of its employees, being motormen, conductors, barn, shop, line and track men, members of Division 741, Amalgamated Association of Street and Electric Railway Employees of America, employees.

London, June 13, 1922.

The Honourable James Murdock,
Minister of Labour, Ottawa.

Sir,

We, the Board appointed in this dispute, respectfully report that the Board met on the 16th day of May, 1922, organized and took as much evidence as could be heard. The general nature of the questions and disputes were made plain and the parties requested by the Board to try and settle their difficulties.

On the 9th, 10th and 12th days of June, 1922, further sittings of the Board were held and further evidence heard. Three memoranda were put in evidence, two relating to the cost of living and one relating to the wages of employees paid on other street rail-

ways, which memoranda are herewith enclosed.

We beg to report that we found that the company and its employees had been operating under an agreement dated the 24th day of May, 1921, a copy of which is enclosed herewith.

On the 30th of December, 1921, a notice dated the 30th of December, 1921, giving sixty days' notice of the intention of the company to reduce the wages of the men, roughly 3 cents per hour, was posted by the company, a copy of which notice is enclosed herewith.

On the 12th day of the following January, the men, by their Secretary, L. Parker, wrote the manager of the company disputing the right of the company to make this reduction. There was further correspondence and conferences between the men and the company, copies of which correspondence are enclosed herewith.

On the 1st of March, 1922, the company put into operation the reduction, and on the 12th of April, 1922, the employees requested a Board for the purpose of having considered the reduction of 3 cents an hour, and also to consider their demand for an increase of 3 cents an hour, from the rate set out in the schedule of the agreement dated May 24th, 1921, with other minor matters.

After the session held on the 9th day of June, at which a considerable amount of evidence was taken, the parties, at the suggestion of the Board, held a conference at which it was agreed that the Committee representing the men would submit a proposition made by the company for a settlement to a vote of the division to be held on Saturday evening. The evidence was continued on Saturday and the vote was taken Saturday evening.

As a result of the conferences and the vote of the employees taken Sa-

turday night, June 10th, the enclosed agreement dated June 12th, 1922, was arrived at, and it is considered by the Board a wise and reasonable solution of the dispute.

Dated at London, this 13th day of June, 1922.

(Sgd.) J. M. McEvoy,
Chairman.

(Sgd.) F. H. McGUIGAN,
Member of the Board.

(Sgd.) G. F. W. McKAY,
Member of the Board.

June, 1922, until either party shall give sixty (60) days' notice in writing on or before the first day of any month of their desire to terminate the same or to alter any of the conditions thereof.

In witness whereof, the Parties have set their hands by their authorized representatives.

THE LONDON STREET RAILWAY
COMPANY.

(Sgd.) C. B. KING,
Manager.

(Sgd.) L. TAIT,
Secretary-Treasurer.

Witness:—
(Sgd.) L. TAIT,

AMENDMENT TO AGREEMENT DATED MAY 24TH, 1921, BETWEEN THE LONDON STREET RAILWAY COMPANY AND CERTAIN OF THE EMPLOYEES OF THE COMPANY.

This Agreement entered into in triplicate, this 12th day of June, A.D., 1922, between the London Street Railway Company and certain of the employees of the said Company represented by the persons who sign this agreement, being their duly accredited representatives, hereinafter called the Employees, of the second part.

Witnesseth.—That the parties hereunto mutually agree to and with each other as follows:—

Section 5.

From the 16th day of June, 1922, until the termination of this agreement, the wages of the employees shall be as follows:—

For Motormen and Conductors.

First year..... 41 cents per hour
Second year..... 44 cents per hour
Third and subsequent years 46 cents per hour

For Shopmen, Barnmen and Linemen.

The rates of wages of the Shopmen, Barnmen and Linemen shall be as per Schedule "C" attached hereto and now forming part of this agreement.

For Trackmen.

The rates of wages of the trackmen shall be as per Schedule "D" attached hereto and now forming part of this agreement.

This amendment, together with the amended schedules attached hereto, shall continue in full force and effect from the 16th day of

FOR THE EMPLOYEES

(Sgd.) JOHN COLBERT,
Chairman.

(Sgd.) LEWIS PARKER,
Secretary.

SUMMARY OF PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

THE tables presented below summarize the proceedings under the Industrial Disputes Investigation Act, 1907, for the fiscal year ending March 31, 1922; and from March 22, 1907, to March 31, 1922.

The proceedings under the Act during the year include five cases in which certain proceedings had taken place during the preceding year, namely, disputes between (1) the Niagara, St. Catharines and Toronto Railway and certain of its employees; (2) the Corporation of Ottawa and its firemen; (3) the Canadian National Railways and certain of their employees in the Stores Department, Fort Rouge, Winnipeg, Man.; (4) the Dominion Steel Company, Limited, Sydney, N.S., and its electrical workers, machinists, etc., and (5) the Nova Scotia Steel and Coal Company, Limited,

New Glasgow, and its tin workers, electrical workers, machinists, etc.

At the close of March, 1922, results were still pending in connection with six applications concerning disputes between (1) coal operators, being members of Western Canada Coal Operators' Association and certain of their employees, being members of District 18, United Mine Workers of America; also certain coal operators, not members of the Western Canada Coal Operators' Association and their employees, members of District 18, United Mine Workers of America; (2) Algoma Eastern Railway Company, Sudbury, Ont., and various classes of its employees; (3) Dominion Power and Transmission Company and its linemen, groundmen, etc.; (4) Dominion Power and Transmission Company and Hamilton Street Railway Company respectively and various classes of employees; (5) Ottawa Elec-

tric Railway Company and certain of its employees, and (6) employers, members of the Canadian Building and Construction Industries, Ottawa Branch, and certain of their employees, being hod carriers.

The figures shown in the following table may be thought to show discrepancies as compared with those appearing in the yearly summary.

A closer examination will, however, show the statements of both classes to be in agreement. A complete statement of proceedings for a year must show all disputes dealt with during the fiscal year. The figures of the yearly statement include, therefore, disputes carried over from the previous year and which are counted in the summary of that year's proceedings. Thus the same dispute may properly figure in the

annual statement for each of the two more than once, and account is taken of years. In the statistical recapitulation the number of applications received during the covering several years, as above, it is year and thus brought within the purview of necessary that no disputes shall be counted the statute.

PROCEEDINGS OF CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

THREE new decisions of the Canadian Railway Board of Adjustment No. 1, have been received by the Department (Earlier decisions of the Board appeared in the *LABOUR GAZETTE* for April on pages 396 to 400, and in previous issues).

Case No. 121, previously referred to, relating to the claim of a ticket seller of the Canadian National Railways for reinstatement and payment for time lost was referred back to the interested parties for additional information. Later on the Board was informed that

a satisfactory settlement had been reached. Case No. 124 has reference to claims for "run-arounds" by certain brakemen of the Canadian Pacific Railway (Western Lines). Case No. 125 has reference to the dismissal of a trainman of the Canadian Pacific Railway for violation of a rule. Case No. 126 has reference to discipline placed against the records of certain employees of the Kettle Valley Railway Company.

Case No. 124.—The Canadian Pacific Railway Company (Western Lines) and the Brotherhood of Railroad Trainmen.

A controversy arose between the Canadian Pacific Railway Company, Western Lines, and the Brotherhood of Railroad Trainmen with reference to claims of certain brakemen for "run-arounds." The dispute was with regard to the application of an agreement under date of June 19, 1906, which contained the following ruling made by the Joint Committee of Central and Western Divisions:

1. When an unassigned crew has come on duty in turn and they have got their engine, and commenced to work, they will remain with train called for, even though another crew comes on duty later, and gets out of terminal first. The first crew called will not be entitled to pay, as per Article No. 26.

2. That if this Company in the interests of their business find it necessary to assign crews to a regular time card through freight train, they shall be given the oldest freight men on the section. Such men to remain so assigned for not less than 1 (one) year, unless relieved in promotion order.

3. That a sufficient number of the senior conductors in through freight service be uniformed, for the purpose of relieving regularly assigned men in passenger service, and also to run chartered trains, such as manufacturers, press associations, or trains of like importance, where the prestige of the Company and men requires the men handling such trains be men of experience. This is no way to be construed to allow these men to run sections of regular trains or ordinary excursion trains, or any train of like character, or to effect the compensation as per Article 4.

Men run around, as provided for in this resolution, shall not be entitled to pay as per Article 26.

The company contended that the agreement in connection with uniformed conductors being used for the service specified carried with it their crews and submitted that it was entirely impracticable to use pool conductors for the special service mentioned in paragraph 3 without using their brakemen, and that men run around as provided in the resolution adopted by the Joint Committee of Central and Western Divisions were not entitled to pay as per Article No. 26.

The employees contended that the special agreement above referred to did not contemplate giving the company the right to run brakemen of freight crews around brakemen of other crews in the terminal, but it only applied to conductors. A case was instanced when uniformed freight conductors were used to handle certain special trains and they and their brakemen were run around other crews then in the terminal. The brakemen of crews run around submitted tickets claiming 50 miles each way under Article 14 of the schedule.

The opinion of the Board was expressed as follows:

Notwithstanding that it was shown in the evidence submitted to the Board that brakemen had in some cases been used with their conductors out of turn under the application of the Agreement of June 19, 1906, it was not the opinion of the Board that the right to do this could be properly claimed under the agreement. It is pointed out that while Clauses One and Two of the agreement refer to crews, Clause Three which bears directly on this controversy, refers specifically to conductors.

By decision of the Board the contention of the employees was sustained.

Case No. 125.—The Canadian Pacific Railway Company (Western Lines) and the Brotherhood of Railroad Trainmen.

A controversy arose between the Canadian Pacific Railway (Western Lines), and the Brotherhood of Railroad Trainmen over the dismissal of a trainman for alleged violation of the Company's rule "G" which is against the drinking of intoxicating liquors.

The company submitted that sufficient evidence was produced to justify the action taken by its officers in dismissing the trainman, while the employees contended that he should not have been dismissed as the charge brought against him in the police court was for creating a disturbance, not for intoxication. By decision of the Board the claim of the employees was denied.

Case No. 126.—The Kettle Valley Railway Company and the Brotherhood of Locomotive Engineers, The Brotherhood of Locomotive Firemen and Enginemen, and The Brotherhood of Railroad Trainmen.

A controversy arose between the Kettle Valley Railway Company and the Brotherhood of Locomotive Engineers, Locomotive Firemen and Enginemen and Railroad Trainmen with regard to discipline placed against certain members of a train crew for causing a delay in the handling of a train. The crew had been instructed to pick up and set out cars at several points including the loading and lifting of stock at Princeton, and to fill out to capacity at Coalmont, their final destination being Brookmere, 38 miles from Princeton. When at the latter place the two firemen wired to the Chief Despatcher that they would require rest before leaving Princeton or would take 50 per cent of the train and go right through. The Chief Despatcher did not agree to this, but after the firemen had refused to comply with certain proposals of his, and declared that they would go through as stated in their first message, he said they could tie up. The firemen then booked eight hours' rest.

The decision of the Board was as follows:

The Board is of the opinion that the serious delay resulting to the train in question was caused through certain members of the crew failing to exercise a proper degree of interest in getting the train over the road, and therefore decides that the claim of the employees is not sustained.

However, it appears to the Board that the discipline, as applied, at least in some of the cases, is excessive, and should be modified.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE 1922

SIX strikes, involving 426 workpeople were reported as having commenced during June. There were in existence at some time or other during the month 25 strikes, involving 10,155 workpeople and an estimated time loss of 254,134 working days, as compared with 30

strikes, involving 13,186 workpeople and 278,160 working days in May, 1922; and 50 strikes, 10,239 workpeople and 188,020 working days in June, 1921. The time loss occasioned by the 6 new strikes which began in June was 3,300 working days, while a loss of 250,834 working

days is charged to the 19 strikes which commenced prior to June. Two of the strikes commencing prior to June and all of those commencing during June terminated during the month leaving the following 17 strikes, affecting 9,609 workpeople on record on June 30; coal miners, District 18, Alta., and B.C.; painters, Toronto; employees of steel and coal companies, Sydney; gauge men, Sydney; moulders, Guelph; photo engravers, Montreal; photo engravers, Ottawa; compositors, Hamilton; compositors, Montreal; compositors, Toronto; compositors, Vancouver; compositors, Winnipeg; compositors and pressmen, Halifax; compositors and pressmen, Ottawa; clothing workers, Montreal; and theatre employees at Calgary.

Disputes by Industries

The following is a review of disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—The strike of coal miners throughout District 18, Alta., and B.C., still continued in existence at the end of the month. About 7,500 workpeople were involved, resulting in a time loss of 195,000 working days.

BUILDING AND CONSTRUCTION.—Five strikes, involving 394 workpeople and resulting in a time loss of 3,572 working days were reported in this group. Two new strikes—carpenters at Winnipeg and plasterers at Montreal—occurred during the month. The first mentioned strike was against a reduction in wages, while the latter was for increased wages. Both of these strikes terminated during the month. The strikes of carpenters at Toronto and plumbers at St. Catharines also terminated during June, leaving painters at Toronto the only strike in this group at the end of the month.

METALS, MACHINERY AND CONVEYANCES.—One new strike was reported during the month, that of sheet metal workers at Edmonton which commenced June 1, and was settled by direct negotiations on June 12. This strike was against a reduction in wages. Three other strikes were carried over from the previous month's record and remained unterminated at the end of the month.

PRINTING AND PUBLISHING.—Ten strikes, involving 1,806 workpeople and resulting in a time loss of 46,956 working days were carried over from the previous month's record and remained unterminated at the end of the month.

CLOTHING.—Two strikes were reported as affecting this group during June, involving 95 workpeople and resulting in a time loss of 1,805 working days. One new strike occurred at Hull on June 19, when 35 employees of a clothing firm stopped work in protest against a wage cut. After negotiations had been carried on for some days a settlement was arrived at and work was resumed on June 27. The strike of clothing workers at Montreal, in existence since February, remained unterminated at the end of the month.

FOODS, LIQUORS AND TOBACCO.—Early in June about 20 brewery workers went on strike at Fernie as the result of a reduction in wages. Negotiations were carried on and work was resumed on June 13.

TRANSPORTATION.—One strike occurred in this group during the month involving 130 workpeople and resulting in a time loss of 1,430 working days. The demand made was for increased wages and after carrying on negotiations for several days, the men returned to work pending a final settlement of their grievances.

STRIKES AND LOCKOUTS DURING JUNE, 1922.

Industry or occupation	Particulars	Number of employees affected	Time loss in working days
MINES, QUARRIES, CLAY PRODUCTS, ETC.—			
Coal miners, District 18, Alta., and B.C.	Commenced April 1. Against a reduction in wages. Unterminated.	7,500	195,000
BUILDING AND CONSTRUCTION—			
Bricklayers, masons and plasterers, Calgary, Alta.	Commenced April 1. Against a reduction in wages. Information received indicates conditions no longer affected.		
Carpenters, Toronto, Ont.....	Commenced May 29. Against a reduction in wages. Settled by negotiations; work resumed June 12.	80	640
Painters, Toronto, Ont.....	Commenced May 15. Against a reduction in wages. Unterminated.	50	1,300
Plumbers, St. Catharines, Ont.....	Commenced April 1. Against a reduction in wages. Settled by negotiations; work resumed June 12.	40	360
METALS, MACHINERY AND CONVEYANCES—			
Employees of steel and coal companies, Sydney, N.S.	Commenced November 22, 1920. For increased wages and improved working conditions. Unterminated.	150	3,900
Gauge men, Sydney, N.S.....	Commenced June 9, 1921. In sympathy with employees of steel and coal companies. Unterminated.	16	416
Moulders, Guelph, Ont.....	Commenced May 4. Against a reduction in wages and increased working hours. Unterminated.	12	312
PRINTING AND PUBLISHING—			
Photo engravers, Montreal, Que....	Commenced May 2, 1921. For shorter hours. Unterminated.	30	780
Photo engravers, Ottawa, Ont.....	Commenced May 2, 1921. For increased wages and 44-hour week. Unterminated.	9	234
Compositors, Hamilton, Ont.....	Commenced May 2, 1921. Alleged violation of agreement by employers. Unterminated.	51	1,326
Compositors, Montreal, Que.....	Commenced June 14, 1921. Objection of men to perform work that came from shop where strike existed. Unterminated.	25	650
Compositors, Montreal, Que.....	Commenced July 1, 1921. For increased wages and 44-hour week. Unterminated.	370	9,620
Compositors, Toronto, Ont.....	Commenced June 1, 1921. For increased wages and 44-hour week. Unterminated.	873	22,698
Compositors, Vancouver, B.C.....	Commenced May 2, 1921. For increased wages and 44-hour week. Unterminated.	30	780
Compositors, Winnipeg, Man.....	Commenced July 1, 1921. Alleged lockout following refusal of employers to renew agreement. Unterminated.	222	5,772
Compositors and pressmen, Halifax, N.S.	Commenced May 2, 1921. For shorter hours. Unterminated.	51	1,326
Compositors and pressmen, Ottawa, Ont.	Commenced June 1, 1921. For increased wages and 44-hour week. Unterminated.	145	3,770
CLOTHING—			
Clothing workers, Montreal, Que....	Commenced February 17. In protest against a change in working conditions. Unterminated.	60	1,560
MISCELLANEOUS—			
Theatre employees, Calgary, Alta..	Commenced May 8. Against employment of non-unionists. Unterminated.	15	390

STRIKES AND LOCKOUTS DURING JUNE, 1922.—(Continued).

Industry or occupation	Particulars	Number of employees affected	Time loss in working days
Strikes commencing during June, 1922			
BUILDING AND CONSTRUCTION—			
Carpenters, Winnipeg, Man.....	Commenced June 12. Against a reduction in wages. Settled by negotiations; work resumed June 15.	24	72

Street pavers (electric railway), Toronto, Ont.	Commenced June 8. For increased wages. Men returned to work pending final agreement of their grievances. Work resumed June 21.	130	1,430

STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING MAY, 1922

THE following details with regard to strikes and lockouts in the United Kingdom during May, 1922, based upon returns from employers and workpeople, are taken from the June issue of the *British Labour Gazette*.

NUMBER, MAGNITUDE AND DURATION.

—The number of trade disputes involving a stoppage of work, reported to the Department as beginning in May, was 38, involving (directly or indirectly) about 22,000 workpeople; in addition, about 350,000 workpeople were involved in 55 disputes which began before May, and were still in progress at the beginning of that month. The total number of new and old disputes in progress in May was thus 93, involving about 372,000 workpeople, and resulting in a loss during May of over 7,200,000 working days.

The stoppage of work in the ship-building trades, which began at the end of March, terminated in most districts on May 6. The stoppage involving members of the Amalgamated Engineering Union in the employment of firms affiliated to the Engineering and the National Employers' Federations, which began on March 13, was extended on May 3 to members of other trade unions in the engineering trade, and continued throughout the month.

CAUSES.—Of the 38 disputes beginning in May, 16, directly involving about 9,000 workpeople, arose out of proposed reductions in wages; 12, involving 6,000 workpeople, on other wages questions; 6, involving 3,500 workpeople, on questions respecting the employment of particular classes or per-

sons; and 4, directly involving nearly 2,500 workpeople, on other questions.

RESULTS.—Settlements were effected of 23 new disputes, directly involving about 14,000 workpeople, and 18 old disputes, directly involving about 84,000 workpeople. Of these disputes, 6, directly involving 2,000 workpeople, were settled in favour of the workpeople; 17, directly involving 14,000 workpeople, in favour of the employers; and 18, directly involving 82,000 workpeople, were compromised. In the case of 6 disputes, directly involving about 2,000 workpeople, work was resumed pending negotiations.

The following table classifies the disputes by groups of trades:

Groups of Trades	No. of disputes in progress in May			Number of workpeople involved in all disputes in progress in May.	Aggregate duration in working days of all disputes in progress in May.
	Started before May 1.	Started in May.	Total		
Building	8	3	11	500	6,000
Mining and quarrying	12	9	21	23,000	210,000
Metal, engineering and shipbuilding...	22	9	31	343,000	6,940,000
Clothing	3	1	4	2,000	20,000

*A general dispute in the coal mining industry was in progress in May, 1921.

THE COAL STRIKE IN THE UNITED STATES.

DURING June there was little change in the situation with regard to the general strike of coal miners in the United States which began on April 1. On June 14, in the anthracite field, the representatives of the United Mine Workers of America rejected a proposal of the operators that their differences be submitted to arbitration by a commission or tribunal to be appointed by the President of the United States. In rejecting this proposal the miners' representatives said that they would be willing to join with the operators in arranging for a settlement on condition that the latter accept their request for an eight-hour day for day men and complete union recognition, and that existing rates of pay be taken as a starting point for future deliberation. The operators replied that they could not accept these conditions. A general vote of the anthracite miners in the union was taken later on the question of declaring a formal strike, and a meeting of the general scale committee of the union was held at Wilkes-Barre on June 26 to consider the status of the nego-

tiations. The referendum vote of the 155,000 idle anthracite miners authorized the committee to make the prevailing suspension of work an absolute strike. This action, however, was not taken, but following the receipt of a telegram from Mr. J. L. Lewis, acting president of the United Mine Workers, who had been in conference with President Harding at Washington, all plans were abandoned pending action by the President for immediately calling an absolute strike and withdrawing the pumpmen from the mines.

In the meantime no progress had been made towards a settlement in the bituminous fields. The intervention of President Harding was now awaited as the only means of ending the deadlock in both the anthracite and bituminous areas. Executive action was hastened, moreover, by events in Illinois where 44 working miners were killed during strike riots. On June 26 the President took charge of the official efforts to end the strike. On June 29 both bituminous and anthracite operators, as well as the officials of the United Mine

Workers agreed to meet at Washington on July 1 to devise methods for reopening negotiations for a settlement. It was understood that the Administration sought to reach a permanent adjustment of the mining industry, and to remove the causes for its ever-recurring unrest. The President made an urgent appeal for a compromise, but the conference failed to reach any basis of agreement. On July 10 the President submitted to both parties a government plan to end the deadlock and settle the strike. This plan called for the immediate resumption of work by the miners at the wage rates prevailing on March 31; also for the fixing of permanent wage levels by arbitration, and for a public enquiry into the permanent problems of the coal mining industry. Both parties delayed their reply to these proposals, the union officials stating that they had no

authority to reject or accept them, but stating that they would summon the general policy committee of the United Mine Workers of America to Washington on July 15, to consider the attitude of the union in the new situation.

It will be recalled that the miners in the anthracite fields are all unionized, and production of hard coal has therefore practically ceased. Stocks at the beginning of the present month were reported to be getting low, involving danger of a shortage of domestic coal next winter. The bituminous industry was still partly active, production being reported at about one-half the normal requirements, due to partial activity in West Virginia, Kentucky and the South. Owing to the large reserves when the strike began it was expected that a suspension of industry need not be expected before September.

THE RAILWAY STRIKE IN THE UNITED STATES.

ELSEWHERE in this issue is printed the text of three recent important decisions of the United States Railroad Labour Board reducing wages of practically all classes of railroad employees in the United States except those in engine and train service and telegraphers, the new rates to be effective from July 1, 1922. As a result of these decisions strike votes were taken by the organizations of the employees affected, and at the end of June it appeared possible that a large part of the railway employees would strike on July 1 or soon after. The dispute involved not only an issue as to a reduction in wages, but as to the policy of some of the railroad companies in contracting out the work on the maintenance of their tracks and on the upkeep of rolling stock (instead of having the work done by their own employees at the rates of pay approved by the Railroad Labour Board), and also the changes in rules of service and working conditions made by decisions of the Board be-

tween August, 1921, and March, 1922. In some respects, therefore, the circumstances leading up to the strike led back to conditions in 1920 and in the fall of 1921, when a general strike of railroad employees was narrowly averted.

When the United States Government turned the railroads back to the railway companies, on March 1, 1920, (the railroads having been operating since December, 1917, under a Director-General responsible to the President) provision was made at the same time for the operation and financing of the roads in the future under a special act known as the Transportation Act, 1920 (Esch-Cummins Law). This act provided for the compensation to be paid the companies for any loss sustained owing to Government control and operation and vice versa, for the adoption of certain principles in the determination of freight rates, etc., by the Interstate Commerce Commission, and also for the amalgamation of roads, traffic arrangements, etc. In regard to labour

conditions, however, the feature of the Act was the establishment of the United States Railroad Labour Board. The duties of this Board were to determine working conditions, rates of pay, etc., in cases where the companies could not agree with their employees, taking into consideration among other relevant circumstances (a) the scales of wages paid for similar kinds of work in other industries; (b) the relation between wages and the cost of living; (c) the hazards of the employment; (d) the training and skill required; (e) the degree of responsibility; (f) the character and regularity of the employment; and (g) inequalities of increases in wages or of treatment, the result of previous wage orders or adjustments.

The Board consists of nine members in three equal groups, the Public Group, representing the public, appointed by the President; the Labour Group, representing the employees, and the Managing Group, representing the employers, the two latter groups being selected by the President from lists of six names respectively recommended by the employers and employees.

Two important questions were placed before the Board immediately on its appointment, first, requests from the employees for increases in pay, as no general increases had been granted since those under General Order No. 27 of the Director-General in 1918 and its supplements, although the cost of living had continued to rise; and second, the proposal of the railway companies to change the rules and working conditions provided for under that order and by the so-called "National Agreements" between the Director-General and various organizations of employees. These agreements had replaced those between the unions and the individual railway companies for the various classes of employees except the engine and train service employees. For these classes the unions and the principal railway companies had previously entered into regional or territorial agreements as to standard rates of pay and

working conditions. The eight-hour day had been secured for many classes of employees by the enactment of the "Adamson Law" in September, 1916; and by the McAdoo Award or by its supplements the eight-hour day, and in some cases also the 44-hour week, had been secured for the other classes, with punitive time-and-one-half rates of pay for overtime work. Other working conditions had also been provided for, which were much desired by the employees. The railway companies however immediately on the return of the railways by the Government sought to have some of these conditions revised on the ground that they unduly increased the wage costs of operating the railways and that under private operation the deficits could be met out of the revenues of the Federal Government for only six months.

The Railroad Labour Board in its first important Decision, No. 2, effective from May 1, 1920, increased the rates of wages of all employees by about 20 per cent and provided that the existing rules and working conditions should remain in effect until after hearing the representations of the employers and the employees. On June 1, 1921, in Decision No. 147 the various companies and their employees were instructed to consider the rules and working conditions and to report to the Board those rules on which they could not agree, as provided by the Transportation Act, the decision containing a statement as to the principles on which such rules should be considered and settled. Later the Board reported that on practically all the important rules, agreement had not been reached for most of the railways and hearings would therefore be necessary. In the meantime, however, the companies had requested reductions in wages, and the Board by an order effective from July 1, 1921, prescribed decreases of from 5 to 17½ per cent. The organizations of employees opposed the reduction in wages and took strike votes. Meanwhile a proposal was made by the railways companies for another 10 per cent

decrease. A strike was averted, however, on the understanding that freight rates would be reduced and that further reductions in wages would be withdrawn from consideration for the time being.

Between August, 1921, and March, 1922, various decisions of the Board were rendered making changes in the rules and working conditions to be effective on railways which had not reached agreements with their employees. The principal changes were the removal of punitive overtime rates after eight hours per day and on Sundays and holidays for some classes, and the restoration of piece work in some cases. Some of the conditions affected by these decisions were greatly prized by the employees and had been in vogue on some railways for upwards of forty years.

In the meantime some of the railways had adopted the policy of sending rolling stock to outside shops for repairs, or of leasing their repair shops to other companies by whom repairs were made, and of letting contracts for the maintenance of tracks, etc., instead of employing their own men and equipment on such work. As wages lower than these approved by the Board were said to be paid in such outside shops and by such contractors, it was alleged that the companies did this in order to lay off their own employees and so avoid paying the higher wage rates approved by the Board. The Board ordered the companies to cease this practice, but the employees' organizations then protested that the companies were ignoring the order. When the reductions on wages to be effective from July 1, were announced, three separate issues were submitted by certain unions to their members in the form of strike votes, namely: 1. Changes in working conditions; 2. The contracting out of work; 3. Wage reduction. In the meantime the officers of various employees' organizations discussed with the officers of the coal miners' organization

(on strike) methods of co-operation and mutual aid.

At the end of June when the strike votes had been taken, the Railroad Labour Board summoned the heads of the unions concerned to appear before it. The president of the Railway Employees Department of the American Federation of Labour (Federated Shop Crafts) and the heads of the six unions in this federation failed to appear, but wrote to the Board that as the railway companies had not obeyed the orders of the Board in certain respects, their organizations also would disregard such orders, and that they had already issued an order calling their members out on strike at 10 a.m., July 1. The officers also stated that so dissatisfied were the men that many had left work before the hour of the strike and that if the strike order were withdrawn or postponed, large numbers would break away from control of their officers and go on "outlaw strike" such as had occurred at times since 1918. The heads of the maintenance of way employees' organization, however, who had not yet issued a strike order as the vote had not been finally counted, appeared before the Board. Some railway companies against whom complaints had been made agreed to cease contracting out maintenance of way work. The Board stated that as the cost of living statistics of the United States Bureau of Labour Statistics indicated that increases in prices had occurred since the decisions on wage reductions had been given, further hearings in regard to the reductions in wages would be held. The head of the maintenance of way employees' organization then agreed to postpone the issue of the strike order until further discussion with the Board.

The Railroad Labour Board decided that as the shop crafts had gone on strike these unions had forfeited all standing before the Board, and accordingly, adopted a resolution instructing

the railways to arrange for the organization of those employees engaged to replace the strikers, so that such employees might be represented before the Board.

The resolution of the Board was as follows:

Whereas the six organizations composing the Federated Shop Crafts have notified the Railroad Labour Board that a very large majority of the employees which they represent have left the service of the carriers, and that the members of said organizations are no longer employees of the railways, under the jurisdiction of the Railroad Labour Board or subject to the application of the Transportation act; and

Whereas the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, United Brotherhood of Maintenance of Way Employees and Railway Shop Laborers, International Brotherhood of Firemen and Oilers and Brotherhood of Railroad Signal Men of America have also made known to the board that they have put out strike ballots on all or a part of the carriers, which may result in the classes of employees which they respectively represent, leaving the employ of the carriers; and

Whereas, in the future submission of disputes, involving rules, wages and grievances of said classes of employees of the carriers, it will be desirable, if not a practical necessity, for the employees of each class on each carrier to form some sort of association or organization to function in the representation of said employees before the Railroad Labor Board in order that the effectiveness of the Transportation act may be maintained; now, therefore, be it

Resolved that it be communicated to the carriers and employees remaining and the new employees succeeding these who have left the service to take steps as soon as practicable to perfect on each carrier such organizations as may be deemed necessary for the purpose above mentioned; and

Be it further resolved, that, on any carrier where either of the above-named organizations, by reason of its membership severing their connection with the carriers, ceases to represent its class of employees, procedure similar to that above suggested in the case of the shop crafts is recommended; and

Be it further resolved that the employees remaining in the service and the new ones entering same be accorded the application and benefit of the outstanding wage and rule decisions of the Railroad Labor Board until they are amended or modified by agreement with said employees, arrived at in conformity with

the Transportation act or by decision of this board; and

Be it further resolved, that, if it be assumed that the employees who leave the service of the carrier because of their dissatisfaction with any decision of the Labor Board are within their rights in so doing, it must likewise be conceded that the men who remain in the service and those who enter it anew are within their rights in accepting such employment; that they are not strikebreakers seeking to impose the arbitrary will of an employer on employees; that they have the moral as well as the legal right to engage in such service of the American public to avoid interruption of indispensable railway transportation, and that they are entitled to the protection of every department and branch of the Government, State and national.

It is suggested that carriers bulletin this resolution.

By order of the
U. S. RAILROAD LABOR BOARD.

A cause of much difficulty was a dispute with the Pennsylvania Railway as to the recognition of the shop crafts unions and as to the jurisdiction of the Board in ordering a vote of the shop employees of the railway to determine their representation. The question was carried to the courts and at the end of June was before the Federal Court of Appeals at Chicago with the probability of being carried to the United States Supreme Court. Among other points the question was raised as to whether the decisions of the Board were more than recommendations which either party might refuse to accept and as to the lack of provision for any penalty for such refusal to be enforced by the courts.

Canadian Railway Employees

The shop employees on those sections of United States railways operated in Canada, such as the New York Central, the Michigan Central and the Père Marquette, were involved in the strike of the shop crafts. As the question of their going on strike on July 1 was raised the Minister of Labour brought the attention of the officers of their organization and also to that of the officials of the roads the provisions of the Industrial Disputes Investigation Act, 1907, which provide

that on public utilities such as railways there shall be no strikes nor changes in wages without 30 days notice and if a Board of Conciliation is requested by either party under the Act, there shall be no changes in wages, working conditions and no strikes pending the presentation of the report of the Board. The shop employees concerned, therefore, under the Act asked the Minister to appoint a Board.

When the wage decisions of the United States Railroad Board were issued the principal Canadian railway companies in accordance with agree-

ments in force gave thirty days notice to their employees of similar changes in wages to take effect about the middle of July. Conferences were entered into in regard to such changes. The changes in working conditions for the shop crafts had already been made by the agreement summarized elsewhere in this issue. Early in July the shop crafts and the maintenance of way employees' organizations applied to the Minister of Labour for Boards of Conciliation, naming in each case the Railway Association of Canada as the employer.

DISPUTES IN THE BRITISH ENGINEERING INDUSTRY

Unions accept conditions offered by Employers

PARTICULARS of the lockout in the engineering industry and of the strike in the shipbuilding industry of the United Kingdom, both of which began in March, were given in the last two issues of the LABOUR GAZETTE. In the June issue it was noted that work was resumed on May 8 in the shipbuilding trades, the vote of the men on the proposed terms of settlement not representing the two-third majority which was necessary for the continuance of the stoppage of work. In the engineering trades, as previously noted, negotiations were resumed about the middle of May between the Engineering and National Employers' Federation and all the trade unions concerned, following the issuance of the report of the Court of Inquiry under the Industrial Courts Act, the text of which was reproduced in part in the last issue. The employers shortly afterwards submitted new terms, which with one variation followed the lines suggested by the Court. Instead of accepting the Court's suggestion that the unions should be consulted *beforehand* when any workshop changes were in contemplation, the employers now proposed to consult the unions only in cases where the proposed change would involve a serious displacement of one class of workers in an establishment by another. More fully, their proposal was

that the management should, "unless the circumstances arising are beyond their control, give . . . not less than 10 days intimation of their intention, and afford an opportunity for discussion. . . with a deputation of the workpeople concerned, or their representatives in the shop; should discussion not be desired, the instructions of the management were to be observed;" and in the event that no settlement followed discussion, the proposal was that "the management should give a decision upon which work shall proceed pending the recognized procedure being carried through." The employers further undertook to take care as far as possible of the workers displaced. On the subject of overtime pay the employers revived a proposal put forward in November, 1921, which had already been rejected by a ballot vote of the men, to the effect that "the employers have the right to decide when overtime is necessary, the workpeople or their representatives being entitled to bring forward. . . any cases of overtime they desire discussed. Meantime the overtime required shall be proceeded with." The executive of the Amalgamated Engineering Union recommended the rejection of these proposals, and their decision was supported by a conference of the Union district organizers on May 19. However, a provisional

agreement with the employers on the basis of the employers' proposals, was reached the next day by the Negotiating Committee of the other unions, and the executive council of the unions decided on May 23 to submit this provisional agreement to a ballot vote. The result was a vote of 99,313 for, and 46,881 against, acceptance.

In the meantime negotiations were resumed between the Amalgamated Engineering Union and the Employers' Federation, the union making an unsuccessful effort to secure more advantageous conditions. Finally a national conference of delegates of the Amalgamated Union decided on June 2 by 204 to 47 votes to submit the employers' new proposals to a ballot vote to be held a week later, the President

advising the members to vote for acceptance on the ground that an important concession was embodied in the employers' proposals, under which ten days' notice and an opportunity for discussion must be given by the management when a workshop change is contemplated which will result in one class of workpeople being replaced by another in the establishment. The vote resulted in the acceptance of the employers' terms by 75,478 votes to 39,423.

A second ballot taken by the National Union of Foundry workers was stated to have shown a similar result, though the actual figures were not announced. The only union which, at the close of the month had not accepted the settlement, was the Boilermakers' Society.

ANNUAL CONVENTION OF THE AMERICAN FEDERATION OF LABOUR

Synopsis of Proceedings of Forty-Second Convention, at Cincinnati, Ohio

THE 42nd annual convention of the American Federation of Labour was held in Cincinnati, Ohio, from June 12 to 24. Just previous to the formal opening of the convention the delegates marched in procession from the headquarters hotel to the Freeman Avenue Armoury, where the sessions were held daily. The opening prayer was offered by the Rev. Peter E. Dietz, the director of the American Academy of Christian Democracy. Mr. Adolph Kummer, president of the Cincinnati Central Labour Council, welcomed the delegates on behalf of organized labour of the city, and Mr. Thos. J. Donnelly, secretary of the Ohio State Federation of Labour, greeted the delegates on behalf of the State. Mayor Geo. P. Carrel and County Commissioner Charles Harding also contributed to the opening proceedings, the several addresses being replied to by Mr. Samuel Gompers, president of the Federation. The report of the credential committee, as finally adopted, showed 470 accredited delegates, 287 of whom represented 95 central national

and international organizations; the five federation departments, 30 state federation and 90 city central bodies were represented by one delegate each, and 39 trade and federal unions were represented by 52 delegates. Among the six fraternal delegates were one from the Trades and Labor Congress of Canada, and two from the British Trades Union Congress.

A synopsis of the report of the executive council, copies of which had been forwarded to all accredited delegates, was read by Vice-President James Duncan. The report consisted of 150 pages and dealt with the various matters which had engaged the attention of the members of the council, and referred also to questions of importance to the organized labour movement.

The customary committees were appointed, to which were referred the various sections of the executive council's report, as well as the resolutions submitted for consideration.

Report of Auditing Committee

The report of the Auditing Committee, which covered in detail the federation's financial transactions, showed general receipts, including the balance from last year, of \$761,382; expenditure amounted to \$562,588, leaving a balance at the close of the fiscal year of \$198,794. Of the balance on hand \$15,000 is invested in Canadian Victory bonds. A statement showed the contributions to (1) the fund for promoting and advancing co-operation; (2) the leather workers; (3) the American Federation of Labour publicity bureau; (4) the National Non-partisan Political Campaign Committee, and how the amounts were disposed of. The building fund, with balance from last year, had receipts amounting to \$30,859; expenses were \$24,986, leaving a balance of \$5,873. Before the report was adopted President Gompers referred to the open manner in which the financial transactions of the Federation were given to the public, and challenged the "open shoppers," the chambers of commerce and other boards of trade, and all the other capitalistic organizations to make such a clean showing as that made by the American Federation of Labour.

The report on membership, which was given at 3,195,651, showed a decrease of 710,893. In reference to the membership figures, President Gompers among other things pointed out that national and international organizations pay their per capita to the Federation on the basis of dues collected by them from their membership. "Those organizations do not collect dues from men and women who are out of work. They issue 'out of work' stamps, and no accounting of the number of such stamps issued is rendered to the American Federation of Labour, for the reason that we do not require a per capita tax on such stamps, since they represent no revenue." It was further explained that this feature makes it impossible to know whether the Federation had lost anywhere near the number of members indicated by the figures presented.

Fraternal and other Addresses

The fraternal delegates included Mr. Ernest Robinson from the Trades and Labour Congress of Canada, Mr. E. L. Poulton and Councillor Herbert Smith from the British Trades Union Congress, Canute A. Vargas from the Mexican Federation of Labour, Miss Anna Fitzgerald from the Women's International Union Label League, and Miss Mary V. Halas from the National Women's Trade Union League. Each of the delegates conveyed fraternal greetings from their respective organizations. The first four named were subsequently presented with gold watches and chains, suitably engraved, as souvenirs of their visit to the convention.

Among other visitors who delivered addresses were Col. Hanford MacNider, commander of the American Legion; Mr. Geo. L. Barry, first vice-commander of the American Legion and president of the International Union of Printing Pressmen; Mr. Thos. J. Duffy, chairman of the Ohio Industrial Commission; Mrs. Lucy Robins, secretary of the Amnesty Committee of the American Federation of Labour; Mr. Jeff Davis, president of the Itinerant Workers' Union of America; Mr. John R. Voris, associate general secretary of the Near East Relief; Miss Effie Bentham, representing Dr. Barnardo's Homes in England, and Mr. Wood F. Axton, an employer, of Louisville, Ky. During a lull in the proceedings of the fourth day's session, at the suggestion of President Gompers, the following delegates spoke briefly on topics of their own selection; Mr. Thos. F. Flaherty, president National Federation of Post Office Clerks; Mr. B. M. Jewell, president, Railway Employees' Department; Mr. James O'Connell, president, Metal Trades Department; Mr. Wm. Green, secretary-treasurer, United Mine Workers and Mr. Frank Morrison, secretary of the American Federation of Labour, the discussion being closed by remarks from President Gompers.

Consideration of Child Labour Law Decision

President Gompers at the close of the first session informed the convention that the Supreme Court of the United States had declared the federal child labour law to be unconstitutional. With the permission of the delegates, the third day of the convention was set aside as a day to be specially devoted to the consideration of the question of how child labour can be abolished and the best method to accomplish that purpose. The day chosen for the consideration of the child labour problem being June 14, national flag day in the United States, the proceedings were interrupted for a brief period during which a silk United States flag was presented to President Gompers by the local arrangements committee, an ode to the flag was recited by Mr. Daniel J. Tobin, treasurer of the Federation, and President Gompers made appropriate reference to the day and the significance of the flag. The first speaker was Dr. Albert Freiberg, who was followed by Mr. Max Pine of the United Hebrew Trades of New York. The main address was by Hon. R. M. LaFollette, United States Senator from Wisconsin, who dealt at length with the decision of the Supreme Court of the United States which had just recently declared unconstitutional the revenue tax provision on the products of child labour and stated that the decision "is merely one of the latest manifestations of the usurpation of power by that court." Senator LaFollette suggested that to overcome the powers of the courts the constitution of the United States be amended to provide (1) that no Federal judge shall set aside a law of Congress on the ground that it is unconstitutional; (2) that if the Supreme Court assumes to decide any law of Congress unconstitutional, or by interpretation undertakes to assert a public policy at variance with the statutory declaration of Congress, which alone under our system is authorized to determine the public policies of Government, the Congress may by repassing the law nullify the action

of the court. On motion it was decided that the address of Senator LaFollette be printed in pamphlet form to be distributed among the people of the nation. It was further decided that a special committee be appointed to consider the decision of the Supreme Court in the child labour law as well as other decisions affecting the activities of organized labour. At the afternoon session of June 14 the question of child labour was further discussed, the speakers being Miss Florence Kelly, of the Consumers' League; Del. T. W. McCullough and Del. Wm. Green.

Report of Special Committee on Judicial Decisions Affecting Labour

The special committee which was appointed to consider the several proposals relating to recent decisions of the United States Supreme Court affecting labour and the rights of labour, as well as child labour, had referred to it the sections of the report of the executive council under the following captions: "Shall Courts Protect Labour in Preference to Property?" "Class-biased Decisions of Our Courts", embracing Judge Anderson's injunction against the United Mine Workers, Judge McClintick's injunction against the miners; "The Tri-City Case", "Traux vs Corrigan", the "Coronado Case", "Use of Injunction by Labour a Snare and Delusion", "National Child Labour Law Held Unconstitutional", "Constitutional Rights and Liberties must be safeguarded at all Hazards", "Supreme Court Decisions."

The report of the committee expressed appreciation of the valuable services contributed by a number of attorneys from various parts of the country. The committee reviewed the several court decisions and stated that "within recent years the Supreme Court had undertaken to deprive American labour of fundamental rights and liberties which heretofore have been accepted as deeply and organically ingrained in our system of jurisprudence". The committee further stated that:

We are determined to preserve our rights as workers, citizens and freemen, and we call upon all fair-minded and liberty-loving citizens to unite with us in a determined effort to deprive the courts of the despotic powers which they have assumed, and to make our Government in full measure a government of the people, for the people and by the people. To this end your committee recommends that the convention record itself in favour of, and promote the adoption of amendments to the constitution of the United States for the following purposes:—

1. An amendment prohibiting the labour of children under the age of 16 years in any mine, mill, factory, workshop or other industrial or mercantile establishment, and conferring upon Congress the power to raise the minimum age below which children shall not be permitted to work, and to enforce the provisions of the proposed amendment by appropriate legislation.

2. An amendment prohibiting the enactment of any law or the making of any judicial determination which would deny the rights of the workers of the United States and its territories and dependencies to organize for the betterment of their conditions; to deal collectively with employers; to collectively withhold their labour and patronage and induce others to do so.

3. An amendment providing that if the United States Supreme Court decides that an act of Congress is unconstitutional, or by interpretation asserts a public policy at variance with the statutory declaration of Congress, then if Congress by a two-third majority re-passes the law, it shall become the law of the land.

Your committee further recommends:

4. In order to make the Constitution of the United States more flexible to meet the needs of the people, an amendment providing for easier amendments of the same.

Your committee further recommends that in conjunction with the campaign for the adoption of the suggested constitutional amendments, Congress be urged to enact:

a. A child labour law which will overcome the objections raised by the United States Supreme Court to the laws heretofore passed by Congress and nullified by the Court;

b. A law which will make more definite and effective the intention of Congress in enacting Sections 6, 19 and 20 of the Clayton Act, which was manifestly ignored or overridden by the Court;

c. An act repealing the Sherman Anti-Trust Law, which was intended by Congress to prevent illegal combinations in restraint of trade, commonly known as "Trusts," but

through judicial misinterpretation and perversion has been repeatedly and mainly invoked to deprive the toiling masses of their natural and normal rights.

The committee recommended that the executive council be authorized and directed to call conferences of persons and associations interested in any or all of the above specified recommendations for the purpose of obtaining advice, assistance and co-operation in the proposed laws and constitutional amendments, and in the education of public opinion for their support and adoption, and that the executive council be authorized to approve, in behalf of the American Federation of Labour, the laws and constitutional amendments so prepared, and to take such other action as may be deemed advisable. It was also recommended that in the meantime, in order to meet the onslaughts on organized labour, the council be authorized to establish a legal defence bureau for the purpose among other things of enlisting the voluntary assistance of lawyers friendly to the cause of labour and experienced in industrial litigation.

This portion of the report of the special committee was discussed at length, after which it was adopted.

The special committee also reported on the matters contained in the report of the executive council under the caption "Legislative Attacks on Trade Unions," and stated that "Interwoven throughout all of these legislative enactments and legislative proposals is the insidious attempt to extend the doctrine of conspiracy to the whole trade union movement, and thus to prevent the constructive, effective and efficient application of the principles of organization and co-operation by the wage-earners."

The committee approved of the declaration of the executive council against compulsory incorporation of trade unions, and of a resolution in favour of the recall of judges and endorsed a request that the executive council render all possible assistance to the Amalgamated Association of Iron, Steel and

Tin Workers in the fight against injunctions in labour disputes.

Report on International Labour Relations

To the Committee on International Labour Relations were referred two resolutions favouring the recognition by the United States Government of the present Government of Russia, and the negotiation of a trade agreement with that country. The majority of the committee reported adversely on both resolutions and recommended for adoption a resolution in which the present rule in Russia was referred to as a "most rigorous, brutal, tyrannical autocracy in the absolute control of communists." The resolution which the majority of the committee favoured further set forth that a propaganda of deception under the direction of the Soviet authorities has been conducted, one of the aims of which is to undermine and destroy the American Federation of Labour. Two of the 22 members of the committee presented as a minority report a substitute resolution in lieu of all resolutions on the subject of relations with Russia. After a debate the majority report of the committee refusing recognition of the Soviet Government was adopted.

In reference to the affiliation of the American Federation of Labour with the International Federation of Trade Unions it was decided that the executive council continue its efforts to bring about affiliation in accordance with the instructions of the Montreal and Denver conventions. (The decisions of these conventions were that there should be a reduction in the per capita tax and that there should be national autonomy for each affiliated trade union centre.)

The convention approved of the activities of the executive council in respect to the Conference on the Limitation of Armament, and expressed satisfaction with the splendid showing made in Pan-American relations.

Approval was given to a resolution seeking immediate recognition by the United States of the Government of Mexico, and offering opposition to bankers demanding unreasonable terms for loans to Latin American republics.

Support for the Mexicans in their task of organizing and bettering the conditions of employment was approved and the executive council was requested to send a fraternal delegate to the fourth annual convention of the Federation of Mexico.

A resolution was approved expressing sympathy for the just struggles and aspirations of the people of India.

Approve of Affiliation in the Clothing Trades

The Committee on Report of the Executive Council recommended, and the convention approved, of a resolution instructing the executive council to use their good offices to bring about an affiliation of the United Garment Workers with the Amalgamated Clothing Workers with a view of restoring harmony in the clothing industry and clearing the way for an amalgamation of all the unions in the said trade.

Jurisdictional Disputes

A number of jurisdictional controversies were before the convention, some of which were reported upon by the executive council, and others introduced by resolutions. It was reported to the convention that the dispute between the jewellery workers and metal polishers had been amicably adjusted, as had also those between certain of the building trades and theatrical stage employees and steam engineers and brickmakers. In reference to the dispute over jurisdiction between the teamsters and bridge and structural iron workers, it was decided that a conference of representatives of the unions involved be called within sixty days. In the event of failure to agree the matter to be referred to arbitration. A basis of settlement of the dispute be-

tween the carpenters and maintenance-of-way employees was reported, and it was recommended that upon the ratification of the terms by the United Brotherhood of Maintenance-of-Way Employees and Railway Shop Labourers the suspension of the organization from affiliation should be lifted. The dispute between the steam engineers and the electrical workers was also up for discussion, the convention approving of a division of work as offered by a representative of the International Brotherhood of Electrical Workers. The long-standing dispute between the machinists and flint glass workers was again before the convention, and it was decided to reaffirm the former decision on the subject, which conceded to the flint glass workers the making of molds for molding glassware. It was also reported that the controversy between the carpenters and longshoremen had been settled on a basis mutually agreeable to both organizations. In regard to the dispute between the plumbers and machinists, the executive council was instructed to continue its efforts to bring about an understanding. The controversy between the longshoremen and railway clerks was referred to the executive council to call a conference for August 1 of representatives of the organizations concerned. The dispute between the railway carmen and the painters was reported as having been adjusted, and the jurisdictional controversy between the tunnel and subway constructors and blacksmiths was referred for further conference, as was also the dispute between the fire fighters and steam and operating engineers.

Other Reports presented

The following is a synopsis of the reports of the regular committees, the more important features of which only are noted.

REPORT OF COMMITTEE ON LEGISLATION.—The first resolution to be submitted to the convention was reported upon by the Committee on Legislation.

The resolution was in opposition to a bill now pending in the United States Congress which is designed to equalize the cost of operation between foreign and American vessels. The resolution condemned the proposed Ship Subsidy Bill "as inimical to the public interest and particularly destructive to the nation's hopes and aspirations for sea power." After Delegate Andrew Furu-seth, president of the International Seamen's Union, gave an explanation of what the proposal meant, the resolution was adopted unanimously. The action of the convention was at once transmitted to the proper authorities at Washington and the executive council was instructed to use their efforts to defeat the proposed legislation.

The Committee on Legislation expressed approval of the efforts of the executive council in combatting an influx of Chinese coolie labour into Hawaii and endorsed a resolution on the same subject.

The committee approved of an increase in the scale of compensation paid to Government employees under the Federal Compensation for Injury Act, and also endorsed requested amendments to the law under which Government employees are retired from the service.

Endorsement was given to the Ohio workmen's compensation law and organized labour in other states was urged to work for the adoption of the provisions of the Ohio law.

Approval was given to a proposal that the rate of interest paid on deposits under the postal savings system be increased to at least three per cent, and that the law be modified in other respects.

The executive council was commended for the efforts put forth to secure sufficient funds for the United States employment service, and for the opposition to a sales tax being adopted by Congress.

Concerning the reported attempts to hinder the functioning of the United States Department of Labour, the committee was opposed to its activities being interfered with, and recommended that the officers utilize their power to prevent the demolition of this government department.

Approval was expressed of the successful efforts of the federation officers to strengthen through Senate amendments the so-called three per cent immigration law, and they were instructed to watch closely all immigration developments, and also to aid organized farmers in securing the enactment of remedial legislation.

The committee also reported on various other items of legislation referred to in the report of the executive council and commended the officers for their vigilance on behalf of the workers.

REPORT OF COMMITTEE ON ORGANIZATION.—To this committee were referred a number of passages in the report of the executive council, together with several resolutions. The committee recommend in regard to unemployment that the Federation continue its efforts to bring about a remedy for unemployment conditions and relief for those out of work. The work of the organizers was commended.

Regarding the observance of contract and the cessation of work referred to by the executive council, the committee expressed the opinion that when agreements are entered into they should be honestly observed and faithfully adhered to by all parties thereto. The committee endorsed the sentiments of the executive council on the "open shop" campaign, and urged the organized workers to strenuously resist all efforts to force "open shop" conditions by intensive organizing.

A resolution proposed that all affiliated national and international organizations be recommended to effect such changes in their constitution as may be required to permit the acceptance of

transfer, travelling or clearance cards from any other affiliated organization in lieu of an initiation fee as is now required, such acceptance to be contingent on the applicants' ability to perform the work covered by the organization in a manner to command the minimum wage provided for that class of work. The committee reported unfavourably on the ground that each organization has complete autonomy over its own members. A number of delegates spoke in opposition to the report of the committee and in favour of the resolution. On a vote the report of the committee was defeated and the resolution adopted.

Two resolutions were introduced asking that the federation take the necessary steps looking to the amalgamation of the various trades unions in order to bring about one union for each industry, the first step to be the calling of a conference of the unions in the respective industries. The committee reporting on these resolutions stated that the subject matter is already in effect through the various departments of the American Federation of Labour, and therefore recommended non-concurrence, the report of the committee being adopted without any debate.

Complaint was made in a resolution against colored boilermakers' helpers being debarred from doing certain classes of work on account of their color, and a request made that the federation make some provision for the settlement of colored helpers' grievances, and for their uniform organization. As previous conventions had dealt with this subject and had decided that if national or international unions refused to accept to membership colored workers the American Federation of Labour should organize and charter them direct, no further action was taken.

A request to have an organizer visit conventions of international organizations with a view of urging them to make it compulsory on their local branches to affiliate with city, central and state bodies was not approved, it

being believed that the result sought could be as effectively achieved by the president of the Federation through correspondence.

With a view of seeking affiliation with the federation of bodies now outside the American Federation a proposal was made that a committee of five be appointed to promote greater labour unity. The committee opposed the resolution for the reason that the ends sought could be obtained without additional expense by a president, who is, and has been, in close touch with the organizations outside the Federation and has at all times used his efforts to have them become affiliated.

A number of resolutions asking for assistance in organizing various crafts were referred to the executive council to comply so far as the funds of the federation will permit. The request for a separate organization for newswriters was referred to the International Typographical Union, the organization with which they are at present connected.

The committee recommended in favour of a resolution asking that salaried and volunteer organizers of the federation do their utmost to organize the laundry workers.

REPORT OF COMMITTEE ON LABELS.—The committee on labels reported favourably on a resolution urging the consistent use of union watermarked paper by all trade unionists and others.

A proposal was made that the American Federation of Labour should consider the advisability of issuing a universal label to be used by all crafts. The suggestion was not entertained as it interfered with the autonomy of affiliated organizations, which includes the ownership and control of their respective labels, and for other reasons was considered impracticable. The committee also referred to the benefit which would be derived from a more extensive demand for union-labeled goods and urged that preference be given to the purchase of commodities bearing the union label.

REPORT OF COMMITTEE ON LAWS.—The committee on the laws of the Federation reported favourably on the recommendation of the executive council as regards representation of local unions in central bodies, and also on changing the date of the annual convention to the first Monday in October instead of the second Monday in June as at present. Both proposals were adopted, the latter on a roll call vote of 24,308 to 5,740.

Eleven resolutions seeking to compel local unions to affiliate with central bodies in their respective localities were reported against by the committee, it being believed that the present law requiring that affiliated international organizations instruct their respective local branches to affiliate with such bodies is sufficient.

In regard to a resolution calling attention to the non-admittance of women into certain international organizations, the committee reiterated the decision of the 1921 convention on this subject and recommended that where women are refused admission to international unions having jurisdiction over the particular craft concerned, the executive council endeavour to reach an understanding with the organizations involved in order to permit of such workers being organized under federal charters issued by the federation. The report of the committee as a whole was adopted.

REPORT OF SHORTER WORKDAY COMMITTEE.—To the Shorter Workday Committee only two resolutions were referred. These, with minor amendments, were adopted. The first requested full moral and financial support to the United Textile Workers in their efforts to maintain the eight-hour day in the textile industry of New England. The remaining resolution pledged support to the international printing trades unions in their fight for the 44-hour working week.

A resolution was also presented pledging endorsement and financial as-

sistance to the United Mine Workers in the present struggle.

The Shorter Workday Committee also pointed out the benefits to be derived from the lessening of the hours of labour and commended the organizations which are at present waging fights for the shorter workday.

REPORT OF COMMITTEE ON RESOLUTIONS.—Several sections of the report of the executive council and one resolution, which were originally referred to the Committee on Resolutions, were subsequently referred to the special committee appointed to report on judicial decisions affecting labour.

A resolution was presented congratulating Alex. Howat and August Dorchy for their opposition to the Kansas industrial courts law. These men when they were indicted were members of the United Mine Workers, to which organization the committee recommended the resolution should be referred. Some objection was raised to this proposal, which was, however, adopted.

In reference to the agitation that certain persons have carried on seeking a change in the form of organization of the Federation, referred to in the report of the executive council, the committee submitted for reaffirmation the decision reached in this matter in 1901 when the principle of organization on trade lines, as far as practicable, was enunciated.

On the question of "Currency, Credits and Banking" referred to by the executive council, the committee reported on a resolution authorizing the executive council to consider the establishment of a central bank at Washington with necessary branches for the deposits of the workers. The committee recommended its reference to the executive council for study and report, and, also, recommended that the executive council give its assistance to all measures introduced in Congress which will make the postal savings bank of greater benefit to the people.

The committee reported on various other sections of the executive council, including a reference to political prisoners, in connection with which two resolutions were introduced asking for the liberation of political prisoners still held. The committee recommended that the executive council continue to give its efforts to be of practical assistance. A new trial was also endorsed for Sacco and Vanzetti, two men convicted of murder, on the ground of mistaken identity.

A resolution which met with approval was one requesting that the principle of reduction of armaments and of military force be applied not only to nations but to such forms of military organizations as are most frequently used against the workers of the United States, namely, the State constabulary and the State militia.

Prohibition of private detective agencies was approved, and on a resolution opposing the Ku-Klux Klan the committee was of opinion that it is not conducive to government by law and the maintenance of peaceful and safe conditions to have members of any organization parade the streets so disguised that their identity cannot be discovered when such disguises are adopted for the purpose of inspiring the thought or belief that the disguised individuals represent an invisible government.

The committee approved of a proposal to make Lincoln's birthday a legal holiday within the District of Columbia, the majority of the States having enacted such a law.

The railroad labour organizations in affiliation with the Federation presented a resolution expressing opposition to the Esch-Cummins law, under which the United States Railroad Labour Board was established, and calling upon Congress for its repeal. The committee recommended adoption of the proposal.

Approval was recommended of a request for the observance of Saturday half holiday in government establish-

ments and, also, of a demand for safer cars for baggagemen and express messengers, as well as a demand for an effective civil service system for United States Government employees.

Endorsement was recommended for an immediate pardon for Tom Mooney and Warren K. Billings, who are now serving sentences for complicity in the bomb outrage in San Francisco in 1916. on the ground that perjured evidence was given to secure their conviction.

The various recommendations of the Committee on Resolutions were adopted by the convention.

REPORT OF COMMITTEE ON EXECUTIVE COUNCIL'S REPORT.—The first resolution to be reported upon by the Committee on Executive Council's Report was one requesting support for a bill now before the House of Representatives designed to define the status of the members of the Russian railway service corps which was organized during the late war in order that they may secure honourable army discharges.

On the requests from the United Textile Workers and the Quarry Workers' International Unions for the levying of a one-cent assessment on the affiliated membership of the American Federation as assistance to their respective organizations, the Committee on Executive Council's report recommended, and it was approved, that the executive council be instructed to issue a general appeal for voluntary contributions for the purpose of providing funds for the organizations concerned.

Approval was given to a resolution in favour of removal of all discrimination against women as to property rights, etc., and, also, to a proposal that union men and women take a more active part in the various elections.

The convention endorsed a proposition that the arsenals, etc., which had been closed owing to the limitation of armaments should be utilized for the

manufacture of governmental supplies.

Opposition was expressed to a proposed law in Louisiana having for its object the creation of boards of arbitration to settle disputes between employers and employees.

The Committee on Executive Council's report commended the campaign carried on by the Non-Partisan Political Campaign Committee of the Federation and recommended that it continue its work. Commendation was also expressed of the action of the executive council in holding conferences with representatives of the various farmer organizations.

On recommendation of the committee the following matters were referred to the executive council for consideration: (1) Enlargement of the platform of principles, (2) old age pensions, (3) formation of a marine transport department, (4) granting of an international charter to office workers, (5) the study of the question of workmen's compensation from a national aspect.

On the recommendation of the Committee on Local and Federated Bodies there were also referred to the executive council five resolutions dealing with alleged grievances concerning freight handlers.

REPORT OF COMMITTEE ON EDUCATION.—The Committee on Education recommended a continuance of the investigation of wage theories, and also that the convention provide adequate funds for the maintenance and development of the Information and Publicity Service of the American Federation of Labour by authorizing the executive council to levy an assessment of one-half cent per capita when conditions warrant such action, and in the meantime through a vigorous campaign for voluntary contributions.

Authorization was recommended that the executive council make such arrangement as it may find practicable for the

publication of a weekly newspaper at such time as its success will be reasonably assured.

In regard to an investigation of text books and social studies, which had been made under the direction of the permanent committee on education, the Committee on Education recommended that such use be made of the report as will effectively contribute to educational progress.

A pamphlet containing the official declaration of the labour movement on education was commended as was also the co-operation of the Federation with other progressive organizations in educational and civic matters.

Recommendation was made, in accordance with the suggestion of the executive council, that the Bureau of Co-operative Societies be continued as a permanent committee of the Federation.

In reference to the proposed discontinuance of the printing of publications issued by the various departments of the United States Government, which would interfere with the usefulness of the Department of Labour, by which the "Monthly Labour Review" is issued, the executive council was instructed to oppose any such measure.

Gratification was expressed with the enactment of the farmers' co-operative marketing law which permits farmers to organize for collective marketing without making them liable for prosecution under the Sherman anti-trust law.

The committee recommended, in the interests of further cementing the friendly relationship between the Federation and the American Legion, that President Gompers be authorized to attend the next meeting of the legion to be held in New Orleans in October, 1922.

Revival of the old age pension system advocated by the Toronto convention was also approved, as was also the observance of the fourth Sunday in

May as Labour's Memorial Day as a tribute "to the memory of those whose lives have been given to the struggle for progress and freedom."

The committee approved of a resolution seeking legislation reducing the night working laws for postal employees and recommended that the executive council endeavour to secure a congressional investigation of parcel post rates for the purpose of determining a fair and reasonable rate commensurate with the cost of the service.

The executive council was instructed to investigate a report that the Harvard University authorities contemplate placing a restriction upon admission to that university based on religious and racial lines; and endorsement was extended to the workers' educational campaign now carried on by a number of labour bodies.

The committee recommended that the executive council be authorized to have an investigation made of the reportorial and news policy of the Federated Press, a labour news agency, which, it is alleged, is pursuing a policy of undermining the trade union movement.

The committee also reported on a number of other matters in regard to education, including the organization of teachers and vocational rehabilitation. All of the recommendations of the Committee on Education were adopted.

Election of Officers

The election of officers, which took place on the eleventh day of the convention, resulted in the re-election of the former office-holders, as follows: President, Samuel Gompers; first vice-president, James Duncan; second vice-president, Joseph F. Valentine; third vice-president, Frank Duffy; fourth vice-president, Wm. Green; fifth vice-president, W. D. Mahon; sixth vice-president, T. A. Rickert; seventh vice-president, Jacob Fischer; eighth vice-president, Matthew Woll; treasurer,

David J. Tobin; secretary, Frank Morrison.

Owing to the change in the date of annual conventions it was necessary to elect fraternal delegates for both 1922 and 1923. As fraternal delegate to the Trades and Labour Congress of Canada for 1922 Wm. E. Hulsbeck, of the Kentucky State Federation of Labour, was elected, and for 1923 Walter N. Reddick,

president of the International Brotherhood of Bookbinders, was chosen. As fraternal delegates to the British Trades Union Congress for 1922 Benjamin Schlesinger and Edward J. McGivern were named, and for 1923 Peter Shaughnessy and Anthony J. Chlopek were elected.

Portland, Ore., was chosen as the convention city for 1923.

SPECIAL CONVENTION, DISTRICT 26, UNITED MINE WORKERS OF AMERICA

A special convention of District 26, United Mine Workers of America, was held at Truro, N.S., in June, about 120 delegates attending, the President, Mr. Robert Baxter, being in the chair.

The report of the policy committee, which was adopted in full, contained a clause which was quoted in the press as follows: "That we proclaim openly to all the world, that we are out for the complete overthrow of the capitalistic system and the capitalistic state, peaceably if we may, forcibly if we must, and we call on all workers, soldiers and minor law officers of Canada, to join us in liberating labour." Another clause of the policy report, which the president criticized as being an endorsement of the One Big Union principle, was to the effect that District 26 should hold out its hand to all labour organizations in Canada for the purpose of agreeing upon a common policy for their protection and to reach an agreement for the working out of such a policy. A section of the clause read, "such agreement to cover joint action, such action to be taken to secure for the workers a living, and the action to be taken with or without the consent of the Government." With respect to the recent award of the Board of Conciliation appointed to deal with the wages dispute in the District, known as the "Scott Award", the policy committee recommended its rejection and added,

"No contract shall be signed by the officers of this District which does not carry with it the wage rates that prevailed in 1921."

The convention decided to send a delegate to District 18 to take up with the miners there the question of sending a delegate from Canada ^{to} the Third Internationale at Moscow to negotiate on the matter of affiliation with that organization. A resolution was adopted urging organized labour throughout Canada to demand that the federal government arrange a loan of \$15,000,000 to Russia.

Resolutions were adopted asking that amendments be made to the compensation Act to provide for an increase in the amount of compensation from 55 per cent to 75 per cent, and that a minimum of \$15 per week be allowed, as well as \$15 per week for each additional child under the age of 16 years, irrespective of the number; to make it possible for legal action to be taken by heirs of men killed while in the employ of corporations; and to provide compensation to men who suffer loss of time through frost bites while employed in mines. A resolution was adopted calling for all mining inspectors to be elected by the miners of the district and paid by the provincial government. Another resolution was adopted urging the federal government to adopt legis-

lation for old age pensions and also one asking for a sick benefit fund.] The convention also endorsed a resolution from the mechanics' local at Glace Bay demanding recognition of the local by the Dominion Coal Company, with the check-off, eight-hour day and double time for legal holidays. It was also decided that the district executive should endeavour to secure a settlement of a claim of two fathers whose sons were killed by falling through an unused shaft at Sydney Mines. Resolutions requesting a covering for the bankhead at No. 16 colliery and a new bankhead at No. 4 colliery were adopted, as was also a resolution demanding a return to the condition which gave to a machine runner the care of four rooms. A protest was made against the alleged employment of small boys as drivers in pits in the Phalen seam. The district officers were instructed to open negotiations with the federal government and the management of the Canadian National Railways in an effort to have the Jubilee mine supply a large portion of the coal required by the government

railways.. It was decided to write off the loans made to various locals for the relief of unemployment, the total of which was \$36,489.

Some changes were made in the constitution among which was one with respect to voting power on the executive board. Under this new section the president, vice-president and secretary-treasurer will have one vote each while the district board members will vote in accordance with the number of miners they represent, the unit being 500. Candidates for office in future elections will be allowed to appoint agents for the various polls in accordance with the procedure of provincial and federal elections.]

The entire executive board of the District resigned following a vote of censure upon certain of the officers for the way they had conducted wage negotiations in February last in connection with the "Montreal Agreement". It was expected that an election would take place shortly after the close of the convention.

TRIENNIAL CONVENTION OF THE BROTHERHOOD OF RAILROAD TRAINMEN

THE third triennial convention of the Brotherhood of Railroad Trainmen was held at Toronto, Ont., from May 9 to June 7 with the president, Mr. W. G. Lee, of Cleveland, Ohio, in the chair. Twenty-seven officers and 936 delegates, including one from Newfoundland, were present at the opening. Among those who addressed the convention were the Honourable James Murdock, Minister of Labour of Canada, and a former vice-president of the Brotherhood; Mr. Ben Hooper, chairman of the United States Railroad Labour Board, who explained the Railroad Reorganization Act of 1920; Mr. H. A. Adams, head of the safety-first organization of the Union Pacific Railroad; and Mr. H. A. Rowe, of the National Safety-First Council of Chicago.

The membership of the Brotherhood was reported to be 175,000 as against 199,998 in 1920, the decline being attributed to the cancellation of the charters of several branches which had taken part in the strike of the yardmen at Chicago in 1920 which was not officially ordered by the Brotherhood. Members reported to have held membership continuously for twenty-five years numbered 4,124. There were 113 lodges in the Dominion of Canada.

The report of the secretary-treasurer, Mr. A. E. King, showed that receipts for the triennial period amounted to \$23,269,365 and disbursements to \$15,600,651. The balance on hand was \$7,940,374. Expenditures included 6,835 death and disability claims amounting

to \$10,238,845; and \$775,000 for the erection of an office building at Mount Morris, Illinois, in 1921. Total death and disability claims paid since the organization of the Brotherhood in 1883, numbered 40,530, and amounted to \$52,-908,907. Since August, 1895, a further \$9,760,000 has been paid out to incapacitated members who had no claim under the regular death and disability pensions. Because of war service 344 death claims and 39 disability claims were paid which amounted to \$558,250 for United States soldiers and \$273,350 for Canadian soldiers. The sum of \$246,448,600 represents the amount of insurance in force in the United States and Canada. The profits of the official publication, "The Railroad Trainman," for the past six years amounted to \$281,-483. Reports of the executive board showed that the Brotherhood has \$5,153,-509 invested in bonds, of which \$3,826,-411 is invested in the United States and \$1,327,097 in Canada.

The convention decided to create a fund to take care of tubercular members. This fund will be maintained by a monthly assessment of 25 cents on members commencing September 1, 1922. Members will be entitled to the protection of the fund from January 1, 1923. The president, secretary and treasurer will investigate the sanitariums to which tubercular members may be sent and claims for assistance will be passed on by the beneficiary board. When a \$1,000,000 fund has been obtained above the estimated requirements for one year, a committee will be appointed to arrange for the construction of a sanitarium. It is specifically stated that the rights of Canadian members are to be fully safeguarded. Whenever they desire to build a sanitarium of their own or formulate some plan to meet the situation they will be entitled to a pro rata refund of assessments. The convention also decided to establish a pension fund, plans for which will be prepared by a special committee and submitted to the various lodges for consideration before being ratified at the next triennial convention; Mr. J. L. Blair of Truro, N.S., was

chosen as Canadian representative on the committee. Changes in insurance benefits, both for death and disability, were approved, increases being made in several classes without an increase in the premium. The convention decided that total and permanent disability rates will be paid for the loss of one eye by a member of the Brotherhood.

A plan was adopted providing for the creation of a permanent committee, the chief function of which will be devoted to hearing and adjusting appeals of members from decisions of lodges and executive officers. Among those elected to the committee of appeals was Mr. W. J. Goodfellow of Hamilton, Ontario. The delegates protested against the action of railways in Canada and the United States in promoting men during the taking of a strike vote, and it was decided that if members of the Brotherhood accept official positions pending the taking of a strike ballot their membership should be cancelled. President Lee was empowered to take the necessary steps towards bringing about an amalgamation of the Switchmen's Union with the Brotherhood. A complaint from certain employees against being compelled to ride on the top of freight trains was endorsed and the matter ordered to be brought to the attention of the Interstate Commerce Commission. A resolution was adopted protesting against the alleged encouragement by the governments of Canada and the United States and by transportation companies of immigration from foreign countries, particularly the Asiatic countries. Another resolution was endorsed favouring the adoption by the Brotherhood of a broader political policy and a more active participation in political discussion. The convention also by resolution declared itself emphatically against any further reductions in wages or the elimination of time and one-half for overtime. A protest against the action of the Central Railroad of New Jersey in refusing to comply with the decision of the United States Railroad Labour Board, under which it

should pay approximately \$75,000 awarded to trainmen by the Board, was referred to President Lee with instructions to secure payment of the amount. Resolutions also were passed dealing with the conditions under which trainmen are compelled to work and it was decided to ask the Governments to enact legislation to reduce the hazards. Some of the resolutions presented to the convention dealt with: The necessity for additional safety inspectors to educate employees to take proper care of themselves while at work; for increase in the number of safety appliance inspectors; against riding on heavy grades on the Canadian Pacific railway; for co-operation in banking and the establishment of co-operative banks in all the principal railway centres of the United States and Canada; for a standard brake staff and dog; for the proper checking up of subordinate lodge officers; for the re-arrangement of seniority regulations; for the elimination of the handling of excessive parcel post mail by baggage masters; for preference rights of members of the Brotherhood over non-members; and against the use of auto trucks, especially in California, where they are operated without their owners having to maintain their right of way, and at lower rates of wages than paid

on the railroads. Recommendations of a committee favouring the appointment of two additional vice-presidents was approved. The Grand Lodge staff will include a president, an assistant president, ten vice-presidents, general secretary and treasurer, editor and manager, board of trustees, executive board and board of insurance.

Mr. W. G. Lee was re-elected president of the Brotherhood; Mr. W. N. Doak was elected senior vice-president. Mr. T. R. Dodge, assistant to the president; Mr. A. E. King, general secretary-treasurer, and Mr. Daniel L. Cease, editor and manager, were re-elected by acclamation. The Canadian delegates named Mr. A. McGovern, of Toronto, Ontario, as Canadian vice-president in place of the Honourable James Murdock who vacated the office on his appointment as Minister of Labour in the Canadian Government. Mr. H. Walters, of Brockville, was elected to the Executive; Mr. James Conley, of Ottawa, to the Board of Trustees, and Mr. J. Bryan, of Toronto, to the Insurance Committee.

The Women's Auxiliary of the Brotherhood also held sessions during the convention, at which there were present 750 delegates.

BIENNIAL CONVENTION OF INTERNATIONAL LADIES' GARMENT WORKERS

THE sixteenth biennial convention of the International Ladies' Garment Workers' Union was held at Cleveland, Ohio, on May 1 to 13. There were present 233 delegates representing a paid up membership of 93,800. The international president, Mr. Benjamin Schlesinger was chairman. Among the speakers were Mr. Samuel Gompers and Mr. Warren S. Stone, president of the Brotherhood of Locomotive Engineers.

Included in the larger expenditures of the Union during the two year period were donations amounting to \$75,000

to other organizations and \$26,000 to famine sufferers in Russia; \$27,000 by its educational department and \$57,000 by its press department. Figures for 1922 show that there are 2,800 students attending the educational courses in New York city.

The convention decided to levy a \$4 assessment upon each member of the International—\$3 to cover a deficit of the International office and \$1 for organization work—the assessment to be collected within one year. A proposal was made by the Hat and Cap Makers

International Union for the revival of the Needle Trade Alliance, a federation of clothing workers unions which was organized in New York at the close of 1920 but which subsequently broke down owing to the fact that the varied affiliations of the trade organizations concerned in the Alliance made close co-operation difficult to continue. A resolution, however, dealing with the organization of a needle trades department in the American Federation of Labour was sympathetically received, but as the Amalgamated Clothing Workers of America is not affiliated with the American Federation of Labour, and might not come into that needle trades department, it was felt that it would not be advisable to have such a department.

A resolution was adopted calling upon the Russian Soviet government immediately to restore the freedom of the press and of association, to liberate all men and women held solely for their opinions and for political activities, and to grant a fair and open trial for those political prisoners now held for trial in Moscow.

The convention approved the work of the Brookwood Workers' College "as an institution founded with a clear aim and purpose to aid the labour movement in fitting out men and women in leadership" and recommending it to the executive board for financial support. The convention adopted recommendations to increase the budget of the educational department from \$15,000 to \$17,500 annually, the increase to be devoted to the educational needs of local unions outside of New York city; to increase the educational activities by lectures, forums and classes and also to increase the social and recreational activities; to urge upon the American Federation of La-

bour at its convention the need for an educational campaign among the trade unions for labour education and for labour colleges under trade union auspices as it was felt that leadership for the labour movement must come from the ranks of labour.

Among other resolutions the convention approved of a 40-hour week and week-work for workers in the ladies' garment industry.

The executive board in reviewing the problems and events of the past year, considered the matter of unemployment insurance. Government systems are not favoured and official action for the relief of unemployed was declared to be "out of the question at this time". It would also be impracticable, the report stated, to consider any system on the basis of joint contributions of employer and employed, as this would involve joint administration and would be a source of constant irritation. "Provision against unemployment must be made directly by the International Ladies' Garment Workers Union. It is an important and complicated undertaking and may involve a radical change in the prevailing system of dues payment by the members. In all likelihood it would be found most practical to do away with the present system of uniform dues, and to substitute for it contributions proportionate to the earnings of the members, something in the nature of an income tax, a system which may seem more burdensome for the members at the first glance, but which may prove of inestimable benefit to them in the long run".

Mr. Benjamin Schlesinger, Mr. Salvatore Ninfo and Mr. Abraham Baroff were all re-elected as president, vice-president and secretary, respectively.

ORDER IN COUNCIL RESPECTING DRAFT CONVENTIONS AND RECOMMENDATIONS OF THE THIRD INTERNATIONAL LABOUR CONFERENCE

AN order-in-council has been passed on the recommendation of the Minister of Justice of Canada dealing with the questions of legislative competence involved in the seven Draft Conventions and eight Recommendations of the Third International Labour Conference (1921) as between the Federal and Provincial authorities in Canada. Under the terms of the Treaty of Versailles and of the other Peace Treaties, it is required that each of the member states shall within a period of one year at most from the closing of the session of the Conference, or if it is impossible owing to exceptional circumstances to do so within a period of one year then at the earliest practicable moment and in any case not later than eighteen months from the closing of the Conference, "bring the Recommendations or Draft Conventions before the authority or authorities within whose competence the matter lies, for the enactment of legislation or other action." As will be seen from the text of the order-in-council which is published herewith, most of the proposals which emanated from the Third International Labour Conference are regarded as falling within provincial jurisdiction. The text of the order-in-council, together with the authentic text of the Draft Conventions and Recommendations referred to (which text was reproduced in the LABOUR GAZETTE, January, 1922), have been transmitted to the respective provincial authorities. The proposals which have been found to come within Federal competence are also receiving attention at the hands of the proper authorities.

The following is the text of the order-in-council of June 27, 1922, in the above matter:—

The Committee of the Privy Council have had before them a report, dated 24th June, 1922, from the Minister of Justice, stating that he has had under consideration, upon the request of the Department of Labour, the several

draft conventions and recommendations which were adopted by the International Labour Conference as its third session, Geneva, 25th October—19th November, 1921, authentic copies of which were lately received by the Government from the Secretary General of the League of Nations pursuant to the provisions of Article 405 of the Labour Part of the Treaty of Versailles and of the analogous provision of the other peace treaties, with relation to the question whether the proposals of these conventions and recommendations are to be regarded as within Dominion or provincial legislative competence.

The Minister observes that the treaty engagement of the Dominion Government in relation to these draft conventions and recommendations was stated, on the report of the then Minister of Justice, in Order in Council of the 6th November, 1920 (P. C. 2722), to be in the nature of an undertaking on the part of the Dominion Government as a member of the International Labour Conference, within the period of one year at most from the closing of the session of the Conference, or if it is impossible owing to exceptional circumstances to do so within a period of one year, then at the earliest practicable moment and in any case not later than eighteen months from the closing of the Conference "to bring the recommendations or draft conventions before the authority or authorities within whose competence the matter lies for the enactment of legislation or other action." Hence, the Government's obligation will, in the opinion of the Minister, be fully carried out if the different conventions and recommendations are brought before the competent authority, Dominion or provincial, accordingly as it may appear, having regard to the true nature and character of the legislation required to give effect to the proposals of the conventions and recommendations respectively, that they fall within the legislative competence of the one or the other.

The said draft conventions and recommendations may be conveniently considered in the order in which they appear in the printed text:

1. *Recommendation concerning the prevention of unemployment in agriculture.*

This recommendation consists of a general proposal that each member of the International Labour Organization should consider measures for the prevention of or providing against unemployment amongst agricultural workers suitable to the economic agricultural conditions of its country, and that it should examine particularly from this point of view the advisability of taking such action as may be necessary

to give effect to a number of proposals set forth in clauses enumerated 1 to 6 in the said recommendation.

The Minister observes preliminarily that it would seem practicable to utilize the existing Dominion-Provincial employment service, which has been co-ordinated on a national basis under the provisions of the Employment Offices Co-Ordination Act (chap. 21 of the Statutes of Canada, 1918, as amended by Chap. 25 of the Statutes of 1920) and the regulations made thereunder, so far as this service can be organized or adapted to the purpose, to promote or carry out the general object of this recommendation.

Legislation, so far as necessary to give effect to the enumerated proposals, would be competent, in the opinion of the Minister, both to the provincial legislatures and the Parliament of Canada, under the authority conferred by sec. 95 of the British North America Act, 1867, in relation to "agriculture", though the legislation of the provinces would have effect as long and as far only as it is not repugnant to any Dominion Act. Since Confederation, however, matters concerning agriculture have been generally treated, as between the Dominion and the provinces, as being matters of a merely local or private nature in the provinces; and unemployment amongst agricultural workers is essentially a local problem in the provinces. The Minister, therefore, considers that the enumerated subjects, on the whole, are proper subjects for provincial rather than federal action, except in the several respects herein-after mentioned:

The Dominion is the proper authority to carry out the proposals contained in paragraphs 1 and 3 of the recommendation, in relation to Dominion Lands.

The provision of transport facilities with a view to rendering work of a temporary nature in one or more provinces accessible to unemployed agricultural workers in other provinces, in accordance with the proposal contained in par. 4, seems to be a matter which possibly might be regulated by the Dominion, but nevertheless is capable of sanction by joint action of the provinces.

In regard to the proposal mentioned in par. 6 it may be observed that the Province of Ontario has already enacted advanced legislation along the lines desired. (See The Agricultural Development Finance Act, 1921; The Agricultural Development Act, 1921, and The Ontario Farm Loans Act, 1921, Chap. 31, 32, 33, respectively, of the Statutes of Ontario, 1921.)

The periodical report called for by Article II of the recommendation should be transmitted by the Dominion after communication with the various provinces in regard to action taken upon the proposals which are within their competence.

The Minister is of the opinion that the proposals of—

2. *Recommendation concerning the protection, before and after childbirth, of women wage-earners in agriculture;*
3. *Recommendation concerning night work of women in agriculture;*
4. *Draft convention concerning the age for admission of children to employment in agriculture;*
5. *Recommendation concerning night work of children and young persons in agriculture,*

so far as legislation is necessary to give effect to them, engage the concurrent legislative power of Parliament and the legislatures in relation to "agriculture," but that they touch subjects of a character proper to be dealt with by the legislatures alone.

The following recommendations and conventions may be considered together:—

6. *Recommendation concerning the development of technical agricultural education;*
7. *Recommendation concerning living-in conditions of agricultural workers;*
8. *Draft convention concerning the rights of association and combination of agricultural workers;*
9. *Draft convention concerning workmen's compensation in agriculture;*
10. *Recommendation concerning social insurance in agriculture.*

The proposals of these recommendations and draft conventions appear to fall strictly within the sphere of provincial legislative authority, except in the several respects mentioned below:

As to the recommendation referred to in par. No. 6: The general subject of education, including vocational education for agricultural workers, belongs to provincial jurisdiction, and this is impliedly recognized by the provisions of the Agricultural Instruction Act (chap. 5 of the Statutes of Canada, 1913) whereby provision is made for an annual grant of a substantial sum of money for the purpose of aiding and advancing the farming industry by instruction in agriculture. The said sum is apportioned among the veterinary colleges established in the provinces and amongst the several provincial governments, upon a defined basis.

The report required to be made to the International Labour Office, as to the administration of the laws, the moneys expended, and the measures taken in order to develop vocational agricultural education, should be made by the Dominion Government after communication with the various provinces for information upon these points.

As to the recommendation referred to in par. No. 7: Parliament alone is competent to give effect to the proposals of this recommendation in regard to the agricultural workers in the service of the Dominion Government, but the provincial legislatures otherwise have the power to give effect to these proposals generally and comprehensively.

As to the draft convention referred to in par. No. 8: Agricultural workers, so far as existing Dominion legislation is concerned, would seem to have the same rights of association and combination as other workers. These rights are subject to a limitation or restriction only at the point where their exercise involves a contravention of the provisions of the Criminal Code. Probably these rights of association and combination do not extend to agricultural workers in the service of the Crown as represented by the Dominion.

As to the draft convention referred to in par. No. 9: The provinces have no authority to extend the provisions of the provincial workmen's compensation laws and regulations to agricultural workers in the service of the Crown as represented by the Dominion. So far as these employees are concerned, they are entitled to the benefits provided by chap. 15 of the Statutes of Canada, 1918, entitled "An Act to provide compensation where employees of His Majesty are killed or suffer injuries while performing their duties," as amended by chap. 14 of the Statutes of Canada, 1919.

The draft recommendation referred to in par. No. 10 has no application to the Dominion, as there are no federal insurance laws for the protection of agricultural wage-earners, as such, against sickness, invalidity, old age, and other similar social risks.

11. *Draft convention concerning the use of white lead in painting.*

The provisions of this convention contemplate the prohibition of the use of white lead and sulphate of white lead and all products containing these pigments, in the internal painting of buildings, subject to certain enumerated exceptions and qualifying provisions which make it apparent that this draft convention is directed, on the whole, at the regulation rather than the absolute prohibition of the use of white lead and sulphate of lead and of all products containing these pigments. The Minister, consequently, considers that such legislation as may be necessary to give effect to its proposals is within the competence of the provisional legislatures.

The following draft convention and recommendation may be considered together:—

12. *Draft convention concerning the application of the weekly rest in industrial undertakings;*

13. *Recommendation concerning the application of weekly rest in commercial establishments.*

The proposals of this draft convention and recommendation contemplate securing to persons employed in industrial undertakings, as defined, and in commercial establishments, public or private, in every period of seven days, a period of rest comprising at least twenty-four consecutive hours, to be fixed so as to coincide with the days already established by the traditions or customs of the country or district. There are qualifying provisions. The definition of "industrial undertaking" in the draft convention is subject to the special national exceptions contained in the Washington Convention limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week, so far as such exceptions are applicable, and, where necessary, the competent authority may define the line of division which separates industry from commerce and agriculture.

The competent authority may also authorize total or partial exceptions (including suspensions or diminutions) from the provision for the weekly rest period.

So far as Canada is concerned, the draft convention and recommendation look to securing the twenty-four hour rest period on the Lord's Day, which is customarily, and by law required to be, observed throughout the Dominion as a day of rest, and, therefore, they involve legislation relating to criminal law, which is a subject within the exclusive legislative authority of the Parliament of Canada. The Lord's Day Act (R. S. C. chap. 153) contains the existing legislation on this subject.

The proposals of the draft convention fixing the minimum age for the admission of young persons to employment as trimmers or stokers, and the draft convention concerning the compulsory medical examination of children and young persons employed at sea, involve legislation which is competent to the Parliament of Canada alone, under the head of "navigation and shipping," ss. 10, sec. 91 of the British North America Act, 1867.

The report which is required by Article 405 of the Treaty of Versailles and the analogous provision of the other Peace Treaties, to be transmitted by each member of the International Labour Conference to the Secretary General of the League of Nations of the action taken to give effect to each recommendation and draft convention, should be transmitted by the Dominion after communication with the various provinces for information as to the legislation or other action taken towards making effective the provisions of the draft conventions and recommendations which are within the provincial rather than the federal domain of government.

The Minister, therefore, recommends that a copy hereof, together with authenticated copies of the draft conventions and recommendations, be transmitted to the different Lieutenant-Governors for the consideration of their respective Governments, with a view to such legislative or other action in line with the proposals of such of the draft conventions

and recommendations as are within the provincial sphere, as each Government may be advised to take.

The Committee concur in the foregoing and submit the same for Your Excellency's approval.

RODOLPHE BOUDREAU,
Clerk of the Privy Council.

ACTION OF THE ECONOMIC CONFERENCE OF GENOA ON LABOUR MATTERS

THE international conference which held its sittings at Genoa during the months of April and May for the purpose of considering questions bearing on the economic reconstruction of Europe gave consideration also to various labour problems. A number of documents from trade unions and co-operative organizations were submitted to the conference through the International Labour Office of the League of Nations, which was represented by a delegation specially appointed for the purpose at the Twelfth Session of the Governing Body. These documents included: (1) A manifesto of the International Federation of Trade Unions; (2) A resolution of the International Co-operative Alliance passed at the Milan Congress on April 9, and transmitted to the Director of the International Labour Office; (3) A resolution of the International Federation of Co-operative Societies (Christian organizations).

An Economic Commission was appointed by the conference, and this commission appointed a sub-committee of experts to consider labour questions. The members of this sub-committee were from the following countries: Belgium, France, Great Britain, Italy, Japan, Germany, Netherlands, Norway, Switzerland and Poland.

At the first meeting of this sub-committee a discussion took place on a resolution which had been introduced by the German representative at a meeting of the Economic Commission with regard to economic reconstruction and

labour. After various resolutions on this subject had been proposed an article was finally drafted and submitted to the Economic Commission which further amended it. The complete article as finally adopted by the plenary economic commission ran as follows:

The economic reconstruction of Europe requires intensified production, which depends essentially on labour. The greatest importance should be attached to the assistance which the workers, men and women, of the whole world and their associations are willing and able to give, in association with other elements of production, to the economic restoration of Europe. In order to obtain the fullest effort on the part of the workers, and in order to avoid regrettable competition between nations, the attention of all states is drawn to the importance of the conventions and recommendations adopted by the International Labour Conference, it being understood that each state reserves its right with regard to the ratification of any one or more of the conventions.

The subject of unemployment was discussed at some length by the Economic Commission. After various draft resolutions had been considered the following articles on unemployment were finally adopted:

Article 22

The present economic crisis, which affects not only production but also the consuming capacity of the people, weighs heavily on the workers, both morally and materially.

While it may be true that measures of economic reconstruction are alone capable of remedying this crisis, direct measures to deal with the resulting unemployment appear to be none the less efficacious for ensuring sustained effort and efficiency on the part of the workers.

Article 23

In consequence, and in addition to any arrangements providing insurance or assistance against unemployment, the following measures are recommended:

(a) The systematic distribution of all labour available by the national organization of employment agencies and by the international co-ordination, by means of agreements between the countries concerned, of such agencies (Emigration and immigration).

(b) In countries in which conditions permit, the placing in agriculture of as large a number as possible of such of the unemployed in industry as are capable of being employed in agricultural work.

(c) The systematic allocation of public contracts with reference to the occurrence of unemployment and to the trades and districts affected, so far as may be consistent with the general interest.

(d) Development of public works in aid of unemployment, provided that they are useful and productive.

Article 24

In order to accelerate the effects of the measures set out in Article 23:

(1) It is recommended that all states which are members of the International Labour Organization should ratify the convention relating to unemployment adopted by the Washington Conference, and that all the states should take into consideration the measures against unemployment envisaged by that conference.

(2) It is suggested that the International Labour Office should collect and publish periodically all information available on the

experience gained by the different countries in dealing with unemployment.

(3) It is further recommended that all the states should co-operate in the enquiry relating to unemployment decided upon by the International Labour Conference of 1921.

With regard to Co-operation, the sub-committee of experts on labour questions submitted the following resolution:

In order to facilitate exchange of commodities between nations especially in the case of foodstuffs, and in order to develop the spirit of solidarity and mutual aid, it is recommended that the services of the co-operative organizations should be utilized.

This, however, was rejected by the commission by six votes to four.

With regard to a memorandum addressed to the Conference by the International Federation of Trade Unions, the following resolution was adopted:

The conference notes that the trade unions are prepared to co-operate in the work which has been taken in hand at Genoa, and would mention that certain suggestions put forward by them have been discussed and that such solutions have been adopted as were possible in the circumstances.

The report of the Economic Commission, Articles 21 to 24 of which included the resolutions on labour, was submitted to the last plenary session of the Genoa conference on May 19. The report was adopted with certain reservations made by the Russian delegation.

RECENT LABOUR LEGISLATION OF CANADA, AND OF THE PROVINCES OF ONTARIO AND ALBERTA.

THE present article is a summary of the various laws and resolutions bearing directly or indirectly on labour matters which were passed at the recent sessions of the Parliament of Canada and the legislatures of Ontario and Alberta; relevant orders in council are also noted. Similar articles with respect to the late sessions of the legislatures of Saskatchewan, Quebec and Manitoba appeared in the LABOUR GAZETTE issues of March, April and May, 1922, respectively. The British Columbia legislature has held no

session during the present year, having held an extra session in the fall of 1921, the proceedings of which were summarized in the January, 1922, issue of the LABOUR GAZETTE.

Canada

The first session of the fourteenth Parliament of Canada opened on March 8, and continued until prorogation on June 28. The Speech from the Throne on the conclusion of the session referred as follows to unemployment and

the measures which were being taken to prevent its recurrence: "It is gratifying to observe that the depression of business is gradually becoming relieved, and that unemployment throughout the Dominion has correspondingly decreased. The conference being arranged between the federal and provincial authorities will, it is hoped, disclose means of more effectively dealing with problems incidental to unemployment, whenever and wherever they may arise." On April 24, the House of Commons adopted the following resolution on the same subject: "That, in the opinion of this House, in view of the widespread unemployment with which the municipalities and provinces find themselves unable to cope it is desirable that the federal government should devise some means of dealing effectively with the situation."

The Prime Minister, on June 24, laid on the table the draft conventions and recommendations filed at the third session of the International Labour Conference held at Geneva on October 25, 1921.

The House of Commons on May 1, adopted a resolution that "in the opinion of this House the Federal Government should consider the advisability of devising ways and means for the establishment of a system of old age pensions in Canada."

A motion made on May 3 favouring compensation for occupational diseases was withdrawn when the Prime Minister pointed out that the subject of workmen's compensation falls within the sphere of provincial legislation, except as concerns employees of the Dominion Government.

On May 8 a resolution was passed by the House to the effect that the immigration of oriental aliens and their rapid multiplication is becoming a serious menace to living conditions, particularly on the Pacific Coast, and to the future of the country in general, and that the Government should take

immediate action with a view to securing the effective restriction of future immigration of this type.

Among the measures passed during the session was an act to incorporate the Frontier College, with headquarters in Toronto. The objects of this institution are to promote education among Canadian working men and women and Canadian immigrants, and to promote higher educational training and instruction for teachers and social workers among Canadian working men and women and Canadian immigrants. The College is authorized to conduct classes and construct suitable buildings wherever required, "as for instance in, or in the vicinity of, factories, industrial plants, mining camps, lumber camps, railway camps, extra gangs, and all communities of workers engaged in construction, industrial, agrarian and other labouring pursuits." It may confer degrees and may affiliate with any other college or university. No religious tests are permitted.

The Public Service Retirement Act, commonly known as the Calder Act, which was extended in 1921 to cover weekly wage earners as well as those on a stated annual salary, was further extended to include persons working by the hour. The duration of the Act was extended for a further period of one year.

The Dominion Elections Act was amended, the section of the Act of 1920 which detailed certain qualifications of electors with respect to allegiance, nationality and naturalization being repealed, and a new provision being made to the effect that change of residence prior to a general election shall not disqualify an elector from voting.

The Pension Act of 1919, which provides pensions to, or in respect of members of the Canadian army, navy or air force, was amended by including the provision of a pension for a widowed mother, this term to include, at the discretion of the Pensions Board, a mother

deserted by her husband, when the circumstances are such as would entitle her to a pension. The provisions of the Returned Soldiers Insurance Act were amended in respect to certain limits of benefits payable to the wife or children when death of insured is due to the war. Pensions granted to former soldiers under any pension law of the United Kingdom, or any British Dominion, or of any of the Allied Powers, are, by another amendment, to be taken into account in the payment of death benefits under the latter act on the same terms as pensions under the Pensions Act of Canada.

An amendment to the Criminal Code made more explicit that section which prohibits the advertising or printing of offers or inducements to bet, a revised sub-section prohibiting offers or inducements to bet on, guess, or foretell the result of any contest.

Ships registered in Canada as engaged exclusively in fishing were, by an amendment to the Canada Shipping Act (Pilotage) added to the list of classes of vessels which are exempted from the compulsory payment of pilotage dues.

Under the Canada Shipping Act of 1906, revised instructions as to the inspection of boilers and machinery of steamships were issued in June, on the recommendation of the Minister of Marine and Fisheries, and published as a supplement to the *Canada Gazette*, June 17, 1922. The regulations previously existing are declared to be out of date in regard to the finding of the working pressure of boilers. The new regulations are in seven parts, of which Parts II to VI governing marine boilers and steam pipes are based on the standard rules adopted by the Imperial Board of Trade and the classification societies (Lloyd's, British Corporation, and Bureau Veritas). Part I contains general instructions in regard to inspection, and Part VII deals with internal combustion engines. Parts I to V

of the Rules for the Inspection of Steamboats and for the Examination of Engineers of steamboats, as approved by an Order-in-Council issued in December, 1904, are cancelled by the new order.

An Order-in-Council issued at Ottawa on March 29, 1922, (P. C. 696) amending the British Columbia Fishery Regulations, provides that "no one shall engage in salmon fishing, nor shall anyone leave any port or place in Canada to fish for salmon, either inside or outside territorial waters of Canada, excepting under license from the Minister of Marine and Fisheries." This order is stated to be necessary as "the Minister of Marine and Fisheries is informed that a movement is on foot in British Columbia for certain fishermen to undertake to fish beyond territorial waters in defiance of the license requirement."

Another Order-in-Council (P. C. 671) dated March 27, affects workers in the herring-packing industry on the Atlantic Coast. This order forbids the practice reputed to prevail on certain parts of the coast, whereby those who cure and pack herring for sale make use of salt which has been already used for curing cod on vessels engaged in the bank fishery. Many complaints as to the poor quality of the product were said to have resulted owing to this practice.

Ontario

The Ontario Legislature was in session from February 14 to June 13, when many social measures were passed, several of special interest to labour. One of the most important of these was the Act to amend the Minimum Wage Act in conformity with the acts in force in other provinces, by enlarging the powers of the Board to fix the working hours as well as the minimum wages of female employees. In presenting the bill the Minister of Labour stated that the Minimum Wage Board had experienced difficulty in securing the intended effect of its orders owing to a

tendency on the part of employers to extend the working hours when the minimum wage was fixed. He claimed it was unfair to fix the same minimum whether the working week was one of 35 or 59 hours. The amending act gives the Board all the powers that may be conferred upon a commission under the Public Inquiries Act, with regard to the fixing of maximum hours as well as of minimum wages. After due inquiry the Board may establish a minimum wage and the maximum number of hours per week for which such minimum wage shall be paid; also a rate of wages for all time worked in excess of the established maximum number of hours per week.

Another measure affecting hours of labour was the Act to Promote the Public Health by providing for one day of rest in seven for employees in certain employments, which will take effect on August 1 in cities and towns with over 10,000 population. Twenty-four consecutive hours of rest in every seven days, on a Sunday if possible, must be allowed for all workers in hotels, restaurants and cafes, with the exception of watchmen, janitors, superintendents or foremen, employees of a class where there are not more than two employed, and employees who are not employed for more than five hours in any one day. Nothing in the act, however, authorizes any Sunday work now prohibited by law. Penalties up to \$100 are provided for contraventions of the Act.

The Workmen's Compensation Act was amended, a subsection being added to section 8, which deals with dependents not resident in Ontario, at the time of an accident to a workman, to the effect that a railwayman's dependents who, in consequence of the workman's duties may have ceased to be residents of Ontario, shall nevertheless be entitled if they later return to reside in Ontario to compensation in respect to an accident occurring in Ontario on the same terms as though they had been residents at the time of the acci-

dent; this amendment applies to all pension payments to dependents accruing after the date of the enactment whether the accident happened before or after that date, but does not entitle any person to claim additional compensation for any period prior to its coming into force. The scale of compensation was revised in respect to cases where the dependents are a widow or an invalid husband and one or more children, the provision being added that if the widow or invalid husband dies, the previous allowance of \$10 for each child under 16 years of age shall be raised to \$15. A separate bill to make more definite the system of "merit rating" of employers, under which deductions are made from their assessments in proportion to their immunity from accidents, was introduced but was not passed by the House.

Under an Act respecting Works and Measures to relieve Unemployment, municipal councils are given authority, without the assent of the electors, to borrow money by the issue of debentures to meet expenditures on relief work not otherwise payable by debentures. Such debentures may be sufficient to meet the normal cost of the work and the excess over the normal cost. Authority is also given to municipal councils which have distributed unemployment relief under orders-in-council issued in January and February of this year, or during 1921, to issue debentures to meet such expenditures. By-laws passed under this act, however, must before taking effect, be approved of by the Ontario Railway and Municipal Board.

An important step was taken regarding the Provincial highways by a provision that the funds required to carry on and complete the system will be obtained by capitalizing a portion of the income to be derived from automobile licenses, and will be made available as required, the financial burden being distributed over a period of years.

Considerable attention was given during the session to public education, an appropriation of about \$120,000 being made for technical instruction. Part of this amount, it was announced, would be employed in the establishment of a training college for vocational teachers. The result of such a college, it is expected, will be that the highest positions in the vocational and industrial schools will eventually be filled by teachers trained in the province.

The definition of a steam boiler under the Steam Boiler Act was amended by the addition of a clause excepting "a portable boiler rated at 25 horse-power or under exclusively for horticultural or agricultural purposes."

The Railway Employees' Voting Act of 1918 was further amended, railway mail clerks employed by the Dominion Post Office Department, and railway express clerks employed by an express company being included among the employees for whom special voting facilities are provided.

The Motor Vehicles Act was amended to provide that "no person shall employ or permit anyone under the age of 16 years to operate a motor vehicle, and no person shall employ or permit anyone over the age of 16 and under the age of 18 years to drive a motor vehicle unless and until he has passed an examination and obtained a license." Penalties are provided for any person conducting a garage business without a license, or infringing the regulations under a license.

The Lieutenant Governor in Council may make regulations under amendments to the Billiard and Pool Rooms and Bowling Alley License Act, to govern the conduct of employees in this class of establishment.

The Ontario Public Service Superannuation Act of 1920 was amended in several respects. Part time employees were excluded; superannuation is extended to those who have been retired

due to ill-health or physical incapacity, after 10 years' continuous service and the Board is empowered to review the case of an employee who has recovered from ill-health. New rules are also laid down as to re-employment in its relation to allowance. The minimum amount of life insurance required to be held by a married employee for the benefit of his dependents was reduced from \$5,000 to \$2,000. If an employee dies or is retired before completing 10 years' service his dependent or representative shall receive the total amount of his contributions with interest compounded annually at 5 per cent, instead of with simple interest, as formerly. The Government's equivalent contribution is safeguarded by a new clause providing that Government grants which have been assigned for the benefit of employees who however retired before being entitled to allowance, shall be credited to the Government. Some minor changes are also made in the basis of calculation of superannuation allowance, account being taken of fractions of a year of continuous service, payment of contributions being made a condition, and a minimum of \$360 for the allowance of an employee retired at 70 years of age. (The amendments in this section are retroactive to June 15, 1920). The allowance to employees over age who retire before reaching 10 years' service is limited to \$2,000. Another amendment eliminates the section of the original act which provided that provided that a widow or child receiving benefits under the act should not be eligible for benefits under any other Provincial act assisting the mothers of infant children. Sheriffs are now included within the scope of the act, which may be further extended by the Lieutenant Governor in Council, upon recommendation of the Board, to any other class of public officers connected with the administration of justice, or to permanent staff employed by any board or commission under the Government.

The section of the Children's Protection Act, which limited to 12 years the age of children engaging in street trades was enlarged to provide that no child shall engage in any street trade or occupation between the hours of 10 p.m. and 6 a.m. The same act was also amended by including a juvenile court in the definitions of a court of summary jurisdiction, and of a judge. Municipal by-laws may be passed for the purpose of assisting a children's aid society or otherwise carrying out the requirements of the act. The minimum sum which a judge, when committing a child to the control of a children's aid society, shall order to be paid by the municipality to which the child belongs is raised to 75 cents a day. The Deserted Wives' and Children's Maintenance Act, which takes effect on September 1, provides that a husband or father refusing to maintain his wife or children may be ordered by a magistrate to make an allowance up to \$20 weekly for the support of his wife or child. The Public Health Act was amended by a provision that city, town or village councils, or local boards of health may appoint one or more public health nurses, and one or more duly qualified physicians, to carry out regulations for the prevention or treatment of disease.

The Association of Professional Engineers of the Province of Ontario was incorporated by a special act, with headquarters at Toronto, with full powers for registering, licensing, and disciplining its members.

The Registration of Nurses Act provided that a training school for nurses may be established in any hospital or sanatorium, and that a graduate nurse in such a school may be entitled to registration in a register kept for that purpose under the direction of the Provincial Secretary. Any person, while so registered may be designated "Registered Nurse," and any unregistered person who makes use of this title is liable to a penalty up to \$100. This act will come into force on its proclamation by the Lieutenant Governor. The Co-operative Credit Society Act provided

for the incorporation of societies, consisting of at least ten persons, for the purpose of receiving deposits from, and making loans to members, the capital to be created by the sale of shares, each member or shareholder having one vote irrespective of the number of shares he holds. Members must be domiciled not more than 20 miles from the registered office. Each society is required to appoint five members as a Board of Administration, and at least three members, not being officers, as a Board of Credit, to consider all loans and investments of funds. A Board of Supervision, consisting of at least two members, is also to be appointed, to supervise the financial operations of the society.

Numerous amendments were made in the Ontario Insurance Act, among these being a clause which provides for the issue of old age insurance contracts by a friendly society. The liability of a society for bodily injury or sickness happening to the insured while engaged in an occupation classified as more hazardous than his occupation, as stated in his contract, is limited to the amount which the premium paid would have purchased for the more hazardous occupation. A similar rule is applied where the insured transfers to an occupation of less hazard. It is expected that a general revision and consolidation of this act will be completed next session. The Reciprocal Insurance Act made lawful the exchange between persons in Ontario of reciprocal contracts of indemnity or inter-insurance for any class of insurance for which an insurance company may be licensed under the provisions of the Ontario Insurance Act, except life, accident, sickness and guarantee insurance. The maximum short-term loan which may be made under the Ontario Farm Loans Act of 1921 to a member of a farm loan association was raised from \$1,000 to \$2,000.

By an Ontario Order-in-Council dated March 22, 1922, the previous orders-in-council respecting the construction of steam boilers, were revoked, and the regulations known as the Interprovincial Regulations, which have already been

adopted by Manitoba, Alberta, Saskatchewan and British Columbia, were substituted. The earlier orders were dated January 29, and June 28, 1913, and governed the materials to be used, the method of construction, the tests to be applied, the inspection of the boiler during its construction and before it is permitted to leave the place of construction, and generally such other matters as may secure a uniform standard of strength, safety and efficiency.

Alberta

The fifth legislature of the province of Alberta held its first session from February 2 to March 28, 1922. Among the measures passed of interest to labour were acts establishing a Bureau of Labour, providing a minimum wage for women, and creating a superannuation fund for the benefit of civil servants.

The new Bureau of Labour consists of a Commissioner of Labour and a staff of officers and employees, all appointed by the Lieutenant-Governor-in-Council, and will be under the control of such minister as may from time to time be determined by order-in-council. The commissioner's duties are to "perform or superintend the performance of such work relating to the collection, assortment, systemization and publication of information and statistics affecting labour as may be directed by the Minister;" to administer such acts as may be assigned to the bureau by order-in-council; and to discharge such other duties as may be delegated to him by the Minister.

The Minimum Wage Act supersedes those sections of the Factories Act of 1917 which provided for the appointment of an advisory committee to deal with wages and hours of labour for women and young persons in establishments governed by that act. The main provisions of the new act are as follows: A Minimum Wage Board, consisting of three members shall be appointed by the Lieutenant-Governor-in-Council, one member to represent employers, one the employees, and one the province at

large. The Board may inquire into the conditions prevailing in any class of employment and the scale of wages payable therefor, and may at any time direct a conference between representatives of employees and employers in any class of employment for the purpose of reaching an agreement as to the minimum wage, periods of employment and shifts for different classes of employees, and time to be allowed for meals. Every such conference shall consist of an equal number of representatives of employees and employers, approved of by the Board, such number to be fixed by the Board. The chairman of the Board shall preside at such a conference but shall not vote. The Board, however, is not bound to act upon the recommendations made by a conference, but may, whether a conference has been held or not, establish a minimum wage for female workers in any occupation (excepting domestic workers in private houses) in any or all of the following municipalities, Calgary, Edmonton, Lethbridge, Medicine Hat, Red Deer, Wetaskiwin, Blairmore, Camrose, Cardston, Coleman, Drumheller and Redcliff. A minimum wage may also be established separately for employees classified as handicapped, or as part time employees or as apprentices. With the approval of the Lieutenant-Governor-in-Council the Board may also fix periods of employment and shifts for the different classes of workers, following in this respect the acts of British Columbia, Manitoba, Nova Scotia and Saskatchewan; and differing from that of Quebec, and from the Ontario act in its original form before the amendment passed during the session just concluded. The Board may further define and limit the number of handicapped employees, part-time employees and apprentices, which may be employed in any trade or occupation. The usual penalties are provided for employers who disobey any order of the Board, that is, a fine not exceeding \$500 and not less than \$25, and payment to any underpaid employee of the amount of the difference between the wage she has actually received and the minimum fixed

by the Board. In default of payment of these sums an employer may be imprisoned for not less than two nor more than six months. The act protects employees from being discriminated against by their employers for giving information to agents of the Board. Every agreement by the employee to work for less than the minimum wage is to be deemed to be at the minimum wage. Employers are required to keep a register of the names and addresses, working hours and actual earnings of all their female employees, and this record is to be open for inspection at any time.

The act to provide superannuation and retiring allowances for provincial civil servants applies to all permanent employees except those of a class otherwise provided for satisfactorily and requesting exemption, and also excepting those belonging to any class which may be excluded by subsequent order in council. Male employees are required to retire at 65 years of age and female employees at 60, unless re-engaged. If they have been employed continuously for ten years they are eligible for annuities not to exceed as many fiftieths of average salary for ten years prior to July 1, 1922, as the number of years of continuous service. The employee may choose the form of annuity, whether for life, for a term of years, or during the joint lives of the employee and a nominee. A lump sum may also be granted, not to exceed one-tenth of all salaries paid prior to July 1, 1922. Contributions are required from the employees to the amount of 4 per cent of salary, a like sum being contributed by the Government, these amounts together forming the superannuation fund, upon which the Government undertakes to pay interest at the rate of 5 per cent.

The application of the Steam Boilers Act was further defined by the specification that every boiler under the act shall be deemed to have a capacity of one horse-power for each twelve square

feet of the superficial heating surface on an externally-fired boiler, and for each nine square feet on one internally fired.

An amendment to the Mechanics Lien Act requires that all registrars and clerks shall keep an alphabetical index of all claimants and of the persons against whom liens are claimed, this index to be open for inspection during office hours.

The Public Service Act was amended in regard to appointments. The Lieutenant Governor in Council continues to make appointments on the application of the department head concerned, but appointments of artisans or labourers, and of temporary employees are now excepted from this practice and half-yearly statements regarding such appointments are required to be submitted to the Executive Council.

The Mines act was amended in regard to the qualifications of applicants for mine managers' certificates, two years practical experience in a coal mine in Canada being required. It was further provided that no owner or manager, or his agent, shall attempt to influence the choice of a check-weigher. New rules are laid down for the date of payment of wages, which must henceforth be paid upon a Saturday and at least once a fortnight, payments to include all unpaid wages earned before the Saturday preceding the date of payment. If the pay Saturday falls on a holiday wages must be paid on the previous Friday.

The tax on coal was by an amendment to the Mine Owner's Tax Act increased from five to ten cents per ton.

The salaries of school teachers must by an amendment to the School Ordinance be paid monthly, instead of quarterly as formerly. A teacher who has been engaged under a continuous agreement must be paid at the end of each year's service the salary allowance for sickness. Facilities for manual training, similar to those already enjoyed by

rural schools, are now permitted also to consolidated districts. In regard to the payment of school taxes, where an employee has paid a tax not less than \$4 to any school district he is not to be held liable for another payment for the same year; if an employer fails to pay the tax of his employees after being duly required to do so his goods and chattels may be distrained.

An amendment to the Motor Vehicle Act provides that no person may operate a motor vehicle as a chauffeur unless he has been duly licensed as a chauffeur for that year.

Amendments were made to the Co-operative Credit Act in regard to the membership in a society of persons residing in an extra-municipal area, the security to be given by borrowers, etc. Several measures were passed during the session for the benefit of farm workers. Among these acts may be mentioned one for the relief of the southern part of the Province, which suffered from a drought last year, a commission being provided to arrange a settlement between the residents and their creditors; an amendment to the Exemption

Ordinance of the North West Territories, providing for the inclusion among the property exempt from seizure and sale under execution certain property essential to the farmer, including working horses, etc., seed grain, house and building; an act enabling the government to advance grain, feed, flour, or any other necessary to relieve farmers outside municipal districts; acts to guarantee payment for seed grain up to the value of \$130 for a quarter section. Produce merchants are required to carry a license, and to keep records of every purchase and sale and to furnish the consignor with a statement of the sale, with the names and addresses of the purchasers.

Among the general social legislation enacted during the session was a measure conferring upon married women equal rights with unmarried women to deal with all classes of real and personal property. The husband under this act is allowed no right "to sue in respect of a tort done to his wife except where and in so far as he has sustained any separate damage or injury thereby."

UNEMPLOYMENT RELIEF EXPENDITURES OF DOMINION GOVERNMENT.

IT is expected that the total expenditures of the Dominion Government in connection with unemployment relief during the past winter will amount to close on \$1,225,000. Although all the accounts are not yet in the hands of the Government, it would appear that about one-half of the above amount was expended on works of construction which were undertaken in various municipalities during the winter for the purpose of providing employment. The remainder was expended in financial assistance to unemployed persons and their dependents. The total payments made by the Dominion Government in direct un-

employment relief in the winter of 1920-21 amounted to \$587,406.

The policy adopted by the Federal authorities during the past two winter seasons was one of co-operative effort between the Dominion Government, Provincial Governments and the Municipalities.

The payments made from the Dominion Treasury during the past winter were mainly on account of relief works and financial assistance in Ontario and the four western provinces. The relief works were undertaken in all cases by the municipalities. In view, however, of

the excess cost of public works undertaken in the winter for the purpose of relieving unemployment, the Federal Government agreed by order-in-council to bear a proportion of the extra cost incurred by a municipality in the prosecution of the work during the winter season, conditional also on the Province assuming its share of such excess expenditure. It was provided by order-in-council of October 7, 1921, that excess cost of winter construction should be borne equally by the Dominion Government, the Provincial Government and the Mu-

nicipality. On January 25, 1922, an order-in-council was passed increasing the Federal proportion to one-half of the excess cost. The expenditures incurred by the municipalities in granting financial assistance to unemployed persons and their dependents were divided equally between the Dominion, the Province and the Municipality. In the case of returned soldiers, the Federal Government has borne one-half of the disbursements made for unemployment relief, the remaining quota being contributed in equal parts by the Province and Municipality respectively.

ANNUAL MEETING OF THE EMPLOYMENT SERVICE COUNCIL OF CANADA

THE fourth annual meeting of the Employment Service Council of Canada was held at Ottawa, June 7-9. Prior to the meeting a two-day conference of employment office officials was held at which questions of administration and technique were dealt with, including employment office forms and procedure, the establishment of part time offices and publicity methods. At the opening general meeting of the Council, the Hon. James Murdock, Minister of Labour, gave the address of welcome to the delegates. With Mr. J. D. McNiven, Deputy Minister of Labour, British Columbia, in the chair, the Council then proceeded to a discussion of the harvest labour problem. Representatives of the Canadian Pacific, the Canadian National and the Grand Trunk Railways were present to confer with the members of the Council. The meeting went fully into the details of mobilization of harvest labourers and their distribution, both from the Employment Service and the transportations standpoints. Among the points discussed were the rates of transportation, proper selection of harvest hands and the closer dovetailing of excursions with the ripening of the crops of the various districts.

The Right Hon. W. L. Mackenzie King, Prime Minister of Canada, was present when the Council opened on the second day and delivered a brief address to the members, assuring them that the Government was glad to have their assistance in its effort to deal effectively with the employment situation. At this session the Council appointed special committees to consider and report on the placement of handicapped ex-Service men, transportation and unemployment. On the following day the reports of these committees were read and discussed, and a number of the recommendations adopted by the Council as a whole. These recommendations will be presented to the Minister of Labour by the newly-elected executive committee, of which the members are: Professor W. C. Clark, Department of Economics, Queen's University, chairman; Mr. C. Grant MacNeil, Secretary of the Dominion Veterans' Alliance, vice-chairman; Mr. Bryce M. Stewart, Director of the Employment Service of Canada, secretary; Mr. Arthur Martel, Vice-President Trades and Labour Congress of Canada, and Mr. E. Blake Robertson, representing the Canadian Manufacturers' Association.

LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA

Reports by Dominion Bureau of Statistics on (a) the ship and boat building industry, 1920; (b) biscuit and confectionery industry, 1920; (c) leather industry, 1919 and 1920; (d) aerated mineral water industry, 1920; (e) cordage, rope and twine industry, 1919 and 1920.

THE Dominion Bureau of Statistics has recently issued advance reports for the calendar year 1920 on the ship and boat building industry; the biscuit and confectionery industry; the leather industry; the aerated mineral water in-

dustry; and the cordage, rope and twine industry. Previous reports in this series relating to other industries have been outlined in various issues of the LABOUR GAZETTE.

The Ship and Boat Building Industries during 1920

An advance report on the ship and boat building industries for the calendar year 1920 is based on returns from 81 shipbuilding plants and 107 boat-building plants. These were distributed among the different provinces as follows:

Provinces	Ship-building Plants	Boat-building Plants
Prince Edward Island.....	1
Nova Scotia.....	39	17
New Brunswick.....	3	2
Quebec.....	9	13
Ontario.....	11	50
Manitoba.....	2
Alberta.....	2
British Columbia and Yukon..	16	23
Canada.....	81	107

The following tables give some of the principal statistics for the two industries for the calendar years 1919 and 1920.

	1919	1920
<i>Shipbuilding plants:</i>		
Plants.....No.	78	81
Capital invested.....\$	70,854,028	62,868,289
<i>Salaried employees—</i>		
Male.....No.	1,247	1,108
Female.....No.	137	124
Total salaries.....\$	2,537,907	2,432,347
<i>Wage earners—</i>		
Male.....No.	24,013	13,970
Female.....No.	32	6
Total wages.....\$	27,298,941	19,155,780
Cost of materials.....\$	35,969,327	23,805,654
Value of products.....\$	86,489,713	54,814,640

	1919	1920
<i>Boatbuilding plants:</i>		
Plants.....No.	99	107
Capital invested.....\$	1,260,663	1,367,617
<i>Salaried employees—</i>		
Male.....No.	40	50
Female.....No.	17	14
Total salaries.....\$	79,026	105,774
<i>Wage earners—</i>		
Male.....No.	783	712
Female.....No.	3	4
Total wages.....\$	841,415	816,609
Cost of materials.....\$	587,624	618,429
Value of products.....\$	1,964,426	1,967,640

A classification of employees according to age and sex by weekly wage groups is given below.

Weekly wage groups	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
<i>In Shipbuilding plants</i>	No.	No.	No.	No.	No.
Under \$5.....	65	65
\$5 but under \$10.....	378	1	20	399
\$10 but under \$15.....	564	3	30	2	599

Totals.....	771	2	7	780

The Biscuit and Confectionery Industry during 1920

The statistics on the Biscuit and Confectionery Industry for 1920 cover the operations of 400 individuals plants. The selling value of the products of these plants amounted to \$54,658,833. This includes bread to the value of \$628,849, and buns and pastry to the value of \$489,667. The following table shows the number of employees in various classes of employment, arranged according to sex with the amount paid in salaries and wages to each class:

Classes of employment	Number of employees		Salaries and wages
	Male	Female	
Superintendents and managers	294	24	\$ 1,061,040
Clerks, typists, etc.....	1,006	382	1,727,922
Wage earners, average No....	4,463	6,499	7,733,514
Outside piece-workers.....	46	8	15,815
Totals	5,809	6,913	\$10,538,291

The average number of days in which the 400 plants were in operation during the year was 273 per plant, and the average number of idle days was 40. The total hours worked per day averaged 8.59 and per week, 50.45.

A classification of employees according to weekly wage payments within specified groups is given in the following table:

Specified groups of weekly wages	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
Under \$5.....	21	63	17	35	141
\$5 but under \$10	256	1,671	80	189	2,196
\$10 but under \$15	536	2,374	76	132	3,618

Canada	400	31,217,581	12,722	10,538,291	30,939,803	54,658,833

The Leather Industry during 1919 and 1920.

An advance report has been issued on the Leather Industry in Canada for the calendar years 1919 and 1920. The report is based on returns from 113 plants in 1919 and 100 in 1920, thirteen having been closed in the latter year. By localities there were, in 1919, 9 plants in the Maritime provinces, 57 in Quebec, 41 in Ontario and 6 in the Western provinces.

In 1920 there were 5 plants in the Maritime provinces, 52 in Quebec, 37 in Ontario and 6 in the Western provinces. There was also a decrease of nearly \$5,000,000 in the value of production in the comparison of two years. The following table gives the principal statistics of Canada for the two years.

Items	1919	1920
EstablishmentsNo.	113	100
Capital\$	34,623,567	29,739,987
Salaried employees—

Value of products.....\$	45,902,082	39,967,831

The number of employees in this industry in 1920 with their salaries and

Classes of employment	Number of employees		Salaries and wages
	Male	Female	
Officers, superintendents and managers	137	\$1,550,624
All other salaried employees	153	44	298,451
Wage earners, average No.	3,395	157	3,781,268
Totals	3,685	201	\$5,630,343

The Aerated and Mineral Water Industry during 1920.

A report on the aerated and mineral water industry for 1920 covers 330 individual plants, of which 3 were in Prince Edward Island, 23 in Nova Scotia, 20 in New Brunswick, 92 in Quebec, 136 in Ontario, 7 in Manitoba, 14 in Sas-

wages is shown in the second table in this group:

In the following table the wage earners during 1920 are classified according to age and sex within specified wage groups.

Groups of weekly wages	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
Under \$5.....	14	3	1	18
\$5 but under \$10	31	37	13	2	83
\$10 but under \$15	142	52	11	4	209
\$15 but under \$20	711	27	5	743
\$20 but under \$24	844	4	848
\$24 but under \$28	553	1	554

The Cordage, Rope and Twine Industry during 1919 and 1920.

A report on the cordage, rope and twine industry in Canada covers the years 1919 and 1920 and is based on returns received from seven individual plants in 1919 and eight in 1920. In each of these years there were four plants in Ontario, two in Quebec and one in Nova Scotia, while in British Columbia there was one plant in 1920 only. The investment of capital in this industry amounted to \$8,979,407 in 1919 and \$10,142,323 in 1920.

The following table shows for 1920 the number of employees by sex in various classes of employment and the salaries and wages paid each class.

Classes of employment	No. of employees		Salaries and wages
	Male	Fe- male	
Superintendents and managers	18	1	\$ 95,686
Clerks, typists, etc.....	41	22	85,555

Totals	938	262	14	11	1,225

In 1919 the seven plants were operating an aggregate of 2,015 days on full time, 108 days on part time, and were idle only five days. In 1920 the eight plants operated a total of 2,094 days on full time, 191 days on part time, and were idle for 147 days. The average hours worked per shift per day were 9.3 in 1919 and 9.1 in 1920, and the average hours per week for these two years were 53 and 51.7 respectively.

WORKMEN'S COMPENSATION IN NOVA SCOTIA IN 1921.

A REVIEW of the work accomplished during 1921 by the Nova Scotia Workmen's Compensation Board is contained in the fifth annual report of the Board.

The amendment made to the Act in 1921, reducing for the purpose of assessment the amount of wages assumed to be earned by fishermen working on shares necessitated increasing the assessment rate in this class from 3 per cent to 5 per cent. This necessity arose from the fact that in the fishing industry the compensation expense arises almost wholly from fatal acci-

dents, and because the amount of compensation payable in fatal cases is not based upon the earnings of the workman but is fixed by statute. It may be stated that several amendments were made to the Nova Scotia Workmen's Compensation Act at the 1922 session of the Legislature, which will be described in a forthcoming article on labour legislation.

The following table shows the number of compensable accidents by classes and the cost of compensation during the year, together with the corresponding figures for the four preceding years.

	1921 so far reported	1920 (revised)	1919 (revised)	1918 (revised)	1917 (revised)
Fatal accidents	48	98	59	186	146
Permanent disability	131	285	252	240	190
Temporary total disability	3,870	5,760	4,638	4,505	4,501
Cases of medical aid only	487	973			
Claims pending completion	328				
Total compensable accidents	4,864	7,116	4,949	4,931	4,837
Compensation cost of accidents	estimated \$945,689	\$1,372,984	\$900,269	\$1,263,675	\$862,938

Several reasons are suggested for the decline which appears in the number of accidents and in the amount of expenses incurred: (1) Fewer workmen were employed, wages were lower and business was slacker during the year; (2) Employers were able to secure workmen with more experience; (3) The work of the Accident Prevention Association, and the large amounts previously expended for safety work were commencing to show results. (Some account of recent safety work in Nova Scotia was given in the April, 1922, issue of the LABOUR GAZETTE, p. 422.)

The expenses of the Accident Prevention Association are paid by the Workmen's Compensation Board, and as the amount of these expenses is not more than would be incurred as a result of a single fatal accident, it is considered that this money is well spent. The Association was formed in 1919 by employers coming within the scope of the Workmen's Compensation Act. Increased activity in safety work by employers is one of the effects of the Act which had been anticipated. It is uncertain to what extent such activity resulted in a reduction of accidents, but, as the report observes "the direct tax, which is proportioned to the cost of accidents, forces thoughtful employers to do something toward cutting down this item of expense."

The decline in the amount of wages paid in the various industries under the Compensation Act in 1921 as compared with 1920 is shown in the report as follows:

	1921	1920
Coal mining	\$19,645,000	\$21,170,000
Steel and iron manufacturing	4,590,000	9,350,000
Steam railways (operation, not including Intercolonial Railway)	1,750,000	2,090,000
Lumber and sawmills	2,200,000	5,800,000
Building	2,200,000	3,570,000

The total assessment made upon employers in 1921 amounted to \$1,092,267. As the estimated surplus for 1920 was exceeded by the actual surplus by over \$300,000, this increase, together with the good accident experience in 1921, called for a retroactive adjustment in the rates for 1921. It is estimated that this adjustment will result in a reduction by \$365,000 of the assessment for 1921. That amount will be credited to the employers in the various industries entitled by their accident record to a reduced rate. Thus the provisional rate of \$2.70 for coal mining was adjusted to \$2; for lumbering and sawmills from \$3.30 to \$2; for steel and iron manufacture from \$1.50 to 80 cents; in steam railways (operation and maintenance) from \$1 to 10 cents; for building (general construction) from \$1.50 to 10 cents. It is pointed out that, for example in regard to the last item, the adjusted rate of 10 cents upon \$100 of the payroll does not mean that such a rate was sufficient to cover the accident cost for the year in the building trades. The average rate for a period of five years was for this group \$1.11, and the reduction to 10 cents indicates that a surplus existed in favour of the building trades which was utilized to pay nearly the entire cost of the accidents in 1921. The difference between the amount paid by the employer upon the provisional assessment

and the amount of the adjusted assessment is credited to the employer for the year following. A considerable working surplus is required for administration, as during the first months of the year the Board has to draw on the working surplus to carry on its operations. Assessments, however, are a first lien upon the property used in industry, and so far the Board has not been compelled to make deductions for bad debts.

The expenditures of the Board, actual and estimated, during 1921, were as follows:

Compensation paid other than pensions.....	\$202,736
Transferred to reserve for pension awards.....	283,970
Paid for medical aid.....	27,336
Administration expenses.....	100,067
Safety associations.....	7,622
Compensation estimated for reported claims.....	193,952

Compensation estimated for unreported claims.....	66,166
Estimated to complete medical aid claims.....	7,108
Disaster reserve.....	56,733
Totals.	\$945,689

The ratio of administration expenses to total accident cost was 10.58, this figure being above the average ratio for the past five years, which was less than 7 per cent. The actual outlay was, however, reduced from that of 1920 by \$4,806. Some reductions were effected in the staff, which has been lately reduced to fifty. The work of the Board, however, was not lessened in consequence of the decrease in assessment and in accidents. On the contrary, increased difficulty was experienced in the collection of assessments and as a result of the unemployment conditions during the year.

MINING OPERATIONS IN QUEBEC DURING 1921.

THE annual report of the Department of Colonization, Mines and Fisheries of the province of Quebec, on mining operations during 1921 shows a decrease in production of 45.3 per cent compared with the previous year, the decline being from \$28,392,939 in 1920 to \$15,522,988 in 1921. The decline was attributed to the worldwide industrial depression. The scarcity of labour which had prevailed throughout the year 1920 began to ease off in the spring of 1921. According to the report, the standard daily wage of common labour in the mines of Quebec and Ontario which had been from \$4.25 to \$5.00 during the years 1918 to 1920 was re-

duced to \$3.25 in May and to \$2.50 per day of 10 hours in the autumn. Owing to the curtailment of operations unemployment became a grave question during the year, and it is stated that finally many companies which had shut down altogether made an effort to reopen at a sacrifice in order to relieve distress by employing as many men as they could on repairs and development work.

The following table shows for each mineral product in Quebec the actual number of workers engaged, the wages paid and the quantities produced in 1921.

Substances	No. of work-men	Wages	Quantities
		\$	
Asbestos, tons	2,753	3,041,199	84,475

	6,616	4,773	7,428

and quarry workers reported to the Bureau of mines. Of the fatalities, 7 occurred in mines (2 underground and 5 in open pits), and 5 occurred in quarries (1 on the surface and 4 in open pits, of which 2 were due to explosives). The number of accidents in proportion to persons employed showed a decrease in comparison with previous years, being 44.6 per 1,000 300-day workers in 1921, as compared with 47.3 in 1920, and 48.3 in 1919.

LAWS AND REGULATIONS RELATING TO LEAD POISONING.

THE Imperial Mineral Resources Bureau has issued a publication on laws and regulations relating to Lead Poisoning, being an analysis with texts, of the laws and regulations made in the chief industrial countries to prevent lead poisoning. * Such a publication is of timely interest in view of the draft convention "Concerning the use of White Lead in Painting," which was

adopted at the Third General Conference of the International Labour Organization, held at Geneva in the fall of 1921.

The volume deals with the laws and regulations governing the employment of workers, in all parts of the world where lead is extensively mined or used in manufactures, in (1) lead mines; (2) lead metallurgical works, and (3) works into the manufacture of which lead largely enters.

*Laws and Regulations relating to Lead Poisoning, by Gilbert Stone, H. M. Stationery Office, London. Price 6s. net.

Lead Mines.—With reference to lead mining it is stated that with but few exceptions the underground working of lead ores has not called for special regulations against lead poisoning (or plumbism). The principal lead producing countries are the United States, Germany, Australia and Mexico, important quantities being also produced in Canada, Burmah, Italy and France. In many of these countries these are general regulations for the prevention and laying of dust, which apply to all mines and are not specially designed to guard against plumbism. In New South Wales, the Mines Inspection Act, 1901, requires mine managers to send monthly reports of cases of lead poisoning to the Chief Inspector of Mines. Pure drinking water must be supplied and bathing facilities must be provided. By the Workmen's Compensation Act, New South Wales, which went into effect in 1919, plumbism was made a compensable disease.

Lead Metallurgical Works.—Reference is made to laws and regulations for the protection of workpeople against lead poisoning in lead smelters and in the manufacture of red lead, orange lead, or of flaked litharge. Such regulations are in force in Great Britain, Tasmania, Victoria, New South Wales, Rhodesia, New Jersey, France, Germany and Austria.

With regard to Canada the writer states that legislation of this nature comes under the jurisdiction of the various provincial governments but that there is very little legislation relating to the lead industry. Figures are cited showing that in all Canada there are 1,058 men employed in lead smelters, and 5,795 in other industries employing lead, of whom 4,001 are employed in the paint, varnish and glass industries.

White Lead.—Lead smelting and the making of white lead are stated to be the most dangerous of the lead industries, although litho-transfer work, dry colour work and the making of storage batteries come very close to them. In

Great Britain special rules governing the white lead industry have been made under the Factory and Workshops Acts. These rules provide against dust and fumes, and require the observance of strict cleanliness. The medical examination of employers is compulsory, and restrictions are placed upon the employment of women. The enforcement of the rules is said to have resulted in a great reduction in the average number of cases of lead poisoning. Similar rules prevail in France. In Germany elaborate regulations exist for all establishments manufacturing lead colours or other lead compounds or mixtures. In Belgium special regulations are in force relating to the manufacture of white lead, lead oxides and lead chromates.

In many countries certain sections of the Factories Acts have special reference to the making of white lead. Frequently the employment of women and children in this industry is forbidden or restricted.

Lead paints.—In Great Britain regulations relating to the manufacture of paints containing lead were made in 1907. These aim primarily at the elimination of dust, the exclusion of women, young persons and children, medical examination of workers and the keeping of a health register, cleanliness, with the usual provisions regarding food, drink and tobacco.

Other lead industries.—In Great Britain regulations have been made to apply to pottery works, the manufacture of electric accumulators, the tinning of metals, and the processes of enamelling and bronzing, for the elimination of dust and the promotion of cleanliness and health, which have greatly reduced the risks of lead poisoning in these industries. In France the use of white lead or lead paints containing more than 5 per cent of sulphate of lead is prohibited.

The final chapter of the volume deals with plumbism as a compensable disease under Workmen's Compensation laws.

In Great Britain under the Workmen's Compensation Act, 1906, schedule 111, lead poisoning or its sequelae incurred in any process involving the use of lead or its preparations or compounds was made an industrial disease. This was later extended to include lead poisoning or its sequelae, incurred in the handling of lead, its preparations or compounds. Brief reference was made to the various provincial Workmen's Compensation laws of Canada which include in their lists of compensable industrial diseases "Lead poisoning or its sequelae—Any process involving the use of lead or its preparations or compounds." These enactments are as follows: Ontario, act of 1914; British Columbia, act of 1916; Nova Scotia, regulation effective on January 1, 1917, in accordance with provisions of act of 1915; Alberta, act of 1918; New Brunswick, regulation effective January 1, 1920, in accordance with provision of act of 1918; Manitoba, act of 1920. With respect to other countries it is stated that the compensation of the worker for injury

due to plumbism has generally, though not universally, been provided for. In the United States various practices are in force; in New York state the British law is followed in a general line; Connecticut, California, Massachusetts, North Dakota, Wisconsin and Hawaii include industrial diseases in their compensation laws, but in some of these states they are only included by judicial decisions. It is noted that the passing of compensation laws or the scheduling of the specific industrial disease of plumbism in connection with compensation laws already passed has usually been marked by an immediate increase in the number of cases of plumbism notified for any particular industry. This is attributed to the difference in the attitude of the patient before the passage of the law when he did not want to appear ill, and afterwards when he had no motive for repressing his illness; also to more accurate diagnosis of the disease by doctors owing to increased knowledge of the symptoms and effects of lead poisoning.

TIME LOST IN UNITED STATES COAL MINES DURING YEARS 1900-1919

THE United States Geological Survey has recently published the following figures relating to the time lost owing to strikes and other causes, in both anthracite and bituminous coal mines in the United States during the years 1900 to 1919.

It will be observed that more than eight-ninths of the total time loss recorded was due to lack of materials, transport difficulties and other problems of management; strikes were responsible for less than one-ninth of the lost time.

Year	Days lost owing to strikes	Days lost owing to lack of markets transport difficulties, etc.	Total days lost
1900	4,878,102	38,122,900	43,001,002
1901*	733,802	43,780,811	44,514,113
1902	16,672,217	40,635,223	57,307,440
1903*	1,341,031	48,517,726	49,858,757
1904	3,382,830	59,860,350	63,243,180
1905	796,735	59,267,036	60,063,771
1906	19,201,348	44,595,142	63,796,490
1907*	462,392	52,235,292	52,697,684
1908*	5,449,938	72,731,214	78,181,152
1909	731,650	64,332,335	65,063,985
1910	19,250,524	44,693,242	63,943,766
1911	983,737	63,044,708	64,028,445
1912	12,527,305	47,506,725	60,034,030
1913	3,049,412	49,376,615	52,426,027
1914	11,031,667	66,242,238	77,255,955
1915	2,467,431	69,896,505	72,303,936
1916	3,344,586	49,214,165	52,558,751
1917	2,348,399	40,401,898	42,750,297
1918	508,526	38,001,284	38,509,810
1919	15,603,567	61,181,749	76,785,316
Total 20 years	124,747,199	1,053,576,708	1,178,323,907

*No strikes of consequence occurred in the anthracite region in these years.

UNANIMOUS DECISION OF UNITED STATES SUPREME COURT IN THE CORONADO COAL COMPANY CASE

Strike funds subject to assessment for damages

IN the recent decision in the case of the Coronado Coal Company, the United States Supreme Court has decided unanimously that labour unions are suable under Sections 7 and 8 of the Sherman Anti-Trust Law, and that strike funds may be assessable for damages in a suit brought against a union for damages caused by a strike. The case came before the Supreme Court on appeal by the United Mine Workers' union which had been found guilty in a lower court of violation of the Sherman Anti-Trust Law during a coal strike in Arkansas in 1914, and had been fined \$600,000. The Court, while holding that the national union was not liable and that suit should be brought in the lower courts against the local branch of the union, proceeded to make an important ruling with regard to trade unionism in the United States. The Court held that labour unions, even though unincorporated, are suable in the Federal courts for their acts, and that strike funds are subject to assessment for damages in suits for wrongs committed by such unions in strikes.

The decision which was pronounced by Chief Justice Taft, is expected to exert a significant influence on the policy of trade unions with reference to strikes in industries entering into interstate commerce. The counsel of the American Federation of Labour, in commenting on the ruling, states that a strike by railway workers would now render not only the union funds, but the property of the members liable to attachment.

That part of the decision which deals with the question of whether unincorporated unions could be sued as organizations, follows:

We think that such organizations are suable in the Federal courts for their acts and that funds accumulated to be expended in conducting strikes are subject to execution in suits for torts committed by such unions in strikes. The fact that the Supreme Court of Arkansas has since taken a definite view in *Baskins vs. the United Mine Workers of America*, supra, cannot under the Conformity act operate as a limitation on the Federal procedure in this regard.

Our conclusion as to the suability of the defendants is confirmed in the case at bar by the words of Sections 7 and 8 of the Anti-Trust law. The persons who may be sued under Section 7 include "corporations and associations existing under or authorized by the laws of either the United States, or the laws of any of the Territories, the laws of any State, or the laws of any foreign country." The language is very broad, and the words given their natural signification, certainly include labour unions like these. They are, as has been abundantly shown, associations existing under the laws of the United States, of the Territories thereof and of the States of the Union. Congress was passing drastic legislation to remedy a threatening danger to the public welfare, and did not intend that any persons or combinations of persons should escape its application. Their thought was especially directed against business associations and combinations that were incorporated to do things forbidden by the act, but they used language broad enough to include all associations which might violate its provisions recognized by the statutes of the United States or the States of the Territories, or foreign countries as lawfully existing; and this, of course, includes labour unions, as the legislation referred to shows.

Undoubtedly at common law, an unincorporated association of persons was not recognized as having any other character than a partnership in whatever was done, and it could only sue or be sued in the name of its members and their liability had to be enforced against each member. But the growth and necessities of these great labour organizations have brought affirmative legal recognition of their existence and usefulness and provisions for their protection, which their members have found necessary. Their right to maintain strikes, when they do not violate laws or the rights of others, has been declared. The

embezzlement of funds by their officers has been especially denounced as a crime. The so-called union label, which is a quasi trademark to indicate the origin of the manufactured product in union labour, has been protected against pirating and deceptive use by the statutes of most of the States and in many States authority to sue to enjoin its use has been conferred on unions. They have been given distinct and separate representation and the right to appear to represent union interests in statutory arbitrations, and before official labour boards.

More than this, equitable procedure adapting itself to modern needs has grown to recognize the need of representation by one person of many, too numerous to sue or to be sued, and this has had its influence upon the law side of litigation, so that out of the very necessities of the existing conditions and the utter impossibility of doing justice otherwise, the suable character of such an organization as this has come to be recognized in some jurisdictions, and many suits for and against labour unions are reported in which no question has been raised as to the right to treat them in their closely united actions and functions as artificial persons capable of suing and being sued.

It would be unfortunate if an organization with as great a power as this international union has in the raising of large funds and in directing the conduct of 400,000 members in carrying on, in a wide territory, industrial controversies and strikes, out of which so much unlawful injury to private rights is possible, could assemble its assets to be used therein free from liability for injuries by torts committed in course of such strikes. To remand persons injured to a suit against each of the 400,000 members to recover damages and to levy on his share of the strike fund would be to leave them remediless.

Though such a conclusion as to the suability of trade unions is of primary importance in the working out of justice and in protecting individuals and society from possibility of oppression and injury in the lawful rights from the existence of such powerful entities as trade unions, it is after all in essence and principle merely a procedural matter. As a matter of substantive law, all the members of the union engaged in a combination doing unlawful injury are liable to suit and recovery, and the only question is whether when they have voluntarily, and for the purpose of acquiring concentrated strength and the faculty of quick unit action and elasticity created a self-acting body with great funds to accomplish their purpose, they may not be sued as this body, and the funds they have accumulated may not be made to satisfy claims for injuries unlawfully caused in carrying out their united purpose. Trade unions have been recognized as lawful by the Clayton Act;

they have been tendered formal incorporation as National Unions by the act of Congress approved June 29, 1886 (24 Stat. 86). In the act of Congress, approved August 23, 1912 (37 Stat. 415), a commission on industrial relations was created providing that three of the Commissioners should represent organized labour. The Transportation Act of 1920, Sections 302-307 (41 Stat. 469), recognizes labour unions in creation of railroad boards of adjustment, and provides for action by the Railroad Labour Board upon their application. The act of Congress approved August 5, 1909, Chap. 6., Sec. 38, 36 Stat. 112 and the act approved October 3, 1913, Chapter 16, subd. G.a. (38 Stat. 172), expressly exempt labour unions from excise taxes. Periodical publications issued by or under the auspices of trade unions are admitted into the mails as second class mail matter. Acts of 1911-1912, Chap. 389 (37 Stat. 550). The legality of labour unions of postal employees is expressly recognized by act of Congress, approved August 24, 1912, Chap. 389, Sec. 6 (37 Stat. 539, 555). By act of Congress, passed August 1, 1914, no money was to be used from funds therein appropriated to prosecute unions under the Anti-Trust Act (38 Stat. 609, 652).

International Union not liable in present case.

The United Mine Workers of America contended that there was not sufficient proof to submit the question of the responsibility of the International Union for the strike. The Court agreed with this contention, its decision on this point being, in part, as follows:

The next question is whether the International Union was shown by any substantial evidence to have initiated, participated in or ratified the interference with plaintiffs' business which began April 6, 1914, and continued at intervals until July 17, when the matter culminated in a battle and the destruction of the Bache-Denman properties. The strike was a local strike declared by the president and officers of the District Organization No. 21, embracing Arkansas, Oklahoma and Texas. By section 16 of the International constitution, as we have seen, it could not thus engage in a strike if it involved all or a major part of its district members without sanction of the International Board. There is nothing to show that the International Board ever authorized it, took any part in preparation for it or in its maintenance. Nor did they or their organization ratify it by paying any of the expenses. It came exactly within the definition of a local strike in the constitutions of both the national and the District organizations. The District made the preparations and paid the bills. . .

The argument of counsel for the plaintiffs is that because the national body had authority

to discipline District Organizations, to make local strikes its own and to pay their cost, if it deemed it wise, the duty was thrust on it when it knew a local strike was on, to superintend it and prevent it becoming lawless at its peril. We do not conceive that such responsibility is imposed on the National body. A corporation is responsible for the wrongs committed by its agents in the course of its business, and this principle is enforced against the contention that torts are *Ultra vires* the corporation. But it must be shown that it is in the business of the corporation. Surely no stricter rule can be enforced against an unincorporated organization like this. Here it is not a question of contract or of holding out an appearance of authority on which some third person acts. It is a mere question of actual agency which the constitutions of the two bodies settle conclusively. If the International body had interfered or if it had assumed liability by ratification, different questions would have arisen. Counsel cite section 2 of article 12 of the constitution of District 21 to show that questions of all strikes must be referred by District officers to the National President for his decision, and suggest that in the absence of a showing it is to be inferred that they did so here and the strike was approved by him. They misconstrue the section. It applies only to a proposed strike which would affect two Districts and to which one District is opposed. It does not apply to local strikes like this. But it is said that the District was doing the work of the International and carrying out its policies and this circumstance makes the former an agent. We cannot agree to this in the face of the specific stipulation between them that in such a case unless the International expressly assumed responsibility, the District must meet it alone. The subsequent events showing that the District did meet the responsibility with its own funds confirms our reliance upon the constitutions of the two bodies. We conclude that the motions of the International Union, the United Mine Workers of America, and of its president and its other officers, that the jury be directed to return a verdict for them, should have been granted.

District organization liable for damages.

With respect to the responsibility of District 21 of the United Mine Workers for the unlawful acts of the strikers and their sympathizers in the destruction of the mining companies' property, the Court found the District's responsibility too clear for argument.

As to the responsibility of the District organization from the injury resulting from the strike activities, the Court stated as follows:

It is contended on behalf of District 21 and the local unions that only those members of these bodies whom the evidence shows to have participated in the torts can be held civilly liable for the damages. There was evidence to connect all these individual defendants with the acts which were done, and in view of our finding that District No. 21 and the unions are suable, we cannot yield to the argument that it would be necessary to show the guilt of every member of District No. 21 and of each union in order to hold the union and its strike funds to answer. District No. 21 and the local unions were engaged in a work in which the strike was one of the chief instrumentalities for accomplishing the purpose for which their unions were organized. By section 1 of Article 12 of the constitution of District No. 21, it is provided that: "When trouble of a legal character arises between the members of local unions and their employer, the mine committee and officers shall endeavour to effect an amicable adjustment, and failing they shall immediately notify the officers of the district and said district officers shall immediately investigate the cause of the complaint, and failing to effect a peaceful settlement upon a basis that would be equitable and just to the aggrieved members, finding that a strike would best subserve the interests of the localities affected, they may, with the consent and approval of the officers, order a strike." Thus the authority is put by all the members of the District No. 21 in their officers to order a strike, and if in the conduct of that strike unlawful injuries are inflicted, the District organization is responsible and the fund accumulated for strike purposes may be subjected to the payment of any judgment which is recovered.

IMPORTANT WAGE DECISIONS OF THE UNITED STATES RAILROAD LABOUR BOARD

IN 1921 the United States Railroad Labour Board, following the application of the railway companies for reductions in wages and changes in working conditions, reduced the wages of employees in Decision No. 147 effective July 1, 1921 (the text of which was published in the LABOUR GAZETTE, July 1921), and later revised the rules and working conditions of various classes in various Decisions issued between August 1921 and March 1922, which Decisions were summarized in the LABOUR GAZETTE, issues of January and May 1922.

In dealing with a prospective strike of railway employees in the autumn of 1921 (referred to in the LABOUR GAZETTE, November, 1921), against the reduction in wages effective from July 1, 1921, the Board stated that the further reduction in wages (approximately 10 per cent) already proposed by the railway companies would not be considered until the revision of the rules and working conditions had been completed. Accordingly in March, 1922, the Board commenced hearings on the proposed reductions in wages, the representatives of the railway companies and of the organizations of railway employees presenting arguments in support of their respective cases. As the Board had not dealt with the rules and working conditions of the employees engaged in train service (the locomotive engineers, firemen, conductors and trainmen), reductions in wages for these classes were not under consideration.

The wages of maintenance of way employees and railway shop labourers were reduced by Decision No. 1028 rendered on May 25, the new rates to be effective July 1, 1922. This reduction amounted to 5 cents per hour for some of the classes included, and to 4 cents, 3 cents and 1 cent for certain

other classes. The rate of 40 cents per hour paid on most of the railways for section men was thus reduced to 35 cents, and the minimum for this class 28 cents paid on some of the southern railways to 23 cents. Approximately 400,000 maintenance of way employees are affected by the reductions, the saving to the railway companies being estimated at \$50,000,000 a year.

Wages of the shop crafts were reduced by Decision No. 1036 rendered on June 5, the new rates to be effective from July 1, the decreases being 7 cents per hour for machinists, boilermakers, etc., also for their apprentices and helpers, 9 cents for freight carmen; and 5 cents for car cleaners. No decrease, however, was ordered for supervisory forces. The rate of 77 cents per hour for most of the mechanics was thus reduced to 70 cents, and the rate for freight car men from 72 cents to 63 cents. The number of men in the shop craft affected was estimated at about 400,000, the saving in wages being estimated at \$60,000,000 a year.

The wages of the other classes under consideration, clerks, freight handlers, station employees, etc., were reduced by Decision No. 1074 rendered on June 10, the new rates to be effective from July 1, the decreases being 3 cents and 4 cents per hour with a provision, however, that telephone switchboard operators should not be paid less than \$85 per month and that no higher rates already in existence should be reduced. No reductions were made for train dispatchers, dining car stewards or for the employees represented by the Marine Culinary Workers' Association of California. The number of clerical and station employees affected was estimated at about 350,000, the wage saving being about \$26,500,000 a year.

On the announcement of these decisions the officials of the labour organ-

izations affected referred the matter of their acceptance or rejection to their membership through the medium of a strike vote. The results of these strike votes are referred in a preceding article in this issue.

As wages and working conditions on railways in Canada have been based on conditions in the United States during recent years, representatives of the railway companies in Canada and of their employees have met and considered revisions of the existing rules and working conditions and the proposals for changes in wages.

The three recent decisions of the United States Railroad Labour Board, referred to above, are reproduced in full below (except that the lists of railways affected are omitted), including the dissenting opinions of the three members of the Board representing the railway labour organizations who did not agree with the majority, and a rejoinder by the majority of the Board as to the contents of these dissenting opinions, entitled "Supporting Opinion of the Majority".

United States Railroad Labour Board

Decision No. 1028 (Docket 1300)

Issued May 25, 1922, effective July 1, 1922.

Alabama & Vicksburg Railway Company et al. vs. United Brotherhood of Maintenance of Way Employees and Railway Shop Laborers et al.

SUBJECT OF THE DISPUTE

Between each of the carriers named below and the classes of employees represented by the organizations named below, disputes have arisen as to what shall constitute just and reasonable wages.

Conferences were held between each carrier and the accredited representatives of its said employees, and, on a considerable number of decided in such conferences, were referred to the United States Railroad Labor Board for decision.

All the carriers named below are petitioning for a reduction in the wages of said employees, and, on a considerable number of

the roads, the employees are requesting an increase in wages.

Both parties made a full presentation to the Labor Board of their respective contentions, by testimony and argument, oral and written.

The Western Maryland Railway Company and the Erie Railroad Company had applications pending before the Labor Board for a wage reduction of maintenance of way employees. After contracting their maintenance of way work, or a portion thereof, the Western Maryland Railway Company withdrew its application for all its maintenance of way employees and the Erie Railroad Company withdrew its application for employees covered by section 8 of this decision.

HISTORY OF THE CONTROVERSY

The Railroad Labor Board by Decision No. 2, effective May 1, 1920, increased the wages of this class of employees, along with others, on all the railroads then before the Board. That decision was rendered at a time when living costs and wages were at their summit. Shortly afterward, living costs and wages in general began to decline.

The Labor Board by Decision No. 147, effective July 1, 1921, reduced the wages of this class of employees on all the carriers before the Board.

These two decisions, Nos. 2 and 147, were handed down by the Board after a full hearing of all parties. The Board endeavored in said cases, as it does in the present one, to observe the provisions of the Transportation Act, 1920, prescribed for its guidance, which read as follows:

Sec. 307 (d) * * * In determining the justness and reasonableness of such wages and salaries or working conditions the Board shall, so far as applicable, take into consideration among other relevant circumstances:

- (1) The scales of wages paid for similar kinds of work in other industries;
- (2) The relation between wages and the cost of living;
- (3) The hazards of the employment;
- (4) The training and skill required;
- (5) The degree of responsibility;
- (6) The character and regularity of the employment; and
- (7) Inequalities of increases in wages or of treatment, the result of previous wage orders or adjustments.

The wages of this class of employees has not been standardized and made uniform throughout the country, as many people seem to think. Prior to Decision No. 2, they were not so standardized, and the increases made by that decision were arrived at by adding to the various existing rates a uniform increase of a certain number of cents per hour.

The reductions made by Decision No. 147 were similarly arrived at by applying to the various rates established by Decision No. 2 a uniform decrease of a certain number of cents per hour.

BASIS AND ANALYSIS OF DECISION

In this case, the Board adopts as its base the rates fixed in Article III of Decision No. 147, and finds it just and reasonable under the law and the evidence to make the following schedule of decreases per hour:

Sec. 1.—Bridge, building, painter, construction, mason and concrete, water-supply, and plumber foremen (except water-supply and plumber foremen coming under the provisions of section 1 of Article IV, Decision No. 147)5 cents

Sec. 2.—Assistant bridge, building, painter, construction, mason and concrete, water-supply, and plumber foremen, and for coal-wharf, coal-chute, and fence-gang foremen, pile-driver, ditching and hoisting engineers and bridge inspectors (except assistant water-supply and plumber foremen coming under the provisions of section 1 of Article IV, Decision No. 147).....5 cents

Sec. 3.—Section, track and maintenance foremen, and assistant section, track and maintenance foremen3 cents

Sec. 4.—Mechanics in the maintenance of way and bridge and building departments (except those that come within the scope of agreements with the Federated Shop Crafts).....4 cents

Sec. 5.—Mechanics' helpers in the maintenance of way and bridge and building departments (except those that come within the scope of agreements with the Federated Shop Crafts)1 cent

Sec. 6.—Track laborers, and all common laborers in the maintenance of way department and in and around shops and roundhouses not otherwise provided for herein.....5 cents

Sec. 7.—Drawbridge tenders and assistants, pile-driver, ditching and hoisting foremen, pumper engineers and pumpers, crossing watchmen or flagmen, and lamp lighters and tenders5 cents

Sec. 8.—Laborers employed in and around shops and roundhouses, such as engine watchmen and wipers, fire builders, ash-pit men, flue borers, coal passers (except those coming under the provisions of section 3 of Article VIII, Decision No. 147, Coal-chute men, et cetera5 cents

Sec. 9.—For miscellaneous classes of foremen and other employees named in connection with a carrier affected by this decision, but not specifically listed under any section in the classified schedules of decreases, deduct an amount equal to the decreases specified for the respective classes to which the miscellaneous classes herein referred to are analogous.

As an example of the absence of uniform standardization of the wages of the class of employees herein covered, take those embraced in section 6 above—namely, track laborers, et cetera. Under Decision No. 147, the rates of pay of such employees range from twenty-eight cents (28c) per hour to forty cents (40c) per hour. As a matter of fact, the 28-cent rate is found on only a few roads and applies to a comparatively small number of employees. As an illustration of the range of rates of these employees, the rates prevailing under Decision No. 147 on the Southern, the Illinois Central, the Chicago Great Western, the Northern Pacific, the New York Central, and the Atchison, Topeka & Santa Fe railroads are given below.

These railroads are somewhat illustrative of the rates per hour for so-called common labor in the East and West and on roads that run through the North and South:

Southern	Illinois Central	Chicago Great Western	Northern Pacific	New York Central	Santa Fe
29½	29½	37	40	37	29½
30¼	30¼	39½		38¼	30¼
30¾	30¾	40		39½	30¾
31½	31½			40	32
32	32				34
32¾	32¾				34¾
35¼	35¼				35
37	37				35¼
37¾	39				35¾
39	39½				37
39½	40				39
40					40

The range of rates per hour under this decision on said railroads is obtainable by subtracting five cents (5c) from the rates above set out.

The Labor Board is of the opinion that after the reductions made under this decision, common labor on the railroads will still be receiving, as a rule, a wage in excess of that paid to similar labor in other industries, and that the same will be true of all other classes of labor covered by this decision. The Board is of the opinion, however, that the hazards and hardships of the employment, the training and skill required, the degree of responsibility to the public, and other elements mentioned in the statute combine to justify the payment of a better wage to these employees than is paid to similar labor in outside employment.

On a very considerable number of the roads, the foremen and sectionmen are furnished living quarters and fuel by the carrier.

Moreover, the Board is not in sympathy with the idea that a governmental tribunal, empowered to fix a just and reasonable wage for men engaged in serving the public in the transportation industry, should be controlled by the one consideration of the low wages that may be paid to other labor in a period of temporary depression and unemployment. It is but just to say that railway managements have indicated no desire for such a result.

Based upon the evidence before the Board, the statistical department of the Board has made a study of the comparative purchasing power of the wage herein fixed for so-called common labor and the purchasing power of the wage paid such labor on the railroads in December, 1917, immediately prior to Government control of the carriers; in January, 1920, just prior to the termination of Federal control; on May 1, 1920, the effective date of Decision No. 2; on July 1, 1921, the effective date of Decision No. 147; and in March, 1922.

The result of this study is as follows:

AVERAGE HOURLY RATES

December, 1917	19.3c
January, 1920	37.7c
May, 1920	46.3c
July, 1921	37.7c
Under present decision	32.7c

PERCENT OF INCREASE IN AVERAGE HOURLY RATES OVER
DECEMBER, 1917.

January, 1920	95.3	per cent
May, 1920	139.9	" "
July, 1921	95.3	" "
Under present decision	69.4	" "

INCREASE IN COST OF LIVING OVER DECEMBER, 1917

January, 1920	40.0	per cent
May, 1920	52.0	" "
July, 1921	26.7	" "
March, 1922 (Latest available Government data)	17.2	" "

PERCENT OF INCREASE IN PURCHASING POWER OF EARN-
INGS OF SUBSEQUENT DATES AS COMPARED WITH
DECEMBER, 1917

January, 1920	39.5	per cent
May, 1920	57.8	" "
July, 1921	54.1	" "
Under present decision	44.5	" "

Although average hourly earnings of this class of employees are below the earnings prior to Decision No. 2 by five cents (5c) per hour, their value is 3.6 per cent greater due to the decrease in cost of living. The cost-of-living figures set out in the foregoing tables have been compiled from the reports of the United States Department of Labor and are for the latest date for which such data are available.

DECISION

The Railroad Labor Board therefore decides:

(1) That the rates of wages heretofore established by the authority of the United States Railroad Labor Board shall be decreased as hereinbefore set out for the class of employees there named, and that such decreases shall be effective as of July 1, 1922.

(2) That the scope of this decision is limited to the carriers named under Article I herein, to such carriers as may be included hereafter by addenda, and to the specific classes of employees named or referred to under each particular carrier.

(3) That the reduction in wages hereby authorized shall be made in accordance with the following articles which prescribe the regulations and designate the employees affected.

ARTICLE I.—CARRIERS AND EMPLOYEES AFFECTED

[List omitted]

ARTICLE II.—GENERAL APPLICATION

The general regulations governing the application of this decision are as follows:

Sec. 1. The provision of this decision will not apply in cases where amounts less than

thirty (\$30) dollars per month are paid to individuals for special service which takes only a part of their time from outside employment or business.

Sec. 2. Decreases specified in this decision are to be deducted on the following basis:

(a) For employees paid by the hour, deduct the hourly decrease from the hourly rate.

(b) For employees paid by the day, deduct eight times the hourly decrease from the daily rate.

(c) For employees paid by the month, deduct two hundred four (204) times the hourly decrease from the monthly rate.

Sec. 3. The decreases in wages and the rates hereby established shall be incorporated in and become a part of existing agreements or schedules, or future negotiated agreements or schedules, and shall remain in effect until or unless changed in the manner provided by the Transportation Act, 1920.

Sec. 4. It is not intended in this decision to include or make decreases in wages for any officials of the carriers affected except that class designated in the Transportation Act, 1920, as "subordinate officials," and who are included in the Act as within the jurisdiction of the Labor Board. The Act provides that the term "subordinate officials" includes officials of carriers of such class or rank as the Interstate Commerce Commission shall designate by regulation duly formulated and issued. Hence, whenever in this decision words are used, such as "foremen," et cetera, which may apply to officials, such words are intended to apply to only such classes of subordinate officials as are now or may hereafter be defined and classified by the Interstate Commerce Commission as "subordinate officials" within the meaning of the Transportation Act, 1920.

ARTICLE III.—INTERPRETATION OF THIS DECISION

Should a dispute arise between the management and the employees of any of the carriers as to the meaning or intent of this decision, which cannot be decided in conference between the parties directly interested, such dispute shall be referred to the United States Railroad Labor Board in the manner provided by the Transportation Act, 1920.

Sec. 1. All such disputes shall be presented in a concrete and joint signed statement setting forth:

- The specific question involved.
- The facts in the case.
- The position of the employees.
- The position of the management thereon.

Where supporting documentary evidence is used it shall be attached to the application for decision in the form of exhibits.

Sec. 2. Such presentations shall be transmitted to the Secretary of the United States Railroad Labor Board, who shall place same

before the Labor Board for final disposition.
By order of

UNITED STATES RAILROAD LABOR
BOARD,

BEN. W. HOOPER,
Chairman.

Attest:
L. M. PARKER,
Secretary.

Dissenting opinion

The undersigned dissent from the majority decision for the following specific reasons:

(1) The rates of pay established under this decision as the basic minimum rates of the transportation industry will merely perpetuate the low level of purchasing power possessed by this large class of workers in pre-war years. The opinion expressed in the majority decision, that "The Board is not in sympathy with the idea that a governmental tribunal empowered to fix a just and reasonable wage for men engaged in serving the public in the transportation industry, should be controlled by the one consideration of the low wage that may be paid to other labor," would seem to indicate a feeling that the decision should not perpetuate the injustices of a former unregulated period. Below we show clearly the fallacies of attempting to show that the rates of the decision will mean increased purchasing power over pre-war levels.

(2) The rates of pay established under this decision will mean annual earnings far below any minimum standard of subsistence which has been formulated, even below those of most conservative employer groups.

(3) The rates of pay established under this decision are not based upon the human needs of the hundreds of thousands of families involved. They are insufficient to provide these families with the absolute essentials. The earnings of this large group of railroad employees will not provide the father of a family with as much food as is allowed convicts in the Cook County, Illinois, jail.

(4) The pre-war standard perpetuated by this decision was the product of inequitable wage bargains. It is considerably below the level recognized at that time as necessary for the maintenance of health and energy.

UNFAIRNESS OF MAJORITY DECISION ON
INCREASED PURCHASING POWER

The statistical study of the comparative purchasing power of the wage for common labor fixed by this decision and the purchasing power of the wage paid such labor in December, 1917, which serves as the major justification in the majority report, is unfair and misleading.

In the first place it fails to take account of the change in the number of hours constituting the basic working day as between the two periods. During the period covered, the basic day was reduced from 10 hours to 8 hours. According to Wage Series Report No. 3 issued by the Labor Board, the average daily rate of pay for this class of labor was \$1.93 in December, 1917, and will be \$2.62 under this decision. This shows a wage increase amounting to 35.8 per cent, not 69.4 per cent as stated. This would bring a consequent reduction in the figure for the increase in the value of earnings from 44.5 per cent, the figure in the majority report, to 15.9 per cent, which is the correct figure. For, as stated in the report of the Lane Commission—

Reductions in hours are not to be regarded as increases in pay. This rule is made necessary first, by its justice, for it is not to be contemplated that hours are reduced to decrease earnings; and, second, by the impracticability of applying any other rule. * * * We assume the good faith of all reductions in hours as being what they pretend to be.

The Railroad Labor Board has decided that 8 hours shall constitute the basic day for this class of labor, and it must, therefore, in good faith, recognize that the basic earnings of these employees under the decision will be only 35.8 per cent above the level of December, 1917, meaning an increase in purchasing power of only 15.9 per cent instead of 44.5 per cent as stated in the majority report.

In the second place, however, consideration of the entire comparison forces one to the conclusion that the period chosen presents an unfair picture. During the period 1915 to 1917 the cost of living had been rising far more rapidly than the wages of this class of employees. In other words, the \$1.93 per day representing the average wage in December, 1917, meant a lower purchasing power than the average wage in 1915.

This fact is clearly shown in the tables compiled by the statisticians of the Lane Commission. In table 6, Part II, Appendix II of the report of this commission, it appears that the expenditures for necessities of 11 families of railroad employees having incomes up to \$600 exceeded their incomes by a total of \$2,647.95. This deficit is more than double that of the same families for the year 1915, which totalled \$1,028.84. Practically all of the employees in question come within this class. The majority report therefore chose, as a base period, for comparison with the wages of the decision, a year in which this class of labor was suffering an increasing deficit.

It is hardly necessary to point out that a fairer comparison would have gone back to 1915. In that year, according to the Interstate Commerce Commission, the average hourly earnings of sectionmen were 15 cents.

For the 10-hour day this meant earnings of \$1.50. Comparing this with the earnings for the standard day under the majority decision—namely, \$2.62—we find that the level of money wages will be 74.4 per cent above the 1915 level. According to United States Department of Labor reports, the cost of living in March, 1922, was approximately 60.5 per cent above the average for 1915. Combining these two figures we arrive at the correct per cent by which the value of a section man's wages under the majority decision will exceed the value of his wages in pre-war days. It amounts to only 8.7 per cent instead of 44.5 per cent, as indicated in the majority report.

There is however, a third way in which the majority report fails to show the real effect of this decision upon the value of the wages of common labor in the maintenance of way department. The statistics presented deal only with section men. There are roughly 100,000 other unskilled workers who will also be affected by the decision. In the Interstate Commerce Commission classification these are classed as "other unskilled laborers." In the Railroad Labor Board's Wage Series Report No. 3 the number of "other unskilled laborers" is set down as 108,977.

According to the Interstate Commerce Commission report for 1915, this group received an average hourly rate of 18.2 cents in that year. Under the majority decision this same group will average approximately 35.9 cents per hour. Extended to a daily basis this will mean \$2.872 for the standard work day compared with \$1.82 in 1915. In other words, the money wages of this group of employees under the decision will be only 57.8 per cent above those which they received in 1915. This contrasts with an increase in the cost of living, already noted, of 60.5 per cent, showing a decrease of 1.7 per cent in value of their earnings.

Combining the two classes of unskilled employees in the maintenance of way department, we have approximately 380,000 men who will receive money wages for the standard day under the decision only 69.7 per cent above those which they received in 1915. In other words, the increase in the real value of the wages of this group as between the two periods will only amount to approximately 5.7 per cent.

The following short table will summarize the facts discussed above:

Wages of Section Men.

	1915.	Under Present Decision.
Average per hour.....	\$0.15	\$0.327
Average per day	1.50	2.616
Percentage increase in wages	74.4%	
Percentage increase in cost of living	60.5%	

Percentage increase in value of wages 8.7%

Wages of Other Unskilled Laborers.

	1915.	Under Present Decision.
Average per hour.....	\$0.182	\$0.359
Average per day.....	1.82	2.872
Percentage increase in wages	57.8%	
Percentage increase in cost of living	60.5%	
Percentage decrease in value of wages	1.7%	

The Two Groups Combined.

Percentage increase in real wages of both groups (weighted average)	5.7%
---	------

ADEQUACY OF PRE-WAR WAGES

The increase in the value of the wages of this class of employees is, therefore, so small as to be negligible. The vital question is as to the adequacy of the pre-war wage and consequently of the wage established by the present decision. The pre-war wages of this class of workers were established in a labor market which to all intents and purposes was subject to no regulation. The carriers bought this labor as a commodity at the lowest possible figure. Just and reasonable wages could not result from such a process which is the very antithesis of the function which the Labor Board is supposed to perform under the Transportation Act. It seems strange that a responsible body created to establish just and reasonable wages, with certain clearly defined principles laid down, should arrive at wage rates so closely approximating the value of those arising in an utterly unregulated labor market. The majority decision appears in strong contrast with the words of a similar Governmental tribunal, appointed for a similar purpose. The Departmental Wage Board of Review of the United States Navy Department, in its report dated August 31, 1921, said:

The rates of pay that in a large measure determine the rates for all trades and occupations are those granted to first-class laborers, which it will be noted the Board has recommended be fixed at \$0.41 per hour, and the pay for skilled mechanics, or the so-called basic trades, which the Board recommends be fixed at \$0.73 per hour. As far as laborers are concerned, the pay of \$0.41 per hour approximates very closely \$1,000 per year. The Board does not believe that it is decent for the Government to pay less money than this to American citizens with families to support. *** The laborer usually has a family to support and with present prices of the necessities of life, with less than \$0.41 per hour it is practically impossible for him to properly clothe, house, feed and educate his family. The Board believes that it is contrary to the public interest to give less wage than the above to first-class laborers.

In terms of the latest cost-of-living information, that for March, 1922, the amount set forth as a basic minimum would amount to approximately 39 cents per hour, which is 16 cents per hour above the minimum established for section men under the decision.

MINIMUM SET IN MAJORITY REPORT CORRESPONDS WITH MINIMUM WAGE FOR WOMEN WITHOUT FAMILIES TO SUPPORT

According to data contained in the majority report, the minimum hourly rate of pay for section men on the railroads of the United States will, under this decision, be 23 cents. This means earnings for a full-time 48 hour week of \$11.04. The following table shows the latest data as to minimum wages for women in various states:

	Per week
District of Columbia:	
Printing	\$15.60
Hotels and restaurants.....	16.50
Laundries	15.00
Arkansas:	
Stores in Fort Smith.....	13.25
California:	
All occupations	15.00
Kansas:	
Laundries and factories.....	11.00
Mercantile	10.50
Telephones	9.00
Massachusetts:	
Candy and food preparations.....	12.00
Corsets	13.00
Brush making, provisional.....	14.40
Men's clothing	14.75
Women's clothing	14.00
Men's furnishings	13.75
Knit goods	13.75
Office and building cleaners.....	15.40
Paper boxes	15.50
Minnesota:	
All occupations	10.25 to 14.00
North Dakota:	
Waitresses and counter girls.....	14.90
Chambermaids and kitchen help.....	14.20
Mercantile	14.50
Laundries	14.00
Telephone	12.00 to 14.00
Oregon:	
All occupations	13.20
Texas:	
All occupations	12.00
Washington:	
All occupations, except public housekeeping..	13.20
Public housekeeping	14.50
Wisconsin:	
All occupations.....	10.50 to 12.00

From the above table it appears that legal minimum wages in the United States fall primarily in the range from \$11 to \$15 per week. It is a striking fact that the minimum wage for section men under the majority decision is just \$11.04 per week, with an average wage for the 250,000 section men amounting to only \$15.69 per week. This last figure is well within the range of minimum wages for women.

It cannot be too strongly emphasized that a minimum wage for women workers is based upon the presumption that the woman is not responsible for the maintenance of a family, while in any virile nation which desires to preserve its growth and strength a minimum wage for men must rest upon the presumption that the normal employee either is or is to be responsible for the maintenance of a family. According to Justice Henry Bourne Higgins of the Australian Court of Concilia-

tion and Arbitration, writing in the Harvard Law Review, (Vol. XXIX., No. 1)—

The Court announced that it would ascertain first the necessary living wage for the unskilled laborer, and then the secondary wage due to skill or other exceptional qualifications necessary. Treating marriage as the usual fate of adult men, a wage which does not allow of the matrimonial condition and the maintenance of about five persons in a home, would not be treated as a living wage. * * *

One cannot conceive of industrial peace unless the employee has secured to him wages sufficient for the essentials of human existence.

This, the basic wage, must secure to the employee enough wherewith to renew his strength to maintain his home from day to day.

The basic wage is the same for the employee with no family as for the employee with a large family.

Here, we are talking about this basic wage for the unskilled worker on which the entire wage structure of the transportation industry must rest and we find it set at about the level of minimum wages for women without families. Pointing out the difference between a minimum wage for men and a minimum wage for women, Justice Higgins makes the distinction very clear, as follows:

The principle of the living wage has been applied to women, but with a difference, as women are not usually legally responsible for the maintenance of a family. A woman's minimum is based on the average cost of her own living to one who supports herself by her own exertions (italics ours).

It is obviously unjust to except railroad employees who should be responsible for the maintenance of families to endure wages at a level designed as the minimum for the support of single women. Such a comparison shows the inherent absurdity of expecting a male employee to "renew his strength and to maintain his home from day today" on the wages provided in the majority decision.

CONTRAST BETWEEN WAGES OF THE MAJORITY DECISION AND ANY MINIMUM STANDARD WHICH MAY BE CHOSEN

The most important grounds for dissent from the majority decision lie in the contrast between the wages therein provided and any minimum standard of subsistence which has ever been suggested whether by governmental or state departments, investigators for charitable institutions, city bureaus, or by representatives of labor. The wages provided in the decision will enable the average employee of this class to secure little more than one-half of the necessities specified in the majority of these budgets as absolutely essential. This decision will provide the section men with only about two-thirds of the goods provided by the lowest budgets of the National Industrial Conference Board.* As a matter of fact the minimum rates under this decision will scarcely buy the food part

*The National Industrial Conference Board is a co-operative body composed of representatives of national and state industrial associations and is organized to provide a clearing house of information, a forum for constructive discussion, and machinery for co-operative action on matters that vitally affect the industrial development of the nation.

of the minimum subsistence budgets which will be cited, with nothing left for clothing, rent, furniture, heat, light and other essentials.

For purposes of comparison we have had 14 of these budgets brought up to date. None of the budgets can be considered as representing a living wage, that is a wage conforming to American standards of comfort. They are distinctly bare subsistence levels below which it is unsafe to expect families to go.

As shown in the majority statement the minimum earnings of section men will be 23 cents per hour, amounting, for a full 2448-hour year to \$563.04. The average earnings for this occupation will be 32.7 cents per hour, amounting to \$800.50 per year. As a matter of fact in 1915, according to reports to the Interstate Commerce Commission section men only averaged 93.7 per cent, of full time earnings. If during the ensuing year this average holds, the average earnings of this basic occupation in the transportation industry will amount to approximately \$750.07.

The United States Department of Labor in the years 1900-1902 investigated the living costs of 25,440 actual families. Of these, 11,156 were selected because the expenditures for food, clothing, rent, etc., could be segregated. The average in case of these families amounted to \$650.98. The average annual expenditure of these families amounted to \$617.80 or to considerably more than the minimum to be allowed section men under this decision. Between 1900-02 and March, 1922, the cost of living has increased by approximately 126 per cent; in other words, these families would to-day need \$1,401.17 to secure the same standard of living. This is nearly double the average wage of section men under the majority decision.

The accompanying table shows other minimum subsistence budgets, the date at which prepared, the increase in living costs between that date and March, 1922, and the approximate cost of these minimum budgets today.

We are forced to dissent from the establishment of rates of pay which will allow a minimum of \$563.04 and an average of \$800.50 per year to nearly a quarter of a million men at a time when the cost of most conservative subsistence budgets ranges from \$1144.79 up to \$1703.25.

The lowest cost budgets shown in the above table are those of the National Industrial Conference Board. A few remarks on these will clarify the contrast drawn. These

COST OF MINIMUM SUBSISTENCE BUDGETS AT CURRENT PRICES

Budget of—	Date prepared	Original cost	Per cent increases in C. of L.	Cost of Budget March, 1922

*Decreases.

budgets, costing to-day from \$1144.79 to \$1334.70 according to the locality are the less liberal of two minimum budgets prepared by this association of industries. Their food budget eliminates all the choicer cuts of meat, the only fresh meats allowed being flank and chuck beef. The clothing budget is arrived at by establishing the cost of certain minimum requirements and then deducting 25 per cent from this cost "to allow for the different means by which the cost of clothing may be reduced." The budget makes no provision for savings, other than insurance.

The average earnings of the quarter of a million section men, as provided in the decision, are to be less than 70 per cent of the lowest National Industrial Conference Board Budget. The minimum earnings of these section men under the decision will be less than 50 per cent of this lowest subsistence budget.

WAGES HARDLY COVER FOOD COSTS IN MINIMUM BUDGETS

In the majority of budgets cited above, the proportion of the budget devoted to the purchase of foods is given. The following table shows the food cost of these budgets, secured by applying the increase in retail food costs since the budget was prepared to the cost of the food provided at prices then prevailing. The amount remaining over for other expenses in the case of the minimum rate provided in the decision is also shown:

Minimum Earnings of Section Men Contrasted
With Cost of Various Minimum Food
Budgets.

Food Budget	*Cost of minimum food budget	Minimum earnings section men	Amount remaining for other expenses
U. S. Labor Department (1900-2)	\$502.25	\$563.04	\$ 60.79
Louise B. Moore (N.Y.)	589.41	563.04	26.37 deficit
Robert C. Chapin (N.Y.)	620.88	563.04	66.84 "
J. C. Kennedy, Chicago	658.38	563.04	95.34 "
Phila. Bur. Mun. Research	535.59	563.04	27.45
N.Y. Bd. Est. & Appor.	507.07	563.04	55.97
National Industrial Conference Board:			
Fall River	419.10	563.04	143.94
Lawrence	439.84	563.04	123.20
W. Hoboken	502.52	563.04	60.52
Cincinnati	468.33	563.04	94.71
Worcester	474.01	563.04	89.03

*Based on percentage each budget allows for food.

In view of the fact that the landlord is persistent, that fuel is an absolute necessity for cooking if for nothing else, that clothing is generally considered socially desirable, and that other expenses will crop up, it is apparent that the food problem of the maintenance of way family will be acute.

WAGE RATES OF DECISION MEAN UNDER-
NOURISHED FAMILIES

In order to make allowance for the other essentials of a family budget we will follow the relative weights used by the United States Department of Labor. The average rate established by the decision for track laborers will mean possible monthly earnings of \$66.71. The following table shows the distribution of these earnings according to the budgetary requirements:

Item	Weight	Amount per month
Food	38.2	\$25.48
Clothing	16.6	11.07
Housing	13.4	8.94
Fuel and Light.....	5.3	3.54
Furniture, etc.....	5.1	3.40
Miscellaneous	21.4	14.48

In a family of five this will mean an average possible expenditure per person for clothing of \$2.21 per month.

It will be clear to anyone that there are few places where decent housing can be had for \$8.94 per month, while \$3.54 will hardly more than cover gas and electricity, with no allowance for winter fuel.

But the most significant fact is the insufficiency of the allowance for food. A month-

ly expenditure of \$25.48 means 84.9 cents per day. Assuming that the family is normal, equivalent to 3.35 adult males, this will mean the following allowance per day for the feeding of each member of the family.

Member	Equivalent	Amount for food
		cents
Man	1.00	25.3
Wife90	22.7
12-year boy90	22.7
6-year girl40	10.1
2-year boy15	3.8

In other words the youngest child is to have less than a cent and a half per meal.

The inadequacy of 25.3 cents to keep up the health and energy of the wage earner is apparent when we remark that the United States Army, buying in wholesale quantities, to-day spends 40 cents per day for the ration of each enlisted man. Presumably buying on a wholesale basis Cook County, Illinois, is paying 45 cents per day for the feeding of prisoners in the jails. Evidently the track laborer under this decision will secure considerably less than a prison ration.

The clearest picture of the inadequacy of this wage appears, however, when the attempt is made to prepare menus for this worker on the basis of the 25.3 cents which he has to spend. The following menus have been prepared to cover three typical days. The person who prepared these menus was instructed to use the cheapest possible foods with a view to securing the greatest possible nourishment for the money. In the case of each item the cost at current prices and the number of calories is given:

First Day.		
Breakfast.		
.010	2 slices toast—1 square oleo.....	240 Cal.
.023	1 dish prunes (2 ounces).....	300 "
.009	1 cup coffee (condensed milk, 1 teaspoon sugar	85 "
		625 "
Lunch.		
.039	1 ham sandwich.....	250 Cal.
.026	1 doughnut.....	160 "
.030	1 banana.....	127 "
		537 "
Dinner		
.051	Baked beans (¼ pound to 1 ounce bacon).....	295 Cal.
.010	1 slice bread—½ square oleo.....	120 "
.009	1 cup coffee.....	85 "
.058	½ apple pie.....	350 "
		850 "
Total for first day		
\$0.264	2012 Cal.

Second Day.

Breakfast.

.065	1 bowl of oatmeal.....	309	Cal.
.009	1 cup coffee.....	85	"
.074		394	"

Lunch.

.042	1 egg sandwich.....	250	Cal.
.032	1 apple.....	75	"
.016	1 doughnut.....	160	"
.088		485	"

Dinner.

.060	Liver (¾ pound).....	156	Cal.
.017	Potatoes (½ pound).....	435	"
.014	1 slice bread and 1 square oleo.....	140	"
.009	1 cup coffee.....	85	"
.100		816	"

Total for third day.

\$0.292 1695 Cal.

With scarcely any possibility of variety this ration would only average slightly over 1900 calories per day. It is generally recognized that 3500 calories per day is necessary for a man engaged in moderate work.

According to a report published in the leading British Medical Journal, the London Lancet for March 5, 1921:

It has been found by definite measurements that every individual expends daily a certain amount of energy in carrying on the vital processes essential to the continuance of life. In the case of a man at rest in bed, this is equivalent to about 1700 calories per day. This is his basal metabolism. Benedict has shown that in conditions of under-nutrition it may be decreased some 30 per cent, and it may, therefore, be possible for life to be maintained by a resting man on some 1200 calories per day. The performance of any muscular work, even that of sitting in a chair for, say, 16 hours, increases the expenditure of energy roughly to 2,200 calories. While for 8 hours in bed, 14 hours in a chair, and 2 hours of moderate exercise an expenditure of 2,500 calories is required.

We are faced with the extraordinary fact that the track laborer with a family, on the wage carried in the decision, can secure little more than the number of calories required to maintain life without exertion of any kind. He cannot secure as many calories as are required by a man who spends 14 hours of his day in a chair and exercises moderately for only two hours unless he sacrifices some of the other necessities of life.

The appalling fact is even more patent in the case of the minimum rate which will be paid under the decision, 23 cents per hour or \$46.92 per month. Distributing the wage to the different items of a family budget, we get the following table:

Item	Relative weight to total	Proportion of monthly earnings based on percentage in second column
Food	38.2	\$17.92
Clothing	16.6	7.79
Housing	13.4	6.29
Fuel and Light.....	5.3	2.49
Furniture and Furnishings	5.1	2.93
Miscellaneous	21.4	10.04
	100.0	\$16.92

The mere division of this wage shown alone makes it appear inadequate on the face of it. The allowance for clothing, amounting to \$1.56 per member of the family per month can obviously be cut no further. Rental at \$6.29 sounds like a Utopian dream, unless we are to assume that congestion and bad sanitation are tolerable.

The division of the food allowance, which amounts to 59.7 cents per day, among the various members of the family allows the man 17.8 cents per day for three meals, less than half the prison ration in Cook County, Illinois; expressed in terms of meals it would show something like the following:

First Day.

Breakfast.

.045	Bacon—3 slices.....	75	Cal.
.005	1 slice bread.....	100	"
.009	1 cup coffee.....	85	"
.059		260	"

Lunch.

.042	1 meat sandwich (¾ pound).....	278	Cal.
.016	1 doughnut.....	160	"
.058		438	"

Dinner.

.045	Macaroni (¾ pound) and cheese (1 ounce)	525	Cal.
.005	1 slice bread.....	100	"
.009	1 cup coffee.....	85	"
.059		710	"

Total for first day

\$0.176 1408 Cal.

Second Day.

Breakfast.

.019	2 slices toast—1 square oleo.....	240	Cal.
.009	1 cup coffee.....	85	"
.028		325	"

Lunch.

.042	1 meat sandwich (¾ pound).....	278	Cal.
.016	1 cookie.....	50	"
.058		328	"

Dinner.

.047	Pot roast (¼ pound).....	488	Cal.
.017	Potatoes (½ pound).....	435	"
.005	1 slice bread.....	100	"
.009	1 cup coffee.....	85	"
.078		1108	"

Total for second day
\$0.164 1761 Cal.

Third Day.

Breakfast.

.023	1 dish prunes.....	300	Cal.
.020	1 roll.....	100	"
.009	1 cup coffee.....	85	"
.052		485	"

Lunch.

.042	1 egg sandwich.....	250	Cal.
.016	1 cookie.....	50	"
.058		300	"

Dinner.

.044	Baked beans (¼ pound).....	295	Cal.
.005	1 slice bread.....	100	"
.009	1 cup coffee.....	85	"
.016	1 doughnut.....	160	"
.074		640	"

Total for third day
\$0.184 1425 Cal.

Without noting the calories these meals appear inadequate. They supply scarcely enough food to maintain life without exertion.

It is clear, then, that on the basis of the rates of pay established under the majority decision, some quarter of a million railroad employees—an entire class—must forego the thought of a family in order to be sure of enough food to keep themselves from actual starvation. With the development of families under-nourishment will immediately appear.

PRE-WAR WAGE OF SECTION MEN WAS WHOLLY UNJUST

The above-recited facts show the grounds for our dissent. Under the decision the great body of employees in the maintenance of way department will receive real wages at about the same level as prevailed prior to the war. The pre-war wages were established in an overstocked labor market, through railroads or contractors bargaining against the weakness of individual workers in search of a job. Such unregulated conditions cannot serve as a basis for the orderly establishment of just and reasonable wages by such a body as the United States Railroad Labor Board without a complete denial of its functions.

The pre-war wages of these employees in the maintenance of way department were unjust, they were inadequate. During the period 1912-1915 it was generally recognized that a minimum of at least \$800 was necessary for the support of a family. The average annual earnings of section men, in that period, were \$429.93 (I. C. C. Report for 1915).

In No. 9 of the Infant Mortality Series published by the Children's Bureau of the

United States Department of Labor, page 30, appears the following:

A striking relationship between the infant mortality rate and the fathers' earnings is shown in table XVIII, the highest rate, 179.5, is for infants whose fathers are in the lowest earning groups, and the lowest rate, 22.2, is for those whose fathers are in the highest group. The mortality rate, with a single exception, falls consistently as the fathers' earnings increase, but the rate does not fall below 100 until the group \$850 to \$1,049 is reached; from this point the fall in the rate is very marked. In other words, the babies in families where the earnings of the father are low die at a much higher rate than do those whose fathers are able to provide sufficient care for them. Poverty with its concomitants is an important factor in infant mortality.

This appears in the report covering an investigation in Saginaw, Mich., in 1913. The same fact is pointed out in reports covering investigations in Akron, Ohio, Brockton, Mass., Johnstown, Pa., New Bedford, Mass., Waterbury, Conn., and Manchester, N. H.

The following table shows clearly the level of earnings below which infant deaths multiply. And it should be noted that the earnings of section men in 1915 fell into the lowest income class shown.

Infant Mortality Rates (1913-1914) For Five
Cities Specified, According to Earnings
of Father, From Studies by U. S.
Children's Bureau.

Earnings of father	Akron, Ohio	New Bed- ford, Mass.	Water- bury, Conn.	Man- chester, N. H.	Sagi- naw, Mich.
Under \$450....	117.1	*203.0	*154.0	*244.0	179.5
\$450 to \$549....	118.0	*129.0	*147.0	*174.0	112.2
\$550 to \$649....	89.7	115.8	*143.0	174.5	103.4
\$650 to \$849....	103.0	98.4	*118.0	162.6	105.7
\$850 to \$1049..	82.0	134.7	*85.3	125.0	44.6
\$1050 to \$1249..	58.4	*58.0	*89.0	*70.0	33.0
\$1250 and over	40.0	*60.0	*68.0	*58.0	22.2

*Approximated from a chart, the basic figures for which were not given. See page 39 of Infant Mortality, Series No. 11 of Children's Bureau, U.S. Dept. of Labour.

DECISION MUST BE BASED ON HUMAN NEEDS

We must, therefore, dissent from the decision which tends to perpetuate as the basic minimum of the railroad industry a wage level established in a wage market dominated by the impersonal law of supply and demand with the employer in this strategic position. Justice Higgins of the Australian Court of Conciliation and Arbitration shows clearly the difference which should exist between minimum rates established by such a Board and those arising in the open market, in the following quotation:

The imposition of a minimum wage below which an employer must not go in employing a worker of a given character implies, of course, an admission of the truth of the doctrine of modern economists, of all schools I think, that freedom of contract is a misnomer as applied to the contract between an employer and an ordinary individual employee. The strategic position of the employer in the contest as to wages is much stronger than that of the individual employee, the power of the employer to withhold bread is much more effective weapon

than the power of the employee to refuse labor. Low wages are bad in the workers eyes, but unemployment with starvation in the background is worse. (Harvard Law Review, Vol. XXIX, No. 1.)

Justice Higgins emphasizes the importance of setting a proper basic wage, as follows:

The "basic" or living wage, the minimum for the unskilled worker is the primary factor in the fixing of all wages by award; and the fixing of the proper basic wage is necessarily of an importance that can hardly be exaggerated. (Harvard Law Review, Vol. XXXII, No. 3.)

In commenting upon one of his cases he says:

Not only in the vastness of the sums involved, but in the effects on families and the proper nurture of children, and in indirect consequences in all employment, the responsibility of the Court is very grave. The decisions of the Court probably affect directly more human lives than the decisions of all the other courts. (Ibid.)

We believe that in this decision the Labor Board is changing hundreds of thousands of families—it is touching the proper nurture of hosts of children. It must adopt the attitude expressed by Justice Higgins, setting the basic minimum of a great industry in terms of human needs.

The human needs of these hundreds of thousands of families were vividly brought before the Board by representative families. They showed humanly what statistics can show at best only coldly—the inadequacy of the basic wage rates prevailing prior to this decision.

EXPRESSION FROM EMINENT SOURCES

In addition to the foregoing, we desire to make brief reference to views enunciated by men of prominence, which to our minds, indicates the trend of the leading thought and opinion regarding this most important subject.

The following brief quotation is from a speech by President Harding in New York City, May 23, 1921 (as reported in the Baltimore Sun of May 24, 1921). It constitutes one of the very best statements ever made as to the significance and content of the living wage idea. President Harding says:

In our effort at establishing industrial justice we must see that the wage-earner is placed in an economically sound position. His lowest wage must be enough for comfort, enough to make his house a home, enough to insure that the struggle for existence shall not crowd out the things truly worth living for. There must be provision for education, for recreation, and a margin for saving. There must be such freedom of action as will insure full play to the individual's abilities.

This is a highly pregnant paragraph. President Harding states his conviction that the lowest wage paid to a wage earner must be sufficient, not only to provide the material necessities of life, such as food, clothing and shelter, but he must also get a sufficient wage to obtain a degree of comfort, to make "his house a home," and to insure him "the things truly worth living for."

The specific "things" mentioned are:

1. Provision for education.
2. Provision for recreation.
3. A margin for savings.
4. Freedom of action to insure full play to the individual's abilities.

The following is a statement of principles governing the awards of the United States National War Labor Board, agreed upon in conference between Capital and Labor, and proclaimed by the President of the United States in 1918.

The Living Wage.—1. The right of all workers, including common laborers, to a living wage is hereby declared.

2. In fixing wages, minimum rates of pay shall be established which will insure the subsistence of the worker and his family in health and reasonable comfort. (Proclamation, p. 9.)

In the very recent past the Secretary of Labor, Honorable James J. Davis, contributed a series of articles on the question of "Saving Wage," the articles of Mr. Davis appearing in the Chicago Tribune. The following appears in the first of the series of articles contributed by Mr. Davis:

War first gave us the living wage as a thing to think about. Since then it has stayed with us, as a phrase, a label for the amount of money that it was supposed to represent. We still hear much about it with a good deal of confusion as to what is meant by a living wage. The trend of events since the war has put the employer in the position of clinging to the original meaning of the term, as a wage adjusted to the actual cost of living.

But to the wage earner himself the living wage has come to mean something more definite. If it means anything to him the living wage means a wage on which he can really live—that is, a pay envelope that will permit him to do a little more than merely meet the day-to-day cost of his necessities and enjoy something of life in addition. * * *

In his thoughts the merely living wage, in its original meaning is something obsolete. He will never willingly go back to it. To this fact we may as well reconcile ourselves, and adjust our economic life to it * * *

A very few reactionary minds among us may still cling to the literal interpretation of a living wage as one to meet the cost of living only; but these I feel sure will be pushed aside by the greater number of more liberal-minded Americans who in the future will be sure to put a broader conception on the term, "a living wage."

The following appears in Article II:

He is no longer a mere worker at a bench, an automaton. His intelligence has been expanded by new and rapid experiences. His tastes have been heightened along with the increase in his intelligence. He too has risen to the enjoyment of books, pictures, music and the theater—a chance at the higher education—to cite but a few of his demands.

In other words the newly enlightened workingman has risen to a new place as a human being and as a member of our rich community. Conscious of having taken that place, he is now entitled to insist upon enjoying all the advantages of it.

The following is an extract from report of the Second Industrial Conference called by President Wilson, 1920:

Considered from the standpoint of public interest, it is fundamental that the basic wages of all employees should be adequate to maintain the employee and his family in reasonable comfort, and with adequate opportunity for the education of his children. When the wages of any group

fall below this standard for any length of time, the situation becomes dangerous to the well-being of the State. No country that seeks to protect its citizens from the unnecessary ravages of disease, degeneration and dangerous discontent, can consistently let the unhampered play of opposing forces result in the suppression of wages below a decent subsistence level. Above that point, there may well be a fair field for the plan of competition in determining the compensation for special ability, for special strength or special risk (where risk is unavoidable), but below that point the matter becomes one of which the State for the sake of its own preservation, must take account.

The following is an extract from the record of hearings before the Senate Committee on Interstate Commerce, Washington, Monday morning, April 17, 1922, page 4391:

"The Chairman (Senator Cummins): I suppose those who framed the law never dreamed that when the Government undertook to fix wages that the wages of any man who was required to work would be less than would be necessary to support him and his family in reasonable comfort.

"Mr. Lauck: No sir, that is our contention. Of course, we cannot conceive anything else. And it is an actual fact now, Mr. Chairman beyond any possibility of contradiction that the lowest paid men cannot live on the wages that the railroads are paying. It is heartrending to hear the testimony of these employees. And then when you get into the highest paid employees, about which the railroads have made these gross statements, you find they are receiving a minimum wage, and nothing for skill and experience. And another consideration that is important there, Mr. Chairman, is this: That if the Labor Board does not take the view that the just and reasonable wage shall be adequate for the lowest-paid worker to maintain himself and his family in comfort—of course, it is inconceivable that they should not take that view, but they have not passed on it—if they do not take that view, then they are only a register of the supply and demand of labor; that is, they are a barometer of the supply and demand and violate the whole fundamental principle of the Transportation Act. I was going to bring that out later.

"Senator La Follette: In applying the rule of 'just and reasonable, in wages, as laid down in the Transportation Act, Congress adopted the same phraseology as it did in the dealing with rates and commodities.

"Mr. Lauck: Yes sir.

"Senator La Follette: And omits all regard of the human element.

"Mr. Lauck: Yes; there are absolutely no human standards set forth specifically, I think really the intent of Congress—

"The Chairman (Senator Cummins) Interposing: I think the words 'just and reasonable' do embrace that.

"Mr. Lauck: I think it would imply that, but the railroads interpret that to mean comparative with other industries, and bring forth argument that the railroads should not have more highly paid clerks or employees. Of course, the answer to that is that this is a semi-public body of workers, and they must consider standards that in the restrictions of other industries would not be considered.

"The Chairman: My view of it is that here are two men, and one man may agree to work for the other at any wage that he would be willing to accept, whether it is just and reasonable or not, but when organized society comes to fixing the wage, it is no more right to fix a wage below the point of living and comfortable living than it is to fix a return on capital below a reasonable point."

The following appears on page 925. Hearings before the Committee on Interstate Commerce, United States Senate, February 3, 1922. (Mr. James A. Emery, General Counsel of the National Industrial Council, Washington, D. C.):

"Mr. Emery: Yes; and now we have the fact presented, that there are petitions for reductions in rates. We have the evidence that they cannot be asked to continue unless they can reduce their operating expenses. And the assertion is made—and I am speaking of assertions only now—the assertions are made that the classifications and standards, as well as the wage rates of those engaged on the railroads,

is incomparable with that of other individuals outside of the railroads and railroad shops.

"The Chairman (Mr. Cummins): That, however, is all within the jurisdiction of the Labor Board, the classifications and everything that affects labor employed by the railroad company; all these things are within the jurisdiction of the Labor Board. Now, when you come to the proposition that the Labor Board must accept as conclusive and act, at any rate, on the rate of pay which may be general in private employment for a somewhat similar service, then you also reach one of the most difficult points in the administration of the law, or in the regulation of railroads. As I said a few moments ago, they must consider that—the law says they must consider that. But suppose the rate of pay in private employment was lower than would support human life or support a man reasonably and fairly, you do not think, do you, that the Labor Board could say to the railroad men that they must work for less than a living wage because some of their associate laborers in other fields were willing to work for less than a living wage?

"Mr. Emery: Certainly not."

All of the best thought of the day is to the effect that wages of working people should not fall below a level which will permit them to live in a fair state of comfort, health and decency. In a word, the "living wage" or "saving wage" is almost universally regarded as a social and economic necessity.

For the reasons set forth, the undersigned are unable to concur in the decision fixing a further reduction in the basic minimum rates of pay in the transportation industry.

ALBERT PHILLIPS,
W. L. McMENIMEN.

United States Railroad Labor Board

Decision No. 1036 (Docket 1300)

Issued June 5, 1922, Effective July 1, 1922.

Alabama & Vicksburg Railway Company et al. vs. Railway Employees' Department, A. F. of L. (Federated Shop Crafts) et al.

HISTORY OF THE CONTROVERSY

The Railroad Labor Board by Decision No. 2, effective May 1, 1920, increased the wages of this class of employees, along with others, on all the railroads then before the Board. That decision was rendered at a time when living costs and wages were at their summit. Shortly afterward, living costs and wages in general began to decline.

The Labor Board by Decision No. 147, effective July 1, 1921, reduced the wages of this class of employees on all the carriers before the Board.

These two Decisions, Nos. 2 and 147, were handed down by the Board after a full hearing of all parties. The Board endeavored in said cases, as it does in the present one, to observe the provisions of the Transportation Act, 1920, prescribed for its guidance, which reads as follows:

Sec. 307 (d) * * * In determining the justness and reasonableness of such wages and salaries or working conditions the Board shall, so far as applicable, take into consideration among other relevant circumstances:

- (1) The scales of wages paid for similar kinds of work in other industries;
- (2) The relation between wages and the cost of living;
- (3) The hazards of the employment;
- (4) The training and skill required;
- (5) The degree of responsibility;
- (6) The character and regularity of the employment; and
- (7) Inequalities of increases in wages or of treatment, the result of previous wage orders or adjustments.

The wages of the respective crafts herein referred to were practically uniform throughout the country by orders of the United States Railroad Administration, which rates were in effect immediately prior to the issuance of Decision No. 2 of the Labor Board, which was effective May 1, 1920. Under that decision new rates were established by adding the increase of a certain number of cents per hour.

The reductions made by Decision No. 147 were similarly arrived at by applying to the various rates established by Decision No. 2 a uniform decrease of a certain number of cents per hour.

BASIS AND ANALYSIS OF DECISION

In this case, the Labor Board adopts as its base the rates fixed in Article IV of Decision No. 147, and finds it just and reasonable under the law and the evidence to make the following schedule of decreases per hour:

- Sec. 1.—Supervisory forces whether paid by the month or by the hour.....no decrease
- Sec. 2.—(a) Machinists, boilermakers, blacksmiths, sheet-metal workers, electrical workers, carmen (except freight carmen), moulders, cupola tenders and coremakers, including those with less than four years' experience, all crafts.....7 cents
- (b) Freight carmen.....9 cents
- Sec. 3.—Regular and helper apprentices and helpers, all classes.....7 cents
- Sec. 4.—Car cleaners.....5 cents

The Labor Board is of the opinion that after the reductions made under this decision, shop employees on the railroads will still be receiving as a rule, a wage in excess of that paid to similar employees in other industries.

The foregoing table of decreases has the effect of maintaining the uniform rates for the respective classes which were continued by Decisions Nos. 2 and 147. It will be noted that the differential between "freight carmen" and the other classes have been increased 2 cents per hour by providing a decrease of 9 cents per hour for this class as compared with 7 cents per hour for the other crafts named. The Board recognizes that there are certain branches of carmen's work which require the service of skilled mechanics, and for the classes so considered this decision provides a decrease of 7 cents

per hour. It is, however, believed that the work of "freight carmen" is not of a character which requires the service of men as skilled as in other branches of work coming within the scope of carmen's work; therefore, the differential between the minimum rates of "freight carmen" and of the other shop crafts under this decision will be increased to 7 cents per hour, which it is felt is just and reasonable considering the character of service performed and the rates of pay and working conditions applicable to this class of employees prior to the issuance of any wage order by the United States Railroad Administration.

It will be further noted that no decrease is provided herein for "supervisory forces." The Board, after due consideration, feels that the duties and responsibilities of these positions are of such a character as to warrant the maintenance of the present rates.

Based upon the evidence before the Labor Board, the statistical department of the Board has made a study of the comparative purchasing power of the wage herein fixed for certain of the shop crafts and the purchasing power of the wage paid such employees on the railroads in December, 1917, immediately prior to Government control of the carriers, in January, 1920, just prior to the termination of Federal control; on May 1, 1920, the effective date of Decision No. 2; on July 1, 1921, the effective date of Decision No. 147, and in March, 1922.

The results of these studies are as follows:

	AVERAGE HOURLY RATES	
	C.	C.
December, 1917.....	50.5	37.7
January, 1920.....	72.3	68.0
May, 1920.....	85.3	81.0
July, 1921.....	77.3	73.0
Under present decision.....	70.3	64.4

PERCENTAGE OF INCREASE IN AVERAGE HOURLY RATES OVER DECEMBER, 1917

	Per cent	Per cent
January, 1920.....	43.2	80.4
May, 1920.....	68.9	114.6
July, 1921.....	53.0	93.6
Under present decision.....	39.2	70.8

INCREASE IN COST OF LIVING OVER DECEMBER, 1917

	Per cent
January, 1920.....	40.0
May, 1920.....	52.0
July, 1921.....	26.7
March, 1922 (Latest available Government data).....	17.2

PERCENTAGE OF INCREASE IN PURCHASING POWER OF EARNINGS OF SUBSEQUENT DATES AS COMPARED WITH DECEMBER, 1917

	Per cent	Per cent
January, 1920.....	2.3	28.9
May, 1920.....	11.1	41.2
July, 1921.....	20.8	52.8
Under present decision.....	18.8	45.7

Although average hourly earnings by machinists are below the earnings after Decision No. 2 was applied by 15 cents per hour, their value is 6.9 per cent greater due to the decrease in the cost of living.

The average hourly earnings of carmen are below the earnings after Decision No. 2 was applied by 16.6 cents per hour, but their value is 3.2 per cent greater for the same reason.

The cost of living figures set out in the foregoing tables have been compiled from the reports of the United States Department of Labor and are for the latest date for which such data are available.

DECISION

The Railroad Labor Board, therefore, decides:

(1) That the rates of wages heretofore established by the authority of the United States Railroad Labor Board shall be decreased as hereinbefore set out for the classes of employees there named, and that such decreases shall be effective as of July 1, 1922.

(2) That the scope of this decision is limited to the carriers named under Article I herein, to such carriers as may be included hereafter by addenda, and to the specific classes of employees named or referred to under each particular carrier.

(3) That the reduction in wages hereby authorized shall be made in accordance with the following articles which prescribe the regulations and designate the employees affected.

ARTICLE I.—CARRIERS AND EMPLOYEES AFFECTED

[List omitted]

ARTICLE II.—GENERAL APPLICATION

The general regulations governing the application of this decision are as follows:

Sec. 1. Decreases specified in this decision are to be deducted on the following bases:

- (a) For employees paid by the hour, deduct the hourly decreases from the hourly rates.
- (b) For employees paid by the day, deduct eight times the hourly decrease from the daily rate.
- (c) For employees paid by the month, deduct two hundred four (204) times the hourly decrease from the monthly rate.

Sec. 2. The decreases in wages and the rates hereby established shall be incorporated in and become a part of existing agreements or schedules, or future negotiated agreements or schedules, and shall remain in effect until or unless changed in the manner provided by the Transportation Act, 1920.

ARTICLE III.—INTERPRETATION OF THIS DECISION

Should a dispute arise between the management and the employees of any of the carriers as to the meaning or intent of this decision, which cannot be decided in conference

between the parties directly interested, such dispute shall be referred to the United States Railroad Labor Board in the manner provided by the Transportation Act, 1920.

Sec. 1. All such disputes shall be presented in a concrete and joint signed statement setting forth:

- (a) The specific question involved.
- (b) The facts in the case.
- (c) The position of the employees.
- (d) The position of the management thereon.

Where supporting documentary evidence is used it shall be attached to the application for decision in the form of exhibits.

Sec. 2. Such presentations shall be transmitted to the Secretary of the United States Railroad Labor Board, who shall place same before the Labor Board for final disposition.

By order of

UNITED STATES RAILROAD LABOR BOARD,

BEN W. HOOPER,
Chairman.
Attest:
L. M. PARKER,
Secretary.

Dissenting Opinion

The undersigned dissent from the majority decision for the following specific reasons:

(1) The wage structure for the transportation industry which is being built up in this series of decisions rests upon no consideration of the human needs of the employees affected. These human needs were set forth by data and witnesses at the recent hearings with compelling force. The majority have not considered the evidence on this point, nor have they met the issue raised. Their failure to give this, the most vital element, consideration and to inform the public impartially on the subject, vitiates the whole decision.

(2) The evidence submitted in the recent hearings tended to show that an income based on the 77-cent per hour rate does not enable representative shop-craft families, with the most economical management to procure enough food for their families, or to maintain their own efficiency. This evidence included a tentative standard of living expressed in terms of goods and services to which mechanics naturally feel themselves entitled. At the current prices an increase in pay would be necessary to enable these employees to secure such a standard. Without any attempt to show that the employees affected by this decision are not entitled to such a standard, and further without any attempt to show how families can make good the food deficits, the majority decision further reduces the ability of these employees

to meet the needs of their families. The undersigned dissenting members feel that the Labor Board must initiate a study which shall determine the amount necessary to meet some recognized standard, that it must use the results as a basis for its decisions, and that it must through this decision transmit this information to the public.

(3) The rates of pay contained in the award, being insufficient to provide for a family of five, tend to substantiate the position taken by management to the effect that wages need not be established with reference to the needs of a family of this size. The most careful and comprehensive investigation on this subject shows that wages which do not provide for a family of that size mean that 72 per cent of all children in families receiving this wage will be inadequately provided for during at least five critical years of their lives. Permanent traces of this malnutrition will be left on the physique of the next generation.

(4) The failure of the majority to consider the real merits of the case has created a wage structure which has no relation to any existing standards. Based on evidence in possession of the Labor Board, the minimum for the industry should have been nothing less than 50 cents per hour. Without, for the moment, questioning the justice of the differentials resulting from the majority decision, this would place the mechanics' rate at least as high as 87 cents per hour.

(5) The ordering of a larger decrease in the case of freight carmen is unjust and wholly inconsistent with former decisions of the Labor Board. In ordering such a change, the majority disregard the fact that any difference in skill which may exist has been already provided for in the 5-cent differential which dates from the days of the United States Railroad Administration. They also disregard the fact that under the classification rules of the Board freight carmen are mechanics and as such are entitled to the minimum rate for mechanics.

(6) The rates of pay established in this decision will mean to the employees affected lower purchasing power and lower standards as compared with pre-war years. From December, 1917, to the present decision, inclusive, the maintenance of equipment forces have suffered a constant deficit, their wages at all times failing to keep pace with living costs. The figures cited by the majority to the contrary effect are a misrepresentation of the true facts as to the relative earnings involved.

(7) The savings to the railroads, as a result of the decisions of the Labor Board and of the lay-off of men, far exceed anything justifi-

fied by the savings to the public in reduced rates. The employees covered by this decision alone have had their payroll cut to the extent of \$371,817,996 per year, as hereinafter set out, based on number of employees in service as of December, 1917, while the total payroll cuts due to decisions alone total more than half a billion dollars. During the last six months of 1921 the total payroll slash, including the lay-offs, was running at the annual rate of \$1,300,000,000. This diminished purchasing power of the employees as a group appears in strong contrast with the increasing prosperity of the railroads noted by the Interstate Commerce Commission in its recent opinion and by the financial press.

(8) The increasing antithesis between profits and just wages will result in lower morale among the railroad employees; thus the present wage reductions will not result in economies and will prove contrary to the real needs of efficient and economical management.

(9) The majority have failed to carry out the function for which the Labor Board was created. Such decisions, containing no explanation of the process by which the majority arrive at the rates established, give the public an impression that these rates are not founded upon a careful consideration of the facts. A strong contrast is presented with the decisions of other wage boards, not only in this country, but in other parts of the world, as well as with the decisions of the Interstate Commerce Commission, which show the public at considerable length how the evidence was weighed and the conclusions reached.

In the light of the Transportation Act it is the clear duty of the Board: First, to act as a constructive, impartial body in providing means whereby railroad employees can have their legitimate human needs satisfied without recourse to stoppages; and, secondly, to enlighten the public so that through the disordered state of unregulated industry and the confusion of propaganda, they shall be able to see the real facts as they affect the body politic. The decision in question fulfils neither of these duties.

These reasons for our dissent are dealt with briefly in the order enumerated.

THIS DECISION MUST BE CONSIDERED AS RELATIVE TO THE PRECEDING DECISION

This decision is one of a series covering the various groups of railroad employees, but the problem will be misunderstood if these decisions are considered separately. Together they really constitute a single decision which determines for the time being the wage structure of the industry. The pro-

blem involved in this series of decisions has been clearly stated by Justice Higgins, already quoted, as follows:

The Court adheres to its practice of dividing the minimum wage awarded into two parts: The "basic wage"—the minimum to be awarded to unskilled laborers on the basis of "the normal needs of an average employee regarded as a human being living in a civilized community"; and the other, the "secondary wage"—the extra payment to be made for trained skill or other exceptional qualities necessary for an employee exercising the functions required.—(Harvard Law Review, Vol. XXXII, No. 3, p. 191.)

Obviously, the justice of the entire wage structure in an industry rests upon the justice of the "basic wage." The justness of this basic wage depends upon the extent to which the Board treats "the proper sustenance of the persons employed on the basis of a family life..... as a first charge on the product," to use the phrases of Justice Higgins.

This decision, in effect, establishes a group of secondary wages or differentials. Such a decision can be just and reasonable only to the extent that it is based on a primary wage determined through exhaustive study of the human needs of the common laborer's family, coupled with a systematic determination of the differentials of skill and responsibility represented in the occupations covered, and of the differentials of payment necessary to secure and encourage the requisite ability. If the Labor Board had determined the section man's wage rate on a just and reasonable basis, we should not here be concerned with the minimum amount necessary to sustain a family, any more than Congress was so concerned when it fixed the salaries of members of the Labor Board.

According to Justice Higgins, the Court is to-day working on the basis of a minimum wage determined by a rough estimate of what was necessary to support a family in Melbourne in 1907, which is varied according to changes in the cost of living. It is interesting to note that this basic wage raised the minimum to a level over 27 per cent above the then existing average for unskilled labor. But, according to Justice Higgins, "There is no doubt that the rough estimate made by the Court in 1907 ought to be superseded or revised by a new investigation made after so many years have elapsed as to the absolute present cost of living."

Now such an investigation of the absolute cost of living as the bases for the minimum wage in the transportation industry is clearly within the function of the United States Railroad Labor Board. It is, in fact, its duty. The first principle laid down in the Transportation Act to govern decisions of the Board is:

"The relation between wages and the cost of living."

This, clearly, is the principle which must be given primary consideration in the determination of the basic minimum of the whole wage structure. It is also a point on which the public has a right to ask information.

EVIDENCE BEFORE THE BOARD ON ABSOLUTE COST OF LIVING NOT CONSIDERED

The center of the case presented by the employees dealt with the question of the actual cost of the necessities of family life. This evidence consisted of far more than the pricing of "theoretical" family budgets. It included the actual monthly expenditure accounts of the families of railroad employees. It included witnesses, railroad employees and their families who showed the Board from personal experience the impossibility of providing for a family on the wages prevailing before this decision.

The undersigned must dissent from a decision which has ignored these witnesses, the human needs of these tens of thousands of families, which has given them not one word of answer. To them the statement that they are hypothetically 40 per cent or 30 per cent or 20 per cent better off than they were in December, 1917, or in any other period, must sound like a rather bitter jest.

The representative of the shop crafts asked the Board to consider the wage question from the point of view of the needs of the families expressed in quantities of food, clothing, fuel, etc. And it appears to the undersigned dissenting members of the Board that the basic cause of disagreement lies in the failure to consider this point or view.

In a decision a reduction of 7 cents an hour is impersonal, it has little to suggest the human side. Consideration of the quantities of food, clothing, etc., which such a reduction will subtract from a family budget will force Board members and the public to test the sincerity of their conclusions. And such a test is essential where the pressure of conflicting interests is prone to force a man to take the easiest road out. In dealing with minimum wages the easiest road out may work irreparable harm to hundreds of thousands of persons, many of them children.

The evidence presented by the shop crafts purported to show that the existing wage rates were so inadequate as to force the families dependent upon them to cut down the quantity of food purchased below the level which scientists have determined as necessary to health and full energy. Taking the food budget prepared by Professor Jaffa of the University of California for a family of five as a basis, the data presented showed that where 210 pounds per month of meat, fish, milk, eggs and beans are required, families with an average income of \$1900 per

year were able to purchase only 134 pounds; that where 104 pounds of flour, cereals and rice are required, they could purchase only 80 pounds; and where 160 pounds of potatoes, vegetables, and fruits were required, they were able to purchase only 146 pounds. To summarize the matter, the evidence showed that just and reasonable wages must increase existing rates so as to make good the following monthly food deficits:

Meat, fish, milk and eggs.....	75 lbs.
Flour, cereal, rice, etc.....	24 "
Potatoes, vegetables and fruits.....	14 "
Butter, oils and fats.....	6 "

These deficits are below what Professor Jaffa calls "the danger line below which it is precarious to go."

The Labor Board was created to insure the efficient and uninterrupted use of the transportation system. The shop crafts have cited medical authorities to the effect that steady efficient service is physiologically and psychologically impossible where the bodily needs and normal desires are unsatisfied. Mr. B. Seeböhm Rowntree, a well-known British authority, writing in the February, 1917, issue of "The 19th Century and After," puts the matter forcefully thus:

Now, in pursuing the quest for industrial efficiency, the first problem that meets us is that of the level of wages.

In the course of the discussion he speaks of a bare "physical efficiency wage." In some ways this is a good expression for it reveals the shortsightedness of those who advocate low wages. It seems to the dissenting members that the fixing of such a wage is mandatory upon the Labor Board, and we cannot agree to a decision which falls far short of that standard.

The representatives of the shop crafts offered a quantity budget to show the least amount which would enable them to render the service required for the efficient and economical conduct of the transportation industry. The standard set was frankly not a minimum subsistence standard—it was an economical comfort standard such as a skilled man, with four years of mechanical training behind him, may rightfully expect. The cost of this budget was shown to be approximately \$2,600 per year and provided for a family of five.

In this connection it appears that under Decision No. 147 the skilled railroad mechanic can get only approximately 70 per cent of the supplies and services enumerated. The following comparison between the annual full-time earnings of railroad mechanics under various decisions and the cost of two important minimum comfort budgets shows clearly that the present rates of pay are not justifiable:

RAILROAD MECHANIC'S EARNINGS FOR FULL YEAR COMPARED WITH COST OF NECESSARY SUPPLIES.

Annual earnings under present decision.....	\$1713.60
Annual earnings under Decision No. 147.....	\$1884.96
Annual earnings under Decision No. 2.....	\$2080.50
Cost of U. S. Dept. of Labor budget.....	\$2303.96
Cost of Railway Employees Dept. budget.....	\$2636.97

We are not completely satisfied with the budget which the shop crafts have prepared. In the nature of the case the means for the exhaustive study necessary is not at their disposal. As a matter of fact, it was put forward merely as a basis of discussion with the request that the Labor Board and the representatives of management join in the work of establishing such a standard.

Before the Labor Board can establish a just and reasonable basic wage it will have to follow this line, dealing with the needs of the employees. These needs can be scientifically determined within fairly narrow lines. They can be determined from the point of view of the life of the community and from the point of view of the potential working power of the railway personnel. The failure of the Board to deal with this question is but one instance of the more general failure to give thorough consideration to the merits of the case before arriving at a decision.

A JUST WAGE MUST BE A FAMILY WAGE

In general the majority decision of the Labor Board merely followed the representatives of management in ignoring the whole question raised. Representatives of management have, however, attacked the proposition on one point, that is, the fact that provision is asked for a family of five. Using census figures, they found 4.4 persons as the average family instead of 5, and 1.4 dependent children instead of 3. This point has been brought out before the Board and almost continuously before the public. In its consideration of the matter the public has, therefore, a right to demand something authoritative.

Mr. B. Seeböhm Rowntree is one of the leading authorities. Full consideration of this question of the family will be found in Chapter I, of his book entitled "The Human Needs of Labour," which is based upon a thorough study made in New York in 1911. Mr. Rowntree sums up his investigation as follows:

The table on page 32 shows that half the men have had three or more children simultaneously dependant on them for shorter or longer periods. Nearly one-half (46.4 per cent) have three or more dependent children for periods of at least five years. Thus it seems clear that in fixing minimum wages at least three children per family must be allowed for, since no minimum wage basis could seriously be regarded as satisfactory which for so many years was insufficient for one family out of every two.

Of course employers may argue that they should not have to pay minimum wages, which are based upon transitory needs, during the whole of a working man's life. If the period of special pressure on the workman's purse only lasted for a few months, this argument might hold good. But we have seen from the table that 46 per cent of the men have three or more dependent children for five years or more; years, too, which are very critical from the standpoint of the future, since the mother is having children, and the

framework of their bodies is being built up. Malnutrition lasting over five years of childhood will leave permanent traces on the physique of the next generation. Besides, even if the minimum is in excess of the day-to-day needs, after the exceptional stress is over the surplus will be needed to enable parents to save something toward their old age. (pp. 34-35.)

Even more important, however, is the proposition of children living in families with three or more dependent children. According to Mr. Rowntree—

An examination of the preceding tables and diagram shows that if we are to base minimum wages on the human needs of families with less than three children, 80 per cent of the children of fathers receiving the bare minimum wage would for a shorter or longer period be inadequately provided for, and 72 per cent of them would be in this condition for five years or more. If we allowed for three children per family in fixing minimum wages, 62 per cent would, for varying periods, be inadequately provided for, and 54 per cent would be in this condition for five years or more. If we allowed four children per family 43 per cent of the children would still, for varying periods, be inadequately provided for, and 38 per cent would be in that condition for at least five years; and even if we allowed five children per family, 24 per cent of the children would be inadequately provided for, and over 20 per cent would be in that condition for five years or more. In view of these facts it will, I think, be clear that any suggestion that minimum wages should be based on less than a standard of three children per family, as some authorities have recommended, is entirely ruled out of court. * * * (pp. 40-42).

ENTIRE WAGE-RATE STRUCTURE OUT OF LINE

It is clear that the majority have failed to consider the real issues involved in the determination of the basic minimum wage and the secondary wages in the transportation industry. The text of the decision gives no evidence of any such consideration. As already pointed out in the dissenting opinion in Decision No. 1028 (maintenance of way employees), the basic wage established in said decision conforms to no existing standard whatsoever. The lowest budgets, those of the National Industrial Conference Board, an employers' organization, could not be met with a wage of less than 50 cents per hour. Nothing less than this should be considered in the industry.

The unjust basic wage throws the whole rate structure out of line. If we concede the justice of the differential between the machinists' rate and the average rate for unskilled labor under the two decisions, then to obtain a fair level of earnings for machinists that differential of 37 cents must be added to no base less than 50 cents per hour, which would justify a wage rate of at least 87 cents per hour for machinists. As a matter of fact the majority show no grounds upon which a just secondary wage can be determined.

In short, we must dissent from the decision because both the basic wage and the differentials above it appear to have no justification in fact.

INJUSTICE TO FREIGHT CARMEN

The failure of the majority to deal consistently with differentials is especially apparent in the treatment accorded the freight

carmen. In an attempt to justify the greater decrease inflicted on this class of employees the majority say:

The Board recognizes that there are certain branches of carmen's work which require the service of skilled mechanics, and for the classes so considered this decision provides a decrease of 7 cents per hour. It it, however, believed that the work of "freight carmen" is not of a character that requires the service of men as skilled as in the other branches of work coming within the scope of carmen's work * * *

This statement disregards two important facts: (a) The fact that the difference in skill, if any exists, is already embodied in the 5-cent differential which has separated the freight carmen from other mechanics since the days of the United States Railroad Administration; and, (b) the fact that the 70-cent rate in the decision is a minimum rate for *mechanics*—not a flat rate—and that the freight carman is recognized as a mechanic.

The Board in Decision No. 222 has recognized the work of freight carmen as mechanic's work for which four years' apprenticeship is required. In rule 153 it said:

Any man who has served an apprenticeship or who has had four years' practical experience at car work, and who with the aid of tools, with or without drawings, can lay out, build, or perform the work of his craft or occupation in a mechanical manner, shall constitute a carman.

In rule 154 it says that carmen's work shall consist, among other things, of "building, maintaining, * * * painting, * * * and inspecting all * * * freight cars, both wood and steel * * *."

Here is the Labor Board's clear-cut statement that freight car work is the work of 4-year mechanics—a statement in the same form and language as that applied to other mechanical occupations. The 85-cent rate under Decision No. 2, the 77-cent rate under Decision No. 147, and the 70-cent rate under this decision are the minimum rates per hour for mechanical work. Above these rates the carriers could pay differentials for greater skill or responsibility. But these rates represented the minimum which should be paid to men who had gone through four years of mechanical training.

Under all previous decisions the freight carmen have unjustly suffered a 5-cent differential below the other mechanics. Here is an inequality arising out of previous awards which, according to principle 7 of the Transportation Act, 1920, should be eliminated. Instead, the present decision increases that inequality, ordering a greater decrease for this class of work, thereby establishing a minimum rate of 63 cents per hour.

For freight-car work not requiring the skill of a 4-year mechanic, the Labor Board has provided in rules 155 and 156 for the hiring of helpers and apprentices. Abundant evidence is in the hands of the Board tending to show that the railroads have continuously failed to take advantage of this provision. With the rates

prevailing under Decision No. 2 proper use of helpers and apprentices in the car department would have meant a payroll saving of \$30,000,000 per annum. With the rates prevailing under Decision No. 147, the saving would have been \$25,000,000 per annum. In other words, an honest application of the rules would mean a much greater payroll saving than the increased differential contained in the present decision which is to all intents and purposes inconsistent with the rules laid down by the Board itself.

President C. H. Markham of the Illinois Central System published an advertisement measuring about 6 by 11 inches in the Chicago papers of June 1, 1921, to inform the public as to the importance of the railroad work which the public does not see. Under a big headline reading, "Illinois Central system calls attention to things the public does not see," President Markham says, among other things, that—

A modern refrigerator car has more than 1,500 parts. Perfect insulation must be maintained and the car must be kept absolutely clean. The ice boxes and many other parts require constant attention.

An ordinary box car has more than 500 parts which must be regularly and constantly inspected and kept in safe condition. Just as a chain is strong as its weakest link, the safety of a train is gauged by the weakest car in the train.

This statement ties up closely with the reflection of the responsibility of a car inspector appearing in "Car Maintenance Regulations No. 120-3-4" published by the Chicago, Milwaukee & St. Paul Railway Company. This is a 300-page book on the method to be followed when inspecting freight and passenger trains. Of the 300 pages, 225 apply to freight-car work. It says:

After an inspector has shopped a car for defects which render it unsafe to be continued in service, no one should be permitted to cause such car to be placed back in service until the repairs for which the car was shopped have been properly made, or improper repairs corrected * * *

It should be considered just as serious and dangerous for one to remove a bad-order card from a defective car and permit it to go into service without necessary repairs being made, or permit a car to go into service with a bad-order card on it without the repairs being made, as it would be for one to change a signal in front of an approaching train operating under automatic block system.

This is quoted merely as an indication of the complexity and responsibility involved in a carman's work.

JUSTIFICATION OFFERED FOR MAJORITY DECISION

The majority decision assumes that the rates contained in the decision will be considered low and makes its defense against attack from that angle. In other words, the underlying assumption appears to be that the decision will be regarded in a favourable light by the railroads and the sympathizing business interests, and that it will be regarded in an unfavorable light by those who think of wages in terms of family

support. The text of the majority opinion says, in effect, that—

(1) The rates of pay decided upon are not so low as those prevailing in outside industry; and

(2) The classes affected will be better off under the decision than they were in 1920 or in 1917.

The first of these is merely stated as an opinion, and that of the briefest. No facts are cited to justify the opinion. The public is given no basis for understanding the case or forming a judgment.

The second assertion is supported by a few figures which are a misrepresentation of the actual changes in the purchasing power of the wages of this class of employees since the pre-war period.

We must protest against such a cynical disregard of the obligation to inform the public. Aside from the fact that its tendency is completely to vindicate the propaganda of the railroads and consequently to condemn such statements as the employees have been able to bring to public attention, there is the additional fact that the thinness of the justification cannot help but create in the public mind a belief that the decisions of the Labor Board do not result from careful consideration of the merits of the case. That such decisions, as that under discussion, carry such an appearance on the face of them appears from the Wall Street Journal's comment upon a similarly written decision for the maintenance of way employees. It said of the decision:

Nothing very exact or scientific is to be found in all this. It means that the Labor Board, like most such bodies, finds itself compelled to function by a process of more or less haphazard compromise.—(Wall Street Journal, May 30, 1922.)

The Labor Board has, under the law, a two-fold function: (1) To determine upon such just and reasonable wages and working conditions as will render unnecessary a forceful struggle to secure these; and (2) to inform the public in such a way that public opinion may be based upon impartial facts.

We dissent from the majority decision because it conforms to neither of these standards. So important do we consider this misconception of the Board's function that we wish to deal with the true purpose at somewhat greater length subsequently.

CONTRARY TO MAJORITY STATEMENT PURCHASING POWER OF SHOP CRAFTS IS LOWER THAN IN PRE-WAR YEARS

The outstanding fact about the rates established by the decision is that they mean lower purchasing power, and lower standards than employees of the maintenance of equipment

forces enjoyed in the pre-war period. This is true not only for mechanics but also for the helper and apprentice group. This seems to be in direct contradiction to the spirit of the opinion expressed in the majority decision that—

The Board is not in sympathy with the idea that a governmental tribunal, empowered to fix a just and reasonable wage for men engaged in serving the public in the transportation industry, should be controlled by the one consideration of the low wages that may be paid to other labor * * *

With such a statement, it is extraordinary that the majority should proceed to base their comparison of relative purchasing power on December, 1917—a period when the wages of these employees were admitted to be materially below those in other industries. How can a decision be justified which does not maintain even the unjust standards of pre-war years?

As in the maintenance of way decision No. 1028, the table showing the relative purchasing power of wages is misleading for two reasons:

(1) Because it deals entirely with hourly rates, ignoring the fact that the number of hours in the regular work day decreased from nine and one-half to eight in the interval. A man's earnings are the product of his regular hours multiplied by his hourly rate. It has been generally recognized as just that a decrease in hours shall not be treated as an increase in pay. A true reflection of the changes in earnings can only be had by considering daily rates; and

(2) Because, as already pointed out, the choice of December, 1917, as a base means the choice of a time when the wages of this class of employees had fallen far behind the cost of living. Railroad executives were unanimous in stating that in December, 1917, the wage rates prevailing on the railroads were materially below those prevailing in other industries. The following quotations from the statement of W. G. McAdoo, former Director General of Railroads, before the Senate Committee on Interstate Commerce, bring this out clearly. He said:

An absolute essential to the achievement of these imperative needs (relieving the unprecedented congestion of traffic and restoring efficient operation of the railroads) was to satisfactorily dispose of the labor problem.

Railroad employees throughout the country were thoroughly discontented and strikes were impending everywhere.

The railroad executives had testified before the Interstate Commerce Commission and elsewhere that railroad wages were below the scale paid in competitive industries and had been seeking increases in rates in order that they might increase wages.

Railroad labor was grossly underpaid and there were many grave abuses in the matter of working conditions on the railroads which needed correction.

It was clear that railroad employees could not be expected to work for railroads at lower rates of pay than they could command in competitive industries throughout the country.

The high cost of living had made it impossible for many of them to live on the wages they were receiving, and it was clearly in the interest of justice and right, to say nothing of the wisdom and reason of the policy to bring their wages to a level which would enable the railroads to command the requisite amount of service and to prevent the continued depletion of their forces with the constant labor turnover which railroad managers themselves had insisted was one of the reasons why they were unable to make the railroads function efficiently.

Before the Interstate Commerce Commission, in March, 1917, President Underwood of the Erie, President Samuel Rea of the Pennsylvania, President Smith of the New York Central, and several other railroad executives complained that the low wages being paid workers were driving thousands of men out of railroad service and preventing the efficient operation of the railroads.

He further testified that—

The fact is that railroad employees worked for less pay during the war than any other class of industrial workers doing similar work. The further fact is that no fair complaint can be made of the part the railroad employees performed during the war. The realization that they were working for their Government in the stress and strain of war, that their patriotic service was essential to victory, and that they would be fairly treated, inspired and spurred them to unusual effort and a faithful service.

Examination of the following tables will show clearly the extent to which the railroad shop employees have fallen behind throughout the course of the inflation and deflation periods:

Table 1.—Average Daily Rates.

Class of employees	Dec. 1915	Dec. 1917	Jan. 1920	May 1920	July 1921	Under present decision
Machinists	4.18	4.80	5.78	6.82	6.18	5.62
Boilermakers	4.10	4.71	5.85	6.89	6.25	5.69
Blacksmiths	4.37	4.95	5.88	6.92	6.28	5.72
Sheet-metal workers	3.91	4.40	5.77	6.81	6.17	5.61
Electrical workers	4.34	4.37	5.71	6.75	6.11	5.35
Carmen	3.05	3.58	5.44	6.48	5.84	5.15
Molders	4.40	4.88	5.76	6.80	6.16	5.60
Helpers and apprentices	2.37	2.77	3.85	4.89	4.25	3.67

Table 2.—Percentage Increase in Daily Rates.

Class of employees	Dec. 1917 over Dec. 1915	Jan. 1920 over Dec. 1915	May 1920 over Dec. 1915	July 1921 over Dec. 1915	Present decision over Dec. 1915
Machinists	14.8	38.3	63.2	47.8	34.5
Boilermakers	14.9	42.7	68.1	52.4	38.8
Blacksmiths	13.3	34.6	58.4	43.7	30.9
Sheet-metal workers	12.5	47.6	74.2	57.8	43.5
Electrical workers	6.7	31.6	55.5	40.8	27.9
Carmen	17.4	78.4	112.5	91.5	68.9
Molders	10.9	30.9	54.5	40.0	27.3
Helpers and apprentices	17.9	62.5	106.3	79.5	54.8
Per cent increases in cost of living	35.5	89.6	106.0	71.6	58.8

Table 3.—Per cent Decrease in Purchasing Power.

(Subsequent dates compared with December, 1915.)

Class of employees	Dec. 1917	Jan. 1920	May 1920	July 1921	Present decision
Machinists	15.3	27.1	20.8	13.9	15.3
Boilermakers	15.2	24.7	18.4	11.2	12.6
Blacksmiths	16.4	29.0	23.1	16.3	17.6
Sheet-metal workers	17.0	22.2	15.4	8.0	9.6
Electrical workers	25.7	30.6	24.5	17.9	19.5
Carmen	13.4	5.9	*3.2	*11.6	*6.4
Molders	18.2	31.0	25.0	18.4	19.8
Helpers and apprentices	13.0	14.3	*0.3	*4.6	2.5

*Increase.

From this table it appears that since 1917 the employees covered by this decision have almost without exception fallen short of receiving enough to enable them to maintain pre-war standards. The only exceptions are the carmen and the helpers, which classes have just about maintained their level. Under this decision the unjust level of earnings described by Mr. McAdoo and by numerous railway executives as prevailing in 1917 will be perpetuated.

These figures appear in strong contrast to the misleading table in which the majority attempt to show that the present decision will mean increased purchasing power ranging from 18.8 to 45.7 per cent above that of December, 1917. It seems to the dissenting members of the Board that the public has a right to demand a true picture of the grounds on which important decisions rest.

WAGE LOSSES TO RAILROAD EMPLOYEES

The following table shows the total decrease in the returns to the maintenance of equipment employees as a result of decisions and reductions in force. In this table each figure is based upon the number of employees of each class employed in the month when the decision became effective. This conservative method is adopted so as to avoid duplication in consideration of the lay-offs.

Shop Crafts.

Saving to carriers by Decision No. 147.	\$ 64,379,872
Savings to carriers by Decision No. 222.	38,879,976
Saving to carriers by present decision.	59,374,546
Saving to carriers by reductions in force.	164,252,379
Total saving at expense of shop forces.	\$326,886,773

The actual wage reductions per annum resulting from the Labor Board Decisions Nos. 147, 222, and this decision based on the number of shop employees in the service of the carriers as of December, 1917, are as follows:

Decision No. 147. (1)	\$ 89,850,015
This decision (2)	78,835,626

\$168,685,641

Decision No. 222, (approximated By Board's statistical staff (3)	38,879,976
--	------------

Total of wage and rules decisions. \$207,565,617

Reduced payroll resulting from reductions in force 164,252,379

Total loss to shop forces. \$371,817,996

Note—(1) Wage Series Report No. 3—455,776 employees. (2) Excluding 26,449 supervisors, as the decision does not change rates of pay of supervisors. (3) Basis of computation September, 1921, I. C. C. wage statistics.

It is estimated that the recent rate cut advised by the Interstate Commerce Commission will mean a reduction in operating revenue of approximately \$225,000,000 in addition to the \$200,000,000 in cuts for which the carriers have already claimed credit. From the above table it appears that the reductions in the payroll of the maintenance of equipment forces alone are greater than the whole of the new rate cut.

Following the same method, it appears that the carriers have cut the payroll of the maintenance of way employees to the extent of at least \$275,237,160, as follows:

Saving to Carriers by Decision No. 147.	\$104,538,169
Saving to Carriers by present decision.	51,021,755
Savings to Carriers by reductions in force.	113,624,972
Saving to Carriers by Decision No. 501.	6,052,264
	\$275,237,160

The actual wage reductions per annum resulting from the Board's Decisions Nos. 147, 501, and this decision, based on the number of maintenance of way employees in the service as of December, 1917, are as follows:

Decision No. 147. (1)	\$127,280,418
This decision (1)	68,846,181
Decision No. 501, (approximated by Board's statistical staff) (2)	6,052,264

Total of wage and rules decisions. \$202,178,863

Reduced payroll resulting from reductions in force. \$113,624,972

Total loss to maintenance of way forces \$315,803,835

Note—(1) Wage Series Report No. 3—585,625 employees. (2) Basis of computation September, 1921, Interstate Commerce Commission Wage Statistics.

In connection with these figures it should be stated that the reductions in force are not based on the low figures of February, 1922, but on the summer force of 1921, during which year, according to the opinion of the Interstate Commerce Commission, (Reduced Rates 1922, No. 13293) the maintenance work was very nearly up to average.

The savings from the other classes as a result of Decision No. 147 totaled approximately \$150,000,000. Without considering the savings at the expense of these employees through reductions in force, the total amount shown above as given up by the employees as a group exceeds \$750,000,000. This is far in excess of any benefits transmitted to the public in reduced transportation rates.

The above calculation is an attempt to appraise the saving which will accrue to the carriers even under normal traffic conditions. The slash in the payrolls resulting from the subnormal traffic of 1921 is far larger. It can be shown most clearly by comparing the total payroll for the latter half of 1920 with that for the same period of 1921, as follows:

Payroll for the last six months	
of 1920	\$2,034,716,238
Payroll for the last six months	
of 1921	1,343,886,463
Decrease for half year....	\$ 690,829,775

In other words, the payroll saving is running at an annual rate of \$1,300,000,000.

This decrease in the payroll appears in such strong contrast to the increasing prosperity of the carriers that it should not pass without comment. The carriers which received enormous increases in operating revenue specifically to cover increases in payroll are failing to afford the public corresponding decreases when the increases granted to employees are taken away.

The average net income received by the railroad corporations since 1916 has been larger than ever before in history. Including the Government standard return, during the years when railroad employees' wages were falling short of meeting the rising cost of living, the net income of the carriers was running over \$900,000,000 annually. Even in the year of severest depression the net income totalled half a billion dollars.

The carriers in response to the request of the Interstate Commerce Commission estimated that the rates and costs prevailing in February, 1922, would result in net railway operating income of \$907,693,630 on the basis of 1921 traffic. The Commission says:

Taking the charted trend as normal, freight traffic for 1921 was subnormal * * * We feel justified in accepting increased revenue car loadings as foreshadowing an increased volume of freight traffic * * * The increase

in loading for all freight traffic during the first three months of 1922 was 11.9 per cent over that of 1921. (Report on Reduced Rates, 1922, p. 701.)

In their conclusion they depict the situation again as follows:

When we decided increased rates, 1920. Supra, the country was still in a period of steadily rising prices. We then resolved doubts as to future operating costs in favor of the carriers. In recent months costs have been declining and traffic increasing. Rates of pay for employees have been reduced to an extent which, based upon the light traffic in 1921, is estimated by carriers to aggregate more than \$350,000,000 per annum. The Railroad Labor Board has estimated that the reduction exceeds \$400,000,000 per annum without taking into account changes in rules and working conditions. The tendency is toward increased revenues, lowered costs, and higher net income for the carriers. (Ibid, p. 731.)

After careful analysis of railroad estimates for the current year based upon 1921 tonnage, the Interstate Commerce Commission says:

It appears that under present rates, and with an increase of 10 per cent or more in traffic over that of 1921, not only would the net railway operating income of the carriers as a whole for the next 12 months be substantially in excess of the fair return herein determined, but it would greatly exceed the corresponding figure for any year in the history of railroad operation. (Ibid., p. 732.)

This situation is clearly foreshadowed in such reports as are available for the first four months of the year. In spite of the traffic setback resulting from the coal strike, the net operating income of the carriers listed below is more than two and one-half times the net income for the same roads in 1921 and nearly four times the balance obtained by subtracting the deficits of last year from the net income.

The following table shows for 54 Class 1 carriers the net income or deficit in 1921 and in 1922.

NET OPERATING INCOME FOR CERTAIN CARRIERS
1922-1921

Carrier	First four months 1922	First four months 1921	
		Income	Deficit
Wheeling and Lake Erie	\$ 502,516		\$ 191,594
Bangor and Aroostook	1,031,340	\$ 296,823	
Toledo, St. Louis and Western....	702,890	136,440	
Gulf, Mobile and Northern	260,908		7,118
Pittsburgh and West Virginia....	268,855		49,875
Detroit and Mackinac	121,855	58,750

Père Marquette	3,784,616	2,318,211	
Chicago, St. Paul Minneapolis and Omaha	1,466,204	912,717	
Pittsburgh and Lake Erie	458,795		468,418
Nashville, Chatta- nooga and St. Louis	227,428		695,670
Maine Central	459,335		445,562
Chicago and East- ern Illinois	448,701		524,255
Virginia Railway	1,009,228		409,814
Chicago, Indiana- polis and Louis- ville	2,129,086	1,288,717	
Minneapolis and St. Louis	565,581		46,976
Totals	228,695		373,718
Totals	\$152,708,784	\$62,645,176	\$20,631,404

This table shows that every carrier earned a net income in the first four months of 1922, the total net income being \$152,708,784,

whereas in 1921, during the same four months, 23 of these carriers incurred a deficit, the total net income amounting to \$62,645,176, with a total deficit of \$20,631,404.

The following typical quotation from the financial columns of the press clearly fore-shadows increasing profits to the corporate owners of the railroads.

Railway earnings taken by themselves, have not yet measured up to the fair return assigned by the Transportation Act. The fact, however, that in March, when the movement of business recovery was only in its earliest stages, net results very nearly touched 6 per cent of the property valuation and in the East rose considerably above that percentage, is strong confirmatory evidence to the prediction of the Interstate Commerce Commission that with unchanged rates and increasing trade activity, earnings would before the end of the year be running far beyond 6 per cent and, inferentially, that 10 per cent reduction in rates, especially if accompanied by further reasonable wage readjustment, would place the railway income in a comfortable position. This has at any rate been the quite invariable result of industrial revival, even when accompanied by reduction of rates.—(New York Times, May 29, 1922.)

Thus it appears that the carriers, which have been receiving, with the exception of a few months in 1921, the largest returns in history, are to be placed in a comfortable position.

EFFECT UPON THE MORALE OF THE EMPLOYEES

The significance of this very apparent contrast between the upward tendency of profits and the downward tendency of human living standards among wage earners will be felt in a lowering of industrial morale which will prove a handicap far exceeding any apparent gain from decreased payrolls. This is pointed out by Mr. Summer H. Slichter in an article on Industrial Morale, published in the Quarterly Journal of Economics. Mr. Slichter, who is an authority on the subject, says:

Most important of all in creating the prevailing low state of industrial morale is the workmen's conception of the relationship prevailing between themselves and industry—the feeling on the part of wage earners that instead of industry being conducted for their benefit as well as the benefit of the stockholders it is devoted almost exclusively to advancing the interests of the stockholders, and that instead of workmen being a part of industry and insiders in it, they are outsiders whom industry is not interested in serving, but from whom it is interested in getting all it can * * *

Consider the effect of the workman's conception of industry and its relation to him upon industrial morale. What could be better calculated to destroy his sense of obligation toward the enterprise by which he is employed and his willingness to cooperate to make it successful and to promote its prosperity, than the feeling that it is seeking to dominate and use him rather than to serve him, that it is working against him rather than for him, that it is seeking to pay him as little as it finds necessary, to prevent his wages from going any higher than it can help, to keep his working day at as many hours as possible, and go get more out of him by pushing up the speed of his work? If one party to an arrangement seeks to give as little and get as much as possible, is it not natural for the other party to do likewise? No one would expect a workman who feels that his employer pays the bare minimum which economic conditions compel him to pay to reciprocate by doing his best to promote the interest of his employers * * * When industry seeks to keep wages low and hours long, when it consistently resists the workmen's efforts to raise their standard of life, workmen cannot be expected to be interested in helping to make profits large.—(Quarterly Journal of Economics, Vol. XXXV, pp. 54-56.)

The decision of the majority will result in lowered morale among the workers in the transportation industry. This is inevitable. The results of a similar policy are already being felt in the scarcity of labor in the steel industry. This is pointed out by a special writer for the Chicago Tribune which editorializes the matter. The correspondent speaks of men in the Calumet region who "after working a day or two at 30 cents an hour," thus coming within the rates set by the majority for sectionmen, "skipped from the steel mills to other manufacturing plants where higher wages were paid." Others are quoted as saying that "the wage rates were equal to working for nothing, as living expenses ate up the pay envelope and still had some appetite left." As a matter of fact, labor has been over-deflated. The necessity of an impartial regulatory authority in the face of this situation is expressed by Justice Higgins as follows:

There is a very real antinomy in the wage system between profits and humanity. The law of profits prescribes greater receipts and less expenditure—including expenditure on wages and on the protection of human life from deterioration. Humanity forbids that reduction of expenditure should be obtained on such lines. Other things being equal, the more wages the less profits; the less wages the more profits. It is folly not to admit the fact and face it. Moreover, the economies which are the easiest to adopt in expenditure tend to the waste and degradation of human life—the most valuable thing in the world; therefore, so long as the wage system continues, there is need of some impartial regulating authority. —(Harvard Law Review Vol. XXXII, No. 3, p. 216.)

The attitude which the Labor Board should have taken in the present subnormal industrial situation is obvious. Its function is to prevent the waste and degradation of human life.

PROPER FUNCTION OF RAILROAD LABOR BOARD

The Interstate Commerce Commission in its recently issued opinion urging reduction of transportation rates introduces its "conclusion" with a very terse statement of its function. This statement may be held to define the function of any Governmental regulatory body. The Commission says:

The carriers take the position that we must be guided solely by those things which are definite and certain in the past. With this we cannot agree. Our function under the law is not that of mere computers and cannot thus be atrophied. The duty to prescribe rates for the future carries with it the obligation to exercise an informed judgment upon all pertinent facts, present and past, in order to forecast the future as best we may.—(Report on Reduced Rates, 1922, p. 730.)

In their public presentations the carriers have taken the position that the Railroad Labor Board must be guided solely by those

things which are definite and certain in the past. In other words, they have asked the Board to perpetuate the standards or lack of standards prevailing in the unregulated labor market of pre-war years. In short, they want the Labor Board to write decisions guided by the injustice of a struggle between employers and employees in which right is determined by might. That this cannot be the function of the Labor Board under the Transportation Act is apparent to anyone who reads its provisions. President Daniel Willard of the Baltimore & Ohio Railroad Company has stated this concisely, as follows:

In fact, Congress in the Transportation Act has created for this particular purpose a special Labor Court consisting of the same number as the Supreme Court of the United States appointed in the same way, that is to say, by the President and confirmed by the Senate, and has given the Board or court a status and dignity in keeping with its importance. The law says that it shall be the duty of the Board to establish rates of pay and standards of working conditions which, in the opinion of the Board shall be just and reasonable.

It may indeed be said that Congress by this Act has made a preferred class of the railroad workers, because so far as I know this is the first and only time that Congress has ever definitely said that any particular class of people should be given at all times and under all circumstances just and reasonable wages and working conditions.

Of course Congress did not do this primarily in the interest of the workers; Congress acted only as it had a right to act in the interest of the nation as a whole. Congress provided or aimed to provide by law so that the railroad workers would at all times be assured of just as good wages and just as good working conditions without striking as they could reasonably expect to secure if they did strike for it is clear that no one could justify or expect to win a strike for wages or working conditions that would be unjust and unreasonable. (Railway Review, April 2, 1921, p. 521.)

Justice Higgins of the Australian Court of Conciliation and Arbitration, in discussing the function of that court, states the matter in much the same terms, though more tersely, as follows:

The people are consumers as well as producers and the object of the power of the constitution is primarily to protect the people as consumers; and as incidental to that end to provide means whereby producers can have their legitimate human needs satisfied without recourse to stoppages. (Harvard Law Review, Vol. XXXII, p. 205.)

Such industrial courts are a comparatively recent development in government and Justice Higgins has taken the lead in expressing the theory on which they rest, the function which ties them to the social fabric. He sees this development as a new province for law and order. He sees it as the function of such a court to introduce system and standards into the use of human life for industrial processes.

ALBERT PHILLIPS,
W. L. McMENIMEN.

**United States Railroad Labor Board
Decision No. 1074 (Docket 1300)**

Issued June 10, 1922. Effective July 1, 1922.

Alabama & Vicksburg Railway Company et al. vs. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees et al.

ANALYSIS OF DECISION AS APPLYING TO VARIOUS CLASSES OF EMPLOYEES COVERED HEREIN

The classes of employees covered by the wage readjustment of this decision are as follows:

- Group I. Clerical and station forces.
- Group II. Stationary engine (Steam) and boiler-room employees.
- Group III. Signal department employees.
- Group IV. Floating equipment employees.
- Group V. Train dispatchers.
- Group VI. Dining car and restaurant employees.
- Group VII. Miscellaneous employees.

After careful consideration of the evidence submitted, the Labor Board is of the opinion that the nature of the work and the responsibility of train dispatchers to the carriers and to the public, coupled with due consideration of the other factors set out in the Transportation Act, are such as to warrant the maintenance of the present rates. Of the 134 carriers covered by this decision only 26 are asking reductions in pay for the train dispatchers.

There are only four carriers asking for a reduction in the compensation of dining car stewards, and, after full consideration of the law and the evidence bearing on the matter, the Board has concluded that the present rates on these carriers should not be reduced.

For similar reasons, no reduction is made in the pay of the employees represented by the Marine Culinary Workers' Association of California.

In the case of the floating equipment employees, disputes are before the Labor Board from only four carriers, and these affect only a portion of the entire class. Presumably, the other carriers which have employees of this class have reached a satisfactory wage agreement with such employees. The Board has, therefore, remanded these disputes to the four carriers and the employees in question in order that further negotiations may be had and, if possible, an agreement reached.

It will be noted that telephone switchboard operators, previously shown in section

5 of Article II (Decisions Nos. 2 and 147), are now placed in a separate section. It was the continuation of a mistake originated during Federal control which placed these employees in said section. As this mistaken location of telephone switchboard operators gave them a smaller increase under Decision No. 2 and a larger decrease under Decision No. 147 than many of the clerks received, the Board has, to a certain extent, created an offset by fixing the minimum wage at \$85 per month, with the understanding that the wages of switchboard operators that may be higher than that amount are not to be reduced.

The reductions made for clerical employees are lighter than for some other classes, because this class suffered considerable loss as a result of certain changes in their rules and because they have never been highly paid compared with other classes. It will be noted that a greater reduction has been fixed by the Board for clerks with experience of one year and less than two, than for clerks with experience of two years or more. The reason for this is that the majority of junior clerks are beginners and apprentices and have not as yet assumed family responsibilities, and many of them are still living with their parents.

Common labor in and around stations, storehouses and warehouses was reduced one cent less than similar labor in the maintenance of way department because a much greater percentage of this class live in large towns and cities, and consequently incur a higher cost of living. Moreover, many of the common laborers in the maintenance of way department are furnished living quarters by the carriers free of charge or at a low rate.

In the light of all the facts the Labor Board is of the opinion that there should be no reduction in the rates of the supervisory forces of the signal department employees, but that their duties and responsibilities are of such character as to warrant the present rates.

In deciding upon the reductions of employees of the signal department covered by sections 2, 3 and 4, Article IX of Decision No. 147, due consideration was given to the similarity of these employees and the shop crafts, but a smaller reduction was considered advisable in the case of signal department employees because their rule as to the payment of punitive overtime is much less favorable than that of the shop employees.

GENERAL OBSERVATIONS

The provisions of the Transportation Act, 1920, which govern and guide the Labor Board in its deliberations upon the matters herein involved, are:

Sec. 307 (d) * * * In determining the justness and reasonableness of such wages and salaries or working conditions the Board shall, so far as applicable, take into consideration among other relevant circumstances:

- (1) The scales of wages paid for similar kinds of work in other industries;
- (2) The relation between wages and the cost of living;
- (3) The hazards of the employment;
- (4) The training and skill required;
- (5) The degree of responsibility;
- (6) The character and regularity of the employment; and,
- (7) Inequalities of increases in wages or of treatment, the result of previous wage orders or adjustments.

Besides the specific elements or factors above mentioned, the Act provides that the Board in determining wages shall consider "other relevant circumstances." Referring to this language, "other relevant circumstances," the Board in Decision No. 2 said:

This, it understands, comprehends, among other things, the effect the action of this Board may have on other wages and industries on production generally, the relation of railroad wages to the aggregate of transportation costs and requirements for betterments, together with the burden on the entire people of railroad transportation charges.

The consideration of all these matters presents, and has presented ever since the Government handed the roads back to private management, the most complex labor problem ever imposed upon a public tribunal.

The artificial conditions that had been built up during the war around every business and industry in this country were particularly accentuated in the case of the railroads by reason of their tremendous importance in the conduct of our country's military operations, which resulted in Federal control. The difficult problems inherited from the war period by every industry were enormously multiplied and magnified in connection with railway transportation. The labor problems of this industry were more complicated than those of any other industry and involved vastly more to the public.

In this post-war period of readjustment, with its fluctuating conditions, its inflated and profiteering prices, its high cost of living, and its extravagance and wastefulness, the readjustment of wages for two million men in the country's most essential industry has been a task of appalling magnitude.

Add to these conditions the pressure of an unsettled discontented, and sometimes misinformed public sentiment harassed by high freight rates, the vigorous and insistent appeals of the railroads for financial help, and the zealous desire of powerful labor organizations to protect what they conceived to be

the rightful interests of the employees, and the task has not been diminished.

Surrounded by such abnormal conditions, the Labor Board has not been permitted to deal with the question of what constitutes just and reasonable wages and working conditions in the same undisturbed and uncomplicated manner as would have been possible in normal times. And, yet, the wisdom and justice of settling these questions by adjudication rather than by industrial war have been demonstrated, both from the standpoint of the parties and the public. While it cannot be said that no mistakes have been made in the awards handed down by the Labor Board, a substantial degree of social and economic justice has been attained and that without the enormous loss and suffering to the carriers, the employees, and the people at large, necessarily resultant from settlements by force.

The extreme utterance of partisan bias to the effect that the Board does not give full consideration to the evidence submitted to it would be discouraging were it not for knowledge of the fact that such utterances evince merely a spasmodic relapse into the old system of bluff and bluster that entered so largely into the adjustment of railway labor disputes before adjudication supplanted force.

In 1920, by Decision No. 2, the Labor Board increased the wages of railway labor by an average of approximately 22 per cent. This was just and over-due, for the railroad labor had not profiteered during the war, as a portion of the public has been misled to believe.

In 1921, the Board rendered Decision No. 147, decreasing wages an approximate average of 12 per cent. If nothing, but the diminished cost of living had been considered, that decrease could reasonably have been made greater.

In 1922, by a series of decisions, the present among the number, the Board has reduced the wages of certain classes of employees, has left others unmolested, and in one minor instance has made an adjustment equivalent to an increase.

The Labor Board cannot venture too far into the realms of economic prophecy, but it is generally conceded to be fairly plain and

certain that our country has entered upon an era of gradually increasing business prosperity which will be liberally shared by the carriers. That the carriers shall have a fair opportunity to profit by the revival of business in order that they may expand their facilities is absolutely indispensable to their efficient service to the American public. Their unpreparedness now to cope with any greatly increased traffic is notorious. Every facility of railway transportation has been skimmed for the last several years, and, as to mileage, there has been an actual decrease instead of an increase.

This statement, in the connection used, must not be misconstrued to mean that the employees should be called upon to bear the cost of railway rehabilitation, improved service and reduced rates. It simply means that it is only patriotic common sense and justice that every citizen, including the railway employee, should co-operate in a cordial spirit, should bear and forbear, until the carriers are back on their feet.

When this accomplishment is safely under way, it will then be possible for the Railroad Labor Board to give increased consideration to all the intricate details incident to the scientific adjustment of the living and saving wage, with enlarged freedom from the complications of the "relevant circumstances" of the abnormal period which is now approaching its end.

LABOR NOT A COMMODITY

In this connection it should be said that the Labor Board has never adopted the theory that human labor is a commodity to be bought and sold upon the market, and, consequently, to be reduced to starvation wages during periods of depression and unemployment. On the other hand, it is idle to contend that labor can be completely freed from the economic laws which likewise affect the earnings of capital.

That the Board has never fixed wages upon a commodity basis has been amply demonstrated during the past year by the ease with which the carriers have obtained labor under the contract system for less than the wage established by Decision No. 147.

In this connection it must be remembered that the carriers are at liberty to pay to any class of employees a higher wage than that fixed by this Board whenever the so-called labor market compels, provided, as the Act states, that such wage does not result in increased rates to the public.

**The average hourly earnings and their purchasing power as applied to certain classes of employees covered by this decision are shown in the following tables:

Table headings	Time for which figures are shown or comparisons made.	Clerks (Group I, Sec. 1 and 2a).	Common Labor, Station Stores (Group I, Sec. 9)	Signalmen Maintainers & assistants (Group III, Sec. 8)	Stationary, Firemen and Enginroom Officers (Group II, Sec. 2b).

		12.3	11.4	7.8	7.9

†Decrease. *Latest available Government data.

**Owing to the manner in which the carriers were required to render their reports to the Interstate Commerce Commission during December, 1917, in which wage data covering heterogeneous classes of employees were grouped rather than separated in accordance with their duties, responsibilities, experience, et cetera, it is impossible to obtain actual figures from which average hourly rates for the above classes could be computed. The figures shown above for December, 1917, are therefore approximations, although assumed to be very close approximations. For this same reason it is impossible to separate the average rates of clerks between those in section 1 and section 2 (a), and the rates shown above are the averages for all clerks in these two classes.

The average rate for common labor for December, 1917, is perhaps a little high due to the fact that the carriers reported all station service employees in one group, and the rate shown herein for December, 1917, is the average for the group.

The foregoing table prepared by the statistical force of the Labor Board is based on the cost-of-living figures issued by the United States Department of Labor.

These figures show that applying the wages fixed by this decision to the present cost of living, the purchasing power of the hourly wage of the respective classes here named has increased over the purchasing power of the hourly wage of December, 1917, (prior to Federal control) as follows:

Clerks.	44.7 per cent
Common labor around stations, etc.	51.5 per cent
Signalmen (maintainers and as- sistants).	67.2 per cent
Stationary firemen and engine- room oilers.	94.1 per cent

The table also shows that with one slight exception the purchasing power of the hourly wage of each class of these employees is greater under the present decision than it was under Decision No. 2 which granted the 22 per cent increase.

BUDGETS

The Labor Board has given careful consideration to the testimony bearing upon family budgets and standards of living. That existing standards will not be lowered by this decision is shown with substantial satisfaction by the above statistics.

This matter of living standards constitutes an interesting and important study, but much that is said on the subject is highly theoretical and of but little value.

When the Railway Employees' Department presents figures to show that the sum of \$2,636.97 is necessary for the minimum comfort budget of the average family, it has pronounced an economic impossibility.

It is stated upon authority that the total income of the people of the United States is now but little more than \$40,000,000,000. If the 25,000,000 families of this country were expending for living costs the sum of \$2,600 each, it would total \$65,000,000,000 which would be \$25,000,000,000 in excess of the country's total income.

Of course, living costs cannot be standardized any more than men can be standardized. One man will consume his income and find himself continually in debt while another man with the same income and under identical conditions will live in equal comfort and accumulate savings.

In this connection, it can hardly be considered a digression or a gratuitous preachment to say that one of the principal trou-

bles with the people of this country today is the abandonment of the old-fashioned ideas of thrift and economy and the indulgence in wastefulness and extravagance.

The loose habits of living were acquired during the inflated period engendered by the war and, like many other ills of similar origin, are slow to depart. Increased expenses do not always mean a higher standard of living nor do diminished expenses necessarily mean a lower standard of living.

In the settlement of these questions, it is the profound desire of the Labor Board to do justice to the parties directly concerned, placing the human and social consideration above the purely economic, and, finally, to establish wages and conditions that will largely meet the hopes and aspirations of the employees, that will prove satisfactory to the carriers, and that will impose no unnecessary burdens on the public. This is not a Utopian conception in America.

DECISION

The Labor Board decides:

1. That each of the carriers party to this dispute shall make deductions from the rates of wages heretofore established by the authority of the United States Railroad Board for the specific classes of its employees named or referred to in article II in amounts hereinafter specified for such classes in Article I.

2. That the scope of this decision is limited to the carriers named under Article 11, to such carriers as may be included hereafter by addenda, and to the specific classes of employees named or referred to under each particular carrier.

3. That the reduction in wages hereby authorized shall be effective as of July 1, 1922, and shall be made in accordance with the following articles which establish the schedule of decreases, designate the carriers and employees affected, and prescribe the method of general application.

ARTICLE I.—SCHEDULE OF DECREASE

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedule of decreases per hour:

Note—For the specific classes of employees listed herein, for which no decreases have been provided, reference to article and section numbers has been omitted and no decrease shall be made by any of the carriers for said classes of employees.

Group I.—Clerical and Station Forces

Section 1.—Storekeepers, assistant storekeepers, chief clerks, foremen, sub-foremen, and other clerical supervisory forces.....3 cents

Section 2.—(a) Clerks with an experience of two (2) or more years in railroad clerical work, or clerical work of a similar nature in other industries, or where their cumulative experience in such clerical work is not less than two (2) years.....3 cents

(b) Clerks with an experience of one (1) year and less than two (2) years in railroad clerical work or clerical work of a similar nature in other industries, or where their cumulative experience in such clerical work is not less than one (1) year.....4 cents

Section 3.—(a) Clerks whose experience as above defined is less than one (1) year.....4 cents

(b) Clerks without previous experience hereafter entering the service will be paid a monthly salary at the rate of sixty dollars (\$60.00) per month for the first six months, and seventy dollars (\$70.00) per month for the second six months.

Section 4.—Train and engine crew callers, assistant station masters, train announcers, gatemen, and baggage and parcel room employees (other than clerks).....3 cents

Section 5.—Janitors, elevator operators, office, station and warehouse watchmen, and employees engaged in assorting way bills and tickets, operating appliances or machines for perforating, addressing envelopes, numbering claims and other papers, gathering and distributing mail, adjusting dictaphone cylinders, and other similar work.....4 cents

Section 6.—Office boys, messengers, chore boys, and other employees under eighteen years of age filling similar positions, and station attendants.....4 cents

Section 7.—Station, platform, warehouse, transfer, dock, pier, store-room, stock-room, and team-track freight handlers or truckers, and others similarly employed.....4 cents

Section 8.—The following differentials shall be maintained between truckers and the classes maintained below:

(a) Sealers, sealers, and fruit and perishable inspectors, one (1) cent per hour above truckers' rates as established under section 7.

(b) Stowers or stevedores, callers or loaders, locators and coopers, two (2) cents per hour above truckers' rates as established under section 7.

The above shall not operate to decrease any existing higher differentials.

Section 9.—All common laborers in and around stations, storehouses and warehouses, not otherwise provided for.....4 cents

Section 10.—Telephone switchboard operators will be paid at the rate of not less than eighty-five dollars (\$85.00) per month, with no reduction in higher existing rates.

Group II.—Stationary Engine (steam) and Boiler-Room Employees

Section 1.—Stationary engineers (steam)....2 cents

Section 2.—Stationary firemen and engine room oilers.....2 cents

Section 3.—Boiler-room water tenders and coal passers.....2 cents

Group III.—Signal Department Employees

Section 1.—Signal foremen, assistant signal foremen, and signal inspectors.....no decrease

Section 2.—Leading maintainers, gang foremen and leading signalmen.....5 cents

Section 3.—Signalmen, assistant signalmen, signal maintainers, and assistant signal maintainers.....5 cents

Section 4.—Helpers.....6 cents

Group IV.—Floating Equipment Employees

Such disputes as are before the Board under this article are remanded to the parties for further conference and attempt to make an agreement.

Group V.—Train Dispatchers

Section 1.—Train dispatcher.....no decrease

Group VI.—Dining Car and Restaurant Employees

Section 1.—Dining car stewards.....no decrease

Section 2.—Culinary workers on ferry boats in San Francisco Harbor.....no decrease

Group VII.—Miscellaneous Employees

Section 1.—For miscellaneous classes of foremen and other employees, not specifically listed under any section of the various groups, who are properly before the Labor board and named in Article II in connection with a carrier affected by this decision, deduct an amount equal to the decreases specified for the respective classes to which the miscellaneous classes herein referred to are analogous.

ARTICLE II.—CARRIERS AND EMPLOYEES AFFECTED

[List omitted]

ARTICLE III.—GENERAL APPLICATION

The general regulations governing the application of this decision are as follows:

Sec. 1. The provisions of this decision will not apply in cases where amounts less than \$30 per month are paid to individuals for special service which takes only a part of their time from outside employment or business.

Sec. 2. Decreases specified in this decision are to be deducted on the following basis:

(a) For employees paid by the hour, deduct the hourly decrease from the hourly rate.

(b) For employees paid by the day, deduct eight times the hourly decrease from the daily rate.

(c) For employees paid by the month, deduct 204 times the hourly decrease from the monthly rate.

Sec. 3. The decreases in wages and the rates hereby established shall be incorporated in and become a part of existing agreements or schedules, or future negotiated agreements or schedules, and shall remain in effect until or unless changed in the manner provided by the Transportation Act, 1920.

Sec. 4. It is not intended in this decision to include or make decreases in wages for any officials of the carriers affected except that class designated in the Transportation Act, 1920, as "subordinate officials," and who are included in the Act as within the jurisdiction.

tion of this Board. The Act provides that the term "subordinate officials" includes officials of carriers of such class or rank as the Interstate Commerce Commission shall designate by regulation duly formulated and issued. Hence, whenever in this decision words are used, such as "foremen," "supervisors," etc., which may apply to officials, such words are intended to apply to only such classes of subordinate officials as are now or may hereafter be defined and classified by the Interstate Commerce Commission as "subordinate officials" within the meaning of the Transportation Act, 1920.

ARTICLE IV.—INTERPRETATION OF THIS DECISION

Should a dispute arise between the management and the employees of any of the carriers as to the meaning or intent of this decision, which cannot be decided in conference between the parties directly interested, such dispute shall be referred to the United States Railroad Labor Board in the manner provided by the Transportation Act, 1920.

Sec. 1. All such disputes shall be presented in a concrete and joint signed statement setting forth:

- (a) The article of this decision involved.
- (b) The facts in the case.
- (c) The position of the employees.
- (d) The position of the management thereon.

Where supporting documentary evidence is used it shall be attached to the application for decision in the form of exhibits.

Sec. 2. Such presentations shall be transmitted to the Secretary of the United States Railroad Labor Board, who shall place same before the Labor Board for final disposition.

By order of

UNITED STATES RAILROAD LABOR BOARD,

BEN W. HOOVER,
Chairman.

Attest:

L. M. PARKER,
Secretary.

Dissenting Opinion

The undersigned dissent from the majority decision for the following specific reasons:

1. The bases upon which the decision rests are not in themselves sufficient to justify the action taken. The Labor Board has gone into considerations which affect the issues only indirectly, if at all, and has ventured upon ground which indicates a very free interpretation of the "other relevant circumstances" provision in the Transportation Act.

It has considered the effect of its decisions upon wages in other industries, extending its own "sphere of influence" beyond the transportation industry. It has taken into consideration that part of the duties of the Interstate Commerce Commission which has to do with railway profits, and the need for railway expansion. It has considered the effect of rates charged shippers, and then decided what wages should be paid the railway workers.

2. The reasons offered for the decisions not only go far beyond the provisions of the Transportation Act, but they also deny the validity of one of the specific provisions contained in the Act. The cost of living is brushed aside, because the only basis upon which it can be computed is a more or less hypothetical budget. If the introduction of external considerations is difficult to justify, then the exclusion of a vital section of the law under which the Board operates is a matter calling for most expert casuistry. The condemnation of the use of cost-of-living budgets amounts to a rejection of a method found practical by other governmental agencies, and a fundamental disagreement with the United States Department of Labor.

3. The wages as now fixed do not insure the continuance of previous standards of living. The statement that the wages constitute an improvement over 1917 does not take into account the very low standards then prevailing, nor the much higher standards of earlier and later periods. It selects the year which, of all those for which data is available, puts the workers' standard at the lowest point. The use of 1917 figures to justify new reductions is neither just nor reasonable.

4. The basing of wages upon rates paid in outside industries, one of the "relevant circumstances" referred to in the Transportation Act, does not provide reason for the reductions made by the Board at this time. In so far as any evidence was introduced into the hearings upon this point, especially with reference to employees covered in Group 1 of Article I, it seemed rather to call for a wage increase than a decrease.

5. The wages fixed by the majority decision are such as to condemn these railway workers to lives of extreme poverty. It is too much, perhaps, to expect that the full meaning of this action should be clear to men not in close contact with the workers. It may be asking too much to urge that human life is in a class by itself, not to be listed indifferently among the costs of transportation. But certainly it may be fairly and rightfully expected that the social cost of poverty is enough to induce a public body to proceed most cautiously in reducing the standards by which the workers must live. The wages

most recently determined are in some cases less than 50 per cent of the amount needed for a fair standard of living. Maintenance and expansion costs of the railways must be paid, and with the "cordial" and "patriotic" co-operation of the workers; the "maintenance costs" of the workers are considered "theoretical," when they are considered at all. Such is the basis for the series of wage decisions now being made.

GENERAL OBSERVATIONS ON PRESENT WAGE DECISION

Among the relevant circumstances which influenced the majority in making the reductions now being announced, several seem to merit comment in this opinion. There can be no question that very great pressure has been brought to bear upon the Labor Board from different sources, making it difficult to consider the cases upon their own merits, and in what has been styled an "uncomplicated manner."

The relevant circumstances enumerated under the heading "General Observations" include the effect of the action of the Board on other wages and industries, on production generally, and on the relation of railroad wages to the aggregate of transportation costs, including expansion, together with the cost of railroad transportation to the entire country. This, as is well said, aids in making the problem very complex.

Among the relevant circumstances specifically named in the Transportation Act is "the relation between wages and the cost of living." Attention should be called to the readiness to go afield under the broad provision "other relevant circumstances" to justify wage cutting, and the equally assiduous search for a means of qualifying the specific cost-of-living provision mentioned. The net effect has been to interpret out of the law the clause relative to the cost of living, and to read into the Act new bases probably never contemplated by those responsible for its passage.

In view of the social responsibility of the Railroad Labor Board, the nature of the circumstances influencing this decision merits special consideration. To state that the present decision is based on the probable effect on other wages and industries, can mean nothing else but that reasons affecting less essential industries have altered the status of the railway workers. The other reasons offered relate primarily to the financial status of the roads. The workers are called upon to co-operate in a cordial spirit in the patriotic task of providing a surplus for reinvestment in the railways. The recent decision of the Interstate Commerce Commission was based upon figures showing railway

earnings; the Interstate Commerce Commission is charged with responsibility for regulating railway income. The single fact that substantial rate reductions were ordered indicates that they are discharging this function and that in their opinion at the present time, at least, the railways are not greatly embarrassed by financial considerations.

The lack of any statement which might indicate that human beings are to live narrower lives by virtue of the decision handed down, is a clear indication that the majority has taken over the typical employer's approach to the problems of the working men. Despite the magnanimous statement that human labor is not a commodity, there seems to be very little basis for saying that it has not been so considered. Lengthy statements dealing with transportation costs, economic laws, "the vastness of the problem," and "fair opportunity to profit," can mean but little to the worker faced with the necessity of providing food and clothing for his family. If American workers are entitled to "life, liberty and the pursuit of happiness," it should surely be part of the responsibility of government to patriotically insure that the pursuit shall not be carried on at a hopelessly long distance. It is said that "every facility of railway transportation has been skimmed for the last several years," and it should not be thought facetious to remark here that if the railway workers had been given the generous consideration accorded those facilities, something of the skimping going on under thousands of American roofs might have been eliminated.

Finally, "economic laws" have been offered as a reason for the decision of the Labor Board. In the natural evolution of industry, the operation of those economic laws has acted to bring into being organizations of workmen, powerful enough to check the destructiveness of the "captains of industry." That power was exercised through the right of the workers to stop working whenever they desire. The Railroad Labor Board was designed to act as a substitute for the conflicts which arose under the unregulated operations of economic laws. Its function is not to free the workers from economic laws, but to so limit the operation of those laws as to render industrial conflict unnecessary in the securing of just wage settlements. In promulgating a modified "laissez faire" policy, the majority returns to the era when workers were unorganized and industry was in chaos. If organized labor has been able to make substantial progress in the face of "economic laws," then the Railroad Labor Board, planned as a substitute for the strike, should and must function in the direction clearly contemplated by the law, in establishing and maintaining decent standards of liv-

THE MEASURE OF WAGE ADEQUACY

The discussion of budgets in the majority report questions the economic soundness of the standard of living proposed by the Railway Employees' Department of the American Federation of Labor. The budget is called "highly theoretical and of but little value."

No absolute claims have ever been made for standards of living budgets. At best they can be only approximations. In the case of the employees covered in Group 1 of Article I, the union concerned based its argument upon the budget published by the United States Department of Labor. That budget, while of course theoretical, has in several cases proven practical enough for other Governmental wage-fixing bodies. It is described by the Bureau of Labor Statistics as follows:

Finally, after long consideration it was decided to use as a working basis a budget level which can be best expressed perhaps by the phrase "a standard of health and decency." The phrase is not entirely precise in meaning. No phrase of the kind can very well be wholly satisfactory. The budget here suggested is intended to give the average family, consisting of husband, wife, and three children below the age of 14 years:

1. A sufficiency of nourishing food for the maintenance of health, particularly the children's health;

2. Housing in low-rent neighborhoods and within the smallest possible number of rooms consistent with decency, but with sufficient light, heat, and toilet facilities for the maintenance of health and decency;

3. The upkeep of household equipment, such as kitchen utensils, bedding, and linen, necessary for health, but with no provision for the purchase of additional furniture;

4. Clothing sufficient for warmth of a sufficiently good quality to be economical, but with no further regard for appearance and style than is necessary to permit the family members to appear in public and within their rather narrow social circle without slovenliness or loss of self-respect.

5. A surplus over the above expenditures which would permit of only a minimum outlay for such necessary demands as (a) street car fares to and from work and necessary rides to stores and market; (b) the keeping up of a modest amount of insurance; (c) medical and dental care; (d) contributions to churches and labor or beneficial organizations; (e) simple amusements such as the moving pictures once in a while, occasional street car rides for pleasure, some Christmas gifts for the children, et cetera, and (f) daily newspaper.

It needs to be emphasized that the budget level adopted in the present study is in no way intended as an ideal budget. It was intended to establish a bottom level of health and decency below which a family can not go without danger of physical and moral deterioration. This budget does not include many comforts which should be included in a proper "American standard of living." Thus no provision is directly made for savings other than insurance, nor for vacations, nor for books and other educational purposes. On the other hand, a family with the items listed in this budget should be able to maintain itself in health and modest comfort. It would have a sufficiency of food, respectable clothing, sanitary housing, and a minimum of the essential sundries.

No wage-fixing body, and certainly no Governmental wage-fixing body, could ask for better economic or statistical authority than the United States Department of Labor.

On the basis of that budget, the cost of living in the United States to-day is \$2,133 per year, as nearly as can be computed. Under the decision now rendered, the highest-paid employees under Group 1 of Article II

will receive \$357 less than that amount. The lowest paid in the group will receive \$1,197 less than enough to live on the scale outlined by the Department of Labor.

With all due allowance for the fact that the budget is of necessity not as precise as could be desired, it is still the result of careful study by some of the best trained investigators and sociologists of the country. There is assuredly a margin of error to be allowed for; but when a wage rate is fixed at only 44 per cent of the amount necessary to keep a family in "health and decency," there develops a radical difference of opinion between the United States Department of Labor and the majority of the Railroad Labor Board. The minority sees no other course but the acceptance of the work of the Department of Labor.

Below is a table showing the amount by which wages of employees coming under Group 1 of Article I fall short of the cost of this American standard of living:

COMPARISON OF EARNINGS BEFORE AND AFTER
WAGE CUT WITH COST OF HEALTH AND
DECENCY BUDGET IN THE UNITED
STATES AS A WHOLE

Class of employees	Cost of health and decency budget	Annual earnings before wage cut	Annual deficit	Annual earnings after wage cut	Annual deficit after wage cut
Clerks (a).....	\$2133.00	\$1851.00	\$ 282.00	\$1776.00	\$ 357.00
Clerks (b).....	2133.00	1524.00	609.00	1420.00	713.00
Clerks (c).....	2133.00	1269.00	864.00	1165.00	968.00
Mech. device operators ..	2133.00	1314.00	819.00	1215.00	918.00
Truckers	2133.00	1134.00	999.00	1034.00	1099.00
Common laborers	2133.00	1035.00	1098.00	936.00	1197.00

The decision rendered would operate to thrust the workers into deeper poverty, and bring with it an intensification of the ills that always accompany an inadequate wage.

CHANGES IN PURCHASING POWER OF RAILWAY WAGES

We must again enter an emphatic protest against the use of the relation between wages and living costs in December, 1917, as the basis for the present wage decision. The use of that period is most unfair, and the decision ignores conclusive evidence of the injustice of that method of wage determination.

There can be no question as to the nature of wage movements from 1914 to 1917, and from 1917 to 1921. They followed the same course as wage movements during preceding business cycles. From 1914 to 1917 the cost

of living rose rapidly; wages increased only slightly. In 1917, as at the mid-year of every cycle for which wage figures are obtainable, wages had fallen far behind living costs. The wage increases made subsequently compensated the workers in part for increases in living costs, but gave no consideration to the great losses in purchasing power suffered during 1914 to 1917.

The year 1917 saw the standards of living of the railway workers at the lowest point ever reached. The decision of the majority states that the wage now being established is "just and reasonable" because it does not quite throw the employees back to the utterly indefensible standard of that year. The absolute minimum of fairness would prescribe 1914 or 1915 as the basis for wage fixing. The selection of the very date when the workers were at the lowest depth to which they had ever been forced, was a most remarkable coincidence.

An attempt to explain this coincidence is made in the phrase "just prior to Governmental control of the carriers." The railroads were in operation, the workers were employed upon them, wages were being paid, food was being bought, and labor controversies had been carried on, before Governmental "control of the carriers." Government control, in so far as it affected the matters now under consideration, was unique only in that it introduced a sense of social responsibility for the condition of the workers. That condition is the only factor that has changed with the end of Governmental control of the roads, in so far as this decision is concerned.

THE WAGE SITUATION 1915-1917

In 1914 the average earnings of clerks employed on the railroads of the United States were \$865. In 1917 the average earnings had increased to \$931, 12.5 per cent more than the wage received in 1914. During that same period, the cost of living in the United States had increased 38.3 per cent; the standard of living of the clerks had fallen 19 per cent. The railway clerks had never lived on so meager a scale as was made necessary by the wages paid during 1917.

From 1917 on, wages increased more rapidly; in 1920 they were nearly as high in terms of the cost of living as they had been in 1914. The first half of 1921 was the only period when the railway clerks were able to maintain as high a standard of living as they had in the period from 1895 to 1900. During the second half of 1921, another set-back was administered to these workers; the purchasing power of their wages became only 87.9 per cent of the 1914 purchasing power.

The decision now rendered takes away 7 per cent of the wages of the clerks, and reduces them to a standard 12 per cent below that of 1914.

The following table shows the changes in annual earnings, cost of living, and purchasing power of wages for the railway clerks:

COMPARISON OF RETAIL PRICES OF FOOD AND WAGES OF RAILWAY CLERKS, 1914-1921, SHOWING CHANGES IN STANDARD OF LIVING

Year	Wage index	Cost of living index	Standard of living index
1914	\$100.0	\$100.0	\$100.0
1915	94.6	102.0	92.7
1916	100.2	114.8	87.3
1917	112.5	138.3	81.4
1918	147.8	169.3	87.3
1919	154.9	182.1	85.1
1920	181.1	199.1	90.0
1921 (Dec.)....	148.8	169.3	87.9

WAGES IN OUTSIDE INDUSTRIES

In this decision, as in the preceding ones, the Labor Board announces that "in its opinion" wages are still above those paid in outside industries. This statement, in particular, seems not to be based upon a consideration of the evidence before the Board.

No evidence was introduced to show that the wages of clerks in outside industries were lower than those of railway clerks. The carriers stated specifically that because of the difficulty of comparing railway clerks with those outside the transportation industry, no such comparison was being made.

The representative of the western carriers stated in his submission:

It is not possible in many cases to make comparison between the office forces on the railroad and the office forces in outside industry.

Later on the statement was repeated:

We did not make a recapitulation of rates for clerks. We attempted to, but we found there was such a variety of rates for this class on both the railroads and the industries, and also such a variety in the industrial length of day and overtime provisions that it was impracticable to summarize the information as it would be so voluminous as to be practically a rewrite of Form 2. * * *

In this connection you will recall that our brief covering clerks called attention to the great variety of rates for clerks and office employees and pointed out that it was not possible to make definite comparisons as between the office employees of a localized industry and the work performed by railroad employees in the different units of an extensive basic industry.

The representative of the eastern carriers, in his submission made this statement:

It has been found to be extremely difficult to make direct comparisons between the duties of these classes of employees upon the railroads and those in the other industries. For the supervisory and chief clerks, even on the railroads, there are rather pronounced dissimilar conditions attaching to the

various individual positions; that being the case on the railroad, it must be obvious that it is still more difficult to make direct comparisons with similar positions in the industries. We have however, submitted such information as we have been able to obtain for such use as the Board may be able to make of it.

The closest comparison that can be made is in the case of Governmental clerks. Those clerks are receiving from 8 to 46 per cent more than railway clerks for similar work. The only other evidence submitted was in an exhibit filed by the carriers, which showed that the wage of clerks in outside industries had been reduced on the average of 5.8 per cent, as compared with the 12 per cent reduction in the rates paid railway clerks as authorized by Decision No. 147 of the Labor Board.

In the case of the railway truckers, the evidence introduced by the carriers was shown to be entirely untrustworthy. Its collection, compilation, and presentation were proven to be equally inaccurate and misrepresentative. Very little evidence on the wages of common labor, comparable to station and warehouse labor, was introduced. That evidence was so scattering and so slight as to be valueless.

The information on wages in outside industries, insofar as it concerned the clerks, proved only that the railway clerks are paid less than employees elsewhere for similar work. With respect to truckers and common labor, no foundation was laid upon which the opinion could have fairly rested. Even if it were the purpose of the Board to decide closely on the rate paid in outside industries, there must have remained grave doubt on the question of whether railway employees were better paid than those in outside industries.

But it is the announced purpose of the Labor Board to avoid close following of outside wages. The majority has said:

The Board is not in sympathy with the idea that a Governmental tribunal, empowered to fix a just and reasonable wage for men engaged in serving the public in the transportation industry, should be controlled by the one consideration of the low wages that may be paid to other labor in a period of temporary depression and unemployment.

With that intention avowed and the evidence presented, it is difficult to reconcile the "opinion" and action of the Board with its statement that the conclusions are "just and reasonable under the law and the evidence."

CHANGES IN PURCHASING POWER OF SIGNALMEN'S WAGES

In the case of the railroad signalmen, as in the case of other classes of railroad workers, the use of the purchasing power of wages received in 1917 as the basis for the present wage decision is unjust.

The purchasing power of the annual income of the signalmen was at its lowest in 1917. The purchasing power of the wages

paid to signalmen and signal maintainers at that time was 19 per cent below the 1914 level. During the same period, the wages of helpers fell 13 per cent in purchasing power. The facts are the same in the case of other workers covered in that section of the decision. Although their income increased in dollars between 1914 and 1917, it fell to a very great extent in purchasing power, reaching its lowest level in 1917.

During 1917 the annual wages were not only the lowest in purchasing power, but were also far below the amount necessary to live on what the United States Department of Labor describes as "the minimum level of health and decency."

In 1914 the cost of living on this prescribed basis was \$1,316.85 for the country as a whole. The wages of gang foremen, leading signalmen, and leading signal maintainers were \$356 less than this living-wage level. Wages of signalmen and signal maintainers were \$476 below this level, and the wages of helpers fell \$716 short of reaching this living-wage level.

The wages of all these groups failed to increase as fast as the cost of living, with the result that in 1917 the signal department workers were very far below the living-wage standard set up by the United States Government. During this period, the wages of gang foremen, leading signalmen and leading signal maintainers were \$740 below the "health and decency" level. This amount is over twice the difference that existed in 1914. The deficit in the wages of signalmen and signal maintainers had increased to \$860 or approximately 45 per cent of the cost of living. The helpers fared the same. They were over \$1,100 below the living-wage standard in 1917. In 1921 this condition was altered slightly, the wages being closer to the minimum health and decency standard. The following table indicates the amount that the workmen of the signal department fell below the minimum standard of living in 1914, 1917, and 1921, and the amount they will fall below under the present wage decision.

WAGES OF SIGNALMEN AND HELPERS IN 1914, 1917, DECEMBER, 1921, AND UNDER THE NEW DECISION, WITH THE PURCHASING POWER EXPRESSED IN TERMS OF THE 1914 WAGE

Date	Signalmen and signal maintainers		Helpers	
	Yearly wages	Purchasing power of wages	Yearly wages	Purchasing power of wages
1914	\$840.00	\$840.00	\$600.00	\$600.00
1917	960.00	694.00	720.00	521.00
Dec., 1921	1650.00	975.00	1080.00	638.00
July, 1922	1541.00	951.00	957.00	591.00

These facts indicate conclusively that 1917 could not have been fairly used as a base for a wage determination. Not only was the purchasing power of the workers the lowest during this period, but they were very far below the minimum health and decency standard of living. It is necessary to note that we are not setting up the year 1914 as the ideal one to use as a base in determining wages for signalmen. That year is used merely to show that in the disparity that existed between the cost of living and wages, 1917 was abnormal, and no proper basis for a wage determination.

WAGES OF SIGNALMEN AND COST OF AN ADEQUATE STANDARD OF LIVING

Under the decision for signalmen and other employees in the same group, wages for these workers will be, as with other groups, far below the amount required for a decent standard of living.

The principal subdivision of this group would receive under the new rates, approximately \$1,540 per year, based on their December earnings. With the cost of living, on the level of the Department of Labor budget, amounting to \$2,133, the deficit of these workers is to be nearly \$600—38 per cent short of the wage required. In the case of the helpers, the deficit will amount to \$1,177; the wage rate fixed by the Board will provide only 45 per cent of the food, clothing and other necessities considered essential in the Department of Labor budget.

ADEQUACY OF WAGES PAID TO STATIONARY ENGINE AND BOILER-ROOM EMPLOYEES

These employees provide no exception to the general rule that railway labor is to be paid a wage sufficient to maintain a decent standard of living. The reductions contained in the decision are slight, but coming to wage rates already far below the level necessary for a living wage, they aggravate a bad condition.

Under the new rates, stationary engineers fall short by over \$300 of the amount required to live on the "health and decency" level endorsed by the United States Department of Labor. Stationary engine firemen and oilers are to receive a wage of \$619 below the cost of the minimum standard of living. The laborers included in this group are to receive only \$913 per year. The wages of these laborers will buy for them only 43 per cent of the commodities the Department of Labor considers necessary for a "health and decency" standard of living.

WAGE LOSS

The following tables show the decrease in the earnings of the classes of employees covered by this decision as a result of decisions of the Labor Board affecting rules and wages,

also account of the reductions in force. The information as shown in the different tables is predicated upon the number of employees of each class employed at or about the time the decisions became effective (depending upon available data). This method is adopted in order to avoid duplication in the consideration of the loss in earnings of the employees account of reductions in force.

SAVINGS TO CARRIERS

Cause of wage loss	Clerical and Station Forces	Signal Department Employees	Stationary Firemen, Oilers, etc.	Total
Decision No. 147	\$	\$	\$	\$
Decisions 630-707-725	56,789,890	2,319,537	1,493,280	60,602,707
(1) Present Decision	4,823,525	500,000	100,000	5,423,525
Loss in earnings account reduction in force..	24,336,317	1,532,423	551,955	26,420,700
	39,422,376	4,790,568	44,212,944
Total decrease in earnings of employees	125,372,108	9,142,533	2,145,235	136,659,876

(1) Based on Dec., 1921, Jan., 1922, and Feb., 1922.

The actual wage reductions per annum resulting from the Labor Board's decisions Nos. 147, 630, 707 and 725, based on the number of employees in the service of the carriers as of December, 1917, follows:

SAVINGS TO CARRIERS

Cause of wage loss	Clerical and Station Forces	Signal Department Employees	Stationary Firemen and Oilers	Total
	\$	\$	\$	\$
(2) Decision No. 147	61,779,992	2,815,200	1,493,280	66,088,472
(3) This Decision	40,675,254	2,267,400	551,955	43,492,609
(4) Decisions 630-707-725	102,453,246	5,082,600	2,045,235	109,581,081
Total decrease in employees' earnings account of wage and rules decision	4,823,525	500,000	100,000	5,423,525
	107,276,771	5,582,600	2,145,235	115,004,606
Reduced payroll account of reduction in force	39,432,376	4,790,569	44,212,944
Total wage loss to these classes of employees	146,699,147	10,373,168	2,145,235	159,217,550

(2) Wages Series Report No. 3—December, 1917 basis.

(3) Based on number of employees, December, 1917.

(4) Approximated by Board's statistical staff.

As stated in previous decisions the decrease in the payroll appears in such strong contrast to the increasing prosperity of the carriers that it should not be passed without comment. Attention is directed to pages 40 and 41, Decision No. 1036, wherein this situation is clearly depicted.

SOCIAL EFFECTS OF LOW WAGES

These statements with respect to the social effects of low wages are not exaggerated, nor do they lack the support of those best qualified to speak authoritatively on crime, child labor, and kindred problems. The Committee on Crime of the Chicago City Council reported in 1915 that—

The pressure of economic conditions has an enormous influence in producing certain types of crimes. Unsanitary housing and working conditions, unemployment and wages inadequate to maintain a human standard of living inevitably produce the crushed or distorted bodies and minds from which the army of crime is recruited. The crime problem is not merely a question of police and courts, it leads to the broader problems of public sanitation, education, home care, a living wage, and industrial democracy.

The Illinois Health Commission reported in March, 1919, that—

There is a close relation between low family incomes and sickness and premature death * * * Numerous investigations have been made of the amount of sickness in relation to family income or wages. All of these investigations have shown that low wages and inadequate incomes are accompanied by an excessive amount of sickness.

* * * The investigations made for this Commission showed that there is an excessive amount of sickness among the families with the smallest income relative to the need of incomes to provide the necessities of life. Among the wage earning families best off in this respect disabling sickness occurred in 63.4 per 100; among those less well off, in 73.0 per 100; among those least well off, in 76.0 per 100.

In pointing out the effects of low wages on mortality rates, Dr. A. R. Perry in a study made for the United States Bureau of Labor Statistics in 1919, reported that—

The far greater bulking of tuberculous decedents at the lower end of the income scale in 15—44 age group than in the age group 45—64 would seem to indicate that low income is an anti-longevity factor and especially so in connection with tuberculosis.

Even more significant is the effect of low wages upon children. Reporting on a study of child labor made in Waltham, Massachusetts, in 1917, the United States Department of Labor states:

Over one-third of the boys and nearly one-third of the girls have economic need as the primary reason for leaving school; * * * This showing as to the large proportion of children who go to work in Waltham because their families need their earnings agrees with the findings in the commonwealth at large and in other communities where child labor has been investigated.

Child delinquency, too, may be directly traced to low family incomes. A report by S. Breckenridge and E. Abbott shows the conditions in Chicago:

It may be said again that such data as we have gathered show that the delinquent children in our court belong to families in which the struggle to make both ends meet is acute. A study of the homes and families of these children

shows much more clearly than any tables of statistics how easily poverty in itself brings the children into court * * * When we see all the wide background of deprivation in their lives * * * it is not hard to understand how the simple fact of being poor is many times a sufficient explanation of delinquency.

The greatest test of any civilization is the protection given to children and to motherhood. The effect of the all-too-prevalent poverty of American workmen upon their wives and children is best proven by the statistics of infant mortality.

The children's Bureau of the United States Department of Labor supplies all the testimony needed as to the effect of low wages upon the death rate of the worker's children:

Infant mortality rates decreased progressively for the higher-earnings group—reaching the low point of 59.9 for babies whose fathers comprised the higher-earnings groups. The lowest-earnings group, comprising over one-fifth of all births, had an infant mortality of 201.9. In the families of the very poor, 20 babies out of every 100 born alive died before reaching their first birthday. In the higher-earnings group only six out of every 100 babies born alive died under one year of age.

We have already pointed out, in the dissenting opinions in the maintenance of way and shop crafts cases, that by any standard ever set up the wages fixed by the Railroad Labor Board are insufficient; that is as true of the rates set in the latest decision. The workers will be forced, in the event that these decisions stand, to exist on a level even lower than the "slave-owners' standard." When human beings were considered chattels, they were cared for well enough to prevent physical deterioration. The food and clothing now allowed to the workers will not provide enough of the basic necessities of life to keep up health and strength. The slave-owner had an investment, and his business judgment urged the advisability of preventing its depreciation. There is no such limit to the employer today; now workers are always available to take the place of those broken by the combined pressure of overwork and under-nourishment. Human depreciation does not find its way into the railroad balance sheet.

HUMAN FACTORS IN WAGE DECISIONS

The vital question in wage determination has again been ignored in the decisions now rendered. The Railroad Labor Board is not a profit-regulating body, nor a tariff-fixing body; it has not to deal with abstract considerations of commodity schedules or the earning power of an over-capitalized road. Wage-fixing has to deal with human values, with the lives of men, women and children. The power to set wages is the power to shape the life of the worker affected.

No other "relevant circumstance" can be greater than this. Human life must be given precedence over every other consideration. A body charged by the government with the responsibility of wage fixing should have as

its primary standard the relation of its action to the lives of the workers concerned.

To explain a wage cut on the plea that workers in other, and unregulated, industries are as poverty stricken, is matched only by the excuse that at one time in the past the workers concerned have led a more precarious existence than that now prescribed. Neither of these reasons can even partially absolve the Board for its failure to consider the living conditions it has set for the railway employees.

The decision of the Labor Board has not only these humanitarian aspects; it is not only the demands of justice and humanity, sufficient though they should be, that condemn the utterly inadequate standards set for the workers. If a proper respect for human life were not in itself enough to motivate the fixing of a living wage for the railway employees, then, at least, a wise public policy, based on the measurable effects of poverty, should have dictated a standard higher than the one established. Some public officials are passing laws to punish and restrain criminals; other public officials are fixing wages that must multiply crime. Public health organizations try to eliminate disease; wage-fixing bodies lay down living conditions that mean overcrowding, undernourishment, inadequate clothing—breaking down the power of the worker and his family to resist disease, and inevitably raising the mortality rate among the thousands of people affected. Clergymen, philanthropists, lawmakers and sociologists work with every means at hand to lessen child labor; the Railroad Labor Board fixes the wage of the parents at a point where the children must be taken from school and must themselves seek employment. One section of society works through every available agency to remedy social conditions; another, supposedly responsive to the same influence, compounds the evils growing out of the poverty of the wage earners.

MAJORITY ADMIT INABILITY TO GIVE JUST WAGE

As pointed out by President Willard of the Baltimore & Ohio Railroad Company in the words which we embodied in our previous minority opinion, the Transportation Act aimed to substitute for the strike such just and reasonable wages as would render resort to a strike unnecessary. If this tribunal, created to determine such wages, admits that under existing circumstances it cannot fulfill this function, obviously, the employees must use such power as they have to influence the labor market, which is henceforth to be the determining factor in their wages. The majority state clearly that—

* * * the Labor Board has not been permitted to deal with the question of what constitutes just and reasonable

wages and working conditions in the same undisturbed and uncomplicated manner as would have been possible in normal times.

Such statement is an admission on the part of the majority that they have been unable to separate themselves from the partisan struggle long enough to perform the function for which they were appointed and consequently it tends to absolve the employees from any limitations which the existence of a judicial board was intended to impose. As a matter of fact, the Labor Board has had nearly two years in which to make such studies as we feel to be essential to the establishment of the just and reasonable wages required by the Transportation Act, 1920.

The mere use of such words as "partisan bias," "bluff," "bluster," et cetera, to describe statements to the effect that the merits of the case were not considered in these decisions does not answer the array of facts and figures with which such statements were supported.

Let us consider for a moment the grounds which the majority suggest as having influenced them in arriving at the rates of pay set forth in these decisions.

The major justification offered for the low rates of pay created is the fact that—

* * * our country has entered upon an era of gradually increasing business prosperity which will be liberally shared by the carriers. That the carriers shall have a fair opportunity to profit by the revival of business * * *

The paragraph containing this statement will bear careful analysis.

The first implication is that the carriers cannot share in the profits of business revival without a reduction in the wages of their employees until their purchasing power is on a par with or below that of the pre-war period. A glance at the recent report of the Interstate Commerce Commission with reference to reduction of railroad rates will show clearly the fallacy of this idea. The Commission states:

Under the adverse conditions of 1921 the net railway operating income of Class I carriers of the United States totalled \$614,810,531. Based upon the subnormal traffic of that year the wage rates, and the prices of materials and supplies, prevailing at the end of the year, the carriers in their constructive year estimated an aggregate net railway operating income of \$907,693,630; equal to 4.72 per cent upon the valuation used by us as adjusted by carriers to cover Class I roads only, including additions and betterments since January 1, 1920, amounting to \$778,499,045. Adopting the ratio of net railway operating income of all carriers to that of Class I carriers in 1915 and 1916 as being approximately correct for 1921, the net railway operating income in the carriers' constructive year would be for all carriers \$923,783,340, or 4.89 per cent upon the valuation.

We do not accept the adjustments made by carriers in their constructive year as correct or complete. We have indicated that further adjustments are necessary in order better to reflect, probable expenditures for Federal income tax, fuel and materials and supplies. Reductions in rates will carry with them reductions in operating expenses of carriers through lessened transportation charges paid by them on their fuel and materials and supplies. Thus it is es-

timated that a reduction of 10 per cent in transportation charges on coal would effect a saving of over \$7,000,000 on the amount of coal consumed by Class I carriers in 1921.

The net railway operating income of all carriers has exceeded \$900,000,000 in only two years—1916 and 1917. In 1916 the most prosperous year in the history of the railroads, it aggregated \$1,051,543,860, and during the three years of the test period the average for Class I as annual rental to the carriers under Federal control.

The figures heretofore given include no estimate for increased traffic over that of 1921, which clearly was subnormal. We do not anticipate return to the tonnage of 1920 for some time to come, but there are many indications of greater tonnage than in 1921. The car loadings for February and March, 1922, exceeded those of the corresponding months in 1921 by 11.7 per cent and 19.9 per cent respectively. During the first three months of 1922 car loadings exceeded those of the same period of 1921 by 11.9 per cent.

Any additional tonnage realized should be handled under a favorable operating ratio. It appears that under present rates, and with an increase of 10 per cent or more in traffic over that of 1921, not only would the net railway operating income of the carriers as a whole for the next 12 months be substantially in excess of the fair return herein determined, but it would greatly exceed the corresponding figure for any year in the history of railroad operation.

The expectation of the Commission is being rapidly realized, as is shown by the report of 201 Class I carriers for the first four months of this year. During the four months the net operating income of these railroads amounted to \$211,278,394 compared with \$57,409,900 for the same period of 1921. In other words, net earnings are today running at a rate nearly four times the rate in 1921. In spite of the continued coal strike the increase in traffic is being steadily maintained. The most recent report of freight car loading received from Washington by the "Railway Age" reads as follows:

The number of cars loaded with revenue freight showed another large increase during the week of May 27 to a total of 801,121 as compared with 795,335 in the corresponding week of last year and 898,169 in 1920. This was an increase of 28,000 in a week. With a normal coal movement the total would have been greater than that for 1920.

Clearly any increase in business such as is indicated will mean far larger profits to the carriers than they have ever enjoyed in the past. It is evident then that the majority must have taken over the idea from railroad propaganda that the carriers were in desperate need of profits, and this propaganda has been demonstrated in numerous instances to be not in accord with the facts.

The second implication of the above-noted assertion is that this necessity of the carriers for profits constitutes a just ground under the Transportation Act for a reduction in wages. This would clearly make of the Transportation Act an iniquitous measure. That it was completely contrary to the purpose of the Congressional framers of the Act appears from testimony submitted to the Board as to the attitude of Chairman Cummins of the Senate Committee on Interstate Commerce. He said:

The view that the Labor Board, I suppose, takes—at least, it ought to be the view they take—is that wages of the men who are employed in a service of that kind ought not to depend upon the profits of the enterprise in which they are engaged. In other words, men are entitled to fair wages,

no matter whether the enterprise is profitable or not. (Hearings, pp. 1527-8.)

The third implication in this paragraph is that the railroads have not been maintained during the abnormal years in such shape as to be able to meet the demands of increasing business. This would seem to indicate that the majority have drawn their opinions from the press statements of the railroads rather than from such authoritative utterances as those of the Interstate Commerce Commission and the former Director General.

The Interstate Commerce Commission rejected this contention of the carriers as unproved. The following quotation illustrates their weighing of evidence:

The carriers generally seem to have taken the fact of under-maintenance during 1921 for granted rather than to have undertaken to prove it. Individual carriers have proved its existence in their own properties. Maintenance charges of Class I roads aggregated \$2 017,700,867 in 1921, more than in any preceding year except 1920, when the total was \$2,623,955,448. The decrease of 1921 under 1920 was \$606,248,581, or 23.1 per cent. The volume of traffic in 1921, as measured by ton-miles, was about 25 per cent less than in 1920. Unusual features in the operations of 1920 make that year unreliable as a measure of what the annual outlay for maintenance should be. It was a period of peak prices, when the greatest ton-mileage and passenger mileage in the history of the railroads moved under most adverse conditions. Moreover, labor and material costs were lower in 1921 than in 1920. In relation to total operating expenses, maintenance charges in 1921 were almost the same as in 1920, the percentages being 43.6 and 44.1, respectively.

The record does not disclose whether the actual quantities of material applied were as great in 1921 as in previous years. It does not appear that, taking the country as a whole such applications in 1921 compare unfavorably with those of 1920, or of the test period. Returns from carriers representing more than half of the tie and rail applications for 1920 indicate that their 1921 applications are within 1 per cent of those of 1920, the East and South being greater than in 1920, and the West being less. In a year in which the movement of traffic is light, somewhat less maintenance is required than in years of heavy traffic, although it would be in the public interest if surplus from prosperous years were expended on maintenance in years of light traffic.

When we consider the conditions which prevailed during 1921, the carriers' contention that current maintenance was deferred may have basis, but they have not supported their contention with such facts of record as would warrant us in making a definite finding of to the extent to which it was deferred. Carriers could not and did not escape the compelling influences which affected other forms of industry during that lean year. The number of their employees was reduced by a fifth, sometimes more; outgo was pared and upkeep skimped where possible; the "bad-order" figures cover an increasing number of cars requiring heavy repairs, as well as the obsolete and obsolescent, which were not being replaced to the requisite extent; and, in brief, we are left with the abiding, if composite, impression that on the whole, the railway plant of the country was not at the end of 1921, and is not now, in as good condition as it should be, and is far from ready to meet the demands which will come with resumption of general business activity. There are, of course, some notable exceptions.

Speaking of the period immediately preceding 1921, former Director General Hines said:

Now, I want to turn to the much discussed matter of alleged undermaintenance of properties. An extraordinary fiction has been developed that the railroads were turned back by the Government to the railroad companies in a broken-down condition.

This is an extraordinary distortion of the real situation. If it had been the case, I take it the first men who would have fully appreciated it would have been the regional directors. They were practical men with long railroad experience, and honestly interested in the properties, right on the point of going back to their companies, and it would be impossible, if it had been a fact that the railroads were in

a broken-down condition, that the regional directors would not have commented on the fact in their utterances and in their annual reports.

But their reports will be searched in vain for any statement of such a condition. They show a generally satisfactory maintenance of the properties, except they point out as to some of the roads there were some shortages of ties rails and ballast. But the reports are such that they show a satisfactory condition, and they deal with the matter in a perfectly matter-of-course way * * * (Senate Committee in I. C. C. Record, p. 1616.)

Mr. Hines then proceeds to quote from such executives as Vice President Hardin of the New York Central Railroad Company and former Regional Director Aishton of the Northwestern Region, who is at present President of the American Railway Association. He quotes Mr. Aishton as follows:

Maintenance of properties has been watched very closely, and the same policies as were practiced prior to Federal control were continued, resulting in the maintenance of properties in about the same condition as they were maintained by the railroads. (Ibid. Record, p. 1617.)

Mr. Hines also quotes Mr. Hale Holden, president of the Chicago, Burlington & Quincy Railroad Company and Regional Director Bush of the Southwestern Region to the same effect.

Mr. Hines then shows by quotations from President Rea of the Pennsylvania System and President Gray of the Union Pacific System that as a matter of fact the railroads were in bad condition prior to Federal control and that the succeeding years were years of actual improvement.

The fact that such evidence has been in existence for nearly six months now, would seem to indicate that the majority have based their assertions on the propaganda of the railroads rather than on the statements of these competent railroad executives and of the Interstate Commerce Commission which has probably made the most exhaustive study to see whether these charges of under maintenance could be maintained.

MAJORITY ATTEMPT TO AVOID IMPLICATIONS OF THEIR DECISIONS

As a matter of fact, the correctness or incorrectness of the deduction of the majority as to the present condition of the carriers or as their crying need for profits is unimportant because the whole matter is irrelevant to the consideration of just and reasonable human standards, which, according to Senator Cummins, is the special function of the Labor Board.

The majority attempt to avoid the implication of their announced basic consideration by the further comment:

This statement, in the connection used, must not be misunderstood to mean that the employees should be called upon to bear the cost of railway rehabilitation, et cetera.

But they cannot so easily avoid the clear results of their decision. The employees will look to the substantive part rather than to the covering words. In order to harmonize the statement just quoted with the rates of pay which will result from these decisions, the majority are forced to add a hasty qualification which amounts to a contradiction of the assertion. It is to the effect that the railway employees must—

bear and forbear, until the carriers are back on their feet.

Interpreted in terms of rates of pay awarded, this can mean nothing unless it means that railway employees must bear unjust wages until the carriers are willing to admit they have secured the rehabilitation which they demanded.

The meaning of the majority is clarified by the statement which follows:

When this accomplishment (the rehabilitation of the carrier) is safely under way, it will then be possible for the Railroad Labor Board to give increased consideration to all the intricate details incident to the scientific adjustment of the living and saving wage * * *

The employees may well consider this as an ultimatum to the effect that justice to them and their families, a real consideration of their human needs, must await complete satisfaction to ownership. In their assertion the majority admit all that we have pointed out in our former opinions; they admit that they have not considered the matter on its merits, but have been driven along by the necessities of the carriers. And they have taken as the measure of those necessities, not a balanced view of the evidence offered by the parties to the case, but the extreme statements of one party in its propaganda.

At least, the vagueness is cleared. The public and the employees know that a full consideration of the merits of the case from the employees' standpoint must await the prior claim of increased profits demanded by the railroad owners.

With the text of the Act before us, interpreted by its author, Senator Cummins, entirely aside from our connection with one party to the case, we cannot assent to such a miscarriage of justice under the law.

LABOR AS A COMMODITY

The majority see clearly the implication of their decision in another direction and attempt to meet criticism there too. Any one viewing the rates of pay established for the great army of labor knows that such rates are practically the same as those paid in industries where labor is treated as a commodity. So the majority hasten to assert that "the Labor Board has never adopted the theory that human labor is a commodity."

The majority, however, in the next sentence admit the influence of the market value of labor upon its decision by the statement that—

It is idle to contend that labor can be completely freed from the economic laws which likewise affect the earnings of capital.

This, in the opinion of the minority, is a very important qualification, for, in the first place, it places the livelihood of human families, the provisions for children who will form the coming generation, in the same impersonal category as profits. And in the second place it immediately sweeps away all the sentiment about identity of interest between employers and employees. This, the decision does, not only here, but throughout its entire text.

In other words, the employee will ask "what is it that is preventing me from receiving enough to support my family in decency?" He will look to the decision and answer "profits—the need of the railroad for profits." The economic laws which the majority feel to be so unchangeable are neither God-given nor man-made. They are simply a description of the way in which business and industry have worked to date, and they have worked out very badly for human life. The results appear in the high infant mortality rates in the majority of centres of industry. Mortality rates rise to shocking heights where families have the lowest incomes.

Frank A. Vanderlip, director in a score of financial and industrial corporations of the first magnitude, has forcibly described the long-time effects of such a policy in his book entitled "What Happened to Europe." He says:

On the whole the forces tending to keep down wages proved, for 20 years prior to the war, almost as strong as the forces tending to raise them, and the result has been during that period that with a somewhat increasing cost of living the standard of living of the laborer has certainly not much advanced, and I believe on the whole has retrograded. Whatever the statistics of index numbers may show, at least two great broad facts are evident. One of these is the deterioration in physique. * * *

A visit to the mill towns of the cotton spinning districts, for example, shows almost another race of people compared to the well-fed Englishmen we know in London, a race undersized, underfed, underdeveloped and undereducated. Lloyd George's famous utterance that you could not build an A-1 nation out of a C-3 population has sunk deep into the English mind. The statistics of physique which the military annals produce show that one-third of the male population of fighting age was unfit for military effort. * * *

The other great, outstanding fact indicating in British industry a wage scale insufficient for what is regarded as a minimum standard of living, is found in the great national housing problem. The brutal truth is that England's labor has been so underpaid during the last generation that it has been unable to keep a roof over its head, and today there is urgent need for homes for a million workmen's families.

It is admitted on every hand that the deterioration and crowding in houses has gone to a shocking point—has gone so far that nothing short of national aid can rescue English labor from an intolerable position * * *

In order successfully to compete in neutral markets British industry has made a red-ink overdraft on the future, an overdraft on the physique of her citizens an overdraft that has consumed her house facilities; that overdraft must now be made good, at the expense of the nation. (p. 34-36.)

These so-called economic laws create a situation in which the lowest wages for which the requisite skill and industry can be bought are considered good for capital and bad for labor. Hence, the struggle, which the majority decries, has been a mere expression of the so-called economic law, and it will continue unless adjudication by a scientific tribunal can adopt methods which will amount to establishing new laws. These new laws must mean a response to something other than manipulation by interests with varying degrees of control in the market.

LABOR EMPLOYED BY CONTRACTORS CITED

In order to prove that the rates of pay established by these decisions were not fixed on the commodity basis, the Board refers to the fact that the carriers were able to contract for work at much lower rates of pay than those established under Decision No. 147.

In making this statement the majority failed to inform the public that the so-called contractors simply took over the management of the carriers' property, on a cost plus basis; that the employees of the carriers became the employees of the so-called contractor; that the employees believed these carriers had violated the provisions of their agreement, the decisions and rules of procedure of the Labor Board, and the provisions of the Transportation Act, 1920; that they would obey the law, submit the dispute to the Board, and pending a decision they would remain at work under protest; that these disputes were properly before the Board long before the carriers presented their request for wage reductions; that these important cases, with their prior claim are still pending, excepting only the Indiana Harbor Belt Railroad affecting the least number of men involved in any of the "contract" disputes; that failing to get a decision on these important questions, the employees finally decided to change their procedure in the case of the Western Maryland Railway Company, and when this carrier attempted to transfer its shops and other equipment over to an alleged contractor, discharging practically all of the shop, maintenance of way, signal department and stationary engine forces, these employees notified the Labor Board of the carrier's action and of their intention to declare a strike, which strike is now in progress; and that subsequently, the Missouri, Kansas & Texas Railroad decided to contract out certain of its car shops and discharged several hundred employees. These employees also submitted this dispute to the Board, which for the first time assumed jurisdiction and restored the

conditions as of a date prior to the alleged contract.

Throughout the long period of propaganda the railroads have constantly used the equipment companies and the sub-contracted work as evidence that the Railroad Labor Board was maintaining unnecessarily high rates of pay for railroad employees. This contracting of work was used not only to induce a public opinion which would coerce the Board but also as direct pressure on the Board. The following quotation from the recent submission of the Buffalo & Susquehanna Railroad shows clearly this attitude:

The Buffalo & Susquehanna Railroad really expects your Board to put into effect the rates proposed by it and your failure to do so can have only one of two results—the sending away of the work to other shops where cheaper labor is employed, or in leasing the shops to outside parties with the requirement that the total cost including overhead will not be more than the wages as proposed by the Railroad. Therefore, an adverse decision of the United States Railroad Labor Board can have one of two effects; that of either throwing these employees totally out of work, or reducing their wages from 10 per cent to 30 per cent more than is proposed by the railroad in order to absorb the overhead.

It should be gratifying to the carriers to find out that the Railroad Labor Board has given their propaganda an authoritative note in this matter.

Investigations conducted by the Interstate Commerce Commission showed clearly that the lower wages paid by the contracting concerns did not mean lower, but instead much higher costs.

CARRIERS TO BE PERMITTED TO ADJUST RATES

In the next paragraph the majority give the carriers specific permission to adjust rates, as follows:

In this connection it must be remembered that the carriers are at liberty to pay any class of employees a higher wage than that fixed by this Board, whenever the so-called labor market compels, provided—as the Act states, that such wage does not result in increased rates to the public.

Do the majority realize the nature of the principle of wage payment contained in that statement? It is that employees are to look for improvement of their wages to the compulsion of the labor market, and that such adjustment upward may be made by the carrier independently of the Board, provided the carrier does not transmit such upward revision of rates to the public in increased rates of pay. The orderly structure brought out of the chaos of railroad wage payment which existed before the war is to be abolished when and where the carriers choose. As we enter the period of rising business prosperity we may expect to see carriers which tend to earn a large profit, making wage adjustment upward, while the carriers on other lines remain stationary.

One result will be a steady increase in labor turnover. Labor turnover is a very ex-

pensive matter. The cost of hiring a new mechanic is variously estimated from \$50 to \$300. The experience of every country during the war demonstrated the economy of energy and money involved in standardizing wages for all employees coming under the same general classification. Bidding for men by employers creates a labor force which is constantly shifting after slight increases. In the long run this represents a very poor use of manpower and should be discouraged.

DECISION ENCOURAGES STOPPAGES WHICH THE LAW IS DESIGNED TO PREVENT

Employees will also take this as a permission to go out and get such wages as they can command. If they feel that they can command higher wages by withholding their services, either separately or in numbers, that will not be a strike against the order of the Board, it will merely be the carrying out of the Board's suggestion as to the method of wage adjustment about to come.

But the real conclusion from this statement, coming at the beginning of a new period of prosperity, will naturally be that the carriers had the Labor Board created to regulate labor during the critical period just coming to an end. Under its cover, they were able to carry through a program which would have been impossible without the practical prohibition of striking. Whenever the Board decided in favor of the employees, the roads either defied the Board or found some method of evasion.

MAJORITY SHY OF BUDGETS

The majority agree with the representatives of the carriers in considering much that is said about living standards as being "highly theoretical and of but little value." They do not point out, however, why these budgetary studies, which express various levels of wages in quantitative terms, are more theoretical than money wages, the inability of which to supply a family fluctuates and does not appear on the surface. To the employee a money wage is theoretical; what he can buy in the way of goods is concrete and real.

It is a simple matter to take the current price of various commodities and from these determine just how much of each can be bought with a given hundred dollars. Surely to say "now these men will have so many dollars per month to spend," and then to ask, "how much can they get for them at current prices?" does not sound theoretical to the untutored mind. The theory must come in when men try to decide what families can get along without.

Budgets are not theoretical; it is the point of view of themen who call them so toward

the livelihood of others that is theoretical. They cannot envisage the spending of such low earnings and so they dismiss the spending side as theoretical. We, the minority, agree that these budgets are in a sense theoretical, because they proceed in a negative fashion. The majority of them aim to show what is the least that men can get along on, what they can do without.

This is the basis of the National Industrial Conference Board budgets which carefully eliminate all but the coarsest, simplest foods, which reduce clothing to the limits of the law, and which are throughout planned to show how low are the earnings on which a man may survive.

In a democracy such budget making is theoretical. It is therefore interesting to find the majority, which have established rates of pay for hundreds of thousands of men averaging about two-thirds of these lowest budgets, choosing as a basis for demonstrating the theoretical nature of budgets, that presented by the Railway Employees' Department, which shows a need almost twice as great per family as that shown by the Conference Board of Manufacturers. Presumably, if the various persons who term such budgets theoretical were forced to live on one of the two they would consider the proposition that they live on the Railway Employees' Department budget far less theoretical of the two. The section man may with justice contend that the Labor Board has forced him to live on a theoretical budget. A practical minimum budget, would call for at least 50 cents per hour.

The majority have not met the challenge of these budgets by pointing out the goods which must be cut out to make them "practical."

As a matter of fact the majority have said nothing about the Railway Employees' Department budget that the representatives of the employees were not careful to point out themselves. They pointed out that the budget was not a minimum subsistence budget, claiming that the families of skilled mechanics should not be required to meet a minimum set at the subsistence level. They devoted pages of argument to demonstrate that the productive effort of the country did not today prove sufficient to meet the demand which would arise if such a wage were made general among all families. But they also showed clearly why this was the case and pointed to the fact that a redirection of the country's energy away from the waste of commercial militarism toward producing to meet the need of the population would automatically make good the present deficit in income.

They submitted much evidence tending to show that the present inability of the country to provide adequately for its citizens was due to the very attitude which expresses itself in the present series of decisions, the attitude which places profits before the sustenance of human life. This policy requires ever lower standards in order to enable capital to secure an ever larger share. It mortgages the wage earner to all eternity. And the result is a steady decrease in the production of national income for division.

The paragraph following this blanket criticism of budgets, points clearly to the social theory underlying this whole decision. It recommends a life of Spartan severity to the drudges of society in order that business may have its satisfactions. It lays a criticism on labor which is as unjust as it is insulting. The majority say—

That one of the principal troubles with this country today is the abandonment of the old-fashioned ideas of thrift and economy and the indulgence of wastefulness and extravagance.

These loose habits of living were acquired during the inflated period engendered by the war and, like many other ills of similar origin, are slow to depart. Increased expenses do not always mean a higher standard of living nor do diminished expenses necessarily mean a lower standard of living.

Is this the apology of the majority for decisions which in important instances mean lower purchasing power? Give up your loose living, they say, and you will be able with a lower purchasing power to maintain the same standard.

In order to avoid the charge that we are indulging in "bluff" and "bluster" we will allow the Metropolitan Life Insurance Company, one of the great owners of railway securities in the country, to answer this accusation in its Statistical Bulletin for November, 1920. It said:

In our Bulletin for May, we commented upon the effect of the high cost of living upon the public health. We observed that, although increasing wages had not quite kept pace with increased prices of essential commodities, the health of the industrial population had not been adversely affected. On the contrary, the low levels attained by the death rates for tuberculosis, pellagra and other diseases which are indices of the material welfare of the population, showed that wage workers were better off than at any time in the history of public health in the United States and Canada. The explanation of this anomaly can be found, we believe, in the absence of unemployment during the period of mounting prices. Wage earners, during this time, were always certain of a full pay envelope each week. This gain was apparently more than enough to offset the disparity between prices and wages.

Despite popular misconception that wage earners spent their higher income in wasteful ways, the real evidence is that much of the increased income was expended wisely in securing a more wholesome home environment. Department store records show that wage earners bought heavily such useful goods as furniture, bedding, carpets, and other lines of household equipment. Both industrial and ordinary insurance companies report unprecedented scales of higher-priced plans of insurance to wage earners. The "industrial" or weekly premium applicant became a candidate for "intermediate" and "ordinary" insurance. Savings banks reported record-breaking deposits from this group of the population. Lodges and other fraternal associations gained largely in membership. Vacation resorts gave testimony that the wage earner took advantage of his increased earnings to provide healthful outdoor recreation for his family. Skilled medical and nursing care became available to many persons who heretofore relied upon free clinic and hospital facilities. All these factors helped

to lower the death rate of the industrial population of the United States and Canada.

This contradicts the opinion of the majority at every point. It shows that the higher earnings consequent upon steady employment were not spent in extravagance but rather in life-sustaining channels. The lowered death rate is directly attributed to this fact. It shows that thrift did not diminish, but increased. Increased saving bank deposits and life insurance policies demonstrate that fact.

The majority of the Board are, then, in a thoroughly insecure position, when they must depend for justification of their decisions upon principles which either contradict the clear purpose of the Act under which the Labor Board is created or upon misinterpretation of fact. It is the opinion of the minority that such pitfalls could be avoided by a clear, sincere attempt to approach the problem of wages from the point of view of the humble worker who must spend his wages to support his family. Wage adjustment will be theoretical until statesmen appear with enough human sympathy to place themselves in the other fellow's position.

A. O. WHARTON,
ALBERT PHILLIPS.

Supporting Opinion of the Majority

It is not incumbent upon the six members of the Board concurring in this decision to follow the minority into a partisan controversy which partakes more of the characteristics of impassioned advocacy than of calm adjudication.

INCENDIARISM

In so far as the dissenting opinion distorts the sentiments of the majority, misquotes their language and reflects upon their desire and disposition to do justice, we will refrain from comment. We prefer to believe that these improprieties crept into that part of the document which was drafted by the employees in the headquarters of the Railway Employees' Department of the American Federation of Labor, and that they were overlooked by the dissenting members. As an example of the looseness with which the statements of the decision were handled in the dissenting opinion, reference might be made to the following quotation from the dissent:

In this decision, as in the preceding ones, the Labor Board announces that "In its opinion" wages are still above those paid in outside industries.

As a matter of fact, the statement in question is not contained in this decision.

There is one feature of the dissenting argument, however, which is so unusual that it

should not be passed over without notice, and that is the portion wherein the two dissenting members advise the employees to strike against the decision of the Board.

It is quite natural for the representatives of Labor on the Board to resist all reductions in wages. This course is in harmony with the policy of the organizations, and it was pursued in connection with the reductions in the year 1921 as well as those of the present year.

It is something new, however, for labor members of the Board to issue incendiary arguments to employees in favor of striking against a decision of the Board. The giving of advice of this kind has heretofore been left to outsiders, who were not under the official obligations imposed by the Transportation Act, the main purpose of which is to prevent railway strikes and protect the public from their dire effects.

One of the passages referred to is as follows:

* * * the Transportation Act aimed to substitute for the strike such just and reasonable wages as would render resort to a strike unnecessary. If this tribunal, created to determine such wages admits that under existing circumstances it can not fulfill this function, obviously, the employees must use such power as they have to influence the labor market, which is henceforth to be the determining factor in their wages.

That is to say, if the Board makes such admission, the employees must strike.

Then the dissenting members proceed to remove the "if" and to assert that the Board has made the admission which renders a strike necessary. After quoting a statement from the decision of the majority, which was separated from the context for the purpose, the dissenting opinion proceeds as follows:

Such statement is an admission on the part of the majority that they have been unable to separate themselves from the partisan struggle long enough to perform the functions for which they were appointed and consequently it tends to absolve the employees from any limitations which the existence of a judicial board was intended to impose.

Not only do the minority step down from the judicial position, which they occupy, to advise a strike, but they obviously distort and misconstrue the language of the majority in order to provide the condition which they pronounce a justification.

This is not the only place in the dissenting opinion where the suggestion is made to the employees to strike.

NO INJUSTICE TO EMPLOYEES

As a matter of fact, the entire dissenting opinion constitutes a strained and exaggerated effort to inflame the employees by the belief that they have been grossly outraged by this decision.

A fair statement of the facts will convince any disinterested man that no injustice has been done to these employees by the present decision, and that the decrease in their wages is conservative and is based upon the law and the evidence.

THE RELEVANT CIRCUMSTANCES

In the decision, the majority quoted from Decision No. 2 what the Board there said in regard to the "relevant circumstances" referred to in the Transportation Act. No detailed comment was made on the quoted matter. The minority in their dissent savagely attack the statements so quoted from Decision No. 2, and, in effect, over-estimate any consideration that the majority may have given any portion of it. And yet, the records of the Board show that the dissenting members voted for the adoption of the decision containing the language in regard to "relevant circumstances," and they did not seek to exclude it. This, be it remembered, was a decision increasing wages 22 per cent and the present minority were then of the majority. It would, therefore, appear that the relevant circumstances mentioned were to be considered by the present dissenting members in relation only to wage increases but not decreases.

PURCHASING POWER OF WAGES

The dissenting members criticize the tables offered by the majority to show the trend of the purchasing power of the wages of the employees covered by this decision, on the ground that the year 1917 in an unfair year to adopt as a basis or starting point. The inference is rather plainly drawn that the selection of said year was the result of a deep and sinister design on the part of the majority. This suggestion is far-fetched, as the dissenters are well aware that the wage reports of this board have begun with the year 1917 and both of them have twice concurred in this arrangement. It was therefore a natural course for the Board to make use of the wage series which it had prepared and published.

The minority suggest that either the year 1914 or 1915 should have been adopted as the basic year for these tables.

The year 1914 can not be safely adopted, because the carriers then reported their clerical forces in groups and classes different from the method since used, beginning with 1915. The use of the year 1914 as the basic year would admittedly require the making of an estimate, the accuracy of which would necessarily be doubtful. If the figures for the basic year were doubtful, then those for all subsequent years would be of uncertain accuracy and value. We will therefore adopt

1915, the other year pronounced satisfactory by the minority, and will demonstrate indisputably the changes that have taken place in the wages of these employees and in the purchasing power thereof, based upon the Bureau of Labor Statistics as to living costs.

The following table was prepared by the statistical force of this Board at the request of the minority and furnished to them, but does not seem to have suited their purpose, as it was not used. The increases in purchasing power of earnings under the present decision over 1915 are as follows:

PERCENTAGE OF INCREASE IN PURCHASING POWER OF EARNINGS UNDER PRESENT DECISION OVER 1915

(a) Employees in Group I

	Per cent
Supervisory clerks and clerks with experience of two years or more.....	8.8
Clerks with experience of one year and less than two years.....	-1.1
Clerks with less than one year experience.....	4.2
Train and engine crew callers, train announcers, gatemen, baggage and parcel room employees	15.0
Office boys, messengers, chore boys and others under eighteen years.....	2.0
Janitors, elevator operators, watchmen, employees assorting waybills, etc.....	1.4
Freight handlers and truckers.....	17.5
Sealers, scalers and fruit and perishable inspectors	20.2
Stowers, stevedores, callers or loaders, locators or coopers	22.9

(b) Employees in Group II

Stationary engineers (steam).....	70.0
Stationary firemen (steam).....	42.1
Boiler-room water tenders.....	25.9
Engine-room oilers.....	42.1
Coal passers, boiler room.....	25.9

(c) Employees in Group III

Leading maintainers, gang foremen and leading signalmen	5.0
Signalmen, signal maintainers, assistant signalmen and assistant signal maintainers....	6.5
Helpers	12.7

—Decrease.

The foregoing table is based on the flat daily rate.

TABLE BASED ON ACTUAL EARNINGS

There is a table on page 41 (dissenting opinion) [see p. 755] which gives the wage index number of clerks between 1914 and 1921, cost of living index number, and standard of living index number. The Board's statistician reports that he is unable to ascertain from what source the wage index numbers were obtained, particularly in view of the fact that in 1914 the carriers reported only general office clerks in a grouping exclusive of other classes of railroad employees.

The statistician of the Board has worked out a table based upon the Interstate Commerce Commission's reports of the average monthly earnings of all clerks from the year 1915 to the last six months of 1921 and has used hours worked by this class in the last six months of 1921 to determine a rate under the present decision. This table is given below. It is also tied up with the cost of living index number in order to reflect a trend of standard of living. From these figures it will be seen that the standard of living for all clerks under the rates prescribed by the present decision is 12.1 per cent above 1915:

COMPARISON OF LIVING COSTS AND WAGES OF
RAILWAY CLERKS, 1915-1921, SHOWING
CHANGES IN STANDARD OF LIVING

Period	Average monthly earnings	Index number average earnings	Cost of living index number	Standard of living index number
Year 1915.....	69.36	100.0	100.0	100.0
" 1916.....	73.55	106.0	112.5	94.2
" 1917.....	77.65	111.9	135.5	82.6
" 1918.....	102.60	147.9	165.9	89.1
Dec. 1919.....	114.59	165.2	189.6	87.1
4th quarter, 1920.....	145.91	210.4	190.7	110.3
Last 6 months, 1921.....	131.58	189.7	165.8	114.4
Last 6 months, 1921, at new decision rates	123.45	178.0	*158.8	112.1

*March, 1922.

This 12.1 per cent increase in the standard of living of clerks in the last seven years, based on an increase in wages of 78 per cent and an increase in living costs of 58.8 per cent indicates remarkable progress. This class of employees should feel that their official representatives have rendered them notable service in the effectuation of this result. It certainly affords grounds for satisfaction and encouragement rather than for inflammatory appeals for strikes.

There is no class of labor covered by this decision to which the dissenting discussion of pauperized labor with its physical and social deterioration and its propagation of crime has any application.

THEORETICAL LIVING STANDARDS

It appears that a portion of the employees covered herein have presented a family budget of \$2,636.97 and others have offered a family budget of \$2,133. The latter is presumably based on the budget set out in December, 1919, Monthly Labor Review, published by the United States Bureau of Labor Statistics, as the dissenting opinion quotes at length from that publication the Bureau of Labor's explanation of the budget. This

quotation is prefaced by the statement: "It (the budget) is described by the Bureau of Labor Statistics as follows." With this identification of the budget used, we desire to quote another passage from the same article as follows:

This report presents the result of a study made by the United States Bureau of Labor Statistics to determine the cost of maintaining the family of a government employee in Washington at a level of health and decency.

Let the significant fact be noted that the budget is for a government employee in Washington and that, when Washington was the most congested city in the United States with an abnormally high cost of living, as a result of the great temporary increase in population resulting from the war expansion of all governmental departments.

Whether the budget of \$2,133 is identical with that set out in said government publication as it purports on its face to be or whether it is one of the several other budgets heretofore submitted to the Board, the figures are practically the same as those in the government publication, the latter being \$2,288.25.

The dissenting members seem to have temporarily abandoned their budget of \$2,636.97.

In the decision in this case, it was shown that this budget of \$2,636.97 if given to every family impartially would require a sum twenty-five billion dollars in excess of the total income of all the individuals and industries in the United States.

The budget of \$2,133 now relied upon is open to the same fatal criticism.

If the country's 25,000,000 families were guaranteed an income of \$2,133, the total income of the entire country would be exceeded by the sum of \$13,225,000,000.

In the face of this absurdity, page after page of the dissenting opinion is devoted to an attack on the Board's decision upon the ground that the wages fixed for some of the employees do not reach the amount of this mythical, visionary budget. The advanced purchasing power of the railway employee's wage, the relative great increase of that wage, the improved social and economic condition of the employee are all ignored, and a vitriolic denunciation of the Board's decision is indulged in because every individual employee is not granted this impossible sum of money.

Let us see what would be the result of adopting either of these budget theories on the railroads and requiring that no employee should receive less than \$2,133, according to one contention, or less than \$2,636.97 according to the other. The following table throws light on this question:

Total revenue of roads, 1921 ..\$5,509,035,259
 Increase in aggregate pay of employees if minimum wage \$2,636.97, were paid on basis of Decision No. 147..... 1,834,778,865
 Increase in aggregate pay of employees if minimum wage \$2,133, were paid on basis of Decision No. 147..... 1,063,081,640

The net income of the carriers for two other years prior to the war was as follows:

1914.\$673,611,198
 1915. 697,185,309

It is quite obvious, that the net income of the roads for the years named, and, it may be added, for any other year in history, would have been consumed by the recognition of either of the above budgets, and the carriers would have shown a loss of hundreds of millions of dollars each year. This shortage would have had to be paid by some form of taxation on the public, presumably, freight rates, which would have added to the burdens of every individual in the country, rich and poor.

In this connection, it is interesting to note that the dissenting opinion finds fault with the majority decision, because it states that "it is idle to contend that labor can be completely freed from the economic laws which likewise affect the earnings of capital."

The soundness of this axiomatic proposition is right well exemplified by the theory of the minority above discussed that no wage can be made so high as to constitute an unbearable burden on an industry. Because those concurring in the decision recognize the existence of some of the old-fashioned economic laws quite familiar to the ordinary business man, those dissenting affect to believe that the majority place the consideration of profits above the welfare of the workers. This is a gratuitous assumption. This Board has never taken the position that the claims of the employees for a just and reasonable wage must await the prior demands for increased profits, nor does it take such position in this decision. It is a waste of time to make detailed defense to all these overdrawn and imaginative assertions.

It is well enough to remember, however, that the time will never come in this country or any other country when the ordinary rules of common sense and business, call them economic laws, if you wish, can be absolutely ignored in the conduct of any industry. The latest instance in which these laws have been thrown overboard and replaced by finespun socialistic theories, both in railway and other industries, is found in Russia, and

the result there is not one that this country desires to emulate.

The minority are sowing some of the tiny seeds that have germinated and blossomed into industrial anarchy in Russia, when they make such statements as this: "They (the economic laws) are simply a description of the way in which business and industry have worked to date, and they have worked out very badly for human life."

It will be readily conceded that our social and industrial system has not invariably produced perfect results, but, upon the whole, it has demonstrated its superiority to every experimental substitute that has been offered. And the fact must not be overlooked that this great industrial republic has rewarded labor with its largest degree of liberty, prosperity and happiness. It is well not to hold its minor imperfections so close to the eye as to obscure its benefits.

PERMISSION TO ADJUST RATES

The dissenting opinion stated that the decision gives the carriers specific permission to adjust rates, because it says that the carriers are at liberty to pay higher wages than those fixed by the Labor Board.

The Board did nothing of the kind. It gave the carriers no permission to adjust rates. There is nothing in the Transportation Act that prevents a carrier from paying higher rates, unless such higher rates would result in increased rates to the public. The statute contemplates that the carrier would not have to coerce the employee into the acceptance of a higher rate. This does not mean that the Labor Board construes the Transportation Act to mean that the carrier may impose a lower rate on the employees or the employees impose a higher rate on the carrier.

The suggestion by the minority that the employees will take this as permission to "go out and get" such wages as they can command is entirely absurd. If they should do so, it would be the result of the minority's suggestion and not of the language of the decision.

Finally, let it be reiterated that the majority, in arriving at this decision, considered every phase of the evidence and provision of the Transportation Act, and that their minds rest easily upon the reasonableness and justice of their conclusions, in the light of all the circumstances and conditions shown to exist at this time.

Attest:

L. M. PARKER,
 Secretary.

FAIR WAGE CONTRACTS, JUNE, 1922

DURING June the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to two fair wage contracts, of which one was awarded by the Department of Public Works and one by the Department of Railways and Canals. These contracts contain the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevent abuses and secure the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS

Dredging part of Pacific Great Eastern Barge Transfer Slip, Squamish, B.C. Name of contractor, Vancouver Dredging and Salvage Company, Limited, Vancouver, B.C. Date of contract, May 29, 1922. Amounts of contract,—Class "A" \$6 per cubic yard, and Class "B" 28½ cents per cubic yard—(in situ).

DEPARTMENT OF RAILWAYS AND CANALS

Completion of construction of Sections Nos. 3 and 4 of the Welland Ship Canal, including Locks Nos. 4, 5, 6 and 7 and Guard Gate. Name of contractor, P. Lyall and Sons Construction Company, Limited, Montreal, Que. Date of contract, June 27, 1922. Amount of contract, schedule rates.

POST OFFICE DEPARTMENT

The following is a statement of payments made in June for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of orders	Amount of orders
Making metal dating stamps and type, and other hand stamps and brass crown seals	\$ 809.31
Making and repairing rubber stamps, daters, etc.	152.58
Supplying mail bag fittings.....	2,500.00
Making up and supplying letter carriers' uniforms, etc.	4,905.14
Repairing letters boxes, etc.....	19.25
Stamping ink, pads, etc.....	22.66
Scales repaired	222.50

FAIR WAGES ON PROVINCIAL PUBLIC WORKS IN MANITOBA.

THE Minister of Provincial Public Works in Manitoba, acting under authority of the Manitoba Fair Wages Act, 1916, has approved the following rates of wages and working hours in connection with the execution of provincial public works in Manitoba,

effective from June 1, 1922, to April 30, 1923, or until another order shall be made.

FAIR WAGE SCHEDULE FOR WINNIPEG.

The following Schedule shall apply to the City of Winnipeg, and a radius of Thirty miles therefrom, effective from the First day of June, 1922, to the Thirtieth day of April, 1923:

FAIR WAGE SCHEDULE FOR PROVINCE OF MANITOBA.

(Exclusive of Winnipeg)

The following Schedule shall apply to any portion of the Province of Manitoba, other than the City of Winnipeg, and a radius of Thirty Miles therefrom, effective from the First day of June, 1922, until the Thirtieth day of April, 1923:—

	Rate per Hour	Hours per week
1. Labourers—	\$	
(a) Skilled. Comprising the following:—Unloading, Piling and Handling Face Brick, Cut Stone, Architectural Terra Cotta, Marble (real or imitation), Roofing Slate, Plaster Castings, Ornamental Bronze and Iron, Interior Joinery, Laying Drain Tiles, Mixing Concrete by Machinery, Puddling Concrete in Forms or Levelling in Slabs, Bending and Placing Reinforcing Material, Movable Scaffolding and Runways.....	.50	50
(b) Unskilled. Comprising all labour other than the occupations above defined or elsewhere provided for in this Schedule.....	.42½	54
2. Teamsters.....	.50	60
3. (a) Bricklayers.....	1.07½	44
(b) Helpers—		
1. Mixing and Tempering Mortar.....	.55	50
2. Attending Bricklayers on or at scaffold.....	.50	50
4. (a) Stonemasons.....	1.07½	44
(b) Helpers—		
1. Mixing and Tempering Mortar.....	.55	50

AGREEMENT BETWEEN THE RAILWAY ASSOCIATION OF CANADA AND EMPLOYEES IN RAILWAY SHOPS

Wage Agreement No. 4 "Revised"

THE employees in the railway shops in Canada, organized as Division No. 4, Railway Employees' Department of the American Federation of Labour, entered into an agreement, (known as Wage Agreement No. 4 "Revised") on May 22, 1922, with the Railway Association of Canada, revising the working conditions provided for in Agreement No. 4 entered into on November 12, 1919 which was a revision of Agreement No. 1 entered into September 2, 1918, with the Canadian Railway War Board representing the principal railways in Canada. The latter agreement, which was the first agreement made between railway employees and the railway companies applying generally to all the principal railway systems throughout the Dominion, followed the adoption of the so-called National Agreements in the United States between the Director General of Railroads representing the United States Government (at that time operating the principal railways) and the various unions of railway employees except those engaged in train service. These agreements incorporated the wages and working conditions provided for in General Order No. 27 of the Director General (commonly known as the McAdoo Award) and the various supplemental orders. Uniform working conditions for the various trades or the various railways were provided for, notably the 8-hour day with time and one-half for overtime in most instances, with 44 hours per week for some trades.

The terms of Agreement No. 4 as to wages were altered later by supplements to provide for increases in wages on May 1, 1920, and to provide for decreases on July 16, 1921, in accordance with changes in the wage rates of railway employees in the United States decided on by the United States Railroad Labour Board. In August 1921 and in subsequent months the Board rendered decisions revising the rules as to working conditions for various occupations which had been in force under the National Agreements in the United States; and the representatives of the railway employees and railway companies in Canada later met to revise the rules for Canadian railways, and reached an agreement on May 22, 1922.

Under the new revised agreement the eight-hour day is retained, with the 44-hour week in some cases, with time and one-half for overtime and for holidays, New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day; except that employees necessary for the operation of power houses, etc., are paid overtime rates for work on the following holidays only, New Year's Day, Labour Day and Christmas Day. Sunday work is also to be paid for at overtime rates, except for employees necessary to operation of train yards, etc., who get a day off each week regularly.

Changes were also made in the provision of time for meals under certain cir-

cumstances and pay for time travelling for the company, travelling expenses, special calls, etc., the revised rules being in most cases in favour of the railway companies. The rules as to the duties of the various crafts, particularly in the case of helpers, were also made more favourable to the companies.

Should either the railway companies or their shop employees desire to revise

these rules a written statement containing the proposed changes is to be given and a conference held within 30 days. The agreement also contains the rates of pay provided for in the 1921 supplement to the 1919 agreement, but since May 22, the day on which the agreement was signed, the Railway Association has given the employees' organization the required notice that rates of wages would be reduced at the middle of July.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both employers and employees, but verbal agreements are also included in the records, the latter being schedules of rates of wages, hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, other important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule the rates of wages for the principal classes of labour are given, with other information of general interest.

Fair wage schedules for Winnipeg and for the province of Manitoba (exclusive of Winnipeg), effective from June 1, 1922 to April 30, 1923, issued under authority of the Manitoba Fair Wages Act, 1916, are printed in a preceding article in this issue.

Manufacturing—Foods, Drinks, etc.

TORONTO, ONT. — CERTAIN MASTER BAKERS, AND BAKERY AND CONFECTIONERY WORKERS' INTERNATIONAL UNION No. 181. Agreement to be effective from May 1, 1922, until May 1, 1923.

Minimum wages per week—foreman, \$48; second hand, \$44; third hand, \$40. Overtime, for regular journeymen, time and one-half, jobbers not less than \$1 per hour.

Hours of labour, not more than 8 per day, 6 days per week. Sponge setting on Friday to be paid not less than \$1; same to be done by jobbers.

Jobbers sent by the local not to be rejected if capable of doing the work. An employer working himself and needing only one man must employ a second hand; third hands in such shops not allowed.

No work to be done on holidays and all Hebrew holidays to be paid.

Union label must be put on every loaf of bread, but if any trouble occurs between employer and employees and it is proved that employer has not fulfilled the agreement, label may be withdrawn.

Local representative may enter shop during work. Shop must be kept under sanitary conditions.

In case of a baker boss taking a partner, only one of them may work in shop, and for not more than eight hours, with union men.

VANCOUVER AND NEW WESTMINSTER, B.C.—CERTAIN LOCAL FIRMS, AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND

HELPERS, No. 371, BAKERY SALESMEN. Agreement to be effective from May 1, 1922, until May 1, 1923, and thereafter unless terminated by 30 days' notice from either side.

Wages per week—Bakery salesmen, \$25.50; stablemen (seven days) \$25.50.

Six days to constitute a week's work, day of rest being Sunday. Time and one-half for repairs to machine or wagon on Sunday. Salesmen not to be required to deliver on Sunday; and not to be allowed to work on certain holidays, or on so doing to receive an extra day's pay or a day off in the week. Legal holidays to be given without deduction of pay.

Salesmen delivering cakes or bread to be union members. No salesmen to be discharged for upholding the principles of organized labour.

A week's work to consist of 50 hours; "week preceding holidays shall be 55 hours; and week following holidays, 45 hours." Overtime, time and one-half. Wednesday to be a half holiday unless preceding or following a public holiday.

No employee to suffer a reduction of wages through adoption of this agreement.

In event of any dispute arising drivers of shop concerned with assistance of union officials to endeavor to effect a settlement with the firm. If no settlement is reached dispute to be referred to an arbitration committee of two union men and two members of the Employers' Association, none of these being members or employees of the firm involved; committee to appoint an independent chairman; decision to be binding.

Salesmen's wages to be adjusted quarterly according to the cost of living figures of the *Labour Gazette*. To avoid retroactive pay, quarter ending May 31 to be taken as a basis for the first quarterly adjustment. Adjustments to be made payable August 1, and once every

three months thereafter, rate in no case falling below minimum wage specified in the agreement.

New employees to make application within 30 days to join the union.

CALGARY, ALBERTA.—CALGARY BREWING AND MALTING COMPANY, LIMITED, AND INTERNATIONAL UNION OF UNITED BREWERY, FLOUR, CEREAL, AND SOFT DRINK WORKERS OF AMERICA, No. 124. Agreement to be effective from June 1, 1922, until June 1, 1923, with 30 days' notice of change.

Wages: Per hour—general mechanics, 77½ cents; mechanic's helper, 59½ cents; coopers (tight work), 70½ cents; coopers (slack work), wash house, aerated water bottles, beer bottles, town teamsters, assistant truck drivers, 61½ cents; cellars, brew house, and grain drier, leading men in bottle house, elevator, 63½ cents; machine men and packers, first man on soakers, yard teamsters, stablemen, 58½ cents; labourers, 56½ cents; boys, 38½ cents; engineers, 70½ cents; firemen, 60¼ cents. Hours: from March 1 to November 1, 9 hours for 5 days with 5 hours on Saturdays; from November 1 to March 1, 8 hours for 5 days with 4 hours on Saturday. Six 8-hour days to constitute a week for firemen with time and one-half for overtime. Stablemen, six and one-half days per week with Saturday afternoon off; one week's holidays per year with pay. Malt floor men, 8 hours per day, one day off in eight. Elevator men, two weeks' holiday per year with pay if working 7 days per week. General mechanics, 77½ cents per hour, time and one-half for overtime, Sundays and after midnight if working sixteen hours previously, double time.

Any competent member of the union may be employed at his trade under this agreement if he has passed the required examination.

Employees to join the union within 10 days of employment. No discrimination for upholding union principles, nor for working on or under a union committee.

Free temperance beer to be served employees three times a day. Employees to be given wholesale rate on goods purchased at local breweries.

Sickness to be no excuse for discharge. Position to be restored up to twelve months unless sickness is caused by accident whilst on duty for the company.

If extra help is required from April 1 to September 30, companies to have right to hire such help as required, returned soldiers when available, provided no union men are out of work. Extra help to be controlled on permit card system.

If stagnation of business causes lay-off, men to be laid off not longer than a week at a time, and in rotation. Employers wishing to employ new men must approach the secretary of the union or an official appointed for the purpose. If no union men are available employers may hire as they see fit.

Differences to be referred to a board of arbitration of two members from each party. If these fail to agree they shall select a fifth disinterested party, decision to be binding.

Brewery may employ one boy for six men. Boys not to do work of a man. Boys under sixteen not to be employed.

Preference for advancement to be given to seniority if there is a competent man in each department.

Manufacturing—Iron, etc.

EDMONTON, ALBERTA.—MASTER SHEET METAL ASSOCIATION, AND AMALGAMATED SHEET METAL UNION No. 371. Agreement to be effective from June 9, 1922, until April 30, 1924, with three months' notice of change.

Wages per hour—Sheet metal workers from June 9, 1922, until April 30, 1923, 90 cents; from May 1, 1923, until April 30, 1924, 85 cents. Improvers for the same two periods, 70 cents and 60 cents. Overtime, until midnight, time and one-half; thereafter and Sundays and holidays, double time.

Hours per full week, December until March, 44. During remaining months, employer to determine whether shorter hours shall prevail depending on state of trade.

Improvers to be men who have served three years. Apprentices' qualifications to join union to be considered by shop steward, foreman and employer. If disagreement arises, case to be brought before a committee of three members of Union not affiliated with said shop and three master sheet metal employers, or the joint council of the industry of the building trades. Majority vote to be final.

One improver to each shop with less than two journeymen, to be sent out on any work without a journeyman during their fourth year. One apprentice to each shop, and one for every three journeymen employed.

Shop steward to collect union cards and assist manager of shop in dealing with disputes which shall if necessary be referred to the Joint Executive Committee.

Allowance to be made for transportation and board and travelling time.

All shops to be closed at noon on Saturdays except to the proprietors.

No union member to work in an open or unfair shop except by mutual agreement. No union member to contract or sub-contract.

SAULT STE. MARIE, ESPANOLA AND STURGEON FALLS, ONT.—SPANISH RIVER PULP AND PAPER MILLS, LTD., AND INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS. Agreement in effect from May 1, 1922, until May 1, 1923.

In hiring and laying off preference to be given to union men. Common labour employees to be notified by the foreman to join the union within reasonable time of having become permanent employees.

Operation of paper mills to be not more than six days per week. Standard week in pulp mills to be not more than six days, but when necessary to provide stock to keep paper mills running or for other reasons, pulp mills shall operate Sundays, work being paid time and one-half.

Overtime over six days of eight hours for day workers, time and one-half. Outside day workers, six days of eight hours; work over eight hours, first two hours, regular rate; thereafter time and one-half. Employees called back for repair work after punching out, to receive not less than four hours' pay.

Four workers for time worked between 8 a.m. on Sunday and 8 a.m. Monday, time and one-half. Overtime, time and one-half. On vacancies after two weeks, time and one-half. If, however, union and company are not able to procure competent men, straight time to be paid until vacancy can be filled.

No strikes or lockouts to occur during the life of this agreement.

Grievances to be reported to the general superintendent. If reply is unsatisfactory, question to be referred to general manager of the Company and the president of the International Brotherhood of Pulp, Sulphite, and Paper Mill Workers, who shall select one man each; these to select a third, or if they fail to do so, third to be appointed by the Minister of Labour. Decision of these three to be rendered within five days. Employee unjustly discharged to report case to general superintendent.

Apprentices in mechanical trades to receive the following percentages of journeyman's rate: 1st year, 25 per cent; 2nd year, 45 per cent; 3rd year, 65 per cent; 4th year, 85 per cent; 5th year, 100 per cent.

In event of cessation of work, or strike, through failure to renew this agreement, local union to supply competent men to do the following work when called upon by the company, at the schedule rates of this contract:—

electrical work, unloading of incoming freight purchased prior to cessation, power house operators, operation of dam or regulation of river flow and any other work of a similar nature, until it is mutually agreed between company and Brotherhood to recommence operations.

Common labour not included in wage schedule attached to the agreement—rate for this class being set by the company—rate being fixed for three months and proposed alterations to be discussed with the Standing Joint Wage Committee.

Wage rates are given in the schedule for "the Soo," Espanola and Sturgeon Falls. These given below are for "the Sco" only; those for the other two localities are similar. Wages: Per hour—foreman, sawyer and powerman in wood yard, 58 cents; woodroom: knife setter, knife barker, chipperman, 39 cents; knife grinder, oiler, 38 cents. Ground-wood mill: stone sharpener, 58 cents; grinderman, wood handler, screens and deckers, 40 cents. Ground wood wet press: men on wet machines, 38 cents; sulphite mill: cook, 83 cents; acid makers, 68 cents; blow pits, 41 cents; sulphur burners, 39 cents. Wet press, sulphite, oilers, 38 cents; stock runners, 41 cents; Rogers wet machine, back, 39 cents; front, 38 cents; weighers, 54 cents; screen tenders, 37 cents; sulphite machine men, 38 cents. Beater room: first helper, broke beaterman, 39 cents. Finishing room: head finisher, 41 cents; helper, 37 cents; car cleaners, 37 cents; head loaders, 41 cents; weigher, 55 and 58 cents; truckers, coremakers, 37 cents; tier, 39 cents, cutter man, 54 cents. Boiler house: water tenders, 61 cents; repair man, 65 cents; helpers, 39 cents; fireman, 57 cents; helpers, 57 cents; oilers, 38 cents; steam engineers, 66 cents. Yard and tracks: teamsters, 39 cents; train crew, 47 to 65 cents; crane engineer, 76 cents; crane fireman, 39 cents. Electrical department: 66-79 cents; mechanical department: minimum rate for mechanics, 65 cents, and for mechanics' helpers, 54 cents. Paper

machine room: tour oilers, 56 cents; cleaners, 37 cents.

Building and Construction

MONTREAL, QUE.—CERTAIN EMPLOYING LATHERS, AND WOOD, WIRE AND METAL LATHERS' INTERNATIONAL UNION No. 315. Agreement to be effective from June 1, 1922, until April 30, 1923, with three months' notice of change.

Wages per hour, 90 cents; overtime, time and one-half; Sundays and holidays: double time.

Hours, 8 per day with 4 on Saturdays—44 per week.

Employers agree to employ only union members. Members agree not to contract or bid for contracts except after taking out a withdrawal card.

ESCOTT, ONT. — LOCAL MANUFACTURERS, AND PAVING CUTTERS' UNION, BRANCH No. 99. Bill of prices and working conditions to be effective from January 1, 1922, until January 1, 1923.

Rates: Blocks $3\frac{1}{2}$ - $4\frac{1}{2}$ inches wide, $4\frac{1}{2}$ -5 inches deep, 7-10 inches long, \$36 per thousand on the track, dimension one way and on the grain if possible. Stone to be free from powder shakes. Grout and motion, \$40 per thousand. Blocks $3\frac{1}{2}$ -5 inches wide, $4\frac{1}{2}$ - $5\frac{1}{2}$ inches deep, 8-14 inches long, \$36 per thousand on the track, dimension one way and on the grain if possible. Stone to be free from powder shakes. Grout and motion, \$44 per thousand. Prices of any other sizes of blocks to be adjusted subject to approval of District Director.

Day work, per hour, minimum, $87\frac{1}{2}$ cents.

Hours per day, 8 with 4 on Saturdays.

Employer to clean and start motions and put down all blast holes required; and to furnish all small tools.

Only union men or men eligible to become so to be employed.

TORONTO, ONT.—MASON AND GENERAL CONTRACTORS' SECTIONS OF THE BUILDERS' EXCHANGE, AND BRICKLAYERS' UNION No. 2, AND STONE MASONS UNION No. 26. Agreement to be effective from May 1, 1922, until December 31, 1922, with three months' notice of change.

Wages per hour, \$1. Overtime, time and one-half; Sundays, Saturday afternoons and holidays, double time. Wages for apprentices: first year, 25 cents; second year, 35 cents; third year, 45 cents; fourth year, 60 cents.

Hours per day or night, 8.

Any union member contracting or sub-contracting must resign his membership. No member to lay brick by the thousand or bulk, or stone by the ton, or to work for any employer who does so.

The union not to strike against employers or leave work before matter is referred to Joint Arbitration Committee—this to be done within forty-eight hours. No members during term of agreement collectively or individually to leave work or take part in any sympathetic strike except under direct authority of union executive officers.

Members of the Mason Builders' and General Contractors' Section to have preference in the supply of bricklayers.

No members to lay brick or cut or lay stone for employers of non-union stone masons or bricklayers respectively.

A Joint Arbitration Committee of 3 members of the two unions combined, and three members from the employers to meet at least once in three months.

HAMILTON, ONT.—HAMILTON SOCIETY OF DOMESTIC SANITARY AND HEATING ENGINEERS, AND UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS No. 67. Agreement to be effective from May 1, 1922, until April 30, 1923, with three months' notice of change or termination. Wage clause may be reconsidered upon 30 days' notice from either party.

Minimum wages per hour, 85 cents for journeymen. Apprentices who have passed the examination, first year, 70 per cent of wage; second year, 80 per cent. Overtime, until midnight, time and one-half; thereafter, and Sundays and holidays, double time.

Fare and board to be paid when working out of Hamilton.

Hours per day, 8, with 4 on Saturdays.

Only union members to be employed. Each journeyman to be allowed only one helper.

Carrying out of terms of agreement and settlement of grievances to be done by a joint conference board of three from each party, to meet at least once a month. Any dispute that cannot be satisfactorily adjusted to be referred to the general office of the Association. No strike or lockout to take place until matter has been investigated and decision rendered by an officer of the said association.

HAMILTON, ONT.—QUARRYMEN'S ASSOCIATION INCORPORATED, AND INTERNATIONAL CUT STONE CONTRACTORS No. 4, AND HAMILTON STONE CUTTERS' ASSOCIATION. Agreement to be in effect from May 1, 1922, to May 1, 1923.

Wages per hour, journeymen, 87½ cents. Overtime only when absolutely necessary; rate for first two hours, time and one-half; thereafter double time. Certain holidays to be observed; others to be optional.

Hours of labour—8 hours with 4 hours on Saturday, with one month's notice of desired change.

For pneumatic and hand cutting only union members to be employed if available. Other employees to join the union at once.

Each party to elect an arbitration committee of three members for settlement of disputes. On failure to agree, an umpire (not affiliated with the trade) to be selected, decision to be final.

One apprentice to five or less journeymen, and one additional for each additional five; in no case shall more than three be in one shop. Apprentices to serve four years, at wages mutually agreed upon.

Carving may be done by day work or sub-contract.

No person to have right to interfere with workmen during working hours. Workmen to be at liberty to work for whomever they see fit. Employers to employ and discharge whomever they see fit.

ST. CATHERINES, ONT. — MASTER PLUMBERS, AND UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS No. 244. Agreement to be effective from June 1, 1922, until June 1, 1923. Three months' notice of change to be given, failing same, agreement to be in force from year to year.

Wages per hour—journeymen, 82½ cents. Overtime until midnight and Saturday afternoons, time and one-half. After midnight and Sundays and holidays, double time.

Hours of labour, 8 per day with 4 on Saturdays.

Only union men or those eligible to become so to be employed.

Men on out-of-town work to have fare and travelling time paid.

Not more than one apprentice to three journeymen. Each employer may employ a man for general help, and additional help on steamfitting when necessary. Each steamfitter to be allowed one helper who may be an apprentice or a labourer. Additional help to be labourers. Apprentice to serve five years, three years as a helper and two as a junior.

Grievances to be referred to a joint committee.

WINDSOR, ONT.—MASTER PLUMBERS AND PLUMBERS AND STEAMFITTERS' UNION No. 552. Agreement to be effective from May 1, 1922, until May 1, 1923,

with 30 days' notice of change; failing such, agreement to remain in force for another year.

Wages per hour, \$1.00. Overtime, Saturday afternoons, Sundays and holidays, double time, except 5-6 p.m. on the first five working days and noon to 1 p.m. on Saturdays, single time; this privilege to be used only in cases of necessity.

Hours per day, 8, with 4 on Saturdays.

Plumbers not to do steamfitting when steamfitters are available.

WINDSOR, ONT.—CERTAIN FIRMS OF THE CONTRACTING PLASTERERS' ASSOCIATION AND PLASTERERS' UNION No. 345. Agreement to be effective from May 1, 1922, until April 30, 1923.

Wages per hour, \$1.12½. Overtime and Sundays and holidays, double time. No work on Labour Day.

Hours of labour—8 per day with 4 on Saturdays. No work on Saturday afternoons.

No person to help a journeyman at plastering or to handle his tools, except an apprentice or employer. None but a good-standing union member to act as foreman, same to have power to hire and discharge, receiving at least one dollar extra per day.

No strike to be entered into on any job except in case of a general strike, until all other means of settlement fail.

Any firm in business for one year employing an average of five men may have one apprentice.

On all jobs in district done by outside employers, 50 per cent of men employed must be members of the local union, this to apply only when members are unemployed.

SASKATOON, SASK. — CERTAIN LOCAL FIRMS AND BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS OF AMERICA, No. 227. Verbal agreement effective from April 1, 1920, until March

31, 1923. Future agreements to be submitted before January 1; failing this, agreement to remain in effect.

Wages per hour, painters, 75 cents; paperhangers, 80 cents. Overtime until midnight, time and one-half; thereafter and Sundays and holidays, double time. Night work only, time and one-quarter.

No work on Labour Day.

No master belonging to the Association to employ non-union men.

No change to be made in agreement without three months' notice.

No employee to be allowed to contract for or do work on his own behalf.

CALGARY, ALTA. — ASSOCIATION OF SANITARY AND HEATING ENGINEERS, AND UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS No. 496. Agreement effective from March 1, 1922, until April 30, 1924. Notice of desired amendment or change to be given before January 31, 1924, otherwise agreement to remain in force for another year.

Wages per hour, from June 1, 1922, until April 30, 1923, 95 cents; from May 1, 1923, until April 30, 1924, 90 cents. Improvers per hour, in their final year, 70 and 65 cents respectively during first and second year of this agreement, provided they have passed the examination. Overtime, first five hours after quitting time, time and one-half; thereafter and Sundays and holidays, double time. Night shifts of ten hours, time and one-quarter, (these must be of at least two nights' duration).

Hours of labour, March 1 to November 30, 8 a.m. to 5 p.m. with one hour for dinner; Saturday, 8 a.m. until noon. December 1 to February 28, 8.30 a.m. to 4.30 p.m. with one hour for dinner. Saturday from 8.30 until noon. Provision that hours during this period may be from 8 a.m. to 4 p.m. with one hour for dinner, also during this period one extra half hour may be worked at straight time to complete job. Out of town work may be ten hours per day with one hour for dinner.

A plumber's apprentice to be allowed to use the tools only under the supervision of a licensed plumber until he has served three years and passed an examination. Five years to be term of apprenticeship. One apprentice to each shop and one additional to each five journeymen. Not more than five to a shop. Journeymen to be employed two months before employer is entitled to an apprentice. Steamfitter's apprentice to use tools only under supervision until he has served four years and passed examination. Five years to be term of apprenticeship. One apprentice to each shop in which one steamfitter has been engaged for 9 months of preceding year. If shop has no steamfitting work on hand apprentice to be loaned to a shop that can continue his training. Not more than one steamfitter's labourer to a journeyman except in cases of heavy lifting.

Only union men to be employed. Union to give preference to members of Master Plumbers' Association while there is work to be done for them, otherwise permission may be given by joint committee to work for outside firms.

In case of grievances, local agent to settle same with employer. Failing this a joint committee to be appointed to settle same within a week.

VICTORIA, B.C.—CERTAIN FIRMS AND LOCAL UNION 2415, PILE DRIVERS, BRIDGE, WHARF AND DOCK BUILDERS. Agreement to be effective from June 1, 1922, until December 1, 1922, and thereafter until terminated on one month's notice.

Wages: Per day, \$6. Existing scale, \$6.50 per day, to continue to be paid on all work on hand. Foreman to be paid \$8 per day.

Only union members of this local or local 2404 of Vancouver to be employed.

Union men not to compete with contractors.

Trade rules of the local union to apply under this agreement except where modified.

Transportation—Rail.

CANADA.—THE RAILWAY ASSOCIATION OF CANADA, (which includes the principal railways of Canada) AND DIVISION NO. 4, RAILWAY EMPLOYEES' DEPARTMENT, AMERICAN FEDERATION OF LABOUR. A summary of this agreement, which covers rates of pay, work hours and conditions of service for employees in the Locomotive and Car Departments of the several Railways appears on pages 771-772 of this issue of the LABOUR GAZETTE.

WINNIPEG, MAN. — WINNIPEG ELECTRIC RAILWAY COMPANY, AND INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, Nos. 1037 AND 435. Agreement to be effective from May 1, 1922, until April 30, 1923. Provided that if for reasons beyond its control company is deprived of any considerable portion of its revenue, and is unable to pay the wages in this agreement, company may give 30 days' notice to terminate the agreement where it concerns the rates of wages.

Wages per hour—linemen: foreman, 95 cents, troublemen and linemen on emergency truck, and sub-foreman, 91 cents; linemen journeymen, 89 cents; meter installers, meter repairers, 82 cents; apprentices, 61½-78 cents; linemen hired to do out of town work, 89 cents or board and 77 cents; foreman hired to do out of town work, 95 cents or board and 83 cents; lamp trimmers 50-70 cents.

Saturday afternoons and other overtime, time and one-half; after midnight and Sundays and legal holidays, double time. Overtime rate not to apply to work done Saturday afternoons, Sundays or legal holidays when coming in regular shift. An employee who has worked overtime not to be laid off to equalize overtime.

Hours of labour, 8 per day and 4 on Saturdays with certain exceptions.

In case of new employees being taken on, union members to have the preference. Company not to discriminate

against any employee for being a union member.

Employees to report grievances to the grievance committee in writing. Committee if they consider the complaint justified, to take matter up with authorities and endeavour to effect settlement.

Transportation and board to be paid to linemen sent out of town.

Apprentices to serve four years; to be required to work only under the supervision of a journeyman except for last six months. Apprentices to be required to work overtime only in cases of emergency. Except where journeymen are lacking, ratio of apprentices to journeymen not to exceed one to four.

Seniority with efficiency to prevail in all departments.

WINNIPEG, MAN. — WINNIPEG ELECTRIC RAILWAY COMPANY AND BARN SHOP AND SHEDMEN IN THE EMPLOY OF THE SAME. Agreement to be effective from May 1, 1922, to April 30, 1923, and thereafter unless 30 days' notice be given prior to April 30, 1923, or prior to May 1 in any other year.

Wages: Per hour—Machinists, 77 cents; apprentices, minimum, 36 cents increasing $2\frac{1}{2}$ cents every six months. Machinists' helpers and drill pressmen, 44-52 cents, babbitt men, 45-54 cents; wheelmen, 56 cents; blacksmiths and welders, 77 cents; blacksmiths' helpers, 44-52 cents; armature winders, 77 cents; armature winders' apprentices, minimum, 36 cents, increasing $2\frac{1}{2}$ cents per month; armature winders' helpers, 44-52 cents; car wiring and controller repairmen, 64 cents; controller inspection and light repairmen promoted from pitmen, 56-60 cents; car carpenters, painters, 77 cents; fender repairmen, 44-48 cents; pitmen leader, 48-56 cents; pitmen helpers, 44-48 cents; air brake repairmen, 60 cents; air brake inspection and light repairmen promoted from pitmen, 56 and 58 cents; oilers, 56 and 58 cents; car cleaners, sweepers, stove tenders, etc., 44 cents. All men working on night shift to receive 2 cents

additional per hour. Where a range is given in the above rates wages increase with term of service (step rates).

Hours of labour—for men in barns and shops during the day shift, 8 hours between 8 and 17 o'clock to constitute a day's work with one hour for lunch. Overtime, time and one-half. On Saturdays from May until September, 4 hours to constitute a day's work except for car maintenance men who may be required to work on such Saturday afternoons. Saturday afternoons from May to September to be paid time and one-half except for car maintenance men.

Holiday rate, time and one-half.

Car maintenance men not to be paid overtime for work on Saturday afternoons, Sundays and legal holidays coming in their regular shift.

Neither the company nor the employees to discriminate against any employee for being or not being a member of the organization represented by the committee executing this agreement.

Employees may apply for leave of absence to shop or barn foreman, and must not accept other employment during leave. Employees absent through holding office in the organization to retain seniority rights. Officers of organization to be granted leave required for organization business when operation of the service will permit.

In reduction of staff, youngest men in service to be first laid off. In increase of staff those laid off to be given preference, efficiency governing.

Free transportation to employees in uniform or showing a company pass.

Company through its properly accredited officers to meet and confer with officers of the Employees' Organization or with a committee of employees on questions arising between them. Complaints and grievances to be adjusted by the superintendent or foreman in charge. If adjustment cannot be made, matter will be taken up with com-

pany direct by a committee representing the men having the grievance. No lock-out or strike to take place in the meantime. An employee who has been discharged or suspended may have case taken up with the company by a committee of employees.

WINNIPEG, MAN. — WINNIPEG ELECTRIC RAILWAY COMPANY AND MOTORMEN AND CONDUCTORS. Agreement to be effective from May 1, 1922, until April 30, 1923 and thereafter unless terminated on thirty days' notice prior to April 30, 1923, or prior to May 1, of any other year.

Wages per hour: Motormen and conductors, first 6 months, 46 cents; second 6 months, 49 cents; second year, 53 cents; thereafter, 56 cents. Sundays, 5 cents per hour above scale.

Extra men reporting regularly, minimum per week, \$19.

Overtime, time and one-half. This does not apply to extra motormen or conductors except when a car is being operated by an extra motorman or conductor and a regular conductor or motorman and they each perform a like service on the full scheduled run.

Motormen and conductors training students, 5 cents extra per hour.

Seniority subject to efficiency to be given preference on all runs.

A uniform pea-jacket to be furnished to conductors and a uniform overcoat to motormen every two years. Each motorman and conductor to be supplied with a summer cap each year and a winter cap every 3 years, and with a uniform each year, provided that he pays half cost of first uniform on entering the service.

Men required to operate motor busses to be taken from the service.

No discrimination against any employee for being or not being a member of the organization represented by the committee executing this agreement.

Provisions made for leave as outlined in the previous agreement.

In reduction of staff youngest men in service to be first laid off and when staff is increased again, these men to be given preference.

Employees in uniform or with a company pass to be given free transportation.

Company through properly accredited officers to meet and confer with the officers of the employees organization or with a committee of employees, upon questions arising between them. Complaints and grievances to be adjusted by the traffic superintendent if possible. When adjustment cannot be made, matter to be taken up with the company direct by a committee representing the men with the grievance who will endeavour to reach an understanding. There is to be no strike or lockout in the meantime. Employees discharged or suspended to have right to have case taken up with the company by a committee appointed by the employees.

Transportation—Water.

VICTORIA, B.C. — VICTORIA MARINE TRANSPORTATION ASSOCIATION AND INTERNATIONAL LONGSHOREMEN'S ASSOCIATION. Schedule of wages and working conditions in effect from May 11, 1922, until October 31, 1922, and thereafter from month to month unless 30 days' notice be given.

Only union members to be employed for longshore and other work specified in this schedule. If sufficient men are not available, employers may engage non-union men.

Wages: Per hour—straight time, 80 cents; overtime, \$1.20; 10 cents per hour above base wages to be paid for certain classes of work; and 20 cents per hour above base wages for boom men and sling men working on lumber or piles from water. High explosive to be paid for at rate of \$1.20 per hour straight time and \$1.80 per hour overtime.

Where cargo of vessel either in whole or in part is badly damaged through fire, collision, springing a leak or stranding, rate to be \$1.20 per hour straight time and \$1.80 per hour overtime for handling cargo badly damaged or in an offensive condition.

In case of a vessel stranded or unable to reach port without first discharging or shifting cargo, men employed to be paid \$1.50 per hour straight or overtime while working, and 75 cents per hour while travelling or standing by and furnished with free meals on board when they cannot go ashore.

Employer to have right to select or discharge employees. Employer or foreman or agent to have right to shift gangs from one job to another on the same ship, or men from one gang to another. In out ports where vessels overlap, employer may transfer his gangs to another ship if first ship is finished, straight time elapsing between the ships to be paid half-time.

Foreman in charge of warehouse, dock or longshore work to have authority to regulate size of gang, and sling loads.

From 8 a.m. to 5 p.m. to be paid straight time except Sundays and holidays. All other time to be overtime. Holidays to be paid overtime.

Work so to be arranged that men can vote on election days.

Work during or past meal times to be paid time and a half except when a vessel sails at 1 p.m. Men ordered to work between noon and 1 p.m. to be paid time and one-half until 1 p.m. Men starting or resuming work at or after 11.30 p.m., work not lasting four hours, shall receive four hours' pay. When starting at or before 10.30 p.m. and working through the meal hour, 10.30 to 11.30 p.m., and thereafter, to receive a minimum of two hours after 11.30 p.m., meal hour rate being paid until expiration of the job, balance of two hours being paid at overtime rate.

Men reporting for work as ordered, and being provided with none, to receive compensation according to time released. Men ordered to work to be paid full time from time specified. Men ordered to work or back to work to receive a minimum of two hours' pay except when ordered back after the mid-day or evening meal after having worked in the morning or afternoon in which case they shall receive pay for time worked, but not less than one hour. Men ordered to stand by longer than one hour to receive one hour's pay and half pay thereafter until work is resumed or men released. In case of men standing by because of shortage of men, time not to commence until there is a sufficient number of men to start the work. Men ordered for work between 5 p.m. and 5 a.m. and working after 8 a.m. to be paid overtime until they quit.

Fare to be paid and half cost of board and lodging when men are ordered to work at outside points. Men's share not to exceed \$1 per day. Travelling time to be allowed.

Disputes to be referred to arbitration by one member from each party, failing agreement matter to be referred to a third party, decision to be final. In no case shall there be any suspension of work on account of any disagreement arising during carrying on of work.

Civic Schedules.

WINNIPEG, MAN.—CIVIC AGREEMENTS OF WORKING CONDITIONS AND WAGES FOR THE YEAR 1922.

FEDERATION OF CIVIC EMPLOYEES

1. *Clerical Service.*

Hours—9 a.m. to 5 p.m. with one hour for lunch in each week day and 9 a.m. until 1 p.m. on Saturday. From May to September, hours on Saturday, 9 a.m. until noon.

Hours for business staff of Hydro-Electric System, 8.30 a.m. to 5 p.m. with one hour for lunch on each week day.

Saturday, 8.30 a.m. to 1. p.m. From May to September, hours Saturday, 8.30 to 12 noon.

After 12 months' continuous service, all members of permanent staff to receive one week's holidays with pay. After two years, two weeks.

2. *Scavenging Department.*

Hours: 48 hours road work to constitute a week's work, 5 days of 8 hours and 40 minutes, and Saturdays, 4 hours, 40 minutes. For work up to 52 hours per week exclusive of Saturday afternoon, straight time. Work in excess of 52 hours, regular overtime rates.

Saturday afternoons and all time worked over 52 regular working hours, time and one-half. From midnight, also Sundays and legal holidays, double time.

Wages: Per week—Teamsters, \$28.40; singles, \$27.23; night soil teamsters, \$29.53; night soil helpers, \$28.40; chauffeurs, 1½ ton and over, \$30.68; under 1½ ton, \$28.40; stable men, \$28.40. Men in nuisance ground and crematory, \$4.34-\$5.69 per day.

3. *Street Commissioner's Department.*

Outside workers—Hours: during summer, 9 per day; during winter, 8 per day. When possible, work to cease on Saturdays at noon. When it is found necessary for employees in asphalt repair gangs to work a full day on Saturday, they may be granted a half day on some other week day.

Seniority with efficiency to be taken into account in all promotions and appointments.

City to receive a grievance committee to deal with matters that cannot be adjusted by the Head of the Department.

Electrical Workers, Linemen, Troublemens and Cablemen, also City Electricians Department.

Hours: 8 per day and 4 on Saturdays. Straight time for all work up to 48 hours exclusive of Saturday afternoons; over 48 hours, regular overtime rates.

Foremen to work a minimum of 44 hours per week. Straight time up to 48 hours exclusive of Saturday afternoons. Over 48 hours, overtime rates.

Troublemens to work a minimum of 48 hours per week.

Before reducing hours of work, men who have not been employed 6 months to be laid off. Before permanent staff is reduced, hours to be reduced to 5 days of 8 hours.

Saturday afternoons and overtime to be paid time and one-half; after midnight, and Sundays and holidays, double time.

Employees who have worked overtime not to be laid off to equalize overtime.

Transportation and board to be paid to city linemen sent to do out of town work, and transportation to men hired to do out of town work, but when board is supplied, wage shall be 12 cents less per hour than city rate.

Apprenticeship to last three years. Apprentices to work under supervision of a journeyman except during last 6 months.

Troublemens on shift work to be paid straight time for 8 consecutive hours, 48 hours per week.

Wages: Per hour—foreman, 95 cents; troublemen, 91 cents; sub-foremen, 91 cents; linemen (step rate) 62-78 cents; journeymen, linemen, 89 cents; linemen hired to do out of town work, 89 cents or board and 77 cents; foremen hired to do out of town work, 95 cents or board and 83 cents; arc lamp repairer, 84 cents; cablemen journeymen, 95 cents; helpers, 87 cents; mates, 60 cents; labourers, 57 cents.

Inside Hydro Electric System Mechanical Staff of Meter Department for year ending December 31, 1922.

Hours: 8 per day, 4 on Saturdays. Straight time up to 48 hours exclusive of Saturday afternoons.

Before reducing the hours of work, temporary men who have not been in the city's employ 6 months shall be laid off. Before permanent staff is reduced, hours to be reduced to 8 hours on 5 days per week. No extra men to be hired until schedule hours are resumed; men with previous service to be given preference.

Saturday afternoons and over 48 regular working hours, time and one-half; after midnight and Sundays and holidays, double time.

Men sent out of town to have transportation and board in advance.

Employees not to be laid off to equalize overtime.

Apprentices to serve four years, and to work only under supervision of a journeyman except during last 6 months; and to work overtime only in case of emergency.

Wages: Per hour—apprentices (step rate, 6 month periods) $31\frac{1}{2}$ - $76\frac{1}{2}$ cents; journeymen, 82 cents; specialist, 89 cents; journeyman's helper, $59\frac{1}{2}$ cents; foreman, 98 cents.

Hydro-Electric System Operating Staff.

Hours per day, 8; per week, 48.

Over 48 hours, time and one-half for first 4 hours; thereafter double time for time worked over first regular 8 hours of shift, such time being considered overtime and not deducted off bulletin hours of 48 hours per week. Men assigned work on their days off to be paid double time.

Assistant operators to be considered as temporary employees for the first 6 months.

In case of vacancies on the staff, preference to be given to competent journeymen at present employed in the Department.

Rate of pay for journeymen operators to be 74 cents per hour, 48 hours per week.

Wages per hour, operating staff: terminal station, relief operators and operators, 74 cents; assistants $57\frac{1}{2}$ and 59 cents. Sub-station operators, $66\frac{1}{2}$ and 59 cents; sub-station assistants, $57\frac{1}{2}$ cents. Operators in city sub-stations who have been employed as operators for more than five years to receive an additional 2 cents per hour.

Hydro Electric System Power House Employees.

Hours—eight during 24; 48 per week. Hours over 48, overtime. Shifts to be changed from fortnightly to weekly periods. Shift men to be paid by the hour.

Temporary employees to be laid off before the hours of work are reduced. Reduction to five 8 hour days per week before reducing permanent staff.

Saturday afternoon and other overtime over 48 regular hours, time and one-half; after midnight, Sundays and legal holidays, double time, except when coming in regular shift time. Employees not to be laid off to equalize overtime. Seniority with efficiency to be basis of promotion.

Wages per hour—operators, 74 cents; floorman, $66\frac{1}{2}$ and $61\frac{1}{2}$ cents; maintenance men, 82 cents; helpers, 67 cents.

Hydro Electric System Chauffeurs.

Hours per week, 50. Work over 52 regular hours, and Saturday afternoons, time and one-half; after midnight, and Sundays and holidays, double time.

Seniority with efficiency to be basis of promotion.

Wages per week, chauffeurs driving gasoline or electric trucks $1\frac{1}{2}$ ton or over, \$30.68; under $1\frac{1}{2}$ ton, \$28.40.

When through falling off in construction work or for other cause it is necessary to work short time, weekly wage may be reduced in proportion to hours worked.

Hydro Electric System Station Maintenance Wiremen.

Hours per day, 8, with 4 on Saturdays. Straight time up to 48 hours.

Before reduction in the hours of work, temporary men to be laid off. Before reduction in permanent staff, hours to be reduced to 8 hours per day for 5 days.

Saturday afternoons and all time over 48 hours, time and one-half. After midnight, and Sundays and legal holidays, double time.

Employees not to be laid off to equalize overtime.

Seniority with efficiency to prevail in all departments.

Wages per hour: apprentices (step rate) $31\frac{1}{2}$ - $76\frac{1}{2}$ cents; helper, 67 cents; journeymen, station maintenance and construction men, $85\frac{1}{2}$ cents; journeymen inside wiremen, 82 cents.

Water Works Operators Union.

Hours per day, 8 hours and 40 minutes; on Saturdays, 4 hours and 40 minutes. Hours per week, 48; overtime over 52 hours. Exceptions: emergency turnkeys and chauffeurs, 8 hours, 7 days per week. Chauffeurs and drivers, 9 hours for 5 days. 5 hours Saturdays, 50 hours per week.

Saturday afternoons and other overtime until midnight, time and one-half. After midnight, and Sundays and legal holidays double time.

City not to discriminate against any employee for being a member of the union.

City at all times to receive a grievance committee to deal with all matters that cannot be amicably adjusted by the head of the department.

Seniority and efficiency to prevail in all departments.

Wages—turnkeys: emergency, \$155 per month; regular, 66 cents per hour. Chauffeurs, 57 and $58\frac{1}{2}$ cents per hour. On meters, 61 - $72\frac{1}{2}$ cents per hour. On hydrant and valves, $58\frac{1}{2}$ - $71\frac{1}{2}$ cents per hour. Services, $58\frac{1}{2}$ - $71\frac{1}{2}$ cents per hour. Flushing, $53\frac{1}{2}$ cents per hour. Night clerks, \$122 per month. Utility men, $58\frac{1}{2}$ -66 cents per hour.

In each of the above agreements provision is made that members of the permanent staff shall receive one week's holiday with full pay after 12 months' continuous service, and two weeks' after two years. It is also agreed in each case that on or before the first of January in each year employees shall submit to the city a draft of agreement and schedule for the city's fiscal year. City and a committee of employees shall consider draft jointly and endeavour to reach agreement. If they fail to agree within 30 days differences to be referred to the Joint Council of Industry. Pending report of the Council, no strike to take place. This same procedure to be followed in case of every unadjusted dispute arising at any time.

PRICES, RETAIL AND WHOLESALE, IN CANADA, JUNE, 1922.

THE movement in prices during June was marked by declines in some lines and advances in others, the general levels showing little change. Seasonal changes in farm products and foods were among the important changes upward and downward, but there was a perceptible firmness in prices of industrial materials. Decreases in milk, butter and cheese caused a slight drop in the

cost of foods in spite of slight increases in meats.

In retail prices, the average cost of a weekly family budget of 29 staple foods in 60 cities at the beginning of June was \$10.18 as compared with \$10.22 at the beginning of May; \$11.16 in June 1921; \$16.92 in June 1920; \$11.89 in June 1917 and \$7.49 in June, 1914. The total

for food, fuel and rent averaged \$20.58 for June as compared with \$20.57 (revised) for May; \$21.74 for June 1921; \$26.81 for June 1920; \$18.67 for June 1917 and \$14.27 for June, 1914. No violent fluctuations occurred. The decline was due almost entirely to decreases in sugar and in dairy products, except eggs which advanced slightly. Slight advances occurred in nearly all the other items, the chief increases being in meats. Fuel was practically unchanged, but rent averaged slightly higher.

In wholesale prices the Departmental index number of 271 commodities stood at 224.3 for June (the lowest point reached since March 1917), as compared with 226.1 for May; 225.0 for April; 242.6 for June 1921; 349.3 for June 1920; 284.1 for June 1919; 246.8 for June 1917 and 135.3 for June 1914. The reversal in the movement since last month was due almost entirely to declines in agricultural products and foods. The chief decreases were in western grains; hay, bran and shorts, sheep, codfish, onions, flour and in linseed oil; while hogs and hog products, dressed lamb, cheese, granulated sugar, wool, raw silk, raw cotton, jute and hessians and hides showed substantial advances, with smaller increases in cattle, beef and in metals.

Other index numbers of wholesale prices in Canada showed slight rises because they do not include as long a list of farm products (in which the principal decreases occurred) as the Departmental index number of 271 commodities. A special index number including fifty of the more important commodities, selected from the Departmental list, 20 foods, 15 raw materials, and 15 manufactured goods, based upon price levels in 1913 as 100 was higher in June at 149.3 as compared with 148.6 for May; 147.8 for April; 154.1 for June 1921 and 254.4 for June, 1920. The Bank of Commerce index number of wholesale prices (which includes 24 articles mainly exported and 24 mainly imported) showed

a fall in the former and a rise in the latter, the combined index number however being higher.

The Monthly Commercial Letter for July issued by the Bank states:—

Our combined number for the wholesale prices of exports and imports has risen from 151.18 in mid-May to 153.13 in mid-June, our export and import numbers, respectively moving in opposite directions. Export prices have fallen from 157.63 to 152.25, or approximately to the April figures; import prices have risen from 144.74 to 154.02, or nearly as high as the figures of thirteen months ago. A certain amount of this apparently violent fluctuation is due to seasonal changes, downwards in the case of dairy products among the exports and upwards in that of sugar and tea among the imports. As far as our exports are concerned, the change is due in part to price adjustment between grains and animal products; wheat, flour and oatmeal have fallen, while cattle, beef, hogs and bacon have risen. Wool, hides and copper also show higher prices, but the fall in cereals has more than offset these, and the result is that the export number has fallen. Among our imports, on the other hand, rubber is the only item which shows a recession in price; the remainder have either firmed or, as in the case of iron and steel, risen sharply. The continuation of the coal strike has of course been one factor in this, but another is the slow but sure revival of industrial activity in the United States, and it should not be long before the influence of this movement is felt in Canada.

The index number of wholesale prices calculated by Professor H. Michell has been revised. This number was designed to reflect sensitively the trend of trade and industrial conditions. It is based upon forty commodities, twenty foods and twenty materials, mainly semi-manufactured goods. Professor Michell has recently revised the calculation but has not altered the base period (average prices 1900-1909 being made equal to 100). Six commodities in the old list have been dropped and six others substituted. The revised list is as follows: *Foodstuffs*—flour, beef, mutton, pork, bacon, lard, whitefish, butter, cheese, sugar, tea, chocolate, potatoes, currants, canned tomatoes, canned peas, oatmeal,

eggs and tapioca. *Manufactured goods*—rubber, wool, cotton, hides, binder twine, iron, galvanized sheets, steel billets, silver, lead, copper, tin, zinc, cement, paints, coal oil, pine, bituminous coal, spruce and newsprint. Changes in prices from month to month during 1919 and 1920 shown by this index number are more violent than those shown by that of the Department. The accompanying table shows the revised figures in full, as the calculation covers only the years back to 1919:—

PROFESSOR MICHELL'S INDEX NUMBER OF
WHOLESALE PRICES IN CANADA.
40 COMMODITIES.
(Average prices 1900-1909=100)

Month	1919	1920	1921	1922
January	223.2	265.1	214.2	165.2
February	221.3	264.1	197.1	163.7
March	220.0	264.0	192.6	161.0
April	222.9	268.4	190.0	161.2
May	228.8	270.2	180.5	160.9
June	266.2	269.9	176.6	164.5
July	245.7	269.4	174.3
August	249.3	254.4	176.7
September	240.7	247.4	172.9
October	238.7	238.4	168.2
November	241.4	225.4	164.9
December	244.7	217.4	168.2

The table of retail prices and rentals shows the prices at the beginning of June of over one hundred staple foodstuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts exclusively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintain-

ed. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruits, fresh and canned vegetables, etc., so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore, made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month; the quotations for

other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for the corresponding month back to 1913.

Retail Prices

Meats at the beginning of June again averaged higher. Sirloin steak averaged nearly 2c per pound higher at 31.6c for the sixty cities. Round steak showed about the same general increase as sirloin and averaged 26.4c per pound as compared with 24.9c in May. Rib roast and shoulder roast were higher in all the provinces. Stewing beef was slightly lower in New Brunswick and British Columbia, but was higher in the other provinces. Veal showed very little change on the average but was lower in New Brunswick and Alberta. Mutton averaged 29.3c per pound in June and 28.7c in May. The advance occurred in all provinces, except Nova Scotia, New Brunswick and British Columbia. Lamb showed a general advance except in New Brunswick which averaged somewhat lower. Roast pork advanced from an average of 30c per pound in May to 31.3c in June, the increase being general. Pork chops were also slightly higher. Mess pork was up about $\frac{3}{4}$ c per pound to 26.8c, the advance being general. Bacon averaged 41.3c per pound as compared with 40.8c in May. Boiled ham was up 3c per pound to 63.7c. In fish there was little change, cod steak, halibut, fresh herring, whitefish and finnan haddie being slightly higher while haddock was lower. Canned salmon, Sockeye, was unchanged though the medium and the pink salmon were lower. Lard showed little change. Eggs, fresh, averaged 33.5c per dozen as compared with 32.7c in May; 33.5c in April, and 50.7c in March. Prices in all provinces, except Manitoba and Alberta, averaged higher. Cooking eggs showed a general advance. Milk was down from 12.1c per quart in May to 11.5c in June. No increases over last month were reported though many cities showed no

change. All grades of butter were down about 3c per pound. Dairy solids averaged 35.7c, dairy prints, 36.5c, and creamery prints 42c per pound. The decline was general, very few cities reporting increases. Old cheese was about 1c per pound lower at 29.8c, and new 1.8c lower at 26.1c. The decline was general in all provinces. Bread, soda biscuits, flour and rolled oats were steady. Cornmeal, barley and tapioca were practically unchanged. Rice, Rangoon and Patna, averaged higher in nearly all provinces. Canned vegetables and beans were unchanged. Onions were about 2c per pound lower, the decline being general. Potatoes were steady. Prunes and evaporated apples were slightly higher, but currants and raisins were lower. Jam, canned fruits and marmalade showed little change. Corn syrup and honey were also steady. Sugar continued to decline and averaged 7.8c per pound in June as compared with 8c in May and 8.4c in April. The decline was fairly general. Tea was practically unchanged. Coffee was up 2c per pound to 53.8c. Laundry starch and soap were steady.

Anthracite coal was practically unchanged in the average, declines in Halifax, St. John, Montreal and St. Thomas being offset by advances in Three Rivers, Sherbrooke, Sorel, Peterborough and Cobalt. Bituminous coal was slightly higher, being up in Three Rivers, Woodstock, London, Cobalt, Port Arthur and Fort William, but lower in Amherst, Halifax, Charlottetown, St. John, Bathurst, St. Thomas and Sault Ste. Marie. Hard wood was down in the average from \$12.44 to \$12.30 per cord, being lower in Montreal, Guelph, Cobalt, Sault Ste. Marie and higher in Bathurst and Winnipeg. Soft wood was unchanged, except at Sault Ste. Marie, where the price was lower. Rent averaged slightly higher, being up in St. John, N.B., St. John's, Brockville and Galt, but lower in Kingston and Windsor.

Wholesale Prices

GRAINS AND FODDER.—Wheat No. 1 Manitoba Northern at Winnipeg, quoted at \$1.42 per bushel in the last week in May, fell to \$1.29 about the middle of June, but later rose to \$1.33. Barley at Winnipeg fell from 68c per bushel at the end of May to 65c at the end of June. Ontario barley at Toronto was steady at 60c-65c. Oats at Winnipeg fell 4c per bushel, to 51c. American corn at Toronto advanced from 74c per bushel to 79c but later declined to 77c. Flaxseed at Winnipeg which was quoted at \$2.50 per bushel at the beginning of May declined to \$2.16 about the middle of June but by the end of June was quoted at \$2.40, a recovery of 24c. Hay, at both Montreal and Toronto, fell \$4 per ton to \$26 and \$21 respectively. Bran at Toronto declined \$5.00 per ton to \$25.25 and shorts \$4.25 a ton to \$27.00.

ANIMALS AND MEATS.—Cattle at Winnipeg were down from \$8.25 per hundred pounds to \$7.50. Choice steers at Toronto were steady at \$8.75 per hundred. Dressed beef was unchanged. Dressed hogs at Toronto advanced 3c per pound to 21c. Bacon rose from 28c at the end of May to 32c at the end of June. Hams were also higher at 31c per pound. Sheep fell from \$8.50 per hundred pounds at the end of May to \$5.00 in the last week in June. Dressed lamb rose 5c per pound to 33c.

DAIRY PRODUCTS.—Creamery butter at Montreal rose from 30c to 39c. At Toronto, creamery prints rose 7c per pound to 41c. Cheese was up from 14c per pound to 19c. Eggs and milk were unchanged.

FISH.—Dry codfish on the Atlantic coast were down from 6c per pound to 5c. Fish were reported to be plentiful on the Grand Banks and the summer catch of the Lunenburg fleet was expected to be good. The spring catch of mackerel was much larger than last year, and the price was lower at \$8.00 per barrel compared with \$14.00 a year ago. The market for herring continued dull. The

(*) Preliminary figures. (†) Ten commodities off the market, fruits, vegetables, etc. One line of speller was dropped in 1915. (a) The number of commodities varies from month to month.

season's pack of canned lobsters was reported to be normal with prices remaining high. At Toronto, salmon trout advanced slightly to 15c per pound while whitefish declined from 20c per pound to 12c.

FRUITS AND VEGETABLES.—Strawberries came on the market at 25c-30c per box and by the end of the month had declined to 10c-15c. Lemons were up \$1.50 per box, reaching \$6.00; and oranges \$1.00 per box, reaching \$9.50. Bananas and dried fruits were unchanged. Potatoes at Montreal were down from \$1.10 per bag to 80c. Beans at Toronto were steady at \$4.40 per bushel. Canned vegetables were unchanged.

MISCELLANEOUS FOODS.—Flour, Manitoba patents, at Toronto, was down from \$8.70 per barrel to \$8.00. Winter wheat flour was also lower. Granulated sugar at Toronto was higher by \$1.00 per barrel at \$7.29. Glucose and molasses were up slightly. Maple sugar was 2c lower at 15c per pound.

TEXTILES.—Wool advanced from 15c per pound to 20c. Raw cotton rose from 21 $\frac{1}{4}$ c per pound to 22 $\frac{1}{4}$ c. Most lines of manufactured cottons were steady. Raw silk at New York was higher at \$7.45 per pound. Jute was up from 9.14c per pound to 10.90c. Hessians also advanced from 11.46c per pound to 13.42c.

HIDES, LEATHER, BOOTS AND SHOES.—Beef hides were up from 6c per pound

to 8c. Calfskins also were higher at 12c per pound.

METALS AND IMPLEMENTS.—Pig iron was steady. Sheets advanced but tin plates were unchanged. Bar iron was higher at \$3.00 per hundred pounds. Steel billets rose from \$38.50-\$43.50 per ton to \$39.50-\$45.50. Antimony, copper, lead and spelter were slightly higher. Silver bar was unchanged.

FUEL AND LIGHTING.—Coal was steady but Connellsville coke at the ovens rose 50 per ton to \$7.00.

BUILDING MATERIALS.—Spruce deals were up \$1.00 per M. to \$27.00. British Columbia fir at Winnipeg rose from \$28-\$29 to \$30-\$31 per M. Fire bricks were down \$5 per M. to \$55-\$85. Cement advanced from \$3.70 per barrel to \$3.75. Nails, iron wire, and barbed wire were slightly higher. Copper wire rose 1c per pound to 15 $\frac{3}{4}$ c. Linseed oil fell from \$1.08 per gallon to \$1.04. Turpentine advanced 10c per gallon to \$1.45. Paris green was up from 31c per pound to 36c.

HOUSE FURNISHINGS.—Sad irons were down from \$1.81 per set to \$1.70.

DRUGS AND CHEMICALS.—Copperas was slightly lower at \$1.70 per pound. No other changes were reported.

MISCELLANEOUS.—Raw furs were steady. Raw rubber was lower at 16 $\frac{7}{8}$ c per pound.

PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES.

THE following notes and the accompanying tables give the latest information available as to the movement of prices in other countries as compared with Canada.

The index numbers of retail prices which are listed are from official sources unless otherwise stated. The authorities for the wholesale price index numbers are named in all cases. The index num-

ber of wholesale prices in Canada of Professor Michell has been revised and revised figures are shown here, while a complete table is given in the previous article, "Prices, Retail and Wholesale, in Canada, June 1922."

Great Britain

WHOLESALE PRICES.—The Board of Trade's index number of wholesale prices for May is 164.0, prices in 1913 being

taken as 100. This is an increase of .5 per cent over the April figure, which when corrected was the same as the figure for March. In both food and industrial materials the price level for May was above that for April, the largest changes being found in the two groups relating to textile materials. Owing to this advance, the general index for the five groups of industrial materials is higher for May than for March or April.

The *Statist* index number, in continuation of Sauerbeck's figures, showed a slight advance during May. Contrary to the figures for the previous months of the year, the figures for May show a decrease of 2.2 per cent in foodstuffs, the chief drop being one of 3.6 per cent in the group "animal food." All materials, on the other hand, advanced on the average 2.7 per cent, textiles increasing 4.1 per cent, minerals 2.9 per cent, and sundries 1.4 per cent.

The *Times* index number of wholesale prices of 60 commodities at the end of June was 158.7, showing an increase of 4 per cent over the figure of 158.0 at the end of May. The rise was due chiefly to an increase of 5 per cent in the cotton group.

COST OF LIVING.—The Ministry of Labour index number of cost of living was 184 in July and 180 in June, the first increase since November, 1920; foods were 180 in July and 170 in June, the increase being a seasonal rise in milk and potatoes; rent was 153 in July and 154 in June; clothing was 240 in both months; fuel and light were 190 in July and 205 in June, and sundries were 195 in both months. The figures are percentages of price levels in July, 1914.

France

WHOLESALE PRICES.—The official index number of wholesale prices stood at 366.3 for May as compared with 362.6 for April, an increase of 1 per cent for the month under review. The food index showed a slight decrease, while the index for industrial materials showed an increase of 1.9 per cent. The index

number for June was 375.7, an increase of 2.5 per cent over the May level.

Germany

WHOLESALE PRICES.—The official index number of wholesale prices rose in April to 6355, an increase of nearly 17 per cent over the March level. At that time the general optimism in Germany was succeeded by a feeling of pessimism, and prices which had been falling with the rise of the mark turned upward and the mark fell to the low value of 283 marks for \$1.00 on April 29. The "Frankfurter Zeitung" index number for 77 wholesale commodities at June 1 showed (on basis of 100 for January 1, 1920) 606, as against 584 on May 1, and 317 on January 1. Foods rose from 668 to 696; textiles and leather from 375 to 388; minerals from 498 to 502 and miscellaneous, from 724 to 759. On basis of 100 for 1914, the figure for June 1 was 6809.

COST OF LIVING.—The statistical authorities recently decided to introduce several changes into the method of calculation of the budget, including a revision of the figures for the base period, 1913-14, an increase of the number of towns from 47 to 71, and a new system of weighting. By the new method the figures for all items of the budget are for March, April and May, respectively, 2639, 3175 and 3462, showing increases of 20.3 per cent in April over March, and 9 per cent in May over April. By the old method, which still continues to be published, the figures for the same three months are 2302, 2804 and 3048, increases of 21.8 per cent and 8 per cent respectively. The food index in each case shows approximately the same increase as the complete budget. During the period from April to May almost all foods contributed to the increase, potatoes, spinach and shellfish declining slightly. Fuel rose sharply owing to increased freight rates. The increase in rents was not so marked as in the previous month. Hitherto all prices data were based on returns relating to one

*For South Africa, Australia and New Zealand base is taken as 1000 instead of 100. a. Average for year. b. Quarter beginning in specified month. c. 230 commodities, 1890-1900; 272, 1910-1914; 271, 1915-1922. d. New index number is joined to old index number (38 commodities), and all converted to base 1913=100. e. The commodities in these two new index numbers are in the one case articles chiefly exported; in the other case, articles chiefly imported. f. First of month. g. Middle of month. h. End of month. j. Monthly average.

particular day in the middle of the month. In future the prices quoted will be an average of two days. The composition of the budget has been modified to approximate more closely to that in actual use, for example the meat ration of 1500 grams was doubled and the fish ration of 4500 grams reduced to 2000 grams, which did not change the total number of calories appreciably. Flour was made a separate item, and petroleum removed. Prices from the illicit market will no longer be quoted; no longer are only the cheapest necessities chosen (for example the fuel most in use will be chosen without regard to price); certain restrictions are changed or removed; and uniform regulations with regard to rentals are made effective. Certain changes have also been made in the weighting so that sufficient importance may be given to the smaller cities.

A comparative table of the old and new figures follows:

	Cost of living		Foods alone	
	Old method	New method	Old method	New method

May	3048	3462	4111	4680

Italy

WHOLESALE PRICES.—The index number of the statistical office of the Chamber of Commerce and Industry at Milan (average prices May-December 1921=100) dropped from 103.09 in February to 98.73 in March, to 96.42 in April,

and to 96.32 in May. The index for food alone dropped from 102.37 in February to 96.03 in March, 93.84 in April, and rose again to 96.13 in May; while the index for industrial materials fell from 103.39 in February, to 99.89 in March, 97.53 in April, and 96.39 in May.

United States

WHOLESALE PRICES.—*Gibson's* average index number of the prices of 22 articles of food for May was 74.3, an increase of 1 per cent on the monthly average for April. The average for June was 72.2, a decrease of 2.8 per cent. This is the first decrease since November 1921.

Dun's general index number for June 1 was 169.997, as compared with 168.096 for May 1, an increase of 1.1 per cent for the month of May. The most important change is in the clothing class where a rise occurred of 6.6 per cent due chiefly to sharp increases in raw cotton and wool. The index for July 1 was 173.743, an increase of 2.2 per cent over June, and the third consecutive increase, all groups showing advances.

The index number for May compiled by the Federal Reserve Board for the purpose of international comparisons showed that prices during May increased 9 points or 6.0 per cent. All groups showed increases, the largest being domestic goods, 6.2 per cent, raw materials, 9 per cent, and producers' goods, 6.2 per cent.

RETAIL PRICES.—The index numbers for the cost of living in Massachusetts for the months of April and May were respectively 155.6 and 154.9. This shows a decrease for the month of May of 5 per cent. Foodstuffs, which item

carries a weighting in the budget of 43.1 per cent, declined 1 per cent. Clothing declined slightly and shelter, fuel and light and sundries remained practically unchanged. The index number for June was practically unchanged, being 155.0. Food and clothing showed slight increases and fuel a very slight drop. Shelter and sundries were unchanged.

The retail food index number issued by the Bureau of Labour Statistics stood at 139 for May, the same as for the two previous months. Of the 43 articles, 23 increased, 15 decreased and 5 showed no change. The largest increases were in cabbage, strictly fresh eggs, sirloin steak, round steak, pork chops and navy beans. The largest decreases were in onions and cheese.

*No change. (a) Food price increases are computed as increases above average prices in the year 1913 not July 1914, and are from the United States Bureau of Labour Statistics. (b) Weighted.

RECENT LEGAL DECISIONS AFFECTING LABOUR

THE two legal decisions which are summarized below have reference to cases of Workmen's Compensation in Saskatchewan and Quebec respectively. On another page of this issue is given a part of a recent decision of the Supreme

Court of the United States in the case of the Coronado Coal Company, versus the United Mine Workers of America, dealing with the subject of the assessment of strike funds for damages.

Railway Company liable for accident if failure of coupling to work is contributory cause.

A workman received a severe injury to his right hand when uncoupling cars. He brought an action for damages for personal injuries against the Company employing him. The case was heard in the Court of King's Bench of Saskatchewan. In the judgment of the Court the circumstances leading to the accident were described as follows: "While the train crew to which he belonged was shunting in the defendants' Regina yards, the plaintiff was required to remove one of the couplings from between two cars, but was unable to make the lever, provided for uncoupling, work. Plaintiff thereupon mounted the platform of one of the cars, a flat car with sides and ends three feet high and hav-

ing a vacant platform space at each end of about fourteen inches. The plaintiff climbed to this fourteen-inch space, then stooped down and pulled the coupling pin of the adjoining car by hand. He then gave the stop signal with his left hand, his right hand at the same time grasping the top of the three-foot end of the car, this being the only available position open to him if he were to maintain his balance. Upon the signal being obeyed, the contents of the car shifted and imprisoned his right hand against the side of the car, inflicting severe injuries thereon."

It was held by the Court that the company was at fault in not providing an

efficient appliance for uncoupling as required by the Railway Act, Section 298, subsection (1) of which reads:

(c) To securely couple and connect the cars composing the train, and to attach the engine to such train, with couplers which couple automatically by impact and which can be uncoupled without the necessity of men going in between the ends of the cars.

The explanation that the apparatus would not work because the switching was being done on a curved track was held not to excuse the defendant Company, as the statute made no exception with regard to curved tracks. While there may have been other courses open to the plaintiff, what he did was what

he might reasonably be expected to do. Accordingly the default of the Company in providing the proper appliance for uncoupling was a circumstance which contributed directly to the accident. The other contributing cause of the accident was the shifting of the cargo, but whether this was due to the negligence of the company or not, the failure with regard to the coupling appliance was quite as contributory a cause of the injury.

The plaintiff was therefore given judgment for \$1,600 and costs.

(*Saskatchewan — Conley vs Grand Trunk Pacific Railway.*)

Father compensated under Quebec Workmen's Compensation law for death of son who helped support family.

A youth of 19 years was killed while at work. His father brought an action against his son's employer under the Workmen's Compensation law of Quebec, in the Superior Court of the District of St. François, alleging that the deceased workman, if not his father's sole support, was his principal support. He accused the employer of inexcusable fault and claimed a sum of \$5,025. In the Superior Court judgment was delivered in favour of the employer on the ground that in order to succeed the plaintiff would have to prove that at the time of the accident he was incapable of supplying his own needs, and that his deceased son was his only or principal means of support. The Court found that the plaintiff could supply his own needs and that his son, therefore, could not be considered his sole or principal support. This son was in no way bound to support the other children of his father and consequently it would be contrary to law to make the defendant company pay the plaintiff's children a pension in the shape of an indemnity, which said children could not have obtained from their dead brother.

The father appealed against this decision and the case was heard in the Court of Revision. This court reversed the decision of the trial court. It was declared in the judgment that this case depended on the interpretation given to the words "principal support" which occur in the law as amended. It was held that the word "principal" in this context signifies that the support will be important and considerable, that among two or three sons or children who furnished the means of support, he who provided the greater part would be styled the principal support. The proof showed in the opinion of the Court that the plaintiff was not in the position of providing entirely and exclusively for himself and his family, and that his son, who was the victim of the accident was the one who brought the greatest help to his father and his father's family.

The judgment of the court of first instance was accordingly reversed and the defendant company was ordered to pay the plaintiff \$1,973 with \$25 in addition for funeral expenses.

(*Quebec—Martel vs Lake Megantic Pulp Co.*)

THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE JAMES MURDOCK

DEPUTY MINISTER—F. A. AGLAND.

Volume 22

AUGUST, 1922.

Number 8.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

This issue, in addition to the usual monthly articles relating to industrial conditions, strikes, conciliation proceedings, wage agreements, prices, etc., contains also regular quarterly statistical articles respecting employment conditions, fatal industrial accidents, and immigration during the second quarter of the year. The issue also contains a number of other articles dealing with matters of industrial interest; among these may be mentioned one relating to the situation arising out of the dispute between Canadian railways and their employees in shop crafts.

At the beginning of July the percentage of unemployment among the members of trade unions stood at 5.3 as compared with 8.7 at the beginning of June and with 13.2 at the commencement of July, 1921. The employment situation as indicated by returns from some 6,300 concerns, showed further improvement during June, and again compared favourably with that reported during the corresponding period of last year.

The average cost of the weekly family budget of 29 staple foods was \$10.27 at the beginning of July, as compared with \$10.18 for June; \$10.97 for July, 1921; \$16.84 for July, 1920; and \$7.42 for July, 1914. The total for food, fuel and rent averaged \$20.67 for July, as compared with \$20.58 for June; \$21.53 for July, 1921; \$26.92 for July, 1920;

and \$14.17 for July, 1914. In wholesale prices the index number stood at 225.3 in July, as compared with 224.3 in June; 238.6 in July, 1921; 346.8 in July, 1920; and 134.6 in July, 1914.

The time loss due to industrial disputes was greater during July than during either June, 1922, or July of last year. There were in existence during the month 22 strikes involving about 15,736 workpeople with an estimated time loss of 261,240 working days. Three of these strikes were reported as having commenced during July. Two of the strikes commenced prior to July and one of those commencing during July terminated during the month, leaving 19 strikes involving about 9,726 workpeople on record at the beginning of August.

Proceedings under the Industrial Disputes Investigation Act, 1907

During the month of July the Department received the reports of six Boards of Conciliation established to deal with disputes between (1) the Corporation of the City of Moose Jaw and certain of its employees being members of Federal Labour Union No. 9; (2) the Corporation of the City of Moose Jaw and certain of its employees, being members of the Moose Jaw Fire Department and the Fire Fighters' Union, Local No. 151; (3) the Winnipeg Electric Railway Company and certain of its employees, being members of the Gas Workers'

Union of Winnipeg (independent); (4) the Inverness Railway and Coal Company, Limited (as represented by the Eastern Trust Company, Halifax, N.S.) and certain of its employees, being members of Locals Nos. 4512 and 5163, District 26, United Mine Workers of America; (5) the Montreal Light, Heat and Power Consolidated and certain of its employees in its Gas and Electrical Distribution and Maintenance Plants, members of various trade unions; and (6) various shipping companies doing business at the Port of Montreal, members of the Shipping Federation, and certain of their employees, being shipliners, members of Local No. 2098, United Brotherhood of Carpenters and Joiners.

During the month thirteen applications were received for the establishment of Boards and in ten cases Boards were established. In two cases Boards were refused, in one because the consent of the employer was not given, and in the other because it was held not to be within the meaning of the statute.

Jottings

Conventions of the following international labour organizations will be held during the months of September and October:

International Association of Fire Fighters, at Tulsa, Okla., on September 11.

International Typographical Union, at Atlantic City, N.J. on September 11.

United Textile Workers of America, at Fall River, Mass., on September 11.

International Union of Steam and Operating Engineers, at Minneapolis, Minn., on September 11.

International Association of Bridge, Structural and Ornamental Iron Workers, at St. Louis, Mo., on September 11.

International Printing Pressmen and Assistants' Union of North America, at Pressmen's Home, Tenn., on September 18.

International Brotherhood of Electrical Workers, at Montreal, Que., on September 18.

International Brotherhood of Bookbinders at San Francisco, Cal., in October.

Telephone Operators' Department of the International Brotherhood of Electrical Workers, at Montreal, Que., on October 2.

International Brotherhood of Pulp, Sulphite and Paper Mill Workers on October 5.

United Garment Workers of America, at St. Joseph, Mo., on October 9.

Brotherhood of Railroad Signalmen of America, at Cincinnati, Ohio, on October 9.

Bricklayers, Masons and Plasterers' International Union of America, at Springfield, Mass. on October 9.

Brotherhood of Maintenance-of-Way Employees and Railway Shop Labourers at Detroit, Michigan, in October.

The Dominion Government has appointed a Royal Commission with Mr. Wm. Duff, M.P., as Chairman, to investigate fisheries conditions in British Columbia.

It is announced that Mr. Walter Smitten, of Calgary, formerly secretary of the Alberta Federation of Labour, has been appointed Commissioner of Labour for the province of Alberta, the appointment having been made under the terms of the act recently passed for the establishment of a Bureau of Labour.

The Ontario government recently informed a delegation from the Canadian Electrical Trades Union that a conference would shortly be held to consider proposed legislation for the licensing of electrical workers. It is expected that the proposed licenses will reduce the number of fatalities and serious accidents among linemen and electrical workers.

The master and journeymen barbers in Montreal at a recent mass meeting passed a resolution calling for the enactment of a provincial licensing act for barbers.

The Quebec city branch of the Retail Merchants' Association recently passed a unanimous resolution requesting the city council to enforce the Sunday observance law by obliging all stores not specially exempt to be closed on that day.

Press despatches state that through the activities of Mr. A. Kennedy, inspector of the Weyburn School District in Saskatchewan, a number of Canadian banks have agreed to advance loans, without security or endorsement, to members of the Boys' and Girls' Clubs who wish to purchase and raise thoroughbred stock or poultry. It is stated that there are some hundreds of branch banks ready to assist young people in this movement, which is intended to stimulate mixed farming in the West and offset the tendency to exclusive wheat growing.

The Alberta Federation of Labour recently passed a resolution recommending that no further coal mines should be opened in Alberta until wider markets have been secured, and that mines failing to pay wages consistent with Canadian standards of living be suspended. The resolution declares that the evidence submitted to the conciliation board which recently reported on the dispute between the Western Canada Coal Operators' Association and certain of the employees, members of District 18, United Mine Workers of America, demonstrated that the coal mining industry was grossly mismanaged.

A recent statement of the International Typographical Union shows that the receipts from Canadian unions from June 1, 1921, to April 20, 1922, amounted to a total of \$524,373. During the same period benefits were paid to Canadian unions as follows: Old age

pensions, \$32,624; Mortuary benefits, \$13,825; strike benefits and special assistance, \$1,840,759. The total paid to Canadian unions amounted to \$1,887,208, or \$1,362,835 more than was contributed by them to the International organization.

A recent press despatch from Charleston, West Virginia, stated that three officials of District 29, United Mine Workers, were sentenced on July 22 to six months' imprisonment for violating an injunction issued by a Federal judge. They were charged by the Loup Creek Coal Company with trying to organize its non-union miners. Leave to appeal was granted by the court.

Recent issues of the LABOUR GAZETTE have contained particulars of the lock-out in the British engineering industry, which began in March. A ballot of the members of the various unions interested was taken in June, and resulted in the acceptance of the employers' proposals by all the unions, and in the termination of the dispute.

A scheme to provide 10,000 houses for coal miners in Great Britain is being put into operation by the formation of a company to which, it is stated, thirty large colliery companies will subscribe £1,000,000 capital. No profits will be sought, but the scheme is expected to pay its own way. A beginning in this housing scheme, which includes also provision for playing fields, institutes and other amenities, is being made in South Yorkshire, Derbyshire and Wales.

Announcement has been made of the nineteenth economic essay contest for prizes donated by the Chicago tailoring firm of Hart, Schaffner and Marx. First and second prizes of \$1,000 and \$500 are offered to contestants in Class A, and prizes of \$300 and \$200 are offered in class B. The latter includes undergraduates of any college in the United States or Canada, while Class A includes all other United States citizens and Canadians without restriction.

Readers of this publication will be interested in hearing that Mr. Bryce M. Stewart, an officer of the Department of Labour who had been since the enactment of the Employment Offices' Co-ordination Act in 1918 charged generally with the direction of the Employment Service Branch of the Department, organized under that statute, has accepted an important position in the United States and his official connection with the Department of Labour of Canada ceased, accordingly, as from July 31st. Mr. Stewart will have in his new position charge of the employment service which is being instituted at Chicago with a view to the possible reduction of the volume of unemployment in connection with the Amalgamated Clothing Workers of America, a trade union organization having its headquarters in New York. Mr. Stewart's official connection with the Department of Labour extended over a period of about ten years, his work relating to the statistical activities of the Department until the enactment of the statute governing the Employment Service, when, as stated, that Service was placed under his charge. Mr. Stewart's services and experiences in the Department of Labour have, therefore, been of the highest value for the important position which he now occupies. It is of interest to note that Mr. Stewart had at the time of his retirement held for two years the position of President of the International Association of Public Employment Services.

Unemployment Conference called by Dominion Government With respect to the Federal and Provincial Conference regarding unemployment recently called by the Dominion Government for assembly at Ottawa on September 5, a statement issued by the instruction of the Honourable James Mur-

dock, Minister of Labour, indicates the desire of the Federal Government that municipalities and other public bodies or organizations which are interested in the subject of unemployment should understand that, whilst it has been deemed necessary to limit actual membership in the approaching conference to the members or officials of the participating Governments, it is intended that municipalities or other bodies desiring to submit views or representations on any aspect of the problem of unemployment shall have the fullest opportunity of doing so and that any views or representations so received at the conference shall have the most careful consideration. It is possible that in some cases the Provincial Governments will themselves arrange for any necessary representations on the part of their municipalities, but in other cases interested municipalities should communicate direct to the Minister of Labour at Ottawa. Representations from municipalities or other organizations should be made preferably in written form and should be in the hands of the Minister of Labour if possible not later than August 26. Where it is deemed desirable to submit representations in person and to send deputations for that purpose, municipalities or other organizations should if possible notify the Minister of Labour to that effect well in advance of the opening of the conference, expenses arising out of the attendance at Ottawa of any such delegations to be borne by the municipalities or other organizations by whom the delegations are sent. Information received by the Minister of Labour indicates that all the provinces will be represented at the conference with the single exception of Prince Edward Island, which is in the fortunate position of not having been at any time seriously troubled with the question of unemployment.

**Government
railway employees
and political
contests**

The views of the Dominion Government with regard to the participation of Canadian

National Railway employees in political contests were set forth in a recent letter from the premier, the Right Honourable W. L. Mackenzie King in reply to a request from Mr. W. D. Bayley, member elect of the Manitoba legislature for the reinstatement of Messrs. George Palmer and Charles W. Foster defeated labour candidates in the recent Manitoba elections and formerly employees of the Canadian National Railways. The latter of the premier was in part as follows:

The control of the Canadian National Railways is vested in a board of directors which are held responsible by the government as representing the people, for the management and operation of the roads. It is a fundamental principle of government policy not to interfere, or to permit interference, with the board of directors in the discharge of its duties. The government is therefore not in a position to say to the board of directors what in this, or in any other matter, should or should not be done. On the other hand, the government does not hesitate to make known that attitude which in its opinion, should be adopted by the board of directors of the government railways with respect to the right of railroad workers to offer themselves for political office. As regards workers on the government railroads, the government would hope and expect that the same attitude be taken in the matter of their political rights as is taken towards their employees by the privately-owned railroads.

**A new Settlement
plan in
Quebec**

The Hon. J. E. Perreault, Minister of Colonization of Quebec, recently announced

that a provincial order-in-council had been passed by which tenders will be asked for the clearing of 300 acres of timber on thirty lots in the Metapedia Valley, and also for the erection on each lot of a house and other buildings necessary to establish a settler and his family. Provision is made in the order-in-council to have the work carried out by lumber companies which will be paid in timber given them in compensa-

tion for the expenses incurred. Settlers will be supplied with these lots under special conditions. The scheme is regarded as an experiment in the meantime, and the government will decide later whether other colonization centres shall be instituted under similar conditions.

**Alberta
mine rescue
contest**

The annual mine rescue and first-aid contest of the province of Alberta was held at

Banff, Alberta, on June 30 and July 1. The first-aid contest was open to teams from all mines in Alberta and south-eastern British Columbia. There was an increase of 34 per cent in the number of competing teams over the previous year. There were four separate contests, mine rescue, senior and junior first aid, and ladies' first aid. The mine rescue contest, which was carried out as far as possible under actual conditions, was won by the Fernie, B.C. team with 480 marks out of a possible 800. The Drumheller Land Company Team, Drumheller, Alberta, came first in senior first-aid with a record of 98 per cent. No. 7 Troop Boy Scouts, Lethbridge, Alberta, with 85 per cent won the junior first-aid competition, and the Central Nursing Division, No. 29, Calgary, won the Ladies' First Aid with 89 per cent. The contests were under the direction of Mr. Duncan Macdonald, Calgary, General Superintendent of the Mine Rescue and First Aid department of the provincial government.

**Aid sought for
Workers'
Educational
Association**

A delegation recently waited on the Premier of Ontario to solicit financial support from the provincial government in order to bring about unification of the work that is being carried on by the Workers' Educational Association in the larger urban centres of Ontario. The delegation included representatives of labour organizations, and of the University of Toronto extension depart-

ment, with university professors interested in providing advanced courses for workpeople. It was stated that the Association had already conducted general and technical classes at Toronto, Hamilton, London, Ottawa and Guelph. The delegation suggested that the classes in these five centres should be joined in a provincial organization which would be in a position to form new classes in smaller centres, and that the University of Toronto should be named as trustee for the proposed provincial annual grant of \$10,000. The Premier promised consideration of the proposal.

Accident

prevention and compensation

At the Joint Safety Convention held recently at Toronto, Mr. Samuel Price, chairman of the Ontario Workmen's Compensation Board, in discussing the question of accident prevention drew attention to the heavy casualty list of the province of Ontario for 1921. Nearly ten per cent of the 450,000 workers in Ontario, he stated, were reported as having sustained accidents during 1921. Discussing the causes of accidents Mr. Price found significance in the fact that less than one-third of all the accidents in the province have been due to machinery. It was, therefore, not by putting guards on machinery, but by promoting general habits of carefulness, that the greater part of the accidents could be prevented. The first essential step was to provide the workers with proper physical conditions, suitable space, efficient organization, and orderly arrangement of the factory or plant. "A still more important thing is the state of mind and attitude of the workers, foremen, superintendents and managers. Is there sympathetic co-operation in the work and in the desire to avoid mishap? Is it looked upon not only as a misfortune, but also as a reflection upon workmen, foremen, and management to have preventable accidents? Does the employer hold his superintendents and foremen personally responsible when accidents happen? Will he deal

with them as sternly for having workmen under them carelessly and needlessly injured and maimed as he would for having his machinery or material carelessly or needlessly broken or destroyed? I believe this is the most important factor in accident prevention." It has been found that an undue proportion of the total number of accidents happen to new men just commencing to work in an establishment, often within a few days or even hours after starting. Employers and foremen should therefore take pains with, and give special consideration to, new hands until they have become accustomed to their surroundings. Another essential is the prevention of serious effects from minor accidents by means of a well organized first aid service. "The figures respecting blood poisoning are startling," Mr. Price states; "from 6 to 9 per cent of all compensation cases have infection at some stage, and the cost of such cases is at least one-eighth of the total accident cost amounting probably to three-quarters of a million dollars a year."

Discussing the alleged practice of malingering, the chairman of the Ontario Board recommends that the employer, doctor, workman and Board should all co-operate in getting the injured employees back to work when they are sufficiently recovered. "Malingering should not be tolerated. In the end it would be workmen generally who would suffer most by anything that would bring discredit upon the Act. No doubt at present there is more than ordinary danger of malingering, but, frankly, I do not believe that it prevails, or ever has prevailed, to any serious extent, under our Ontario Act. The fact that the average time loss has not increased and that medical aid cases have increased more in proportion than compensation cases, confirms this view. The Board never fails to investigate any specific charge of malingering that is brought to its attention. Generally the complaints turn out to be unfounded or to have arisen from a misunderstanding, but where imposition or fraud is discovered it is sternly dealt with. Pro-

secutions have been entered and conviction obtained against both workmen and doctors for obtaining or attempting to obtain money under false pretenses." The report of the Ontario Workmen's Compensation Board for 1921, is reviewed elsewhere in this issue.

**Economic
value of
Safety
committees**

According to a recent report of the American Smelting and Refining Company to its shareholders, the creation of a Department of Safety, Labour and Welfare and of safety committees composed of foremen and general committees of workmen, organized at each of its plants to increase the safety of operation, has resulted in a saving to the company of \$778,858 since 1913. Since that date there has been a steady decrease in the accident rate per 1,000 employees per annum (3,000 hours) from 264 in 1913 to 63 in 1921. The total number of disabling accidents decreased from 2,745 in 1913 to 318 in 1921.

**Committee on
Unemployment
in Great
Britain**

On July 27, the Right Hon. Lloyd George announced to the British House of Commons the appointment of a committee of the cabinet on unemployment with the premier as chairman and Sir Laming Worthington Evans as vice-chairman. It is stated that this committee will examine into the various causes of unemployment especially those connected with the loss or lack of markets abroad and will also devote attention to overseas settlement along the lines of the scheme which was embodied in recent legislation. A former Cabinet committee on unemployment under Sir Alfred Mond had been concerned only with local aspects of the question and various palliative measures.

**Labour and
Social
Welfare Code
of Chile**

A draft Labour and Social Welfare Code has been submitted to the Congress of Chile by M. A. Alessendri,

President of the Republic, with a request for its adoption at the earliest possible date. The draft code contains the following provisions: Labour agreements may only be made for one year. They may be entered into by persons over 14 years of age, but up to the age of 18, the approval of a parent must be obtained. Wages must be paid in coin or notes except in the case of agricultural workers who may be paid partly in kind. Time workers must be paid once a fortnight and day workers and piece workers once a week. Workers who have been employed in an industry for over a year shall be entitled to share in the profits after allowing for 8 per cent interest on capital and for working expenses and depreciation. Children under 16 years of age may not work more than six hours a day, and children under 14 years may not be employed at all except only when the employer's family is employed. Children under 18 years cannot be employed unless they have completed their elementary education. Women are prohibited from all night work and work on board ships. Hours of work, except in agriculture, must not exceed 8 a day or 48 a week. A minimum weekly rest of 36 consecutive hours is provided. The code declares that the constitution of trade unions should be encouraged. Provision is made for conciliation and arbitration courts but arbitration is never to be compulsory and the right to strike is recognized after all means of conciliation have been exhausted. It is suggested in the code that a compulsory national labour insurance fund should be established. The questions of co-operation and workers' housing are also dealt with.

New Seamen's Act of Sweden

An Act was passed by the Swedish Riksdag on April 1 which will come into force on January 1, 1923, extending the rights and privileges of Swedish seamen. Some of the provisions of the Act are as follows: (1) A seaman who has been in the service of a vessel for twelve months (eighteen months in a sailing vessel) may give seven days' notice of termination of agreement in any Swedish port, if of Swedish nationality and domicile; if of any other nationality, in any port of discharge or loading. (2) Wages are to be paid up to the day of signing off. The right to withhold pay is limited to a fortnight's wages, instead of one-third of the total sum due as heretofore. (3) The right to free medical service is extended from four to twelve weeks outside of Sweden. (4) The right of the captain to dismiss seamen is restricted. On dismissal for sickness a month's pay must be given. In case of dismissal without valid reason full damages may

be claimed. (5) A seaman may claim discharge if bound for a port where there is a severe epidemic, or if the voyage is altered to a considerable degree. In the event of a shipwreck seamen are entitled to pay during the voyage home and to compensation for lost effects. A seaman's responsibility for damage due to negligence is to be fixed after fair examination by a court. The retention of a deserter's property and wages, and the sequestration of those of seamen suspected of intending to desert are no longer lawful as under the Merchant Shipping Act. Imprisonment for desertion, with a maximum period of one year without hard labour, is to be imposed only if the safety of the ship or crew is endangered thereby. The captain's power to inflict disciplinary punishment is restricted to a maximum fine of one week's pay, the punishment of confinement being abolished. Pay deducted for fines must be applied to the support of seamen or their dependants.

GENERAL REVIEW OF THE INDUSTRIAL SITUATION.

The Labour Market, Strikes, Prices.

The Labour Market

THE volume of employment as reported by employers showed a further increase during June, although the expansion was not as pronounced as in May. The situation continued to compare favourably with that indicated by the concerns making returns for the corresponding period of last year. Unemployment as indicated by trade unions declined at the close of June as compared with the preceding month and the percentage of idleness was considerably smaller than that reported for the same month in 1921. The volume of business transacted by the offices of the Employment Service decreased during June, the number of vacancies notified, of applicants placed, and of persons applying for work showing further reductions.

EMPLOYERS' REPORTS

The upward trend that employment as reported by employers evidenced during the preceding two months was again indicated during June, the curve of employment rising to a higher level than at any period of last year and standing several points higher than at the end of June, 1921. The tendency was favourable in all districts except Quebec, and the contractions in employment in that province were insignificant. The level of employment in every district was slightly higher than for the corresponding period of last year.

The most decided gains occurred in highway and railway construction which, according to the reports received, absorbed 5,068 and 4,797 additional workers, respectively, during the month.

The greater part of the expansion in the former group was registered in the New Glasgow and Sydney districts in Nova Scotia, in Ontario, and in the Banff region in Alberta. The increase in railway construction was considerably smaller than that recorded in May. The Canadian Pacific reported the addition of approximately 1,600 persons to their construction and maintenance staffs, the Canadian National Railways enlarged their working force by over 2,600 men, while the Grand Trunk Railway absorbed nearly 300 additional workers during the month. Practically 27 per cent of the total increase in railway construction was reported in Ontario. In Quebec, Saskatchewan and Manitoba there were also extensive gains, while the expansion in the remaining provinces was on a rather smaller scale. Considerable activity was indicated in building construction mainly in Ontario and the Prairie Provinces. Large individual gains occurred in Montreal, Toronto, Brantford, Hamilton, St. Catharines, Winnipeg, Regina and Vancouver. The level of employment in sawmills generally continued high, although the increases in staffs were not as pronounced as during April and May. Large gains were indicated in particular at Chatham, Inkerman, Nelson and Newcastle, N.B.; at Ingram Port, N.S.; at Louiseville, Charlemagne, Hull and Three Rivers, Que.; at Ottawa and Cutler, Ont.; at The Pas, Man.; and at Wardner and Vancouver, B.C. Container factories in Ontario were somewhat busier. Railway operation also afforded increased employment, the concerns and divisional superintendents making returns having enlarged their forces by approximately 1,700 men. Of these persons, the Canadian Pacific Railway absorbed nearly 600 workers in their operation departments, the Grand Trunk indicated a gain of approximately 400 employees, and the Canadian National of over 400 workpeople. All provinces except the Maritimes shared in the expansion, which was most pronounced in Quebec, Ontario and the Prairie Provinces. The commencement of the fruit and vege-

table preserving season caused considerable increases in employment in canneries, particularly in Ontario, and, notably at Leamington, Hamilton and Waterford. The production of cereals at Peterborough and other centres also showed an increase. The resumption of activity in several important rubber factories caused substantial gains in employment in that industry, particularly at Granby, Que., and at Kitchener and Toronto, Ont. Tobacco factories reported considerably larger staffs than in the preceding month, during which shutdowns had been reported in several cases. The trade at Montreal, Que., and at Hamilton, Ont., and Vancouver, B.C., was a good deal busier. The level of employment in the clay, glass and stone group continued to be high. The greater part of the expansion in the brick division occurred in Ontario, notably at Milton West and Hamilton. Glass factories in Quebec reported an increase in operations, especially at Ville St. Pierre. The largest gain in the cement group occurred in Edmonton. The production of electric current absorbed a substantially larger number of men, particularly in Vancouver, B.C., in Montreal, Que., and in Toronto, Ont. Tin can factories were decidedly busier in meeting the requirements of the preserving season. Improvement continued to be registered in the asbestos mines of Quebec, especially at Thetford Mines. Continued expansion was reported in the employment afforded on street and electric railways, notably at Montreal and Toronto. The ports at St. John, N.B., Montreal, Que., and Hamilton, Ont., were considerably busier, but a very large decline in employment in shipping and stevedoring at Vancouver, B.C., largely offset the gains recorded elsewhere. The conclusion of the lobster canning season in the Maritime district caused substantial reductions in employment at Halifax, Yarmouth, and other Nova Scotia centres. Salmon canning on the Pacific Coast, on the other hand, continued to absorb large numbers of workers, particularly at Prince Rupert, Alert Bay and Wales Island.

Dairying was somewhat more active, especially in Ontario. The reopening of several boot and shoe factories, which had been shut down for periods of varying duration, resulted in considerable increases in employment in the leather group, especially at Montreal and Quebec, and at Galt and St. Thomas, Ont. The level of employment in both wholesale and retail trade was higher than during May, the gains representing small increases made by a number of firms in practically all provinces. Continued activity was evidenced in summer hotels, especially in New Brunswick, Alberta and British Columbia. Additions to staffs were also indicated by hotels in Montreal and Toronto.

The closing of several large railway car shops over the month-end, a somewhat common practice during recent months, affected employment in the iron and steel group adversely. Other branches of the industry, however, afforded more employment than in May. This was especially true of rolling mills, agricultural implements and structural iron fabrication plants. Some of the car shops at London, Stratford and Montreal were shut down. Rolling mills at Sydney, N.S., and Sault Ste. Marie, Ont., automobile factories at Walkerville, agricultural implement plants at Toronto, Ont., and steel shipyards at Halifax, N.S., all reported considerably larger staffs than during the preceding month. The production of musical instruments declined slightly, especially at Toronto. Between-season dullness in the garment trades resulted in moderate reductions in employment in the textile industries. The thread, yarn and cloth division, however, reported increased activity. The production of cotton at Milltown, N.B., showed a gain. Cotton factories at Montreal, Montmorency Falls and Sherbrooke, Que., absorbed larger working forces than in May. Woollen mills at St. Jerome also registered increased activity, but garment manufacturers at Quebec and Montreal, reported contractions. Hat factories in Ontario, notably at Toronto and Brockville, were less fully employed, partly

on account of stock taking operations. Telephone concerns at Toronto were decidedly slacker but at Montreal there were increases in activity.

Employment during June, as previously stated, was in greater volume than during the corresponding month of 1921, increased employment being indicated in the majority of industrial groups, notably in the lumber, textile, electric current, transportation and construction industries. The situation as reported by logging concerns was not quite as favourable, and coal mining also was duller.

TRADE UNION REPORTS

Statements tabulated
from 1,437 trade unions
representing 151,564
members indicated fur-

ther improvement of a general character during June, the percentage of idleness standing at 5.3 at the end of the month, as compared with 8.7 at the close of the preceding month and with 13.2 on June 30, 1921. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades, or who are idle because of illness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.) Nova Scotia, Quebec, Manitoba, Saskatchewan and British Columbia registered less unemployment than in May, but in the other provinces there were small increases in slackness. In comparison with the returns for June of last year, improvement was indicated in every district. Unions in the manufacturing industries reported a smaller percentage of idleness than in the preceding month, the garment trades, particularly, being very much busier. Tradesmen in the furniture, wood, boot and shoe, and glass groups also reported a decidedly more favourable situation. Bakers and confectioners and sugar re-

finery workers, on the other hand, were not so fully employed. In the pulp and paper, iron and steel, and jewelry divisions the percentages of unemployment were larger than in May. The mining group, generally, was busier. Employment in the coal mines in Nova Scotia, increased; quarrying in the same province showed further activity, and asbestos mining in Quebec also afforded more employment. The Western coal fields continued to be largely affected by the strike of mine workers still in existence there. Unions in the building and construction industries reported about three per cent less unemployment than in May, the increases in operations in Quebec and Ontario being particularly marked. All tradesmen in this group, with the exception of electrical workers, hod carriers and building labourers, were more fully engaged than in the preceding month. In the transportation industries, the percentage of idleness was slightly lower, improvement being recorded by steam railway, shipping and stevedoring, and street and electric railway employees. Fishermen, lumber workers and loggers indicated a larger proportion of their members as being employed than in the preceding month. Civic employees were less fully employed especially in Quebec. Hotel and restaurant employees, barbers and stationary engineers and firemen reported increased activity on a small scale. Theatre and stage employees and unclassified workers, on the other hand, registered slightly larger percentages of unemployment.

EMPLOYMENT OFFICE REPORTS

During the month of June, 1922, the offices of the Employment Service made 31,811 references to positions and effected a total of 30,240 placements. Of these, the placements in regular employment totalled 23,439 (of which 20,149 were of men and 3,290 of women) and in casual work numbered 6,801. Applications for work registered at the offices totalled 40,816 (of which 31,622 were from men and 9,194 from women). Employers no-

tified the Service during the month of 35,382 vacancies (of which 25,826 were for men and 9,556 for women). Compared with the preceding period a decline was reported in the volume of business, while a slight increase was shown for the same period a year ago. The reports indicate that at the end of June, 1922, the average number of placements was higher than in June, 1921. The following table gives the average number of applications, vacancies and placements made daily by the offices during June, 1922, as compared with the preceding month and with the corresponding month of 1921:

	May, 1922		June, 1922		June, 1921	
	1st half month	2nd half month	1st half month	2nd half month	1st half month	2nd half month
Applications	1,772	1,758	1,725	1,547	1,623	1,628
Vacancies...	1,619	1,587	1,525	1,313	1,318	1,328
Placements..	1,369	1,326	1,263	1,160	1,091	1,115

A statement showing in some detail the work of the offices of the Employment Service during the quarter ended June, 1922, appears elsewhere in this issue.

PRODUCTION REPORTS

According to the monthly reports issued by the Dominion Bureau of Statistics the production of pig iron during June showed an increase of 23 per cent over the output of the previous month. A tonnage of 28,763 was returned for the month under review as compared with an output of 23,363 gross tons in May. The basic pig manufactured for the use of the reporting firms increased over the previous month's record by 8,449 tons. The malleable iron produced for sale also presented the substantial increase of 149.5 per cent. On the other hand the production of ferro-alloys in blast furnaces decreased from 2,680 tons in May to 2,051 tons in June, involving a reduction of 23 per cent. The pig iron and ferro-alloy production for the first six months of the present year presents

a decline of 118,129 tons, or 31.9 per cent, from the output of the corresponding period of 1921. At the end of June last year six furnaces were in blast as compared with the four furnaces in operation at the close of June last. One furnace at Sydney was blown in during June, and the three units reported last month remained in blast.

The production of steel during June exceeded that of any month in the present year except February. The increase over the tonnage for May was 93 per cent and the record of January was exceeded by a few tons. The output of castings was practically maintained while the production of ingots increased from 15,646 tons to 31,270 tons involving an advance of 99.8 per cent. As usual a large proportion of the output consisted of open hearth basic steel intended for further use. On the other hand, 1,318 tons of the castings comprising three different grades were produced for sale. A comparison of the cumulative steel production during the first six months of the present year with the record of the corresponding period of 1921 throws recent performance into an unfavourable light. The half year in 1921 was credited with an output of 295,140 tons comprising a lead of 66.7 per cent over the production in the half year ending with the month under review.

BUILDING PERMITS AND CONTRACTS AWARDED

Employment in the building trades as indicated by the value of the building permits issued in 56 cities during June showed the first decline that has been indicated since January, there being a slight contraction as compared with the preceeding month. The volume of the building authorized, however, was higher than in June, 1921. The value of the permits issued during the month under review stood at \$15,799,680, as compared with \$17,765,326 in May and with \$12,900,124 in June of last year; there was, therefore, a decrease of \$1,965,646 or 11 per cent, in

the former and of \$2,899,556, or 22.5 per cent, in the latter comparison. Prince Edward Island, New Brunswick and British Columbia reported increases in the volume of building contemplated during June as compared with the preceding month, while in all other provinces there were declines, that of \$571,094 or 44.6 per cent in Saskatchewan being the largest. As compared with the figures for June, 1921, Prince Edward Island, Saskatchewan and Alberta reported reductions in the value of the permits issued, but in all other provinces the totals were higher. Of the larger cities, Toronto, Winnipeg and Vancouver reported increases in the volume of building anticipated during June as compared with both the preceding month and with June of last year. In Montreal, there was a decline in the former and a gain in the latter comparison. Of the smaller centres, Sydney, Moncton, Guelph, Kitchener, St. Catharines, Welland, St. Boniface, New Westminster and Point Grey reported noteworthy increases in the value of the building permits issued in both comparisons.

A summary showing in some detail the value of the building permits issued by the 56 larger cities during the quarter ending June, 30, 1922, is given elsewhere in this issue.

According to the *Canadian Building Review*, issued by MacLean's Building Reports, Limited, the value of the contracts awarded during June amounted to \$35,620,400 as compared with \$34,827,300 in May and with \$26,436,800 in June, 1921. Of the total for the month under review, \$2,141,600, or 6 per cent, was to be expended in the Maritime district; \$28,054,900, or 79 per cent, was to be spent in Quebec and Ontario; and \$5,423,900, or 15 per cent, in the Western districts. A further analysis shows that \$12,985,900 was to be used for residences, \$10,351,200 on business buildings, \$4,914,300 on industrial contracts and \$7,369,000 on engineering projects.

Strikes

The time loss due to industrial disputes was greater during July than during either June, 1922, or July of last year. There were in existence at some time or other during the month 22 strikes involving about 15,736 workpeople with an estimated time loss of 261,240 working days, as compared with 25 strikes, involving 10,155 workpeople and 254,134 working days in June, 1922; and 41 strikes, 9,413 workpeople and 92,891 working days in July, 1921. On July 1, there were on record 19 strikes, affecting 5,045 workpeople. Three strikes were reported as having commenced during July as compared with six during June. Two of the strikes commencing prior to July and one of those commencing during July terminated during the month, leaving 19 strikes involving about 9,726 workpeople on record at the beginning of August.

Prices

The general movement in prices was slight, both the index number of wholesale prices and the retail prices of foods showing little change from June levels, though with an upward tendency.

The index number of wholesale prices stood at 225.3 in July as compared with 224.3 in June; 238.6 in July last year; 346.8 in July, 1920; 294.0 in July, 1919; 248.7 in July, 1917; and 134.6 in July,

1914. The general decline in farm products and foods noted in June was continued in a lesser degree in July. Grains and livestock and meats again fell, but dairy products, fish, and miscellaneous foods showed an upward tendency. Most of the other groups were slightly higher. The chief increases for the month were in butter, sugar, raw wool, raw silk, jute, coke, linseed oil and turpentine with smaller increases in metals, gasoline, and coal oil. The chief declines were in grains, cattle and beef, sheep and dressed lamb, boots, some chemicals, glassware and crockery.

In retail prices the average cost of a weekly family budget of 29 staple foods in some 60 cities was \$10.27 at the beginning of July; \$10.18 for June; \$10.97 for July, 1921; \$16.84 for July, 1920; \$11.62 for July, 1917; and \$7.42 for July, 1914. The total for food, fuel, and rent averaged \$20.67 for July, as compared with \$20.58 for June; \$21.53 for July, 1921; \$26.92 for July, 1920; \$18.41 for July, 1917, and \$14.17 for July, 1914. In food no violent changes occurred; dairy products were practically unchanged, while mutton, flour, and potatoes were slightly lower. Nearly all the other items showed small increases, the chief of which were in beef, pork, and sugar. Fuel and rent were unchanged.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

Proceedings for the month of July, 1922, with Texts of Boards' Reports.

DURING the month of July the Department received reports of six Boards of Conciliation and Investigation established to deal with disputes between (1) the Corporation of the City of Moose Jaw and certain of its employees being members of Federal Labour Union No. 9; (2) the Corporation of the City of Moose Jaw and certain of its employees, being members of the Moose Jaw Fire Department and City Fire Fighters' Union, Local No.

151; (3) the Winnipeg Electric Railway Company and certain of its employees, being members of the Gas Workers' Union of Winnipeg (independent); (4) the Inverness Railway and Coal Company, Limited (as represented by the Eastern Trust Company, Halifax, N.S.) and certain of its employees, being members of Locals Nos. 4512 and 5163, District 26, United Mine Workers of America; (5) the Montreal Light, Heat and Power Consolidated

and certain of its employees in its Gas and Electrical Distribution and Maintenance Plants, members of various trade unions; and (6) various shipping companies doing business at the Port of Montreal, members of the Shipping Federation, and certain of their employees, being shipliners, members of Local No. 2098, United Brotherhood of Carpenters and Joiners.

Applications received.

During the month thirteen applications for the establishment of Boards were received, as follows:

(1) From employees of the Canadian Pacific Railway Company being station agents, assistant agents, telegraph operators, train despatchers and linemen, members of the Order of Railroad Telegraphers. A Board was established composed as follows: Mr. D'Arcy Scott, Ottawa, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. U. E. Gillen, Toronto, representing the Company and David Campbell, Winnipeg, representing the men.

(2) From certain employees of the City of Calgary, being members of the Fire Fighters' Federal Union No. 19. As this dispute did not fall directly within the scope of the Act, the consent of the employer was necessary before a Board could be established. The Corporation of Calgary refused to give its consent to the establishment of a Board.

(3) From employees of the Michigan Central Railroad Company being machinists, boilermakers, blacksmiths, carmen, electricians and sheet metal workers. A Board was established composed as follows: Mr. J. M. McEvoy, London, Ont., chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. H. T. Malcolmson, Hamilton, and W. D. Robbins, Toronto, nominees of the Company and employees respectively.

(4) From shop employees of the Pere Marquette Railway Company, being machinists, boilermakers, blacksmiths, electricians, etc. A Board was established as follows: Mr. W. T. R. Preston, Port Hope, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Alex. Leslie, Kingsville, Ont., and W. D. Robbins, Toronto, nominees of the Company and employees respectively.

(5) From employees of the New York Central Railway Company, being members of the Federated Shop Crafts employed in the Ottawa shops. A Board was established composed as follows: the Honourable Senator G. D. Robertson, Ottawa, chairman, appointed on the joint recommendation of the other two members of the Board, Messrs. Max Goodrich, Ottawa, and John T. Foster, Montreal, nominees of the Company and employees respectively.

(6) From employees of various railways—members of the Railway Association of Canada including the Canadian National Railways, the Canadian Pacific Railway and the Grand Trunk Railway—being motive power and car department mechanics, helpers and apprentices, members of Division No. 4, Railway Employees' Department, American Federation of Labour. A Board was established as follows: Mr. Alex. Smith, Ottawa, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Isaac Pitblado, K.C., Winnipeg, and James Simpson, Toronto, nominees of the employers and men respectively.

(7) From employees of various railways—members of the Railway Association of Canada, including the Canadian National Railways, the Canadian Pacific Railway and the Grand Trunk Railway—being maintenance of way employees and shop labourers, including dock men, bridge and building employees, signalmen and water service

employees represented by the United Brotherhood of Maintenance of Way Employees and Railway Shop Labourers. A Board was established by the appointment of Messrs. U. E. Gillen, Toronto, and J. G. O'Donoghue, Toronto, nominees of the employers and men respectively. While the Board was in process of constitution the dispute was settled by direct negotiations, and the proceedings were cancelled.

(8) From employees of the Canadian National Railways, being clerks, freight handlers, roundhouse shop and store labourers, etc., members of the Canadian Brotherhood of Railroad Employees. A Board was established by the appointment of Messrs. George D. Kelley, Ottawa, and Howard S. Ross, K.C., Montreal, nominees of the employers and men respectively. The chairman had not been appointed at the end of the month.

(9) From employees of the Grand Trunk Railway System, being clerks, freight handlers, stationmen, stationary engineers and firemen, oilers, roundhouse shop and store labourers, etc., members respectively of the Canadian Brotherhood of Railroad Employees and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. A Board was established by the appointment of Messrs. U. E. Gillen, Toronto, and Howard S. Ross, K. C., Montreal, nominees of the employer and men respectively. A chairman had not been appointed at the end of the month.

(10) From employees of the Pere Marquette Railway Company, being clerks, checkers, freight handlers, baggage men, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and

Station Employees. A Board was established by the appointment of Messrs. Alexander Leslie, Kingsville, Ont. and Chas. B. McClurg, St. Thomas, Ont., nominees of the Company and employees respectively. A chairman had not been appointed at the end of the month.

(11) From employees of the Canadian Pacific Railway Company, being clerks, checkers, freight handlers, baggagemen, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. A Board was established by the appointment of Messrs. J. T. Arundel, Oakville, Ont., and J. G. O'Donoghue, Toronto, nominees of the Company and men respectively. A chairman had not been appointed at the end of the month.

(12) From various employees of the Canadian National Railways, the Canadian Pacific Railway, the Esquimalt and National Railway and the Winnipeg Joint Terminals as represented by the Railway Association of Canada, being members mainly of different trade unions representing railway shop crafts. The alleged dispute concerned railways and classes included in the Board constituted as above under the chairmanship of Mr. Alex. Smith, and it was deemed impossible to establish a second board dealing with the same classes, and that the dispute was not within the meaning of the statute.

(13) From employees of the Marconi Wireless Telegraph Company at Glace Bay, N.S. being members of Federal Labour Union No. 16570, American Federation of Labour. A Board had not been established in reference to this dispute at the end of the month.

Report of Board in Dispute between the Corporation of the City of Moose Jaw and certain of its employees being members of Federal Labour Union No. 9.

A report was received from the Board established to deal with the dispute between the Corporation of the City of Moose Jaw and certain of its employees being members of Federal Labour Union No. 9. The Board was composed of Messrs. W. E. Knowles, K.C., chairman, W. D. McIntyre and R. H. Chadwick. The report of the Board was unanimous and contained recommendations as to the settlement of the dispute. Advice was received from both parties that the findings of the Board were acceptable to them, and the dispute was thus amicably arranged.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Corporation of the City of Moose Jaw, Employer, and certain of its employees being members of Federal Labour Union No. 9, Employees.

To the Hon. James Murdock,
Minister of Labour, Ottawa.

On the 29th of April, 1922, a Board of Conciliation was applied for under Section 63 of the above mentioned Act, the application being made by the Union. On the previous day the City Council passed a resolution agreeing to the said dispute being referred to a Conciliation Board. The union nominated for membership to the Board R. H. Chadwick, and the city nominated W. D. McIntyre, and they jointly nominated to the Minister of Labour W. E. Knowles for Chairman. These nominations were duly approved by the Minister and appointments made, the Chairman's appointment being dated May 22nd, 1922.

Evidence was taken by the Board at four sittings, on the 6th and 7th instant. Owing to absence from the city of one or more members of the Board, it was impossible to hold the Board's consultation meeting until the 28th instant.

The formal application for the appointment of a Board describes the dispute as being in connection with "reduction of wages, and also taking away from our employees concessions granted to them through Conciliation Board in 1920," etc. The Board therefore divides its report into two parts, the first dealing with the matter of wages, and the second with regard to the conditions granted by the 1920 Conciliation Board.

WAGES

The Board's recommendation is that the following scale of wages prevail:

Sewer and Water:

Tappers and Caulkers.....	56½c per hr.
Hydrant and Emergency men 55½c	"
Helpers.....	52c "
Motor Truck Driver.....	52c "

Water Meters:

Foreman.....	\$32.00 per wk.
Meter Tester.....	27.50 "
Meter Repairer.....	26.00 "
Meter Reader.....	24.00 "

Sewage Disposal:

Chief Operator.....	33.00 "
Assistant Operator.....	29.00 "

Board of Works:

Foreman.....	33.00 "
Sub-foreman.....	28.00 "
Team foreman.....	25.50 "
Master Mechanics.....	.66 per hr.
Helpers.....	.49 "

Street Cleaners:

Foreman.....	\$25.00 per wk.
Street Cleaners.....	.42 per hr.

Nuisance Ground Attendant:

Caretaker.....	\$23.00 per wk.
----------------	-----------------

We recommend that the weekly minimum wage to hourly men be based on 45 hours per week.

CONDITIONS

The Board recommends that the report of the Conciliation Board of 1920, and the agreement thereto attached, prevail, subject to the following findings of this Board:

(1) The condition providing that in the event of a vacant position in any Department, such vacant position shall first be available to an ex-employee of

some other department, should, in the opinion of the Board, be amended by providing that no such appointment shall be made unless the Superintendent of the Department in which such position is vacant approves of such appointment.

(2) The condition providing for three weeks' sick pay in any one year should, in the opinion of this Board, not be at full pay, but at two-thirds pay.

(3) In the opinion of this Board the provisions as to either annual or statutory holidays (with pay) should not apply to any employee who has been less than twelve months on the city's pay roll.

(4) The Board recommends that the new agreement take effect as from the 1st day of April, 1922, and continue to the 31st day of March, 1923. In the event of either party desiring a change in the rate of wages or working conditions, notice must be given by the party so desiring the change to the other party not later than the 31st day of January, 1922, otherwise this agreement shall continue in force for the succeeding year.

Dated at Moose Jaw, in the Province of Saskatchewan, this 29th day of June, A. D. 1922.

All of which is respectfully submitted.

(Sgd.) W. E. KNOWLES,
(Sgd.) W. D. MCINTYRE,
(Sgd.) R. H. CHADWICK.

Report of Board in Dispute between the Corporation of the City of Moose Jaw and certain of its employees being members of the Moose Jaw Fire Department.

A report was received from the Board established to deal with the dispute between the Corporation of the City of Moose Jaw and certain of its employees, being members of the Moose Jaw Fire Department and of the city Fire Fighters' Union, Local No. 151. The Board was composed of Messrs. William A. Munns, chairman, W. D. McIntyre and Edgar H. Cooke. The report of the Board was unanimous and contained recommendations as to the settlement of the dispute. The findings of the Board were accepted by both parties and the dispute was thus satisfactorily terminated.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Corporation of the City of Moose Jaw and certain of its employees being members of the Moose Jaw Fire Department and city Fire Fighters' Union, Local No. 151.

Moose Jaw, Sask., July 12, 1922.

To the Honourable James Murdock,
Minister of Labour, Ottawa.

Sir:—

We, the Board of Conciliation and Investigation appointed in the above matter, beg to report as follows:—

We found the dispute consisted of a desire on the part of the City to reduce the wages of the employees \$5 per month, and in fact had made the reduction already, effective from April 1st, 1922, to which the employees strongly objected.

In support of the various contentions the City claimed the cost of living had been reduced to such an extent that the wages of the employees should be reduced also, while the Employees contended that the wages paid during the peak of living costs were not sufficient, and that no reduction should be made at this time.

Written and oral evidence was submitted to the Board by both parties to

the dispute, and, after thoroughly considering the same, we recommend:—

That the agreement between the City of Moose Jaw and the Fire Fighters' Union, Local No. 151, which terminated on March 31st, 1922, be continued from April 1st, 1922, and to remain in force and effect until March 31st, 1923, with the following alterations:

That the wages of each member of the Department be reduced \$2.00 per month and that they be paid, from April 1st, 1922, the rate of wages as shown in the following schedule:—

Firemen:	Per month
For first three months.....	\$108.00
For the following six months.....	113.00
For following twelve months.....	118.00
Any further period.....	123.00
Lieutenants:	
For any period.....	128.00
Captains:	
For first year.....	133.00
For further period.....	138.00
Captain in charge.....	148.00

Electricians:

Same as Captain.

Motor mechanics:

For first year.....	158.00
For second year.....	163.00
Any further period.....	168.00

We would further recommend:—That all other conditions in the agreement, referred to above, remain in full force and effect until March 31st, 1923, and that there be no change made in the conditions of service, other than those set forth in the above schedule of rates.

All of which is respectfully submitted, and we have the honour to be.

Yours faithfully,

(Sgd.) W. A. MUNNS,
Chairman.
(Sgd.) W. D. McINTYRE,
(Sgd.) E. H. COOKE,
Members.

Report of Board in Dispute between the Winnipeg Electric Railway Company and certain of its employees.

A report was received from the Board established to deal with the dispute between the Winnipeg Electric Railway Company and certain of its employees being members of the Gas Workers' Union of Winnipeg (independent). The Board was composed of Messrs. W. H. Trueman, K.C., chairman, C. E. Dafoe and R. S. Ward. The report of the Board was unanimous and contained recommendations as to the settlement of the dispute. These findings were accepted by both parties, but the company stated that the proposed reduction in wages would date as from May 1 instead of July 1.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Winnipeg Electric Railway Company, employer, and certain of its employees, being members of the Gas Workers' Union of Winnipeg, employees.

Winnipeg, Man., June 30th, 1922.

The Honourable,
The Minister of Labour, Ottawa.

Sir:—

The Board constituted herein begs leave to report as follows:—

Sessions of the Board were held on the 5th, 6th, 9th, 12th, 13th, 20th, 22nd, 26th, 27th, 29th, and 30th days of June. Messrs. John McRae, James Hector, and Henry Winkworth, members of the Gas Workers' Union, appeared for the employees, and Messrs. John Whitsell, M. L. Kane, J. W. Lawler, C. W. Dahl, and L. Palk represented the Company. A great deal of evidence was presented by each of the parties and the fullest opportunity for the discussion of the dispute in the presence of the Board was allowed. The Board sought to have the dispute adjusted by mutual concessions, but efforts for the purpose were without result. A previous dispute arising from demands by certain of the Company's

employees, members of the Gas Workers' Union, for reduction of a 56 hour week to one of 48 hours, and for an increase of wages, was submitted to a Board of Conciliation and Investigation, composed of the late Judge R. Hill Myers, Chairman, Mr. Charles E. Dafoe, nominee of the Company, and Mr. R. S. Ward, nominee of the employees. A report, dated July 3rd, 1920, was submitted by the Board containing a draft of an agreement and wage schedule.

The Company advised that the findings of the Board regarding wage adjustments were acceptable to it, and an agreement was executed by the Company and the employees, which continued in existence until April 30th, 1922, when the Company offered to the employees a new agreement containing certain reductions in wages and some minor changes in conditions.

In the course of negotiations between a committee of the employees and the Company, the Company agreed to continue the wages of labourers at 45c an hour. Their wages are therefore withdrawn from the dispute. The principal contention raised by the representatives of the employees is that the proposed reduction from 63c to 59c an hour affecting certain classes of employees should not take place because it will diminish their weekly wage \$2.48 below what it was in 1919 under a seven day week. The Company on the other hand point out that the rate of wages named in the Myers award was due in part to the high cost of living then prevailing, and which is now considerably less. Giving the matter the very best consideration the Board is of opinion that the following wage schedule should be accepted by both parties:—

	Per hour
Machinemen.....	62c
Front door men.....	60c
Back door men.....	60c
Pipe Jumpers.....	60c
Hand stokers and scurfers.....	60c
Trimmers.....	52½c
Fire cleaners.....	60c
Boilermen, firemen, scurfers, helpers..	52½c
Work fitters.....	59c
Yard men, coke wheelers and labour employed in coal cars and purifying house, or any part of the gas works.	
Blacksmith.....	59c
Handyman, pipefitter, tinsmith.....	59c
Coal elevator operators.....	52c
Boiler cleaner.....	52½c

The Board desires to further recommend that in all other respects the provisions of the determined agreement shall be continued in a new agreement, and that certain minor changes therein proposed by each party to the dispute be not insisted upon. The Board considers that the new agreement should be effective May 1st, 1922. However, as the employees have been paid wages at the former rate during the pendency of the dispute, and the amount involved is nominal, the Board recommends that the new rates become effective on July 1st, 1922.

While Mr. Ward is of the opinion that the reduction is somewhat excessive, he subscribes to the award in order to make it unanimous.

The Board begs to put on record its appreciation of the unfailing courtesy, as well as the very marked ability, shown in the presentation of their views of the representatives of each of the parties to the dispute.

Respectfully submitted,
(Sgd.) W. H. TRUEMAN,
Chairman.
(Sgd.) C. E. DAFOE,
Member.
(Sgd.) R. S. WARD,
Member.

**Report of Board in Dispute between the Inverness Railway and Coal Company,
(as represented by the Eastern Trust Company, Halifax, N.S.) and certain
of its employees.**

A report was received from the Board established to deal with the dispute between the Inverness Railway and Coal Company (as represented by the Eastern Trust Company, Halifax) and certain of its employees being members of Locals Nos. 4512 and 5163, District 26, United Mine Workers of America. The Board was composed as follows: Messrs. John R. Osborne, Ottawa, chairman, G. McGregor Mitchell, Halifax, and L. D. Currie, Glace Bay. The report of the Board was unanimous and contained recommendations as to the settlement of the dispute.

Report of Board.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Inverness Railway and Coal Company, Limited, represented by the Eastern Trust Company, Receivers, and their employees being members of District 26 of the United Mine Workers of America, Local Numbers 4512 and 5163:

Halifax, July 14th, 1922.

To the Honourable James Murdock,
Minister of Labour, Ottawa.

Sir:

A Board of Conciliation was applied for by Malcolm J. McLean, President, Local 5163, Inverness, Archibald McNeil, Local 4512, John A. Beaton, Secretary, Local 5163, and Hugh G. McDougall, Secretary, Local 4512, in the matter of a dispute regarding a reduction in rates of pay and other matters; and in pursuance thereof and under your authority the said Board was constituted and composed of John R. Osborne of Ottawa, Chairman, Mr. G. MacGregor Mitchell of Halifax and Mr. L. D. Currie of Glace Bay, N.S., and having been duly sworn held their first meeting for organization at the town of Inverness, N.S., on the 4th day of July

at 10 a.m. and on request of the employees adjourned for the purpose of visiting mine No. 4. On Wednesday, July the 5th, the Board again met in the town hall at Inverness at 10 a.m. and again adjourned at the request of the employees to enable the Board to visit mine No. 1. The Board reconvened on the afternoon of July 5, at 2 p.m., when evidence was taken; and again on Thursday, July 6, the Board held two meetings in the town hall, and all these meetings were open to the public, and after completing the taking of evidence in Inverness, where the mines are situated, the meetings of the Board were adjourned to meet in Halifax, N.S., for the purpose of taking the evidence of the officials of the Eastern Trust Company whose head office is in that city and who, as receivers, represented the company. Meetings were held in the Board of Trade Rooms, two sessions being held each day. A committee of the employees, appointed by the locals above named, attended these meetings in Halifax. Following this the formal sittings of the Board ended, and several conferences between the employees represented by the said committee and the President and other officials of the Eastern Trust Company were arranged by the Board in an effort to effect conciliation. These failed owing largely to the fact that a duly convened convention of District 26 had met at Truro, N.S., on the 26th day of June, 1922, when a resolution was passed which in effect forbade any member of the district to enter into any agreement with any operator which did not provide a scale of wages equal to those in force in the district prior to January 1, 1922.

The members of the Board were accompanied through the mines Nos. 1 and 4 at Inverness by Mr. Robert Baxter, President of the District 26 of the United Mine Workers of America, and other members of the District duly appointed by the locals involved, also by

the mine manager of the company; and the conditions complained of in the workings by the men were pointed out. All the sessions of the Board held at Inverness were thrown open to the public and much evidence was taken, and the claims of the men and the position of the company were fully disclosed. After the public sessions at Halifax, the members of the Board went into consultation for two days and have unanimously agreed upon the following report:

The Inverness Railway and Coal Company was incorporated and organized some twenty odd years ago with a capitalization of \$8,000,000 and a bond issue of \$3,000,000. All the stock was issued, all the bonds sold, and whether all the millions represented by this stock and bonds went into the development of the company's property, or not, was beyond the province of this Board to enquire; but the Board did discover that its entire career was one long struggle to survive and that it finally gave up the fight on the 5th day of July, 1915, when by an order made by the Supreme Court of Nova Scotia, in an action instituted by the bond holders, the whole undertaking was placed in the hands of Mr. John MacGillivray as receiver and he was succeeded in that position by the Eastern Trust Company on the 24th day of June, 1919. Between the said 5th day of July, 1915, and the 16th day of June, 1920, the operations of the company were continued by the receivers, acting as managers for the bond holders. On the latter date the entire assets of the company were sold, with the approval of the court, to one M. E. C. Henderson for the sum of \$1,250,000. cash payment of \$250,000 was all that was ever paid of this sum. A company organized by the purchaser, under the name of the Inverness Railway & Collieries Company, to operate the mines and railway, became insolvent within eight months, having accumulated in that brief period, liabilities aggregating \$454,000 and the Eastern Trust Company again came into possession by order of the Supreme Court of Nova

Scotia made on the 8th day of February, 1921; the bond holders being called upon to pay \$80,000 to protect their security from statutory liens. Only the joint representations of the Government of Nova Scotia, and members of those locals of the United Mine Workers of America, that are interested in this application, to the effect that the closing down of the industry would mean complete unemployment for a large portion of the population of Inverness, with its consequent distress, induced the bond holders to re-open the mines; and then only because the Government undertook to waive payment of all royalties on the coal that would be mined during the six months immediately following the 1st day of March, 1921, and the pledge made by members of District 26, of the United Mine Workers of America of faithful co-operation. During the fifteen months that have intervened from the re-opening of the mines until the first day of July, 1922, the expenses of operating the mines and railway have far exceeded the revenue. It is obvious that this company had no reserve fund other than that created by the deposit paid by Mr. Henderson, under his agreement to purchase. By means of this the receivers have been able to meet the recurring deficits and keep the mines open. This had practically been exhausted and it became exceedingly clear, as the investigation proceeded, that the big question the receivers had to solve was not so much as to what scale of wages they would be able to pay, but as to what means can be adopted to keep the mines open.

The management of the mines, corroborated by the receivers at Halifax, say, and the Board find, that the crippled financial condition of the company accounts to a very large extent for many of the things of which the employees complain, viz, reduction of wages, lack of equipment, etc.:

The complaints of the employees may be placed under the following heads:

- (1) Reduction of wages.
- (2) Unsatisfactory working conditions.
- (3) Poor housing conditions.

WAGES

The application for this Board was based mainly on the contention that the wage scale as reduced by the cut made effective by this company on the 13th day of May, 1922, was not sufficient to enable them to maintain the standard of living that they and their families are entitled to enjoy. President Baxter has pointed out very cogently that the workman's position has advanced and his standard of living has improved and that what satisfied him before the war does not satisfy him any longer. The Board agrees with that contention. A like claim has been made before other Boards of Conciliation this year, and while all have recognized the quiet revolution going on in the industrial system making for better and happier conditions for workmen, it has been laid down invariably that so long as the present industrial system remains, in fixing the scale of wages not only must the workers' right to an improved standard of living be recognized, but that the ability and capacity of the employer must also be regarded. With these two principles to guide us, we have considered the demands in this case. The evidence given on behalf of the company, as well as the evidence given on behalf of the men by Mr. Isaac D. MacDougall, cost accountant for the men, who has had free access to the company's cost sheets, show incontrovertibly that the operations of this company have been and are being carried on at a loss. Mr. MacDougall's figures show this loss to be less than those of Mr. Killam, manager of the company; but the explanation lies largely in the fact that, the one figures on a short ton and the other on a long ton, and their ideas as to percentage to be allowed for depreciation and depletion differ to some extent. An understanding between the parties to this dispute as to the scale of wages

to be paid is highly desirable. A resolution passed by the members of District 26 of the United Mine Workers of America in convention assembled at Truro recently, prevents the Board urging the men in this case to sign any definite agreement, confirming the scale of wages at present paid by the company. The Board finds, however, that having regard to the financial condition of the company, that the scale at present effective is fair; and recommends that it be continued in force without any other formal agreement, until such time as a permanent adjustment of wages is arrived at between District 26 of the United Mine Workers of America, and the British Empire Steel Corporation, when the scale fixed by that settlement shall automatically become the wage scale for this company. In the event of no permanent adjustment being arrived at between the British Empire Steel Corporation and its employees on or before the 1st day of October, 1922, the Board recommends that the scale of wages now in effect between the Inverness Railway & Coal Company be confirmed by a written agreement.

The foregoing shall not override the following specific recommendations that the Board make after special investigation, that is to say, in their opinion:

Section foremen should receive \$3.70 per day; all other men working on sections shall be admitted as Union men and paid as such;

Bank headmen, 5½ cents per ton for coal and 4½ cents per box for stone;

Weighmen, minimum of \$100 per month;

Hoist engineers, (1) \$3.90 per day;
(2) \$3.70 per day;

these special rates to become effective only from the date of filing this report.

HOUSING CONDITIONS AND DRAINAGE

A large percentage of the miners live in houses owned by the company, which, having regard to modern ideas on sanitation and the undoubted ill effect on

the miner and his family of unpleasant surroundings, the Board find to be, in many cases, unsatisfactory. The original lay out and location was ill advised. The houses have been built back to back in most cases, with an alley or passage dividing in the rear, which constitutes at once a convenient playground for the children and a depository for all the filth and dirt in the neighborhood; a medley of surface closets; homes and barns line these back streets; open drains, the only sewerage system in the town, carrying the refuse water from houses and outbuildings, undirected follow the path of least resistance, and in their blind struggle to find a way to the lower ground, pass indiscriminately through street and door yard; the whole scheme creating a breeding ground for pestilence and disease.

The wretched state of the drainage system of Inverness was admitted by everybody and responsibility therefor lies equally upon the company and the Town Council, which has for sometime past been controlled by the miners themselves. The Board believes that this outstanding menace to the health of the community could be very largely overcome by the co-operation of these two parties. The town is so located that there is a gravity run to the sea, and there is at present a sufficient water power in the town itself, to supply a steady flow of water through properly constructed drains. The Board directs the attention of the council to the powers conferred upon it by the laws of the Province, and recommends that the company and the council get together at once and inaugurate an aggressive clean up policy.

The present management are in no way responsible for the plan and location of the houses, and are apparently not in a position financially at the moment to undertake alterations or improvements on a large scale, but in the opinion of the Board a great many of the objectionable features, that at present irritate and annoy, could be eliminated without any large expenditure of

money; the Board recommends that for the present, all complaints regarding leaky roofs and requests for repairs that are essential to enable the workman to live decently and in comfort be promptly attended to by the company. The Board further expresses the hope that the management of these mines, which constitute the sole industry of the town, will in the near future fall into the hands of some man or men, who will have, not only the financial ability, but the public spirit that will prompt them to reconstruct and alter the character of these houses in accordance with more modern ideas of house planning, so as to remove the cause of much of the squalor and monotony that exists at present.

WORKING CONDITIONS

The Board, as already stated, visited the working places in and about both mines Nos. 1 and 4, underground as well as on the surface, and a special evening was set aside for taking the evidence of individual miners as to the nature, cause and extent of certain grievances that it was alleged in a general way existed, and with respect to which the miners' committees had been unable to obtain any satisfactory adjustment.

Black Damp.—Evidence was submitted by the miners and admissions were made by the company, as to the presence in certain sections of mine No. 1 of quantities of gas known as "Black Damp"; it was agreed that this constituted a serious grievance for the men who had more immediately to contend with it. Not only was it a menace to the health and life of the miner, but its presence in the working places interfered and interrupted his work and therefore impeded production, and impaired his earnings; when the mine is operated only part time the condition appears to be aggravated and the loss to the miner is much more serious. Methods pursued by former owners of this property account for the presence of this condition, and witnesses, called on behalf of the miners, testified that

the present management were doing a great deal to overcome it. The difficulty of dealing with the matter appeared clearly. The officials of the company explained what they were doing to combat it; the miners could suggest no other solution; the Board bearing in mind the serious nature of the condition can only recommend that the policy already adopted by the company be continued, and so far as finances permit extended, and that not only the letter, but the spirit of the Coal Mines Regulation Act of the Province be complied with.

Coal Chutes.—That these were blocked too frequently was the ground of much complaint. It was clear that the condition interfered with the production of coal and impaired the earnings of not only the man at the face, but all down the line. Various causes were alleged for this condition by the men; delay in removing falls of stone blocking the levels; insufficient supply of coal boxes; lack of track turnouts; etc. Evidence adduced by the miners themselves disclosed that one of the chief contributing causes to this condition was the total lack of consideration on the part of their fellow workmen who, situated on lower levels in parlance of the mine "hogged" the chute to the great prejudice of the men above.

The officials of the company said that this was one of the unsatisfactory conditions that developed when mine was operated part time, and that with steady operation it disappeared almost entirely. Your Board recommends that the company should give more consideration to this complaint and that the men more immediately connected with the chutes should recognize the rights of their co-labourer higher up by giving a practical demonstration of the principle involved in the Golden Rule. It appeared to the members of the Board that a rule designed to regulate the operation of these chutes could be made by the company, that would meet with the approval of a majority of the members of the local union and when ratified by

them could be enforced to the advantage of company and men alike.

SURFACE CONDITIONS

The Wash Houses—which mean much to the miners, are, at both collieries, in very bad condition. No. 1 is over crowded, poorly ventilated, and in equipment wholly inadequate, the old wash basin system prevails, no shower baths have been installed at any place, and the whole thing is unsanitary. The management admit that this condition should be remedied by stating that they have already laid plans for the construction of a new commodious wash house, with proper equipment, as soon as funds can be obtained. The Board recommends that in the meantime, two shower baths be installed in No. 1 wash house and one in No. 4. The practicability of this was acknowledged by the management, and the expenditure involved will not be large.

No. 4 Bank Head.—This is a new mine, and the equipment is incomplete, lack of funds explain many deficiencies, and these must be excused, but the Board feels that the men who at present work on this bank head, exposed to all kinds of weather, without any protection should be provided with a shelter of some kind. The company say that a permanent bank head is to be erected in the future. The future with this company is clouded, the Board urges that a temporary shed be erected forthwith. Cash expenditure would be trifling.

A number of other matters such as the rate of pay for "brushing" in No. 4 mine, rate of pay in the sinkings, and scarcity of timber were placed before the Board for consideration, but the Board feels that these can be better adjusted by meetings between the miners' committees and the management.

The claim of the men that the crippled financial condition of the company is due largely to the losses sustained annually in the operation of the railway, and that the two projects, railway and mine, should be dissociated, involves a question of policy, which is perhaps

beyond the province of this Board to deal with, but it was made to appear so clearly that it was in the interest not only of the miners and the company, but of the entire district that the Dominion Government should take over and operate the railway that the Board recommends that some joint action be taken by the men and the company to impress this view upon the Dominion Government.

The Eastern Trust Company, who as receivers represented the company before this Board, and have for some months directed the operation of this company have had a difficult task to perform; as officials of the court their authority has been limited; the obligation imposed upon them by their trusteeship compels exact account and justification for every dollar expended; they have to compete with corporations financially strong; to satisfy the bond holders on the one hand and wage earners on the other; all under the close scrutiny of the court; such a situation does not leave much scope for independent judgment, or allow for bold or aggressive business policy. The Board think the Trust Company are discharging their difficult task well.

The Board sympathize with the claim of the men, who say that they are vitally interested that this mining industry should be continued and developed at Inverness, and that they should therefore have some voice in framing the policy to be pursued in the actual operations carried out in the mines in which some of them have spent a generation of toil, and around which they have established their home. The Board hopes that, in the re-organization that must soon take place at these mines, that this claim will be recognized.

The Board believes it appreciates the position—continued disagreement between the men and management at the mines means the closing of the industry and greater hardship to the community. It recommends therefore that the parties to the dispute recognize that only loyal co-operation and mutual consideration will ensure the continuance of the industry.

All of which is respectfully submitted.

Report of Board in Dispute between the Montreal Light, Heat and Power Consolidated and certain of its employees.

A report was received from the Board established to deal with the dispute between the Montreal Light, Heat and Power Consolidated and certain of its employees in the gas and electric distribution and maintenance plants, members of various trades unions. The Board was composed as follows: Messrs. E. McG. Quirk, chairman, Bernard Rose and Gustave Francq. The report of the Board was unanimous and contained recommendations as to the settlement of the dispute. Advice was later received from both parties that the findings of the Board were acceptable to them.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of differences between the Montreal Light, Heat and Power Consolidated and certain of its employees, being members of the following organizations: I. B. of Electrical Workers, I. A. of Machinists, U. B. of Carpenters and Joiners, and Gas Workers, Federal Union 16571—all members of Joint Council of Employees.

To the Hon. James Murdock, M.P.,
Minister of Labour, Ottawa.

Sir,

The Board, constituted by you under the Industrial Disputes Investigation

Act, 1907, consisting of Mr. E. McG. Quirk, Chairman, Mr. Bernard Rose, representing the employing company, and Mr. Gustave Franco, representing the employees, has the honour to submit its report on the above mentioned dispute.

The Board's preliminary meeting was held on June 15th, when preparations were made in regard to its sittings. Subsequent sittings were held in room 24, Court House, placed at the disposal of the Board through the courtesy of Mr. Sheriff Lemieux.

The Board held meetings and sittings open to the public on June 19, 21, 22, 23, 26, 27, 29, 30, and July 6th. It visited the company's gas plants and electrical stations.

The Company's representatives were Mr. R. M. Wilson, Chief Electrical Engineer, Major J. J. Humphreys, Mr. E. J. Turley; the Vice-President and General Manager, Mr. J. S. Norris, attending from time to time upon call of the Board.

The employees' representatives were Mr. J. Broderic, Mr. H. A. Spence and Mr. F. Griffard. Associated with them as advisers were representatives of various craft organizations interested in the dispute, namely, Mr. H. Kerwin, Mr. J. Noble.

In April, 1919, an agreement was effected between the company and its employees in regard to wages, classification, and working conditions. This agreement may be accepted as the basic agreement in regard to subsequent ones. It established the eight-hour day in the basic trades, and in continuous shift operations; provided for grievance committees; defined overtime, and holidays with pay. It is designated as the "1919" Agreement.

In May, 1920, the "1919" agreement was renewed through negotiation and conference, the wages rates were increased 25 per cent to meet increased cost of living. This agreement is designated as the "1920" agreement.

In June, 1921, the "1920" agreement was renewed through negotiation and conference. Wage rates were decreased 12½ per cent and in some instances 20 per cent. This reduction was acceded to in order to meet the company's contention that living costs had decreased. This agreement is designated as the "1921" agreement.

The three agreements referred to, along with a statement showing comparison of wage rates covering the various classifications extending over the period from 1915 to 1921, as also the proposed reduction effective 1922, were filed with the Board.

From statements and arguments submitted to the Board, the contentions of the parties may be summarized.

The contention on the part of the employing company is that a wage reduction was justified; (1) in conformity with prevailing wage reduction and deflation, and a corresponding decrease in cost of living as interpreted from the indices of the *Labour Gazette*, Department of Labour, Ottawa; (2) to enable the company to make effective a proposed reduction in the price of gas and electricity to its consumers.

The contention on the part of the employees against the proposed reduction is that (1) the cost of living has not decreased proportionately to the wage reduction proposed by the company; (2) the proposed reduction if made effective would seriously affect their standard of living.

The major issue before the Board was one of wage reduction applying to the existing agreement, expiring June 1st.

Some items of classification and working conditions were brought to the attention of the Board. The Board is of the opinion that in many of the instances cited, a satisfactory adjustment can be reached, if brought to the attention of the company's officials.

The Board is justified in expressing its opinion in this regard by quoting

from the statement prepared and submitted to the Board by the company's representatives, Mr. R. M. Wilson and Major J. J. Humphreys, as follows:

That the company's attitude in its relations with its employees has, at all times, been such that it welcomed discussions concerning grievances and recommendations with representatives chosen by the employees amongst themselves. It will, in the future, follow the same policy. It appreciates the advantages of discussing with its employees such matters as are of mutual interest.

At no time has it ever refused to discuss with its employees, through one or more spokesmen or committee chosen from amongst themselves, such matters as the employees considered merited investigation or remedying.

They believe this is a policy that contributes to mutual respect and is in the welfare of both the company and its employees.

During its sittings and hearings, members of the Board were impressed with the excellent relationship existing between the officials of the company and its employees. In conversation with the company's officials and employees, the Board became cognizant of the mutual regard and good-will existing between the parties.

In discussing this agreeable and pleasant observation, the Board was unanimously of the opinion that the interests of the parties would be best served by counselling them to effect a settlement and agreement by further conferences. At the meeting on June 30th, the Chairman and his colleagues spoke in no uncertain terms of the advisability of the parties going into further conference in an endeavour to reach a satisfactory settlement.

The Board adjourned pending the conferences. It resumed its sitting on July 6th; the parties appearing stated they had reached an understanding in regard to wage rates, but were unable to agree as to working conditions. The Board suggested the conferences be continued in its presence and by its help and suggestions along with the conciliatory spirit of the parties an understanding was reached enabling the Board to make a unanimous report and recommendation, and it believes

that the recommendations made should be accepted by the parties. They are as follows:

(1) That there will be no reduction in the rates of pay of employees now receiving the rates contained in the tion below the rate established by the agreement signed in June, 1919.

(2) That, the rate of pay of all employees now receiving wages in excess of the rates established in June, 1919, be reduced 5 per cent; but in no case will any employee suffer any reduction below the rate established by the June agreement of 1919.

(3) That labourers shall be paid a minimum rate of 30 cents an hour.

(4) The Board believes that, in order to avoid misunderstanding, a definition should be provided in the matter of who shall be designated as a temporary labourer, and defines temporary labourer as, all those employed in the extension of new mains, new services, new buildings, new apparatus and new machinery, and accessories thereof, and all extraordinary repairs.

(5) Clause 4 of the agreement of 1921 referring to gas workers shall have the following added thereto: "Any man employed as set forth in the preceding clause shall have the right to absent himself one day in seven, providing the employee so absents himself gives 24 hours' notice to his foreman."

(6) The 1921 agreement shall prevail and be in full force and effect, subject to the exceptions contained in the preceding paragraphs, which constitute the Board's recommendations.

(7) The Board recommends that the present agreement shall come into effect and continue for a period of one year, commencing July 11th, 1922.

The Board desires to place on record its sincere appreciation of the help accorded it by the representatives of the parties to the dispute. Their willingness

to materially aid the Board assisted it in reaching a unanimous conclusion.

It desires specially to warmly compliment the men involved in the dispute in the judgment shown in selecting their representatives. The case on behalf of the men was very ably presented, and showed a thorough appreciation of conditions and circumstances. At all times during the sessions of the Board, the utmost courtesy was shown it by the men's representatives.

The Board likewise desires to make reference to the willingness and conciliatory spirit shown by Mr. J. S. Norris, the Vice-President and General Manager of the company. He and the officials of the company gave the Board every possible facility to inspect the gas and electric plants of the company and to get such information as it thought might serve its purpose. Mr. Norris,

assisted by Mr. R. M. Wilson, the Chief Electrical Engineer of the company, Major J. J. Humphreys, Superintendent of the gas plants, and Mr. E. J. Turley, Superintendent of shops, presented the company's case in a manner that entitles them to our thanks. We believe that, as already set forth in the preceding paragraphs of this report, the good feeling shown during the Board's deliberations is a splendid augury for the continuance of that spirit of good-will in the relations between the employers and employed that means so much for the maintaining of industrial peace.

The whole very respectfully submitted.

(Sgd.) E. MCG. QUIRK,
Chairman.

(Sgd.) GUS. FRANCO,
(Sgd.) BERNARD ROSE.

Montreal, July 7th, 1922.

Report of Board in Dispute between various shipping companies at Montreal and certain of their employees.

A report was received from the Board established to deal with the dispute between various shipping companies doing business at the Port of Montreal and certain of their employees being shipliners, members of Local No. 2098, United Brotherhood of Carpenters and Joiners. The Board was composed as follows: Messrs. H. S. Ross, K.C., chairman, David K. Trotter and J. T. Foster. The report of the Board was unanimous and contained recommendations as to the settlement of the dispute.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and amendments, and of a difference between certain shipping companies doing business at the Port of Montreal represented by The Shipping Federation of Canada, Incorporated, employers, and members of Local 2098 of the United Brotherhood of Carpenters and Joiners, Montreal, employees.

To the Hon. James Murdock, M.P.,
Minister of Labour, Ottawa.
Sir,

The undersigned members of the Board of Conciliation and Investigation herein beg to report as follows:

David K. Trotter, appointed by your Department to represent the Shipping Federation, and John T. Foster, appointed to represent the members of Local 2098, met to consider the recommendation of a chairman of the Board on June 15, 16 and 19, and at the meeting held on June 19 decided to recommend the appointment of Howard S. Ross, Barrister, of Montreal.

On being notified of the appointment of the chairman the Board held its organization meeting on June 21, and sat for the purpose of hearing evidence and preparing this report on June 23, 26, 27, 29, July 3, 4, 5, 6, 10 and 11 and 12. On June 28 the Board visited a number of the docks and ships in order to see the men at work so as to get a better idea of the work performed.

During the course of the investigation certain officials of the organizations concerned and a number of employees appeared before the Board and presented statements verbally and in writing.

Two carpenter contractors who are familiar with such work also gave evidence.

The Board during the course of the investigation arranged a number of meetings between the representatives of the parties to the dispute with a view to an amicable settlement. The efforts of the Board in this direction have so far not been successful.

The dispute between the parties arose following the action of the employers in putting into effect, at the expiration of the agreement for the year ending 16th of April, 1922, a reduction in wages. The employees were, under the agreement expiring April 16, 1922, receiving 60 cents per hour for day work and 75 cents for night work, and for the season of 1922 asked for 65 cents per hour for day work and time and one-half for night work, an increase of 5 cents per

hour for day work and 22½ cents per hour for night work. This request was refused and the employees were notified that they would be paid 50 cents per hour for day work and 60 cents for night work.

The employees declined these rates and applied for a Board of Arbitration.

The Board are of the opinion after carefully considering the evidence submitted that substantial justice will best be done in this case if the rates to be paid are as follows:

55 cents per hour for day work.
65 cents per hour for night work.

We hope that this recommendation will be accepted by both parties so that the amicable relations which have always existed may be continued.

All of which is respectfully submitted.

Dated at Montreal, July 12, 1922.

(Sgd.) HOWARD S. ROSS,
Chairman.

(Sgd.) JOHN T. FOSTER,
(Sgd.) DAVID K. TROTTER.

COST OF LIVING ADJUSTMENT OF WAGES OF VANCOUVER ISLAND COAL MINERS.

THE Cost of Living Commission appointed on January 21, 1919, to determine every three months the changes in the cost of living for coal miners on Vancouver Island, and to report the amount by which wage rates should correspondingly be increased or decreased, forwarded its report to the Department of Labour for the quarter ending June 30, 1922.* The Commission consisted of Mr. Matthew Guinness, representative of the miners; Mr. Tulley Boyce, representing the operators; and Mr. D. T. Bulger, Fair Wages Officer of the department of Labour, Chairman.

As in previous investigations, forms were sent out to the merchants and dealers with whom the majority of miners were accustomed to trade in the various localities. The forms contained the same list of groceries, provisions, meats, etc., that was used on previous occasions. The method of computing the changes for the period under review was the same as used for previous adjustments, namely, to determine the percentage of increase or decrease, as the case may be, of prices of June 30 over March 31, for groceries, provisions, meats, etc., and to add a further two-fifths of this increase (or decrease) as an equivalent to cover similar increases (or decreases) in

*For previous orders see LABOUR GAZETTE, May, 1922, and various preceding issues.

clothing, etc. An increase of 6.3 per cent was ascertained, which amounted to an increase in wages of $1\frac{3}{4}$ cents per day where the base rate was \$3 per day, and 2 cents per day where the base rate was \$3.15, the increase in wages to become effective August 1, 1922, and to apply to all underground service, clerical and office employees.

Retail price lists were received from general merchants and retail dealers in meats in the various mining centres.

Sharp increases were noted in sugar, lard, and cookies. Slight increases were

noted in molasses, Lima and brown beans, rice, canned beans, tomatoes, salmon, brooms, most varieties of flour, rolled oats, soda biscuits, butter, evaporated milk, coffee, cream of tartar, flavouring extracts, evaporated figs and prunes, beef, mutton, and veal. Slight decreases were noted in jam, split peas, barley, sago, tapioca, canned corn beef, canned roast beef, standard flour, corn meal, oat meal, ham and bacon, tea, currants, raisins, and fresh pork. Sharp decreases were noted in syrup, lunch tongue, and pickles. No changes were noted in small white beans, canned peas, and canned corn.

STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1922.

THE following table shows the number of strikes in existence in Canada at some time or other during July, 1922, together with the number of employees involved and the time loss in working days, as compared with the previous month and with July, 1921:

	Disputes	Employees involved	Time loss in working days
July, 1922.....	22	15,736	261,240
June, 1922.....	25	10,155	254,134
July, 1921.....	41	9,413	92,891

Most of the time loss in July (as in June) occurred in the coal miners' strike in Alberta, where 7,538 miners had a time loss of 188,450 working days. Three strikes commenced during the month, involving 5,045 employees and a time loss of 11,065 working days. Of the 25 strikes in June, 19 were carried over into July, these causing a time loss of 250,175 working days. Three strikes ended during July, two of which had commenced prior to July and the other during the month: the strike of fishermen at Rivers Inlet, B.C., commenced on June 20, and terminated July 9; that of clothing workers at Montreal commenced on February 17, and terminated July 31; and that of the garment work-

ers in Montreal commenced on July 25, and terminated on July 27.

At the end of the month there were, therefore, still on record 19 strikes, affecting 9,726 workpeople, as follows: coal miners, District 18; painters, Toronto; railway employees of steel and coal companies, Sydney; narrow gauge enginemen, Sydney; moulders, Guelph; structural iron workers, Edmonton; structural iron workers, Winnipeg; photo engravers, Montreal; photo engravers, Ottawa; composers, Hamilton; composers, Montreal; composers, Toronto; composers, Vancouver; composers, Winnipeg; composers and pressmen, Halifax; composers and pressmen, Ottawa; motormen and conductors, Niagara Falls, and theatre employees at Calgary.

Disputes by Industries.

In this article a new grouping of industries and occupations is adopted which is different in some respects from that previously used. At the end of the year the record for the year will be tabulated in accordance with this new grouping. The following is a review of disputes by industries in the order in which they appear in the statistical table. A brief reference is made to the more important strikes.

FISHING

On June 20, a strike involving 950 fishermen engaged in the sockeye salmon fishing for the canneries, occurred at Rivers Inlet, B.C. The cause of the dispute was the employers' refusal of a demand by the fishermen for a 50 per cent increase in the rate of payment, that is, from 30 cents to 45 cents per fish. Negotiations were carried on between the parties concerned after which work was resumed on July 9, at the same rates as prevailed prior to the strike. The resulting time loss was 9,500 working days during June and 6,650 during July.

MINING, NON-FERROUS SMELTING AND QUARRYING

The coal miners' strike in existence in District 18 of the United Mine Workers of America, in Alberta and south-eastern British Columbia, against a reduction in wages continued, neither party accepting the award of the Conciliation Board.

MANUFACTURING

Clothing. — Two strikes, involving 5,060 workpeople and resulting in a time loss of 11,500 working days were in existence in this group. One strike, that of clothing workers in Montreal which commenced during February ended during July. The strike was against the introduction of piece work, involving also a reduction in wages. Work was resumed at the end of July under conditions existing prior to the strike. A strike of garment workers began at Montreal on July 25, when some 5,000 workers demanded that work should be given only to shops working under union conditions. Work was resumed on the second day when the employers agreed to the demands of the employees.

Printing and publishing. — In this group the situation remained practically the same as in the previous month, namely, with 10 strikes involving 1,802 workpeople and resulting in a time loss of 45,050 working days. Included among

these were the several strikes in the printing trades for the 44-hour week and increased wages in various cities which began in May and June, 1921. None of these disputes were terminated during the month.

CONSTRUCTION

Buildings and structures. — Three strikes were recorded in this group, involving 165 workpeople and resulting in a time loss of 4,065 working days. The strike of painters at Toronto which occurred on May 15, against a reduction of 10 cents per hour from the previous rate of 75 cents per hour, remained un-terminated at the end of the month. During June the structural iron workers at Winnipeg in the employ of two firms went on strike against a reduction in wages from \$1.10 to 85 cents per hour. The dispute was still un-terminated at the end of the month. On July 7, structural iron workers at Edmonton also went on strike against the same reduction from \$1.10 to 85 cents per hour.

TRANSPORTATION

Steam Railway Service. — The strike of railway employees of steel and coal companies in Nova Scotia which had been carried over from the previous month's record remained un-terminated at the end of July.

Electric Railway Service. — Electric railway employees on that section of the International Railway in the city of Niagara Falls, Ont., and its neighbourhood, were involved in a strike against non-recognition of the union. The strike commenced on July 1, involving in Canada 30 motormen and conductors, and resulted in a time loss of 750 working days for the month. This dispute remained un-terminated at the end of July.

SERVICE

Recreational. — The strike of theatre employees at Calgary which commenced during May remained un-terminated.

STRIKES AND LOCKOUTS DURING JULY, 1922.

Industry, occupation and locality	Particulars	Number of employees involved	Time loss in working days
(a) Strikes commencing prior to July, 1922.			
FISHING—			
Fishermen, Rivers Inlet, B.C.....	Commenced June 20, for a 50 per cent increase in the rate per fish. After negotiations work was resumed July 9 at previous rates.	950	6,650
MINING, NON-FERROUS SMELTING AND QUARRYING—

STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING JUNE, 1922

THE following details with regard to strikes and lockouts in the United Kingdom during June, 1922, based upon returns from employers and workpeople, are taken from the July issue of the British *Labour Gazette*.

NUMBER, MAGNITUDE AND DURATION.—The number of trade disputes involving a stoppage of work, reported to the Department as beginning in June, was 32, as compared with 38 in the previous month, and 29 in June, 1921. In these new disputes about 31,000 workpeople were directly involved and 2,000 indirectly involved (i. e. thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition to the numbers involved in new disputes, about 278,000 workpeople were involved, either directly or indirectly, in 50 disputes which began before June, and were still in progress at the begin-

ning of that month. The total number of new and old disputes in progress in June was thus 82, involving about 310,000 workpeople; and resulting in a loss during June of nearly 2,100,000 working days.

The stoppage of work involving members of the Amalgamated Engineering Union and other engineering trade unions in the employment of firms affiliated to the Engineering and the National Employers' Federation terminated in June.

CAUSES.—Of the 32 disputes beginning in June, 17, directly involving about 19,000 workpeople, arose out of proposed reductions in wages; 5, directly involving 5,000 workpeople, on other wages questions; 4, directly involving 6,000 workpeople, on questions of trade union principle; and 6, directly involving nearly 1,000 workpeople, on other questions.

RESULTS.—Settlements were effected in the case of 17 new disputes, directly involving about 22,000 workpeople, and 20 old disputes, directly involving about 256,000 workpeople. Of these disputes, 5, directly involving 6,000 workpeople, were settled in favour of the workpeople; 14, directly involving 9,000 workpeople, in favour of the employers; and 18, directly involving 263,000 workpeople, were compromised. In the case of 4 disputes, directly involving about 2,000 workpeople, work was resumed pending negotiations.

The following table classifies the disputes in progress in June by groups of industries:—

Groups of industries	No. of disputes in progress in June			Number of workpeople involved in all disputes in progress in June.	Aggregate duration in working days of all disputes in progress in June.
	Started before June 1.	Started in June.	Total		
Building	5	4	9	4,000	26,000
Mining and quarrying	12	11	23	31,000	286,000
Metal, engineering and shipbuilding	17	5	23	269,000	1,693,000
Transport	3	3	6	500	10,000
Other trades.....	10	8	18	6,000	51,000
Employees of public authorities..	3	1	4	500	12,000
Total, June, 1922..	50	32	82	311,000	2,078,000
Total, May, 1922..	55	38	93	372,000	7,229,000
Total, June, 1921..	62	29	91	*1,551,000†	*29,998,000†

*Revised figure. †A general dispute in the coal mining industry was in progress in June, 1921.

THE RAILWAY STRIKE IN THE UNITED STATES

THE strike of shop craft employees, against a reduction of wages, on the principal railways in the United States which began on July 1, as described in the LABOUR GAZETTE for July, continued throughout the month. Other organizations of railway employees affected by the wage reductions effective from July 1 agreed to withhold strike orders until the Railroad Labour Board had reconsidered the reductions ordered, the final rates decided upon to be retroactive to July 1. On some railroads, however, employees in these organizations left work either in sympathy with the shop craft strikers or because dissatisfied with conditions. The organizations concerned, however, took steps to adjust these conditions. The railroads took on men to replace the shop craft employees on strike and in some localities trouble ensued between the strikers' pickets or sympathizers of the shop employees, resulting in riots. The railway companies, in some instances, secured injunctions from the courts forbidding picketing, and in some cases troops were stationed by the authorities about the railway shops and yards. Toward the

end of the month complaints were made by members of train crews that the engines and cars were not in proper repair and could not be operated in safety. Objections were also made to entering yards and shops surrounded by armed men. In some cases train operating employees, therefore, stopped work but these conditions were not widespread.

On July 11 the President of the United States issued a proclamation directing all persons to refrain from interfering with lawful efforts to maintain interstate commerce and the carrying of the United States mails. It was also reported that the authorities had arranged for the mobilization of motor trucks to carry the mails where necessary. On some railroads large numbers of passenger trains were cancelled owing to the inability of the railway companies to repair rolling stock, and later in the month difficulty in moving the fruit crop on the Pacific Coast was reported. On July 25 the Interstate Commerce Commission under the Transportation Act declared that an emergency existed,

and took over the control of rolling stock and the movement of cars. It issued an order to the railway companies to move all freight by the most direct routes regardless of all other orders and arrangements and to give priority in shipment to perishable foods, coal for certain localities and purposes, and other necessities of life according to the classification provided. The Commission placed the operation of this policy under a committee of which the Chairman was Secretary of Commerce Hoover.

During the month negotiations were entered into between the railway companies and the employees through the

President of the United States and the Railroad Labour Board, and at the end of the month both parties to the dispute had agreed to refer the wages question to the Board to be considered, but the employees refused to call off the strike unless the men regained their positions without loss of seniority according to length of service. The railway companies refused to accept the proposal of President Harding that this issue should also be referred to the Railroad Labour Board and the strike was therefore un-terminated at the end of the month.

The situation as affecting railways in Canada is discussed in a separate article.

THE UNITED STATES COAL STRIKE

Federal plan to control distribution of available coal supply

THE general coal strike in the United States, which began on April 1, continued throughout July. The transportation of coal from the non-union fields which were still in operation was crippled by the railway strike, an account of which appears on another page of this issue. A quantity of coal was ordered from Great Britain for delivery at ports both in the United States and Canada.

On July 10, the President of the United States addressed a proposal to representatives of the operators and miners at a joint meeting at Washington, with a view to the immediate resumption of work and the settlement of the dispute by arbitration.

The proposal of the President was in part as follows:

Mine workers are to, return to work on the scale of wages which expired last March 31, and mines now idle because of strike or suspended operation to resume activities, without interference with activities of mines now working. The 1922 scale to be effective until August 10, 1922.

A Coal Commission to be created at once, consisting of three members selected by the mine-workers, three members selected by the

mine-operators, and five members to be named by the President. All decisions by this Commission shall be accepted as final.

This Commission to determine, if possible, within thirty days from to-day, for the miners on strike a temporary basic wage scale, which scale shall be effective until March 1, 1923. In event that the Commission is unable to report its scale by August 10, it shall have power to direct continued work on 1922 scale, until superceding scale is ready.

The Commission shall investigate exhaustively every phase of the coal industry. It shall reveal every cost of production and transportation. The President will ask Congress to confer authority for the most thorough investigation, and make appropriations necessary to do such work. The Commission shall make recommendations looking to the establishment and maintenance of industrial peace in the coal industry, the elimination of waste due to intermittency and instability, and suggest plans for dependable fuel supply.

I have taken this short cut to a resumption of operations because I believe it to be in the interest of the public welfare. It is that simple form of adjusting disputes which answers the call of good conscience and a just civilization. When two great forces do not agree there must be a peaceful way to adjustment, and such an arbitration opens the way.

I do not expect reply without due consideration. Please take the proposal to separate

conferences. I wish you to appraise the situation, weigh your responsibilities, and then answer this proposal as you wish to be appraised by American public opinion. I am speaking first of all for the public interest, but I am likewise mindful of the rights of both workers and operators. You are also an inseparable part of that public interest. With due regard for all concerned, it ought to be easy to find a way to resume activities and command the approval of the American public.

This was subsequently interpreted by the President as follows:

The program contemplates three successive stages as follows:

First—That the mine workers return to work under the same terms and conditions as those which governed each case on last March 31. This includes the check-off.

Second—It is the intent that the temporary arrangement above shall remain in force only during the shortest period that may be required for a determination of terms and conditions of labour for the period ending March 1, 1923. I have emphasized this by suggesting that the wage scale shall be determined by August 10, 1922, with authority in the commission to extend that period by such number of days as may be required. Its earliest determination is very necessary in order that contracts and estimates involved in business transaction may become settled, and it is understood that all questions of dispute as to conditions of labour or any other points of friction between operators and employees, who are parties to this arrangement, shall be determined by the commission, and such settlement shall hold until March 1, 1923. These decisions may also require more time than until August 10, and therefore the commission is to have authority to extend time for settlement of each or any of these questions as it finds to be necessary.

Third—That the commission in recommending an establishment for maintenance of industrial peace in the coal industry will be expected to bring in such recommendations in time to allow for their use in the settlement of relations after March 1, 1923. They are to be recommendatory and not binding.

The President will ask of Congress as soon as the House is reconvened in August for a grant to the commission of the necessary legal powers to make an exhaustive enquiry into the coal industry in order to acquire the needed information upon which to formulate plans to avoid future suspension of production.

In order to clarify what shall constitute a commitment to the plan I have proposed, let

it be understood that, as to the bituminous fields, the basis of agreement in national disputes has hitherto been agreements between the United Mine Workers with operators in the Central Competitive Field. Therefore, the acceptance of this offer by the United Mine Workers and by the operators shall be deemed complete and binding when the United Mine Workers and the operators, parties to the Central Competitive Field agreement which expired on March 31, have accepted it. The other bituminous mines which are now idle because of strike or suspended operation are expected to adhere to the plan and comply with the decisions of the commission, but their action in no way affects the validity of the agreement to the plan.

In the anthracite fields the acceptance of this offer by the United Mine Workers on one side and the Anthracite Operators' Association on the other shall render it effective. If the mine workers and operators agree, there shall be a separate commission.

It is understood that all decisions by the commission must be reached by a majority vote thereof, and all decisions shall be binding to all parties to the agreement until March 1, 1923.

A series of conferences of representatives of bituminous coal operators' associations took place to consider the President's proposal, but they were unable to reach a unanimous agreement. All but three of the associations signed a report accepting the President's plan "without reservation or qualification". The three associations that refused to accept the plan were the Pittsburgh Coal Producers' Association, the Indiana Operators and the Central Coal Association of Pennsylvania.

The anthracite operators expressed sympathy with the President's plan, but suggested that a separate commission be appointed to study conditions in the anthracite field, and that March 31, 1923, be the date adopted for the expiration of the Temporary Wage Scale.

The policy committee of the United Mine Workers of America unanimously rejected the President's proposal, and a letter signed by the international officials and the district presidents of the Union set forth their reasons for its rejection. While welcoming the appoint-

ment of a commission which "shall investigate exhaustively every phase of the coal industry," they considered the combination of a scientific investigating committee with a wage arbitration board to be bad. They believed there would be no difficulty in establishing proper wage scales through conferencer with the operators if the industry itself was operating on a proper basis. They also pointed out that operators representing nearly fifty per cent of the tonnage in strike fields had not been present at recent conferences, and they were advised that these interests had no intention of coming within the provisions of this plan of settlement.

No progress toward a settlement of the dispute was made during the month. Steps were taken to control the distribution and rationing of the available coal supply under the direction of Secretary of Commerce Hoover and the Interstate Commerce Commission. A plan to prevent profiteering by withholding cars from mines charging exorbitant prices was declared to be perfectly legal by the Attorney General of the United States. This plan, which was drawn up tentatively and is subject to further consideration is as follows:

(1) A committee in Washington, to be appointed by the President, of representatives of the Department of Commerce, the Interstate Commerce Commission, the Department of Justice, and the Department of the Interior, to be designated the Presidential Committee. This committee to have general supervision of the measures to be taken hereunder and to authorize the execution of such of these measures as may be necessary from time to time.

(2) The Administrative Committee, comprising representatives of the Presidential Committee together with representatives of operators, representatives of the railways, and, where necessary, representatives of the larger consuming groups.

(3) The Presidential Committee will establish a representative in each coal-producing district.

(4) The Presidential Committee will appoint a committee of operators in each district to be nominated by the district oper-

ators' association or independent operators (in case of failure of the operators to take such action the Presidential Committee may appoint such operators as they see fit on such committee). The members of these district committees may be changed as determined upon by the Presidential Committee.

(5) The Presidential Committee will co-operate with the Interstate Commerce Commission in carrying out preferential orders issued by the Commission.

(6) The governmental representatives in the districts with the co-operation of the district committees shall advise the agencies of the Interstate Commerce Commission as to the local car movement to effect the purposes of this plan.

(7) The operators will proceed with their usual business until they are affected by preference orders.

(8) It is expected that the district committees under authority of the Presidential Committee will recommend the allotment of cars on the basis of those who conform to the fair prices to be agreed upon with the Presidential Committee.

(9) When the operators demand, then suitable guarantees shall be given for payment by persons buying under priority orders.

(10) The railroads will be requested to appoint a representative to deal with purchases of railroad fuel.

(11) The basis of prices agreed upon between the operators and the Secretary of Commerce on June 1 are to be maintained, except where varied by the Presidential Committee, and this same basis of price determined shall be applied to all districts which are so far not co-operating.

Representatives of the operators agreed to this plan and steps were taken to put it into operation.

Official action in Canada.

With a view to protecting the interests of Canada as far as possible the Dominion Government appointed a Federal Advisory Fuel Committee composed of the Hon. W. C. Kennedy, Minister of Railways, and Messrs. C. A. Magrath of Ottawa and Fred McCourt, Montreal. Mr. Magrath, it will be remembered, had been appointed Fuel Controller in June 1917 to deal with the shortage of anthracite coal in that year.

Mr. McCourt is a coal merchant of Montreal, member of the Century Coal and Coke Company. The Ontario government also announced the appoint-

ment of Mr. J. A. Ellis, vice-chairman of the Ontario Railway and Municipal Board, to the position of Fuel Administrator for Ontario.

CANADIAN MANUFACTURERS' ASSOCIATION ANNUAL CONVENTION

THE Fifty-first annual general meeting of the Canadian Manufacturers' Association was held at St. Andrews, N. B. on June 20 to 23, the president, Mr. W. S. Fisher, of St. John, N. B. being in the chair. The total membership was reported as 4,272, a net gain of 41 over the preceeding year. Of this total 2,282 members were from Ontario, 994 from Quebec, 373 from Manitoba, 213 from British Columbia, 149 from Alberta and Saskatchewan, 126 from Nova Scotia, 118 from New Brunswick and 17 from Prince Edward Island.

UNIFORMITY OF LAWS

The Legislative Committee commended the work accomplished by the annual interprovincial conference which first met in 1918 for the purpose of promoting uniformity in the legislation enacted by the various provinces. This movement was initiated by the Council of the Canadian Bar Association, through whose efforts several of the Provinces passed statutes providing for the appointment of commissioners to attend an interprovincial conference. These commissioners now meet annually, and have already secured the passing of measures and amendments tending toward greater uniformity. In the sphere of labour legislation, action has been begun in regard to workmen's compensation and mechanics' liens, and suggestions in regard to harmonizing the provincial laws on these subjects may be expected from the commissioners. The legal department of the Manufacturers' Association is represented at these annual conferences and is in close touch with the work of the Commission.

LABOUR LEGISLATION

The Legislative Committee in their report commented adversely on the appointment by the Ontario Government of a labour representative on the Workmen's Compensation Board of that province, while the manufacturers' request to have a representative was refused. The report also advocated provision for the payment to the workmen's compensation fund of contributions by the workers. Criticizing the amendment to the act in 1920, which raised the scale of compensation from 55 to 66 $\frac{2}{3}$ per cent of wages, and increased certain other benefits, for example, to widows and children, the report claimed that during the first year under the new scale the number of accidents increased by over ten thousand, though the number of workmen employed was practically the same as in the previous year, and that the total amount of compensation awarded increased from less than \$4,500,000 to more than \$7,750,000 in 1921. It is admitted, however, that these figures are subject to qualification from the fact that under the amendment increased payment had to be made to old "cases", but when every allowance is made the increase in accidents is still, in the opinion of the Legislative Committee, to be described as "startling". It is further alleged that injured workmen are not returning to work so promptly as when the scale of compensation was 55 per cent; that half the cases are one-week or two-week cases, and that the cost of medical aid is in many instances more than the actual compensation awarded. The Industrial Relations Committee also alleged that the 66 $\frac{2}{3}$

per cent scale had resulted in malingering among workmen of a certain class.

The report states that early in February a questionnaire was sent out to all the members asking for their opinions as to the advisability of: (1) a 3-day absolute waiting period; (2) a contribution by employees to cost of medical aid; (3) a contribution by employees to cost of benefits; (4) exclusion of clerical staff and salesmen. The replies showed that 70 per cent of the members favoured the three-day absolute waiting period for which no compensation shall be paid in preference to the seven-day non-absolute waiting period for which compensation may or may not be paid; that 70 per cent favoured the second proposal; that there was no clear-cut majority in regard to the third; and that 85 per cent favoured the fourth suggestion. A resolution on workmen's compensation, which was passed by the convention, is given below.

In regard to mechanics' liens the committee found that the Ontario law as it now stands, with certain minor amendments, provides adequate protection to contractors, sub-contractors, and material men, as well as to wage earners. In connection with a proposed amendment to the Ontario Factory Act, which would have required further safety devices in elevators, the legal department of the Association made objections on the ground of expenses involved, and the bill was dropped. A similar result was secured in connection with a bill to restrict the issue of licenses to electricians.

In New Brunswick objection was taken by the Association to a bill amending the Workmen's Compensation Act, and the bill was set aside through lack of time for its proper consideration. In Manitoba also a bill which would have brought the Compensation Act of that province into agreement with the Ontario Act in regard to benefits was dropped.

The new Minimum Wage Act of Alberta met with the approval of the Association, several amendments to the original bill having been secured, and the act was pronounced to be "satisfactory to employers of female labour in Alberta." In British Columbia, the committee noted that a bill to increase workmen's disability compensation from 55 per cent to 66 2/3 per cent of earnings had been dropped. The Act to amend the Mechanics' Lien Act was approved as being of direct benefit to lumber manufacturers. Criticizing the series of acts which were passed in the same Province, contingently on the passing of similar legislation in the other Provinces, on the lines of the conventions of the First International Labour Conference at Washington, the legislative committee reported that the "most harmful" of these acts was that which provided for a uniform 8-hour day in the province. This law, if enforced, would be disastrous, it was declared, more particularly in fishing and in fruit and vegetable canning, and also to a certain extent in logging and lumbering.

INTERNATIONAL LABOUR CONFERENCE

The Industrial Relations Committee, after recapitulating the results of the Third International Labour Conference at Geneva, and urging that this was predominantly an European conference, pointing out that the United States had no delegation present, went on to state with respect to the "Washington Conventions" that if the 8-hour day recommendation was carried into legislation it would have disastrous consequences in an undeveloped country such as Canada to which new capital must be attracted, and that "it is absolutely impossible for Canada to think of passing such legislation unless and until similar legislation is passed in the United States". In regard to unemployment insurance proposals, the committee considered, after a study of the various schemes in force in Great Britain and other countries, that these

schemes have "conspicuously failed", resulting in enormous government burdens and on the other hand pauperizing the insured workers. "Generally speaking," they conclude, "except in periods of abnormal depression such as the last eighteen months, there is work for all to do in a new country like ours".

SHORTAGE OF SKILLED LABOUR

A shortage of skilled labour, the report stated, was already being reported from many of the larger centres in Canada and the United States, and there was reason to believe that this condition would become accentuated as business revived. Apprenticeship training was neglected during and after the war, and it was recommended that careful attention be given to this subject so that industry may not be seriously hampered by a shortage of skilled workers. A resolution passed by the convention on immigration is given below.

With respect to the general decline in prices since July 1920, it was noted that the only item showing advance was rent. The increase in rent was attributed in the committee's report to the fact that wages in the building industry had not been reduced, this industry not being subject to nation-wide competition.

UNEMPLOYMENT

In connection with the recent unemployment, which proved somewhat less serious than was feared last summer, the report noted the success of the relief measures which were adopted by the Dominion and Provincial Governments and by the various municipalities. "In this connection," it continued, "mention should be made of the excellent work done by the bureaus of the Dominion Employment Service." Warning was given that the recent improvement in regard to employment is seasonal and that "unless the basic industries such as iron and steel revive considerably, there is likely to be con-

siderable unemployment next autumn and winter."

WORKS COUNCILS COMMENDED

The real need of the present situation is stated in the same report to be the development of a spirit of mutual good will and co-operation between employers and employees, instead of one of antagonism. A reduction in the unit cost of production is declared to be essential if Canadian industries are to compete with those of countries where standards of living and wages are much lower. Now that industry is rather quiet the spirit of co-operation is more likely to thrive than in a boom period when each party is prone to disregard the other's interests.

"It only remains to add," this section concludes, "that while your Committee approved thoroughly of the principle of 'freedom of employment' to all workers, irrespective of their affiliation with any church, order, or union, it feels that the common interests of employers and employed would be greatly furthered if some form of co-operative working, adapted as might be applicable thereto, were introduced in the particular units of industry . . . Your committee feels that the development of works councils is in accord with the policy of the employers of Canada as laid down at the National Industrial Conference in September, 1919, to the effect that dealings between employers and employees should be within the particular plant or unit in industry."

Resolutions

The following resolutions were among those passed by the Convention:

Workmen's Compensation.—Whereas workmen's compensation for accidents has become a serious charge on industry, and whereas this is partly due to the injection of class representation into the personnel of the administrative boards and to the absence of the fundamental principle of contribution by beneficiaries, therefore be it resolved that the Canadian Manufacturers' Association. . . record its opinion that Workmen's Compensation Boards should

be judicial in character; that if this principle is ignored those who pay compensation should have equal representation to those who receive it; that boards shall not initiate legislation other than that concerned with the administration of the acts; and that the employees should contribute at least a portion of the total cost in order that they may have a personal interest in the economical administration of the funds.

Immigration.—Whereas Canada has vast areas of fertile agricultural land waiting cultivation and great stores of potential wealth in mines, forests and inland and coast waters; and whereas this country offers unequalled opportunities to immigrants; and whereas the prosperity of the country will increase as the population grows; therefore, be it resolved that the Canadian Manufacturers' Association . . . commend the action of the Dominion Government in appointing a sub-committee of the Cabinet to study immigration; endorse the action taken as a result of this sub-committee's recommendations; and respectfully urge the Government to continue and to intensify its efforts to increase desirable and necessary immigration, especially from other parts of the British Empire.

Industrial Research.—Whereas it is believed that great impetus can be given to industrial production by the creation of research departments in factories; therefore be it resolved that the Canadian Manufacturers' Association . . . instruct the education committee of the Association to investigate the possibility of extending industrial research throughout the

trade sections of the Association or in individual plants.

Home Production.—Whereas the policy of producing in Canada from Canadian materials by the labour of Canadians contributes to the welfare of all citizens and to the general prosperity of the country; and whereas the contrary policy of importing articles which are produced in Canada or "Made-in-Canada" results in unemployment, trade depression, and national loss; therefore be it resolved that the thanks of the Association be extended to the Dominion, provincial and municipal governments; to the wholesale and retail distributors; to the Boards of Trade; to the press and to all others who have given such valuable assistance to the "Produced-in-Canada" campaign during the past year; and further that all the above be earnestly requested to continue their support during the coming year.

Honorary officers for the ensuing year were elected as follows:

President—John R. Shaw, Canadian Furniture Manufacturer, Ltd., Woodstock, Ont.

First vice-president — C. Howard Smith, Howard Smith Paper Mills, Ltd., Montreal.

Second vice-president—Henry Bertram, The John Bertram & Sons Co., Ltd., Dundas, Ont.

Treasurer—Thomas Roden, Roden Brothers, Ltd., Toronto.

CONVENTION OF THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT HANDLERS, EXPRESS AND STATION EMPLOYEES

THE third triennial and eleventh regular convention of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees was held at Dallas, Texas, from May 1 to 13, with the Grand President, Mr. E. H. Fitzgerald as chairman. There were present 1,177 delegates. Among those who addressed the convention were Mr. C. R. Brice-land, representing employees on the Pennsylvania Railroad system, who claimed that unsatisfactory conditions had been brought about on that railroad by deliberate violation of the United

States Railroad Labour Board's decisions by its officials. Mr. Leonard Craig of the Iron Moulders' lodge of which Tom Mooney is a member spoke on behalf of Tom Mooney and Warren K. Billings, and Mrs. A. E. Orr of Fort Worth, Texas, outlined the purposes of a proposed ladies' auxiliary.

An amendment to the Grand Lodge constitution to provide for the election of officers from the several crafts or groups represented by the Brotherhood was discussed at great length. The convention decided against specific provi-

sion for group representation, but if was conceded that the Express employees should have direct representation for the reason that all their negotiations both with the management and with the United States Railroad Labour Board are entirely separate from the negotiations on behalf of railroad employees. Finally an amendment was carried providing for the election of one vice-Grand President and one member of the Grand Executive Board from the Express employees, the balance of the Grand Lodge officers to be elected from the membership at large, exclusive of Express employees. The Canadian delegation was divided on the issue of separate representation for Canada, one group favouring separate representation because, first, the Canadian members of the Brotherhood had to fight the propaganda of the purely Canadian organization that the Canadian workers' representation in the internationals is inadequate; and, second, that all negotiations on behalf of Canadian rail workers are carried on apart from the negotiations in the United States. The other group was in favour of removing all craft and geographical lines, claiming that the greatest need in Canada was not separate representation in the Grand Lodge but an adequate force of organizers to build up the membership. Provision was made also in the constitution for the adoption of the principles of the referendum and recall.

The convention empowered the Grand President and Grand Secretary-Treasurer to grant suitable charters and approve constitutions and by-laws for ladies' auxiliaries, information regarding the formation of which may be obtained from Mrs. A. E. Orr, 1502½ Main Street, Fort Worth, Texas, or Mrs. F. J. Taylor, 2241 Hurley Avenue, Fort Worth, Texas.

Resolutions aiming at closer affiliation between crafts and the amalgamation of the various trade unions were adopted. The question of the Brother-

hood amalgamating with the Canadian Brotherhood of Railway Employees was discussed and it was decided to request the Canadian organization to appoint two representatives (one from the eastern and one from the western sections of its membership) to meet with two representatives of the Brotherhood and a fifth party who is without affiliation in either organization, this Board of Arbitration to be vested with full authority to investigate all features of the proposal that the two brotherhoods amalgamate, and to render a mandatory decision to cover the basis upon which the amalgamation shall be consummated. By another resolution the Grand President was authorized to appoint a committee, and to arrange with the Order of Railroad Telegraphers to appoint a similar committee, with a view to an agreement on exclusive agency stations on each system, designating the same by name and incorporating them in the schedules of the different railroads and systems.

Endorsement was given to a resolution to request the Railroad Labour Board to render its decision immediately on the question of contract labour as it was felt the railroads had violated the law in "farming-out" work under so-called contracts. Moral and financial support was pledged to those railroad employees who were striking in protest against the contract system. It was also decided to grant financial assistance to the Nashville, Chattanooga and St. Louis System Board of Adjustment to enable the Board to establish their right to legislate for employees on that line. The establishment of a permanent Board of Statistics and Submissions was recommended, and it was also recommended, if the effort to secure the restoration of wages in effect prior to June 1, 1921, failed, that an effort be made to secure a reduction in rates to give the public the benefit of the wage reductions. The Grand President was instructed to find out from the proper authorities and determine exactly the responsibility of joint baggage

and express messengers in handling the mail, and to ascertain if they are entitled to some additional compensation as it was claimed that in addition to their many other duties they are required to handle United States mail and parcel post for which they receive from \$50 to \$75 less per month than the salary received by mail clerks in charge of mail cars.

Provision was made for the construction of a permanent headquarters building at Cincinnati, Ohio, at a cost not to exceed \$300,000, and for the establishment of a bank to be known as the Brotherhood of Railway Clerks National Bank of Cincinnati. This bank to be similar to the national bank of the Brotherhood of Locomotive Engineers at Cleveland and to be incorporated with a capital stock of at least \$500,000 and \$50,000 surplus, 49 per cent of the stock to be sold to members of the Brotherhood and 51 per cent to be retained by the Grand Lodge.

Measures were adopted providing for the establishment of an auditing and bonding department to be surety on all bonds furnished by and for the financial officers of all local lodges, boards of adjustment or federations of the Brotherhood (Grand Lodge officers excepted); for the creation of a Death Benefit Fund ranging from \$100 for continuous membership for one year up to \$1,500 for continuous membership of 15 years or more (provision being made that members desiring to avail themselves of accrued benefits accumulating for continuous membership may pay into the fund an amount equal to ten cents per month for the number of months the member has been in good standing prior to the establishment of the fund); for an additional annual allowance for the maintenance of *The Railway Clerk*, the Brotherhood's official journal; and for subscribing for *Labour* a weekly labour newspaper published in Washington, for the entire membership for a period of one year.

The delegates voted \$1 each out of their per diem allowance toward the

Mooney Defense Fund, for which each delegate is to receive the "Tom Mooney Monthly" for one year.

The use of wooden baggage and express cars by railroads was condemned and the Grand President was authorized to appoint a committee of general chairmen to work in conjunction with the legal advisor of the Brotherhood with a view to having introduced in Congress a bill, similar to that passed in 1914, requiring all railways to place in the railway mail service either cars of all steel or cars with steel under-frame construction, and equip such cars with modern sanitary conveniences. A committee was also authorized to investigate the establishment by the Railroad Men's Country Club of a hospital in Marion County, Florida, for railroad men suffering from sickness or injury.

The convention pledged its support toward securing legislation for old age pensions, and strongly endorsed the Brookwood resident workers' college at Katonah, New York. It expressed itself as favouring public ownership of public utilities, such as railroads, express companies, (the latter to be combined with parcel-post service), mines, shipyards, light and power plants, telephone and telegraph wires, wireless telephone and telegraph stations, irrigation and drainage lines, elevators and storage warehouses and mills. Endorsement was given to the Conference for Progressive Political Action that met in Chicago in February last, and the convention expressed itself in favour of the non-partisan political movement. It was decided to support a member of the Brotherhood, Mr. W. W. Williams, as candidate for the state legislature of Pennsylvania, it being claimed that that legislature had been hostile to the interests of organized labour in maintaining a state constabulary in support of industrial autocracy.

Mr. E. H. Fitzgerald and Mr. George S. Levi were re-elected as Grand President and Grand Secretary-Treasury respectively.

NATIONAL CONFERENCE OF BRITISH LABOUR WOMEN.

THE National Conference of Labour Women of Great Britain, organized by the Standing Joint Committee of Industrial Women's organizations, was held at Leamington, England, on May 9 and 10, 1922, under the presidency of Miss Margaret Bondfield. There were present 338 delegates representing women's sections of trade unions, labour parties and other organizations.

Considerable discussion centred around an interim report on motherhood and endowment which had been prepared, at the request of the women's conference of last year, by a special committee of the Joint Research Department of the Trades Union Congress and the Labour Party. The report suggested means of endowment in services and in kind (e. g. by provision of meals, clothing and boots for all children attending school), and in money, "as a practical programme which a labour government should endeavour to carry out as quickly as possible." An amendment to the report was moved accepting endowment in kind as an emergency policy only, and calling on the labour party to aim at securing for mothers of dependent children the direct control of a money income proportionate to their family obligations. The amendment was, however, lost and the report was adopted by 241 to 20.

The following resolution commending certain activities and results obtained by the International Labour Office was carried unanimously:

That this Conference congratulates the International Labour Office on the excellent results of its representations to the Persian Minister of Foreign Affairs with regard to the employment of women and children, and trusts that as we come closer into line with our sisters in all lands we may be able to bring to a speedy end the exploitation of children and improve the condition of labour generally.

(The results achieved by the International Labour Office in this connection

were set forth in the April issue of the *LABOUR GAZETTE*). The mover of the resolution pointed out that if the work of women trade unionists was to be of real value they must work in the international field. It was no use working nationally, she stated, when in other countries work could be given out to workers and performed by children under bad conditions, and such work used to cut down the price of work produced by trade union labour.

Other resolutions called on the Government to ratify conventions respecting maternity and hours of labour adopted by the Washington International Labour Conference; to provide work or maintenance for the unemployed from the National Exchequer; to maintain all the powers now possessed by trade boards, to improve the machinery in accordance with the evidence tendered by the trade unions concerned to the "Cave Committee," and to set up trade boards in all industries where the workers demand such protection. Resolutions were adopted in favour of the promotion of international co-operative trade through co-operative channels; disarmament and foreign policy; the education of children for peace; amendments to and the extension of the factory law to other groups of workers such as clerks, shop assistants, agricultural workers, domestic servants, etc.; in support of the Maintenance and Separation Bill now before Parliament; the right of free speech, and the release of all political prisoners; maintenance of national health, housing and educational services; the necessity for organization of women in industry; higher education for working women; improved housing conditions; protesting against the unemployment dole to women and calling upon the Labour Party to press for the establishment of general educational courses for unemployed women, those attending to be paid an additional

grant, making the dole £1 per week; urging more progressive labour representation on all local governing bodies

and also urging that the burden of local relief should be met by "grants in aid" instead of by municipal rate.

CONVENTION OF THE NATIONAL WOMEN'S TRADE UNION LEAGUE OF AMERICA

THE eight biennial convention of the National Women's Trade Union League of America was held at Waukegan, Ill., from June 5 to 10, 1922.

Miss Mary Anderson, director of the Women's Bureau of the United States Department of Labour addressed the convention on the work of her department. The Women's Bureau, she said, was charged with the duty of formulating standards and policies for the effective employment of women workers, and to investigate conditions under which women are now employed. During the four years of its existence, it had already made investigations in ten states to obtain information on the three major questions which enter into the effective employment of women—wages, hours of work and working conditions.

A resolution was adopted urging the American Federation of Labour to issue local charters to groups of women in trades in which the existing international union will not admit them to

membership. A copy of this resolution was signed by all the delegates and forwarded to the Federation.

Another resolution pointed to the fact that of the 8,000,000 wage earning women in the United States, 2,000,000 are employed in domestic service, while more than 20,000,000 women working in their own homes receive no official recognition for their work which is nevertheless of economic value. The resolution asked that Congress direct an inquiry into the economic status and labour conditions of both these groups of women, that an appropriation be granted, and that the investigation be carried out by the Women's Bureau of the United States Department of Labour.

Mrs. Maud Swartz, of New York, was elected president to succeed Mrs. Raymond Robins who had resigned after having held that office for fifteen years. Miss Rose Schneiderman was re-elected vice-president and Miss Elizabeth Christman secretary-treasurer.

THE SITUATION ARISING OUT OF DISPUTE BETWEEN CANADIAN RAILWAYS AND THEIR SHOP CRAFT EMPLOYEES

SEVERAL Boards of Conciliation and Investigation have been, as reported elsewhere in this issue of the LABOUR GAZETTE, established to deal with differences between the various railways of Canada and certain of their employees in shop crafts.

The dispute here concerned is largely identical with that existing as between the same classes of workers and the railways of the United States and growing

out of a reduction in wages ordered by the United States Railway Labour Board, as reported in the last issue of this journal. The strike in the United States continued throughout the month; particulars of efforts at settlement are recorded elsewhere.

With regard to the dispute as affecting railways in Canada and Canadian shop crafts workers, it should be noted that four distinct Boards of Conciliation

and Investigation have been established, namely:

1. Between (1) various railways, members of the Railway Association of Canada, including the Canadian National Railways, the Canadian Pacific Railway, and the Grand Trunk Railway, and (2) workmen, members of Division No. 4, Railway Employees' Department, American Federation of Labour, and being motive power and car department mechanics, helpers and apprentices in the employ of said railways.
2. Between Michigan Central Railroad and certain of its employees being machinists, boilermakers, blacksmiths, carmen, electricians and sheet metal workers.
3. Between Père Marquette Railway Company and certain of its shop employees being machinists, boilermakers, blacksmiths, electricians, carmen, etc.
4. Between New York Central Railway Company, as represented by its officers in charge of the railway shops located at Ottawa, and certain of its employees being members of the Federated Shop Crafts, employed in the Ottawa shops.

Of the four disputes above indicated, it will be observed that three relate to United States railways having lines in Canada, namely, Michigan Central, Père Marquette and New York Central.

In the correspondence arising out of the establishment of these Boards of Conciliation and Investigation it was pointed out to the various railway companies concerned that Section 57 of the Industrial Disputes Investigation Act, as understood by the Department, required that, with respect to the proposed change in wages, no change could properly be made until the dispute arising had been dealt with by the Board of Conciliation and Investigation to which the dispute had been referred.

With regard to dispute No. 1 in the above list, that respecting the Canadian railways generally, the employing companies did not accept the departmental interpretation of Section 57 and announced their intention of putting into effect the proposed reduction as from July 16, urging that the employees concerned would be protected "in that should the rates finally agreed upon be more favourable to the employees they would receive retroactive pay."

With regard to disputes Nos. 2, 3 and 4 in the above list, the railways concerned, being United States railways with branch lines in the Dominion, consented to waive the proposed reduction until the dispute arising had been dealt with by the Board of Conciliation and Investigation which had been established.

Statements appearing in the press and representations reaching the Department direct indicated considerable unrest among the employees of Canadian railways with respect to the divergence in view between the railways and the employees and led to an exchange of communications between the Department of Labour and the railways.

On July 29 the Deputy Minister of Labour telegraphed each Canadian railway management concerned as follows:

I am directed to request your attention to statements which are being printed widely in the press with reference to the attitude of the railways involved in dispute with shop crafts workmen on question of deferring proposed changes in wage rates until matters in dispute have been dealt with by Board of Conciliation and Investigation. Minister had assumed management of your railway would be following course which has been adopted by other roads involved in disputes with same classes of workmen and where separate Boards of Conciliation have been established, namely, Michigan Central, Pere Marquette and New York Central, which have deferred intended reduction of wages until dispute has been dealt with as stated by Conciliation Board, this line of action being that clearly laid down under section fifty-seven of governing statute. Representatives of workmen are, however, requesting information as to intended attitude of railways involved in this dispute, and Minister would be pleased to

receive assurance as to course your company will take.

Replies from the railways.

The following message was received from each of the principal railways concerned as on various dates between July 31 and August 2:

Your message of the twenty-ninth addressed to the President of this company directing attention to statements in the press with reference to the attitude of the railways involved in dispute with shop crafts workmen is received, and in reply this company desires to state that, on advice of counsel, we have proceeded along lines which are considered to be in accordance with the law. We are without definite information as to the circumstances which have led to the establishment of Boards of Conciliation in connection with disputes apparently existing on United States railways operating in Canada with same classes of employees, but we understand in a general way that there are several material differences as to the notice given, as to the application made for a Board and as to other relevant circumstances. We believe enquiry will show that the United States railways first acted to put reduced rates of pay definitely into effect for their employees in Canada without proper notice or any preliminary negotiations with them. We further believe that these United States railways also put into effect without agreement rules governing working conditions, while in one case the revision of working conditions rules was mutually agreed upon some months ago. The company gave thirty days' notice of cancellation of existing schedule. The company's proposition was that the new rates should be put into effect pending further consideration and negotiation as from date of cancellation of previous schedule. Under this proposition the employees would be protected in that, should the rates finally agreed upon be more favourable to the employees, they would receive retroactive pay to such date of cancellation of old rates. On the other hand the proposition afforded the company an absolutely necessary feature of protection. Any other course than that adopted by the company would defeat the intent of the agreement entered into after long negotiation between the companies and the employees. Otherwise employees have it in their power to unduly delay the application of new schedules and if former wages continue to be paid and be ultimately reduced company would have no means of reimbursement for amount overpaid. Retroactive provisions were made available to employees when wages were rising and same rule should be applied to present situation. Inasmuch as the railways have agreed to joint proceedings and a Board of

Conciliation has been established in this matter, we prefer at this time merely to assure your Department that there is every desire on the part of the company to comply with the law and to repudiate the suggestion from any quarter that the company's action is either arbitrary or improper.

Ruling of Justice Department.

The question of the interpretation of Section 57 of the Industrial Disputes Investigation Act was then taken up by the Minister of Railways with the Department of Justice and resulted in a ruling on the part of the Department of Justice contained in a letter addressed over the signature of the Acting Deputy Minister of Justice (Mr. W. Stuart Edwards) to the Hon. W. C. Kennedy, Minister of Railways and Canals, and under date of August 3, as follows, namely:

Referring to Mr. Fairweather's conversation with me this afternoon in which he stated that you wish to have a departmental opinion to-day upon a question arising under Section 57 of the Industrial Disputes Investigation Act as amended by Chapter 29 of the Statutes of 1920, it appears from what Mr. Fairweather tells me that the Canadian National Railways have given notice to their employees of a proposed reduction in wages; that this has resulted in a dispute within the meaning of the Act and that a Board is now being constituted under the Act to deal with the same; that in the meantime the period of thirty days mentioned in the Act has expired; that the Railways propose, pending determination of the dispute by the Board, to pay their employees from the date of the expiration of said period at the proposed reduced rates; that the employees deny the right of the Railways to make any reduction in pay until a report in favour thereof has been made by the Board, and that an opinion is desired as to what are the rights of the Railways in this connection.

Upon the hasty consideration which I have been able to give to the matter, it would seem that the question depends almost altogether upon the provisions of Section 57 of the Act above referred to, which reads as follows:

"57. Employers and employees shall give at least thirty days' notice of an intended change affecting conditions of employment with respect to wages or hours; and in the event of such intended change resulting in a dispute, until the dispute has been finally dealt with by a Board, and a copy of its report has been delivered through the Registrar to both the par-

ties affected, neither of those parties shall alter the conditions of employment with respect to wages or hours, or on account of the dispute do or be concerned in doing, directly or indirectly, anything in the nature of a lockout or strike, or a suspension or discontinuance of employment or work, but the relationship of employer and employee shall continue uninterrupted by the dispute, or anything arising out of the dispute; but if, in the opinion of the Board, either party uses this or any other provision of this Act for the purpose of unjustly maintaining a given condition of affairs through delay, and the Board so reports to the Minister, such party shall be guilty of an offence, and liable to the same penalties as are imposed for a violation of the next preceding section."

Upon consideration of these provisions I find it difficult to escape the conclusion that the intention of parliament in enacting this legislation was to prevent the doing of that which the Railways are proposing to do; that is to say, that the making of a reduction in the actual amount of money paid out to employees on pay-day is making an alteration in the conditions of employment with respect to wages within the meaning of the statute, notwithstanding the fact that the intention of the Railways is to account to the employees for the difference if and when a report in favour of the employees has been made by the Board.

I do not overlook the fact that in case the Railways continue payments at the old rates and the Board reports in favour of a reduction they may not succeed in recovering back all of the overpayments so made, but I do not think this circumstance can be looked at as affecting the interpretation of the plain words of the statute.

Notification to Railways.

A copy of the findings of the Department of Justice was forwarded under date of August 3, to the principal railways by the Honourable W. C. Kennedy, Minister of Railways, together with the following covering letter:

Strong representations are being made to the Government and it is a matter of current report in the press that pending the decision of a Board to be constituted under the Industrial Disputes Investigation Act, 1907, and amendments, the railways contemplate withholding from employees the differences between wage schedules that have been in effect and new schedules which they have proposed to establish. This procedure has been vigorously protested.

On behalf of the Government, I have to express the view that the railways should act in exact accordance with the law applicable, and your attention is drawn to Section 57 of Chapter 20 of 1907, as amended by Section 5 of Chapter 29 of 1910, and further amended by Section 5 of Chapter 29 of 1920, and reading as follows:—

"Employers and employees shall give at least thirty days' notice of an intended change affecting conditions of employment with respect to wages or hours; and in the event of such intended change resulting in a dispute, until the dispute has been finally dealt with by a Board, and a copy of its report has been delivered through the Registrar to both the parties affected, neither of those parties shall alter the conditions of employment with respect to wages or hours, or on account of the dispute do or be concerned in doing, directly or indirectly, anything in the nature of a lockout or strike, or a suspension or a discontinuance of employment or work, but the relationship of employer and employee shall continue uninterrupted by the dispute, or anything arising out of the dispute; but if, in the opinion of the Board, either party uses this or any other provision of this Act for the purpose of unjustly maintaining a given condition of affairs through delay, and the Board so reports to the Minister, such party shall be guilty of an offence, and liable to the same penalties as are imposed for a violation of the next preceding section."

For your information, I attach a copy of an opinion received from the Department of Justice with respect to its interpretation of the above provision of the Statutes.

Other correspondence

Other correspondence then ensued as follows:

Montreal, August 9, 1922.

Honourable W. C. Kennedy,
Minister of Railways and Canals,
Ottawa.

Dear Sir,—

The undersigned have received your letter enclosing copy of the opinion of the Acting Deputy Minister of Justice upon the application of Section 57 of the Industrial Disputes Investigation Act to the action taken by the railway companies in establishing a tentative scale of wages pending investigation and report by a Board of Conciliation appointed under the Act.

The railways, upon the advice of their own counsel, are not in accord with the opinion of the Department of Justice. The contention

raised has been before the Supreme Court of Nova Scotia in District No. 26, United Mine Workers of America against the Dominion Coal Company and others, where the Court in a carefully considered judgment unanimously decided that a similar proposed reduction is not a change of conditions within the prohibitions of Section 57 of the Act. It is thought that this authoritative decision may not have received full consideration in the preparation of the Department's opinion.

It is to be pointed out also that it is one of the functions of Boards of Conciliation to recommend the date when rates recommended by them shall come into force. The fairness of the companies' action in tentatively applying a revised scale of wages is a question before the Conciliation Board now in session, and we feel that an expression of opinion from the Government upon the question, obviously based on a misconstruction of the law, is improper and is bound to have an embarrassing effect upon the proceedings before the tribunal properly constituted pursuant to the statute.

The payrolls for the last half of July have already been made up, and it is impossible to alter them for payment upon the approaching pay day. On the other hand, if, as a result of the proceedings of the Board, additional payments are agreed upon for the period referred to, they may be added to subsequent payrolls.

We would refer also the facts which led to the present situation. On June 14, pursuant to their agreement with their employees, the railways gave notice of their desire to revise wages, and specified the reductions proposed to be effective a month afterward. In the negotiations which followed it developed that, owing to conditions affecting the same classes of labour in the United States, the employees were unable to concur in any downward revision, and that it would be impossible to conclude any agreement until the situation in the United States should have cleared. The railways then proposed that the reduction should be applied conditionally from July 16th, with the understanding that the rates finally agreed upon should be made retroactive to that date. This proposal, it will be observed, effectually protected the interests of employees as well as of the railways, and is the method which has obtained between the railways and the classes of employees involved in negotiations during each of the last four years, but, as it was not accepted on this occasion, the issue then resulting has been referred to a Board of Conciliation. The

situation on United States railways has materially changed since the date of the negotiations to which we have referred, it having now been definitely announced by the employees there, who have been on strike for the last six weeks (forming a large majority of the members of the same organizations whose members, employed on Canadian roads, have applied for a Board of Conciliation) that they are willing to return to work at the same reduced rates, effective July 1st, as were proposed by Canadian railways, effective July 16th.

In these circumstances, we submit that, in fairness to all parties, the railways could not adopt a course of action which they believe is not in accordance with law nor required by the merits of the case.

Yours truly,

(Sgd.) HOWARD G. KELLY,
President, Grand Trunk Railway System.

(Sgd.) D. B. HANNA,
President, Canadian National Railways.

(Sgd.) E. W. BEATTY,
President, Canadian Pacific Railway.

The Deputy Minister of Justice.

Ottawa, August 10, 1922.

Dear Mr. Kennedy,—

Since writing you on the 3rd instant with regard to the dispute between the Canadian National Railways and certain of its employees, certain representations have been made to me by legal representatives of the Railways and my attention has been directed to the joint letter from the Presidents of the three Railway Systems to you dated the 9th instant. These representations have had my careful consideration and I have concluded that they do not contain anything which would justify me to alter the view expressed in my said letter.

The position taken by the Railways is that the present case is covered by the decision of the Supreme Court of Nova Scotia in certain injunction proceedings against the Dominion Coal Company et al. With this view I am, however, unable to agree as I think it quite clear that the ground upon which the Appellate Court proceeded in the Nova Scotia case has no application to the present situation.

Yours faithfully,
(Sgd.) W. STUART EDWARDS,
Acting D. M. J.

Hon. W. C. Kennedy,
Minister of Railways and Canals,
Ottawa.

Ottawa, August 12, 1922.

E. W. Beatty, Esq.,
President,
Canadian Pacific Railway,
Montreal, P. Q.

Dear Mr. Beatty:

The Government has had under consideration the correspondence that has passed between the railway executives and the Minister of Railways and Canals, including the letters containing the opinion of the Acting Deputy Minister of Justice, with respect to the application to the existing dispute between the railway companies and certain of their employees in the shop crafts of Section 57 of the Industrial Disputes Investigation Act.

It must be apparent that if the parties to industrial disputes are to be permitted to place their own interpretation upon Acts of Parliament passed for the express purpose of avoiding strikes or lockouts occasioned by industrial disputes and to persist in a course of action which in the opinion of the law officers of the Crown constitutes a direct violation of existing legislation, there can be no guarantee of industrial peace nor indeed of the preservation of law and order throughout the Dominion. As you are well aware, the industrial situation on this continent as a consequence of existing strikes in the coal mines and on the railways in the United States, is fraught with possibilities of the gravest character. That Canada has been spared a like condition in her mines and on her railways is owing to the legislation enacted by Parliament for the prevention and settlement of industrial disputes and to the loyal and public-spirited manner in which both employing companies and their employees have on the whole respected its provisions.

The relations between the railway companies and their employees and the coal mining companies and their employees in Canada to-day are such that, given continuous operation of the mines and railroads through a due regard for the provisions of the law, the companies concerned and their employees may do much to relieve the existing situation of some of its most alarming features. A contrary course on the part of either of the parties might conceivably precipitate an industrial situation in Canada which would greatly aggravate and intensify the unfortunate consequences of the protracted disputes in the United States.

The Government feels that the public interest demands its utmost vigilance in the preservation of industrial peace in Canada at this time, and that the public has a right to expect that in its endeavour to uphold the law and secure uninterrupted operation of railway and mining activities, the Govern-

ment may count upon the co-operation of employing companies and employees alike. Under the circumstances, it is the hope of my colleagues and myself that the railway companies will accept without further question the opinion of the Department of Justice with respect to the interpretation of Section 57 of the Industrial Disputes Investigation Act, and immediately restore conditions relative to wages so as to remove any question as to a full compliance with the intention of the Act.

I should perhaps add that, having been waited upon by a deputation representative of the employees concerned, I have assured them that the Government will not hesitate to exert its full influence and power to see that the provisions of the law governing industrial disputes are complied with by all parties. At the same time I have expressed the view that once informed of the confirmation of his opinion by the Deputy Minister of Justice, after conference with the legal representatives of the railway companies, the railway executives may be expected to adopt such a course as will render unnecessary any further action on the part either of the employees or the Government to secure a due compliance with the provisions of the law. Upon this undertaking, I was assured by the employees' representatives that they would agree to an immediate resumption of the investigation being conducted by the Board of Conciliation to which the dispute in question has been referred, and would refrain, without further conference with the Government, from taking any step calculated to prove prejudicial to the public interest.

I should be pleased to be advised by you by telegraph at your earliest convenience of the action which the Government may expect your Company to take in the light of these representations.

Yours sincerely,
(Sgd.) W. L. MACKENZIE KING.

Canadian Pacific Railway
Co's Telegraph,
Montreal, Aug. 15, 1922

Right Hon. W. L. Mackenzie King,
Prime Minister,
Ottawa.

Answering your letter of the twelfth instant, we need not assure you of our concurrence in your desire that the important business of the country may be carried on without interruption, and that both employers and employees should co-operate in carrying out the laws which have been enacted to that end.

It is quite impossible for us to change our view as to the legality of the course which the railways have taken, and we believe that such action afforded full protection to the interests of both parties.

We must respectfully submit that, notwithstanding the view which the legal advisers of the Government may hold, it is the duty of the company to follow a course which they have been advised is legal and in accordance with the binding decision of the Canadian courts, and necessary to preserve the rights which they consider essential to the protection of their property.

In view, however, of the decision of the Government to accept the opinion of the De-

partment of Justice, we will undertake, pending an anticipated early report of the board of conciliation now sitting, that the scale of shop crafts' wages in force prior to July 16 last will be continued, on the understanding that the companies' case before the board of conciliation will not be thereby prejudiced, and that the companies shall not thereby be precluded from taking the position in negotiating an agreement during or subsequent to the proceedings of the board that the new scale should be retroactive to July 16 last.

(Sgd.) D. B. HANNA,

(Sgd.) HOWARD G. KELLY,

(Sgd.) E. W. BEATTY,

RECENT LABOUR LEGISLATION IN NEW BRUNSWICK.

THE second session of the Eighth Legislative Assembly of New Brunswick began on March 2 and continued until April 19, 1922. The labour and social legislation passed included acts amending the Workmen's Compensation Act; providing pensions and disability allowances to public school teachers and officials; providing for the incorporation of associations for co-operative marketing, and giving municipal councils larger powers in the appointment of Boards of Health.

The Workmen's Compensation Act of 1918 was amended by the addition of a subsection bringing under the act workmen whose employment takes them outside the Province. This subsection provides that "whenever a workman is engaged in work, part of which is to be performed in this Province and part in an adjoining Province or country, the work shall be considered as done and performed in this Province and the workman shall be entitled to be paid compensation under this part provided the employer includes said workman in his payroll". The section which fixes the scale of compensation to be paid to an injured workman or to the dependants of a deceased workman was also amended, a subsection being added to make more definite provision for surviving orphans. This subsection

is to the effect that when the dependants are children only, each child shall receive \$15 per month up to the age of 16 years in the case of a boy, and up to the age of 18 years in the case of a girl. This clause is supplemental to the existing subsection which provides that where the dependants are a widow or invalid widower, and one or more children, payments shall be made at the rate of \$30 per month, with an addition of \$7.50 per month for each of such children.

An act was passed to provide for the examination and licensing of scalers who are employed in measuring logs for building or other purposes cut upon Crown Lands or subject to any dues for the purposes of administration or revenue in the province. A board of examiners may be appointed by the Lieutenant Governor in Council, to consist of three skilled persons, including the chief forester and the chief scaler of the Department of Lands and Mines, for the purpose of examining candidates and performing other duties. Candidates holding forest ranger certificates may receive certificates without examination, at the Board's discretion. Only licensed scalers may make measurements of Crown Land timber on which the Crown may have dues to receive for administrative or

revenue purposes, unless the Minister is satisfied that no licensed scaler is available, in which case he may issue a special temporary license to a competent person. Licensed scalers are required to submit their measurement records for inspection by officers or rangers of the Crown Lands Department when so required, and shall make a report of the amount of timber measured on the conclusion of each season.

The Act of 1910 providing pensions for school teachers was enlarged by the additional provision of disability allowances. Under the new act, as under the old, male teachers of the age of 60 years and female teachers of the age of 55 years, who have taught in public schools of the Province for not less than 35 years, may upon application to the Board of Education and upon retirement from active service receive a life pension equal to one-half their average salary for the last five years before retiring. Under the new act, however, no such pension may be less than \$250 or more than \$800 per annum. Teachers of twenty or more years standing, on becoming incapacitated for further service and upon certification of total disability to teach or engage regularly in any other occupation, are now to receive annually as a disability allowance as many thirty-fifths (not to exceed 35) of a sum equal to one-half their average salary for the past five years, as there have been years of teaching or service, within the same minimum and maximum limits. Pensions hitherto allowed under the Act of 1910 must henceforth be not less than \$250. (The older act fixes only the maximum limit, which was \$400 per annum). A teachers' pension fund is provided for, out of which these payments will be made, to consist of teachers' contributions equal to 5 per cent of the Government allowance supplementing the salaries of teachers, and of contributions from the Government sufficient to allow the pensions and disability allowances to be paid out of

the fund. The new act applies also to inspectors, instructors, superintendents, and school board secretaries, holding teachers' certificates, though not actually engaged in teaching.

The Act of 1916, incorporating the Provincial Association of Graduate Nurses, was amended to provide reciprocal privileges with other provinces of Canada or with states of the United States, in regard to the issue of certificates to duly qualified nurses.

The Provincial Women's Institute was incorporated under an act in which the objects of the organization were stated to be the improvement of social conditions in rural and other communities by means of (a) the study of household science (including cookery, dietetics, sanitation, home nursing, house furnishing, sewing, house management, etc.) child welfare, immigration, legislation, etc.; (b) development of a community spirit with the object of improving education, moral, social and economic conditions; (c) fostering agricultural learning; (d) holding lectures and school courses, promoting travelling and other libraries, exhibitions, meetings, and conventions. An annual subsidy of \$10 may be paid each local institute having 15 or more active members. A superintendent of women's institutes and other officers may be appointed by the Lieutenant Governor-in-Council, on the recommendation of the Minister of Agriculture; and a Provincial Advisory Board is also provided for, to consist of the Deputy Minister of Agriculture, the Superintendent, and seven or more members chosen at the annual convention together with certain *ex officio* members, the duty of this Board being to advise the Minister in any matter arising in connection with women's institutes and their work. Junior institutes may also be formed by girls between 14 and 18 years of age.

By another Act the Maritime United Farmers' Co-operative, Limited, incor-

porated under the New Brunswick Companies Act of 1916, was reorganized, being subdivided into branch companies, which were given separate incorporation on assuming their share of the indebtedness of the main organization.

Provision was made for the incorporation of associations for the co-operative marketing of farm products, to consist of not fewer than ten persons. Subsidiary field organizations of local egg circles, live stock or other community clubs may also be formed, and producers in the vicinity of such clubs may become members by the purchase of at least one share of the capital stock of the central association. The shares held by one member must not exceed \$2,000 in value. Shares are transferable, but each member doing business through the association must retain at least one share. Elections will be by ballot, each member having one vote, regardless of the number of shares held by him. The liability of shareholders is limited, no member being held liable in respect of any debt due by the association beyond the amount of his personal holdings. One section

of the act states that "the business as conducted by the association shall be purely co-operative. The central association shall keep accurate account of the business transacted with each member, and should a surplus profit remain after all legitimate expenses have been paid and provision made for a reserve fund, it shall be distributed among the members in proportion to the business supplied by each member to the association".

The Provincial Government undertook to guarantee to the extent of \$15,000 the bonds of the Farmers' Co-operative Creamery Limited, to enable the company to carry on its business, large sums having been expended in the purchase of plant and real estate, and in the erection of buildings. This Association was incorporated by a statute of 1903.

Among other measures of the past session, important amendments were made with the object of protecting Crown Lands against forest fires; and the various Public School Acts were consolidated.

REPORT FOR 1921 OF WORKMEN'S COMPENSATION BOARD OF ONTARIO

THE report of the Ontario Workmen's Compensation Board for 1921, the seventh year of the operation of the Act, shows that the total benefits awarded during the year amounted to \$6,189,263 (including medical aid), as compared with \$7,780,145 during 1920, and \$4,192,860 during 1919. It may be noted that the large total for 1920 was partly due to the increase which had been provided by amendments made in that year in death pensions for accidents in previous years, this increase amounting to \$2,289,250.

The benefits awarded during 1921 averaged \$20,631 per day, the cheques issued averaged 485 per day, and the

accidents reported averaged 151 per day.

Reviewing the work of the past seven years the report states that during the entire operation of the act, 271,807 claims have been dealt with and \$27,947,653 has been awarded in compensation and medical aid benefits. More than 100,000 people are every year in some measure dependent upon these benefits for their support. The wage roll of all workmen covered by the act during the seven years totalled about 2¾ billion dollars. The average cost rate to employers of the benefits provided was about \$1.12 per \$100 of payroll. It will be recalled that in 1920

the workman's allowance was increased from 55 per cent to 66 $\frac{2}{3}$ per cent of his loss of earning capacity and the widow's allowance was increased to \$40 a month, with \$10 a month for each child under 16, or, where there is no widow, \$15 for each child, the total benefits, however, not to exceed 66 $\frac{2}{3}$ per cent of the workman's earnings.

For the purposes of the Act the industries of the Province are divided into two classes. "Schedule 1" industries are those in which the employers are liable to contribute to the Provincial accident fund, and Schedule 2 industries are those in which the employers are individually liable to pay compensation, the latter class including public bodies, railway, telephone and telegraph construction, etc. The amount of compensation paid during the year (excluding medical aid) in Schedule 1 industries was \$3,858,017, and in Schedule 2 industries \$1,668,452. Payments for medical aid in Schedule 1 industries amounted in 1921 to \$662,794, as compared with \$703,706 in 1920.

The total number of accidents reported during 1921 was 45,191 as compared with 54,851 in 1920, and 44,260 in 1919. Fatal cases numbered 386 as against 452 in 1920, and 429 in 1919. The number of accidents in which compensation or medical aid was paid during the year was 40,266, of which 34,271 were under Schedule 1, 5,161 under Schedule 2, and 834 were Crown cases. Of this total 343 were awards for death cases, 27 were for permanent total disability, 2,224 for permanent partial disability, 25,235 for temporary disability, and 12,437 were cases requiring only medical aid. Of the total 40,266 accidents in which compensation was paid during the year 5,749 occurred in 1920 and 34,517 in 1921.

In 1921 the number of firms under Schedule 1 was 17,917, representing a total payroll of \$337,005,458; and the estimated average rate of assessment on these firms, based on provisional figures,

is \$1.34, for each \$100 of payroll, as compared with \$1.23 for 1920, \$1.22 for 1919, \$1.09 for 1918, 99 cents for 1917, \$1.09 for 1916 and \$1.27 for 1915. The total payroll for Schedule 1 industries, as stated above, is provisionally estimated at \$337,005,458, as compared with \$464,589,211 in 1920, with \$325,225,970 in 1919, and with \$147,602,562 in 1915. The board has no similar data for Schedule 2 or for Crown industries, compensation and medical aid forming an individual liability and payrolls not therefore having to be filed. The payroll of these classes is probably, it is thought, about one-third that of Schedule 1 industries.

During 1921, 21,531 assessments were issued and 2,146 refunds were made. Of these 1,409 were refunds of assessments made on account of merit rating. A system of merit rating has been in effect since 1917, a maximum difference of 55 per cent of assessment being made between the employer with a good and one with a bad accident record; refunds up to 30 per cent are made to the former, and additional charges up to 25 per cent are levied upon the latter. Under this system, in 1920, \$311,874 was refunded, and \$184,844 was collected from employers.

The total income, actual and estimated, for all classes under Schedule 1 in 1921 was \$4,693,444, of which amount \$4,488,725 was collected on estimated payrolls. In the same period the total expenditure, actual and estimated, for all purposes and including the amount set aside for pensions, disaster reserve and compensation deferred, and the amounts paid for administration expenses and safety associations, was \$4,678,550, leaving a net provisional balance for the year of \$14,894. This balance, added to the balance of \$929,044, remaining over from 1920, makes a net provisional balance at the end of 1921 of \$943,938.

The administration expenses of the Board during 1921 amounted to \$226,661, as compared with \$207,052 in 1920.

The Province, under section 68 of the Act contributed over \$98,000 (being \$100,000, less its share of administration expenses) as well as paying the salaries of the Board. The cost of administration borne by Schedule 1 employers in 1921 was 2.18 per cent of the compensation and medical aid awarded during the year, or 1.78 per cent of the net assessments received during 1921, these figures being comparable with 1.41 per cent and 1.55 per cent, respectively for the previous year.

The amounts awarded for compensation and for medical aid during 1921 were as follows:

	Compensation	Medical Aid
Schedule 1..	\$3,858,017	\$662,793
Schedule 2..	1,343,549	furnished by
Crown Cases	324,803	employer
	\$5,526,469	\$662,793

The balance standing in the pension fund at the end of the year was \$8,620,546. Payments during the year from this fund amounted to \$636,107. The amount of the Disaster Reserve stood at \$218,616 on December 31, 1921.

The report contains revised figures for the Board's operations in 1920. Among these the following table of accident frequencies for a number of years expressed as a percentage of each 100 full year workers, may be quoted:

Year	Temporary Disability	Permanent Disability	Death	Totals
1915.....	3.63	.58	.12	4.32
1916.....	4.99	.79	.10	5.88
1917.....	5.78	.72	.07	6.57
1918.....	5.81	.66	.07	6.54
1919.....	5.81	.68	.07	6.56
1920.....	6.23	.67	.07	6.97

Accidents in which only medical aid was paid are not included in the foregoing table. On the same basis, however, the frequency of such cases was 3.66 in 1918, 3.70 in 1919, and 4.26 in 1920.

The average wage of injured workers in 1920 was \$25.57 weekly, as compared with \$22.26 in 1919. The total time loss, exclusive of cases in which medical aid only was paid and not including loss of man power by death or permanent disability was 630,856 days, or an average per injured worker of 24.81 days, as compared with 511,674 days and an average of 24.54 days in 1919, for all compensable cases. The average time lost by accidents causing temporary disability decreased from 19.66 days to 19.62 days, and the loss from permanent disabilities increased from 67.68 days in 1919 to 74.53 days in 1920. In 44.41 per cent of the temporary disability cases the disability terminated between one to two weeks, as compared with 46.76 per cent in 1919.

MINIMUM WAGE ORDER IN BRITISH COLUMBIA.

Re-issue of Order governing Fruit and Vegetable Industry.

AN order of the Minimum Wage Board of British Columbia, governing the fruit and vegetable industry, took effect in February, 1920. Subsequently the employers petitioned the Board to reopen the question of the amount of a fair minimum wage for this industry, and in accordance with the provisions of the Act a conference

was held at which representatives of all persons interested in the scale were heard. The recommendations made by this conference were reviewed and approved by the Board, and the scale of minimum wages was again fixed to take effect 60 days from July 4, 1922, the date of the new order, the previous order becoming null and void on the

same date. The new scale is practically identical with that of 1920. Its provisions may be re-stated as follows. The "fruit and vegetable industry" in the order, means the work of females engaged in canning, preserving, drying, packing, or otherwise adapting for sale or use any kind of fruit or vegetable. By "experienced" female employee is meant one who has worked for three months in the industry.

The minimum wage for an experienced female employee of 18 years of age or over remains at \$14 for a week of 48 hours, and inexperienced employees are still to be paid at the rate of \$10 a week during the first month's employment in the industry, and \$11 and \$12 respectively during the second and third months. The piece time rates are also unchanged. Where wages are paid on the basis of piece-work the minimum piece rates shall be such as will produce for an experienced employee the sum of \$14 for a week of 48 hours; and,

similarly, for an inexperienced worker the piece rate shall be such as will produce the wages specified for her class. In an "emergency" period, which, unless by special sanction of the Board, must not extend over 90 days in the year, the hours of labour may be extended to 10 hours in any one day, or up to 60 hours in any week, the excess time over 8 hours per day to be paid at the rate of 30 cents an hour for experienced employees. Time worked over 10 hours a day shall be paid at the rate of 45 cents an hour. The excess-time rates for inexperienced workers bear the same proportion to the rates for work under 8 hours.

With respect to experienced or inexperienced female employees under 18 years of age, the Board, pursuant to Section 11 of the Minimum Wage Act, orders that "wages, hours, and periods of experience shall be the same for all female employees under 18 years of age as for those of or above that age."

THE WORKING OF THE TRADE BOARDS ACTS IN GREAT BRITAIN.

(Report and Recommendation of "Cave" Committee and Memorandum thereon by Organized Labour)

IN September last a committee was appointed by the British Minister of Labour under the chairmanship of Lord Cave "to inquire into the working and effects of the Trade Boards Acts and to report what changes, if any, are required." The report of the committee popularly known as the Cave Committee which has recently been issued (cmd. 1645; 55 pp., price 2s.), contains recommendations for the repeal of the existing Acts and the passing of a new law which would be a consolidation of the old ones with a number of amendments. A brief review is given of the circumstances leading up to the passing of the Trades Boards Acts of 1909 and 1913. In 1889 and 1890 a select committee of the House of Lords had investigated

the evils of the "sweating system", the employment of the poorer and more helpless class of workers for excessive hours at an inadequate wage under insanitary conditions. Recommendations were made for amendments to the Factory and Public Health Acts with a view to securing better inspection and the registration of outworkers. In 1906 the result of an inquiry by the Board of Trade showed that in certain trades wages were extremely low. In 1907 under instructions of the Home Department, Mr. Ernest Aves reported on the working of the wages boards of Australia and New Zealand. In the following year a select committee of the House of Commons on Home Work recommended the establishment of wages boards for the fixing of minimum time and piece rates for home workers. The committee supported the principle of establishing

wages boards to fix minimum rates for home workers, but recommended the establishment of the boards in only a few industries at first, as an experiment. This led to the passing of the Trade Boards Act, 1909. This act originally applied to four trades only: viz—Ready-made and Wholesale Bespoke Tailoring, Paper Box Making, Machine-made Lace and Net Finishing, and Chain Making. The Board was authorized to apply the Act to other trades by provisional order, subject to confirmation by Parliament, but only if the rates of wages in any such trade were exceptionally low, and if other circumstances rendered the application of the Act to the trade expedient. For any trade or branch of a trade to which the Act applied a trade board was to be established by the Board of Trade consisting of an equal number of representatives of employers and workers with additional appointed members, of whom one at least was to be a woman in the case of trades in which women were largely employed. The trade boards were to fix general minimum rates of wages for piece work, and they might also fix general minimum rates of wages for piece work and these rates might be fixed so as to apply universally to the trade, or to any special process or special class of worker or special area. A trade board was also empowered on the application of any employer to fix a special minimum piece rate to apply to his employees. Where no minimum piece rates had been fixed, the rate to be paid was to be such as would yield to an ordinary worker at least the same amount of money as the minimum time-rate. For six months after the fixing of a minimum rate, that rate was to be recoverable by the employee in default of a written agreement to the contrary, but after that period the Board of Trade was to declare the rate obligatory, and thenceforth failure to pay the rate fixed was to be punishable by summary conviction. In addition to the four trades mentioned in the Act, four more were added by provisional order in 1913. These were

Sugar, Confectionery and Food Preserving, Shirtmaking, Hollow-ware and Tin Box Making; and Linen and Cotton Embroidery. For the eight trades thirteen boards were set up, eight in Great Britain and five in Ireland, covering in all about half a million workers. The effect of the work of the boards was to remove from the trades concerned the reproach of "sweating".

During the war the trade boards were largely superseded by the Orders of the Minister of Munitions under the Munitions of War Acts. Fears were entertained lest at the end of hostilities there should be a sudden drop in the wages of unskilled workers, particularly women, without a corresponding drop in the cost of living. In 1917, a sub-committee of the Reconstruction Committee recommended certain amendments in the law so that women workers should be protected by trade boards machinery. In the same year the Whitley committee in its second report recommended that in those industries in which there existed little or no organization the machinery of the Trade Boards Act should be applied pending the development of such degree of organization as would render possible the establishment of a national council or district council.

These reports were followed by the passing of the Trade Boards Act, 1918, which became law on August 8. This Act amended the preceding one in a number of respects. The power given to the Board of Trade to make a Provisional Order applying the Act to a new trade was made exercisable by special order of the Minister of Labour without confirmation by Parliament, if he was of opinion that no adequate machinery existed for the effective regulation of wages throughout the trade, and that it was expedient that the principal Act should apply to that trade. In addition to minimum time rates and piece rates authorized by the original act, Trade Boards were authorized to fix overtime rates, "guaranteed time-rates," and "piece-work basis time rates." This last term

means a special time-rate with reference to which piece-rates are to be fixed. The rates fixed by a board were to become obligatory on a date fixed by the Minister in his Order of Confirmation. A trade board was authorized to make a recommendation to any Government Department "with reference to the industrial conditions of the trade."

This act led to a large increase in the number of boards, there having been 63 at the end of 1921. It is estimated that the Acts have now been applied to trades employing about 3,000,000 workers of whom about 70 per cent are women.

Evidence was submitted to the committee by representatives of employers' associations, of workers' organizations, of the Parliamentary Committee of the Co-operative Congress, by members of Trade Boards, and by officials or former officials of the Ministry of Labour and the Board of Trade.

The general tendency of the evidence was that nearly all the witnesses desired the retention of the provisions of the Act of 1909 directed against sweating; that while a strong minority of witnesses representing employers were willing that the Act of 1918 should continue in force subject to amendments, the majority desired the repeal or drastic amendment of that Act; that the witnesses representing the workers and the co-operative congress were in favour of retaining both Acts; but all witnesses representing employers' and workers' organizations wished to have the machinery of the Acts amended. The chief criticisms of the Acts were that the high minimum rates fixed by the Board had caused loss and dislocation of trade and unemployment; that in some trades the rates fixed for juvenile labour had interfered with the recruitment and training of young workers; that the lines of demarcation laid down in applying the Acts to trades, the multiplicity of boards set up for kindred industries; and the lack of co-ordination among the boards

had produced unfair competition, friction and confusion; and that the length of time required for revision of the rates when fixed rendered it impossible to modify wage rates so as to follow the trend of prices and cost of living.

The recommendations of the Committee were as follows:

(1) That the power of the Minister of Labour to apply the Acts to a trade be confined to cases where he is satisfied (a) that the rate of wages prevailing in the trade or any branch of the trade is unduly low as compared with those in other employments; and (b) that no adequate machinery exists for the effective regulation of wages throughout the trade.

(2) That in any case in which the Minister considers that a *prima facie* case exists for applying the Acts to any trade, he shall cause a public enquiry to be held into the matter and shall have regard to the report of such enquiry.

(3) That it be the duty of a Trade Board to fix (a) a general minimum time-rate for the general body of workers in the trade, such rate to be fixed with reference to the lowest grade of ordinary workers in the trade; and that a Trade Board be authorized to fix (b) if so authorized by Order of the Minister of Labour, a special minimum time-rate for workers performing work ancillary to that performed by the general body of workers; (c) a piece-work basis time-rate; (d) a guaranteed time-rate for piece workers; (e) minimum piece-rates for out or home-workers engaged in piece-work in the trade; (f) overtime rates based upon the above rates; and that such rates when confirmed be enforceable in manner now provided by the Trade Boards Acts.

(4) That a Trade Board have power to fix (a) special minimum time-rates and piece-work basis time-rates for special classes of workers in the trade or workers engaged in any special process; (b) minimum piece-rates for in-workers; (c) special minimum piece-rates for in-workers to be fixed on the application of an individual employer to apply in respect of workers employed by him; (d) overtime rates based upon the above rates; and to apply for confirmation of such rates, and that such rates if confirmed be recoverable by civil proceedings only.

(5) That any question arising under the last preceding recommendation be determined by agreement between the members representing employers and the members representing workers, and that for this purpose the assent of not less than three-fourths of the members of either side present and voting on the ques-

tion (not less than one-half of the members on the side being present) do bind the side.

(6) That provision be made for enabling the representative members of a Trade Board to refer any difference which may have arisen with regard to any rate proposed to be fixed under the recommendations numbered (4) above to such person or persons as they may appoint.

(7) That as regards any rate fixed or proposed to be fixed under the above recommendation numbered (4) the provisions of the Corn Production Acts (Repeal) Act, 1921, Section 4, Sub-sections (3) to (5) have effect subject to certain modifications.

(8) That as regards any manufacturing or productive trade to which the Acts have been or may be applied, the Minister of Labour be authorized, after consultation with the Trade Board for such trade, to set up for any area a district committee for the regulation of such trade in the area, and that every such committee have the powers conferred by the Acts upon district committees.

(9) That where a district trade committee has been established it shall be consulted by the Board before a proposal for a rate affecting the district is made.

(10) That a Trade Board which has established a district trade committee shall have power at any time to dissolve it.

(11) That as regards the distributive and retail making-up trades to which the Acts have been or may be applied (including the Laundry Trade), the Minister of Labour be authorized to divide the country into suitable areas and to set up for any area a District Board or District Boards for the regulation of such trades in the area.

(12) That a co-ordinating committee for each trade or group of trades for which District Boards are so formed be set up.

(13) That the Trade Boards which have not already adopted this course be recommended in fixing minimum rates for learners to have regard to experience not less than to age and to make suitable provision for late entrants.

(14) That Trade Boards be recommended in trades where apprenticeship is of value to encourage that system by fixing a minimum rate for apprentices lower than that fixed for learners of the same age.

(15) That the power of exemption conferred upon Trade Boards by the Acts be extended so as to cover any worker employed in a trade who from age or any other cause is incapable of earning the minimum rate applicable to him.

(16) That permits of exemption when given may be made retrospective to the date of application.

(17) That the rates fixed by Trade Boards be subject to confirmation by the Minister as at present, but that the Minister be authorized, before confirming any rate or referring it back to a Trade Board for reconsideration, to refer the matter to the Industrial Court for its consideration and advice, or to cause a public enquiry to be held into the matter.

(18) That the Minister of Labour be authorized to establish a Trade Board for two or more trades and to transfer to any such Board the powers of any existing Board.

(19) That the Minister of Labour be authorized, on the application of a proprietor of any establishment in which two or more trades to which the Acts apply are carried on, by Order to determine which minimum rates of wages shall apply to the workers or any class of workers in such establishment.

(20) That the Minister of Labour be authorized, on the application of a trader or of any person concerned, by Order to determine whether any worker or class of workers falls within the scope of an Order under which a Trade Board is established or of a determination made by such a Board.

(21) That any Trade Board or person aggrieved by any such decision shall have the right of appeal to a Judge of the High Court in manner provided by Section 10 of the Unemployment Insurance Act, 1920.

(22) That the Minister of Labour be authorized, if he is of opinion that the circumstances of any trade or any branch of a trade to which the Acts apply are of such a character as to render the application of the Acts no longer necessary, by Special Order to withdraw that trade or branch from the operation of the Acts either altogether or for such period and upon such conditions as he may think fit, but that before making any such Order the Minister shall cause a public enquiry to be made into the matter.

(23) That the Minister be authorized by Order to empower the Lace Finishing Board, and any other Board to which he may consider that similar considerations apply, to fix a minimum remuneration for middle-women.

(24) That Trade Boards be authorized to fix a series of minimum rates to come into operation contingently on the occurrence of specified events.

(25) That Trade Boards be authorized in fixing overtime rates to make the payment of a daily overtime rate conditional on the completion by the workers of a specified number of hours' work in the week, subject to such work being provided by the employer; and also to fix such rates by reference to a dif-

ferent number of hours' work in different districts.

(26) That the provision which prevents a Trade Board from giving notice of a proposal to vary a rate within six months after it has been fixed, without the consent of the Minister of Labour, be repealed.

(27) That the period allowed for objections to a proposal for the cancellation or variation of a rate be reduced in the case of a rate specified in the above recommendation numbered (3) to one month, and in all other cases to 14 days, from the date of notice being given of the proposal.

(28) That the maximum period allowed to the Minister for confirming a cancellation or a variation of a rate or referring it back to the Trade Board be reduced (unless in his opinion there are special circumstances which make a postponement desirable, and excepting when he refers the rate to the Industrial Court or orders a public enquiry to be held) to 14 days.

(29) That where, as a result of objections to a proposal for a minimum rate, a rate different from the proposed rate is agreed to by not less than three-fourths of the Representative Members on each side of the Board present and voting, not less than one-half of the Members on each side being present, the Minister be authorized (unless he is of opinion that the difference is of so serious a nature that fresh notice of it should be given) to confirm such different rate as the minimum without any further notice thereof being given.

(30) That when on investigation it is found that an employer is not complying with the compulsory Order, the employer be warned forthwith of the non-compliance.

(31) That when a magistrate convicts an employer of an offence against the Acts it be the duty of the magistrate to order payment of all arrears incurred within six months before the commencement of the proceedings, but without prejudice to his power to order payment of arrears for a longer period.

(32) That it be the duty of the Minister to obtain an annual report on the working of the Acts and to present the same to Parliament.

(33) That provision be made for applying the amendments proposed in this report to the existing Boards.

(34) That the Trade Boards Acts be repealed and a Consolidating Act containing the necessary amendments be passed.

Memorandum of Advisory Council of the Trades Union Congress

The Trade Boards Advisory Council of the British Trades Union Congress

took under consideration the report of the committee on the Trade Boards Acts which is summarized above, and its opinion and recommendations have been published by the Trades Union Congress and the Labour Party.*

With regard to unemployment, the Committee had stated "There is substance in the allegation that the operations of some of the Boards have contributed to the volume of trade depression and unemployment." The Council denied that this statement was warranted by the facts and quoted from figures based on the operation of the Unemployment Insurance Acts which showed that while the average rate of unemployment for the whole of the 12,000,000 workpeople in Great Britain at the end of August, 1921, was 13.15 per cent, the percentages in the largest occupational groups covered by trade boards were as follows: Distributive trades, 6.02; dressmaking, etc., 9.89; tailoring, 10.21; laundering, 5.78. In only two trade board industries—linen and jute—was the rate exceptionally high.

The views of the Advisory Council with regard to the recommendations of the Committee are as follows, the numbers referring to the recommendations as given above:

(1) With regard to the application of the Acts the Council state:

We are strongly of the opinion that it is desirable in the interests of the good order of industry and of the community as a whole that effective measures should be taken, not only to prevent "sweating," but to assure, so far as possible, that a reasonable wage, and, still more, proper facilities for collective bargaining, be secured to all workers. We therefore desire that the basis of the 1918 Act should be retained.

In reply to the recommendation of the Committee that a Board should only be established where the Minister is satisfied that (a) wages are unduly low and (b) no adequate machinery exists

*Trade Boards and the Cave Report. Published by the Trades Union Congress and the Labour Party, 32, 33 and 34 Ecclestone Square, London, S. W. 1. Price: 6d.

for the regulation of wages, the Council say:

Where there is no adequate machinery wages are certain to be low, but it is difficult for the Trade Unions to prove low wages, and the difficulty of inducing workers to give evidence that they are underpaid is almost insurmountable. It should be sufficient to insist upon either "unduly low" wages or "absence of machinery," and to hold a public enquiry only in cases where employers or workers object to the establishment of a Board.

(2) The Council do not think that the history of the formation of Boards under the 1918 Act justifies the recommendation for public enquiry in every case in which it is proposed to apply the Acts.

(3) The Council object to the recommendation that a general minimum time-rate be fixed with reference to the lowest grade of ordinary workers in the trade on the grounds that:

(a) There may be in a trade groups of workers under such "sweated" conditions that the imposition at one step of any reasonable minimum rate would cause such disturbance as to force them out of the trade. In such cases the advance to a reasonable minimum must be sufficiently gradual to enable the trade to adapt itself to the new conditions. At the same time, and in the same trade, there may be other groups of workers—and these may constitute the greater number—in such position as to permit of the immediate imposition of a reasonable minimum rate. If the recommendation of the Committee be adopted, these latter workers must, quite unnecessarily, wait for a reasonable minimum until the gradual process of raising the particularly bad "pockets" is completed.

(b) In certain trades which employ a relatively small number of unskilled labourers, and where the whole of the trade for which the Board is set up consists of skilled workers, the lowest rate fixed would probably be entirely inappropriate to the great majority of workers in the trade.

(4) The Council take up the position that the powers of the Boards should remain as now in respect of all rates, and the proposal to restrict the power of the Boards in regard to fixing a general minimum piece-rate is opposed on the grounds that a general minimum piece-rate is the only means by which, in certain trades, the principle of a minimum

rate can be expressed, and no complaint against the exercise of the power to fix these rates has been addressed to the Committee. To obviate the danger that minimum rates for special classes may not be fixed where no agreement is reached, the Council recommend that the difference be referred as now to the vote of the appointed members of the Trade Board.

(7) They consider the alternative proposed by the Committee for obtaining legal sanction for this class of rates has already proved practically of no value in the agricultural industry, and the clauses providing for a type of exemption hitherto unknown to the Boards and for an appeal beyond the Boards are, they believe, thoroughly dangerous.

(8) They consider the proposal to invest the Minister of Labour with power to establish a district committee in a manufacturing trade as an unnecessary encroachment on the existing autonomy of the Boards.

(11) With regard to the distributive or retail making-up trade to which the Acts are or may be applied, the Council are of opinion that "the power to decide on rates of wages should be definitely placed in the hands of a Central Board or Committee, constituted so as to represent the interests of the various localities and in a position to survey the trade as a whole."

(15) With regard to the power of exemption of "slow workers" it is pointed out that under the present Acts the employers may place such workers on piece work without any further obligation, provided the piece rates yield the piece-work basis time rate to ordinary workers. Where this is not possible there is no difficulty in obtaining permits in all suitable cases on the present basis of exemption. They could not accept so general and indefinite a phrase as "age or any other cause."

(17) The proposal to authorize the Minister to refer any rate fixed by a Board to the Industrial Court or to

cause a public inquiry to be held into the matter is regarded as striking deeply at the autonomy of the Boards and bound to cause delay in giving effect to Board decisions.

(20) With regard to the proposal that the Minister of Labour be authorized to determine whether any worker or class of workers falls within the scope of an Order under which a Trade Board is established, the Council think that the Minister of Labour should consult the Board or Boards concerned before making any decision.

(21) The Council think that an appeal from a decision of the Minister of Labour should be to the Industrial Court rather than to the High Court, as being more suited to the hearing of technical industrial questions as well as being simpler and quicker in its proceedings and less costly. At present no Trade Board can appeal against a decision of the Minister without first obtaining the sanction of the Minister for the costs of the appeal. The Council think the Boards should be enabled to apply for sanction of costs in such cases

to some authority independent of the Minister.

(28) The Council appreciate the object of the Committee in recommending that the maximum period allowed to the Minister for confirming a cancellation or variation of the rate or referring it back to the Trade Board be reduced to 14 days, but consider the exception made in the recommendation leaves the Minister with as much scope for delay as he now has, and would prefer to limit the time to 14 days without any exception. The Council prefer that in addition to the rates mentioned in Recommendation (3) the responsibility for the enforcement of other rates should also be with the Minister of Labour, and request that in any case power should be explicitly given to the trade unions to take action on behalf of any worker aggrieved.

The Council regret that the Committee have ignored their suggestion that power be given to the Minister of Labour (before the Board has been set up) and to the Trade Board itself, once formed, to require a return of wages paid in any firm or firms.

THE RAILROAD CRAFTS AND HOW THEY ARE ORGANIZED.

(Reprinted from "Bloomfield's Labour Digest," July 29, 1922)

THE 2,000,000 men who are employed on railroads [in the United States*] may be divided roughly into three groups—train service brotherhoods with a membership of about 500,000 engineers, firemen, trainmen, switchmen and conductors, constitute the first group, says *Justice* in the current issue.

Four of these unions are outside of the American Federation of Labour. Only a small number of switchmen numbering about 10,000 still remain in the Federation. These are the men that actually take the trains out. They have to do the moving of steam and electric transport.

The second group is the shopmen, known as the Federated Shop Crafts,

but more correctly as the unions composing the Railway Employees' Department of the American Federation of Labour. Six international unions of the American Federation of Labour compose these unions of mechanics. They construct and repair the engines, passenger and freight cars, man the round houses and shops and couple up

*While the present article presumes only to apply to the United States it also has its application to Canada, inasmuch as all the unions mentioned herein (with one exception, that of the Brotherhood of Railroad Patrolmen) have local branches in Canada. In this country, however, there is also an organization, known as the Canadian Brotherhood of Railroad Employees, which embraces in its membership such railway employees as clerks of all departments, freight handlers, foremen, checkers and porters, car checkers, baggage masters, parlour, sleeping and dining car service employees, locomotive wipers, asphalt men, crane men, labourers and express company employees.

and inspect trains of cars before they are sent out of the terminals.

This is the group now out on strike. These six international unions are working as an industrial unit through their department whose headquarters are in Chicago. The present strike is carried on by these unions, the six international presidents acting through Bert M. Jewell as spokesman. The unions involved in the order of their importance are the Brotherhood of Railway Carmen, International Association of Machinists, Brotherhood of Boilermakers, Brotherhood of Electrical Workers, Brotherhood of Blacksmiths, and Sheet Metal Workers' International Alliance.

The third group of the railroad employees is the largest and the least compact. Its numerical strength is estimated variously from 750,000 to 1,000,000. It is composed of the two largest groups of semi-skilled and unskilled workers, the trackmen, trestle builders and shop labourers in the United Brotherhood of Maintenance of

Way Employees, which claims over 300,000 workers, and the still larger union known as the Brotherhood of Railway Clerks, Freight Handlers and Station Employees. These compose the bulk of the miscellaneous groups. In addition, there is the Order of Railroad Telegraphers, the Brotherhood of Railroad Signalmen, two small but skilled crafts, the Brotherhood of Stationary Firemen and oilers, composed of men working in the shops and roundhouses (already involved in the present strike, although unofficially), and two very small groups, the Brotherhood of Railroad Patrolmen and the Order of Sleeping Car Conductors.

Fourteen of the eighteen railroad labour unions are in the American Federation of Labour. Six of these have solidified and simplified their organizations by pooling their strength through the shop crafts organization. The remaining eight are in the closest of communication with the mechanical crafts through the railway employees' department, in which they are also represented.

THE AMERICAN CONSTRUCTION COUNCIL.

New organization to promote efficiency in the building industry.

AN association having as its object the organization of the American building industry on the basis of public service was formed at a convention held at Washington, D.C., on June 1920, under the title of the American Construction Council. Franklin D. Roosevelt, formerly assistant secretary of the United States Navy, was elected president, and John B. Larner, vice-president of the American Bankers' Association, treasurer. Attending the convention were representative architects, engineers, general contractors, sub-contractors, labour men, manufacturers of material and equipment, dealers, bond insurance and real estate interests, and construction departments of public utilities and of federal, state and municipal govern-

ments. Each of these groups will have equal voting power in the new organization. The Council will, however, be rather a council of existing associations than a new formation of itself.

Back of the Council, press despatches state, "is the desire to regain the good opinion of the public in those American cities where the building industry has been discredited . . . The revelations spread before the public by the Lockwood investigation in New York have doubtless done much to set in motion the movement which has resulted in the selection of Mr. Roosevelt . . . By choosing a general director of the building industry the Council hopes to win the favour of the public."

The immediate programme of action suggested for the Construction Council included the formation of a "code of ethics" acceptable to the whole industry and to the public, and enforced by means of a board of review, assisted by the press by engineering and trade associations and by the government, especially the Department of Commerce; the gathering of statistics and their interpretation; the establishment of an apprenticeship system; the establishment of uniform building codes (in this connection the adoption of a universal contract form was recommended); revision of the existing freight rates on construction materials; the setting up of local organizations throughout the country in order to secure the co-operation of all elements in the industry in conformity with the principle of the Council; the mitigation of the evils of seasonal employment; the encouragement of local building shows; simplification, standardization, and elimination of waste; education of the public regarding the advantages to be secured by the distribution of building operations more evenly throughout the year; promotion of the health and safety of workmen; reduction of loss of life and waste of construction materials by fire; the study of old buildings in order to improve methods of construction; education of the public as to proper maintenance of existing buildings.

Approval of the American Construction Council from the side of labour was assured when the Building Trades Department of the American Federation of Labour, at their convention in Cincinnati, Ohio, early in June, unanimously resolved to affiliate with the new organization. Mr. John Donlin, president of that department expressed his belief that the Council might become a very important factor in stabilizing the building industry, and hoped that all elements in the industry would become affiliated with it. He stated that the Council should be a "fact-finding agency" to determine rights and wrongs, and to eliminate the wrongs, which were inflicted by a few in each element. He recommended that the Council should establish and maintain local conference committees in all cities. These committees, in his opinion, would show how public confidence might be retained, how strikes and lock-outs might be avoided, and the industry generally protected against wasteful abuses. "If one member is working with detriment to his group," Mr. Donlin continued, "he should be called to task. Responsibility for any bad condition can be determined and the remedy applied. If the banker, manufacturer, dealer or worker is responsible, all the others are concerned. We must all be guided by a determination for absolute justice."

EMPLOYMENT CONDITIONS IN CANADA FROM MARCH 31, 1922, TO JUNE 30, 1922, AS REPORTED BY EMPLOYERS.

EMPLOYMENT as indicated by the concerns making returns during the quarter ending June 30 showed a decidedly upward trend, the index number gaining over ten points since the end of March. Seasonal expansion accounted for the greater part of the gains, though increases were general in most groups.

The accompanying chart illustrates graphically the favourable trend recently indicated by employers, the curve of employment climbing uninter-

ruptedly during the quarter. During the corresponding period of 1921 a general upward tendency had been evidenced but the movement fluctuated with the monthly closing and re-opening of the railway car shops, which influenced employment very largely at that time. The gains reported during the three months under review caused the curve to rise to a slightly higher level than at any period of last year and to be several points above the course followed during the same quarter in 1921.

Statements tabulated by the Dominion Headquarters of the Employment Service of Canada from some 6,300 concerns showed the following net changes during the quarter:

Month Ending	Increase in staff.	Percentage of change.
April 30.	20,153	3.0
May 31.	47,836	7.1
June 30.	13,122	1.8

There was, therefore, a total increase of 81,111 persons in the working forces of the firms reporting. All districts shared in the upward movement; concerns in Quebec and Ontario together employed over 50,000 additional workers, while the gains in the other provinces were on a somewhat smaller scale, though they represented large percentage increases. In all districts the level of employment was higher at the end of the quarter than at the close of June, 1921.

The most pronounced gains made during the three months under review were those in railway construction, which absorbed nearly 20,000 additional workers since March 31. These increases were widespread in application, being most extensive in Ontario and the Prairie provinces. In the lumber division increases in employment affecting over 16,000 workers were reported, most of these men being absorbed by the sawmills in Ontario and Quebec.

In New Brunswick and British Columbia considerable expansion was indicated also. Highway construction was very much more active, particularly in Ontario. Building contractors generally reported substantially larger staffs, this industry, as indicated by the concerns making returns, having provided work for almost 6,600 additional workers since March 31. The transportation division was decidedly busier, increases in employment being indicated by steam railways, on street and electric railways and also in shipping and stevedoring. The gains in the first named were general, except in the Maritime provinces, where reduced activity was indicated largely as a result of the closing of the winter ports. The greater part of the increase on street and electric railways occurred in Ontario. The re-opening of the summer ports accounted mainly for the expansion in water transportation. Seasonal activity in fish canning and smoking establishments caused large net additions to staffs in the Maritime provinces and British Columbia during the quarter. The lobster season, however, was drawing to a close at the end of June, releasing from employment considerable numbers of men along the Eastern coast, but the salmon industry in British Columbia continued to report larger working forces than for many months. The pulp and paper industry was decidedly

busier, mainly in Quebec and in lesser degree in Ontario, the Maritime provinces and British Columbia. Following a period of low activity, operations were resumed with considerable briskness in asbestos mines in Quebec. Stone quarrying was also decidedly busier, to meet the requirements of the building season. The same factor caused noteworthy improvement in the situation as reported by manufacturers of glass, brick and cement, who indicated very much larger staffs than for many months. The commencement of the fruit preserving season provided employment for many additional persons during May and June, mainly in Ontario. The production of confectionery also showed an increase. Tobacco factories were decidedly busier, as were also tin can and petroleum concerns. There was a rather slight expansion on the whole, in the volume of employment afforded in the iron and steel industry. The closing of the railway car shops at the end of both April and June caused considerable losses in personnel, but the situation during May had shown sufficient improvement to counteract the declines. The production of crude, rolled and forged products, agricultural implements and structural iron and steel showed expansion, and steel shipyards and automobile factories were busier also. Both retail and wholesale trade were more active than during the preceding quarter, there being increases in employment affecting between 600 and 700 persons in each case. The re-opening of summer hotels caused pronounced gains in employment, especially in the Maritime and Western provinces. In the logging division, river driving during April absorbed large numbers of men, but the completion of such operations resulted in heavy reductions in employment during June.

The contractions recorded during the quarter under review were on a much smaller scale than were the increases indicated above. The largest declines occurred in the textile industry, where seasonal inactivity mainly in garment factories, caused reductions affecting over 1,500 persons. Hosiery and knitting mills, on the other hand, were somewhat busier and the production of cotton and woollen cloth showed a slight increase. Boot and shoe factories in April and May reported fairly large decreases in staff. There was some revival in trade during June, but not sufficient to make the balance favourable for the quarter. The shrinkage in both textile and leather industries occurred almost wholly in Quebec and Ontario. Activity in the coal fields declined to some extent; there was a large contraction during April and the situation remained practically unchanged during the two following months. This decline was chiefly recorded in the Maritime Provinces. The strike in existence in Alberta and parts of British Columbia affected employment in those districts to a considerable extent.

The level of employment in the majority of groups was higher than during the corresponding period of 1921. A particularly favourable situation in that comparison was indicated by the concerns making returns in the lumber, textile, electric current, transportation and construction groups. On the other hand, the index numbers of employment in the iron and steel, communication, coal mining and logging industries were somewhat lower.

A summary of employment conditions during the month of June appears also in the regular monthly article on page 814 of this issue.

UNEMPLOYMENT IN TRADE UNIONS DURING THE QUARTER ENDING JUNE 30, 1922, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with the situation reported during the quarter ending June 30, 1922. At the end of April the percentage of idleness stood at 10.4, or

as unemployed. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures

.8 per cent higher than in March. Conditions improved considerably during the succeeding two months, and at the close of May only 5.3 per cent of the members reported were out of work. There was much less unemployment during the period under review than during the corresponding period last year; the percentage was nearly 8 points lower at the end of June, 1922, than at the end of June, 1921. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades, or who are idle because of sickness or as a direct result of strikes or lockouts are not considered

have reference only to the unions reporting).

The building trades showed considerable improvement during the quarter under review as compared with the preceding three months, as did also the fishing and lumbering divisions. The transportation industries, moreover, were slightly busier.

The accompanying chart shows the curve of unemployment as reported by trade unions by quarters for 1916-17-18 and by months for 1919-20-21 and to June of this year. The curve during the period under review continued the downward movement indicated since the

beginning of the year. As compared with the curve for the corresponding quarter of last year which was also downward, the decline was steeper and the curve was on a considerably lower level.

New Brunswick and Ontario registered the lowest percentages of idleness during the quarter, while the greatest improvement as compared with the preceding three months was shown in the Prairie Provinces and British Columbia. The situation everywhere was decidedly more favourable at the end of each month of the quarter than during the corresponding period of last year, except in Manitoba during April, when the percentage was higher than during April, 1921.

Table I on this page summarizes the returns by provinces and Table II on page 875 shows the percentage of unemployment reported in the different groups of industries.

The percentages of unemployment in the manufacturing and construction industries during the first month of the quarter were very much smaller than in April of last year. In the former group, the increases in activity in the textile and iron and steel trades were most pronounced, garment workers, machinists, carmen and moulders particularly reporting considerable improvement. Pulp and paper mill workers also were busier. Tradesmen in the transportation industries were more fully employed, idleness in the steam and street and electric railway divisions declining to a noticeable extent.

During May, the situation in manufacturing, particularly in iron and steel and pulp and paper, was decidedly more favourable than in the same month

of last year. The percentage of idleness in building construction was much smaller, there being a 7 per cent decrease. Tradesmen in the railway operation group were considerably busier, but unions in the water and local transportation divisions reported reduced activity. Employment for

ation employees were somewhat busier. Employment in the former industries stood over 8 points higher than on June 30, 1921. Lumber workers and loggers reported very much less idleness, while approximately the same percentage of unemployment was indicated by fishermen.

The accompanying tabulations (Table

III) show in some detail the returns for the month ending June 30, 1922, for which month reports were received from 1,437 labour organizations representing 151,564 members, of whom 8,101 were out of work, a percentage of 5.3. The table also gives the general percentages of unemployment in the various trades and industries for April and May.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE QUARTER ENDED JUNE 30, 1922.

A COMPARISON of the work of the offices of the Employment Service of Canada during the period April-June, 1922, with the same period of a year ago shows slightly increased volume of business. During this period the number of vacancies offered by employers increased more than 5 per cent over the same period of 1921, but applications for work declined slightly. Placements effected by the offices show-

ed a slight increase over the corresponding period a year ago, the increase in regular employment being more pronounced than that in casual work. The accompanying chart, which presents the returns from the offices on the basis of daily averages over half-month periods, shows that the curves of applications, vacancies and placements, rose rapidly during April of this year when the spring demand for farm workers and

building tradesmen was at its height. During May and June declines were reported in all three curves, those of applications and vacancies reaching a point at the end of June, 1922, lower than at the same time a year ago. The decline in placements was not so marked. Further expansion in the volume of

business is anticipated for the following weeks especially during the harvest season.

During the period April 1 to June 30, 1922, the offices reported that they had made 99,876 references to positions and had effected a total of 94,447 placements, of which 71,002 were in regular employment and 23,445 in casual work. This represents an increase of approximately 3 per cent over the same period a year ago when 91,600 placements were made. Of the placements made in regular employment during the period under re-

view, 62,332 were of men and 8,670 of women. The number of applications registered at the offices during the period was 126,140 (98,360 of men and 27,780 of women), as compared with 129,367 during the corresponding period of last year. Vacancies reported during the period under review increased slightly the number reported being 113,524 (of which 83,368 were for men and 30,156 for women), as compared with 107,670 during the previous year.

A report in some detail of the work of the offices for the month of June, 1922, may be found on page 817 of this issue.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS ISSUED DURING APRIL-JUNE, 1922.

EMPLOYMENT in the building trades as indicated by the value of the building permits issued in 56 cities showed a substantial increase during the three months ending June 30, 1922, as compared with the preceding quarter. The volume of business authorized, moreover, was considerably higher than during the same three months in 1921. In April there was an increase of 53.7 per cent over March; the May figures were 26.2 per cent higher than in April, while in June there was a further expansion of 11.1 per cent over the May total. The aggregate value of the building authorized during the quarter under review was \$47,647,176 in comparison with \$16,310,387 for the preceding three months and with \$38,566,053 for April, May and June, 1921. There was therefore an increase of \$31,336,789, or 192.1 per cent, as compared with the first three months of this year; and of \$9,081,123, or 23.6 per cent, over the corresponding quarter of 1921.

During April, New Brunswick, Quebec, Ontario and Manitoba reported increases in the value of the building permits issued as compared with the same month of last year. The most pronounced gain occurred in Ontario where the total exceeded that for April, 1921, by \$1,860,543, or 34.3 per cent. Increased activity in Toronto largely accounted for this expansion. Of the declines in the remaining provinces, that of \$830,120, or 65.8 per cent, in Alberta was the most noteworthy. This contraction was recorded almost wholly in Calgary, where the value of the permits issued in April, 1921, had been unusually high.

All provinces except British Columbia reported increases in the volume of building authorized during May as compared with the same month in 1921. The gains in Ontario were again the most notable, the value standing at \$2,041,019, or 31.4 per cent higher than in May

of last year. Toronto registered an important share of the expansion, while the increase in Ottawa also was very large. The value of the permits issued in British Columbia was \$285,637 or 22.3 per cent lower in this comparison, there being a decided falling off in the amount of building contemplated in Prince Rupert.

In June, Prince Edward Island, Saskatchewan and Alberta recorded slight declines in the permits issued as compared with the corresponding period of last year, the decrease of \$68,440 or 13.9 per cent in the last named province being the largest. Elsewhere the value was considerably higher. In Ontario there was an expansion of \$1,983,164, or 32.9 per cent, of which increased activity in Toronto accounted for a large share. The value of the building contemplated in that city stood over \$1,600,000 higher than in June, 1921. On the other hand, there was a contraction in the same comparison of approximately \$1,000,000 in Windsor.

The accompanying table shows in detail the value of the building permits issued in 56 cities by months during the second quarter of this year. The 35 cities for which a continuous monthly record has been kept since 1910 are marked by asterisks.

A comparison in some detail between the statements for June and those for May, 1922, may also be found on page 818 of this issue.

FAIR WAGE CONTRACTS, JULY, 1922.

DURING July the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to one fair wage contract awarded by the Department of Public Works. This contract contains the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System and the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS

For building for Royal Canadian Mounted Police 4 main houses, 3 store

houses, 3 blubber houses, and 4 latrines in the Arctic Regions. Name of contractor, O. A. Gignac, Quebec, Que. Date of contract, July 7, 1922. Amount of contract \$10,250.

POST OFFICE DEPARTMENT

The following is a statement of payments made in July for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of order	Amount of order
Making metal dating stamps and type, and other hand stamps and brass crown seals	\$ 1,109.21
Making and repairing rubber stamps, dates, etc.	155.94
Supplying mail bag fittings.....	6,250.00
Making up and supplying letter carriers' uniforms, etc.	12,202.69
Repairing letter boxes, etc.....	20.00
Repairing scales	90.00
Mail clerks' tin boxes.....	176.39

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both employers and employees, but verbal agreements are also included in the records, the latter being schedules of rates of wages, hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, other important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule the rates of wages for the principal classes of labour

are given, with other information of general interest.

Mining and Quarrying

AVONDALE AND WENTWORTH, N.S.—WENTWORTH GYPSUM COMPANY, LTD., AND THE AVONDALE AND WENTWORTH BRANCHES OF THE QUARRY WORKERS' INTERNATIONAL UNION. Agreement to be effective from May 24, 1922, until May 1, 1925, and from year to year unless one month's notice is given.

Wages: Minimum wage per day, \$2; breakers, loaders, dumpmen, shovelmen, locomotive firemen, men loading cars with plaster by hand, night watchmen, blacksmiths' helpers, railroad men, steam shovel firemen and sidemen, signalmen, skip dumpers, steam drill

men, \$2.75; blowers, train brakemen, carpenters, pumpers, and donkey runners, steam shovel cranemen, machine repairmen, \$3.00; sub-bosses, train conductors, wharf foremen, car builders, locomotive engineers, boss carpenters at Wentworth, cable and stationary engineers, steam shovel engineers, \$3.75; stevedores, \$3.00 per day; where no work on barges, work to be given them in the quarry at schedule pay for work done. Rate for horses and carts except those under steam shovel, \$3.75; rates for horses and carts hauling material from under steam shovel, \$4.00; rate for horse hauling cars, \$3.75; rate for water carts, \$3.75; men owning same having privilege, when not hauling water, of working with them in the quarry, if such work is available. Overtime, time and one-half; Sundays and holidays, double time; hours per day, 9; Saturdays, 8½. Union men to have preference over non-union men of all work at all times. Horses and carts to be supplied by the union, when possible. No union man to have more than one horse and cart on the works, if another union man is asking to have his horse and cart put on.

Provision made for an adjustment committee of the men to meet the superintendent or the manager to settle disputes. Failing settlement, a joint committee to be appointed. No strike, lock-out or suspension of work during this adjustment.

Wages to be adjusted every six months, starting on June 28, 1922, (except the minimum wage) so that the daily wage shall bear the same proportion to the Department of Labour figures for the cost of living for the month prior to each adjustment date as \$2.75 bears to \$21.61.

NEWPORT STATION AND WINDSOR WHARF, N.S. — WINDSOR GYPSUM COMPANY AND SWEETS CORNER BRANCH OF THE QUARRY WORKERS' INTERNATIONAL UNION. Agreement to be effective from May 27, 1922, until May 1, 1925, and from year to year thereafter unless one month's notice of change is given. This

agreement is similar to the one summarized above, except for certain variations in rates and the addition of a few clauses, as follows:

Wages: Auger turners, per day, \$2.90; wharf dumpmen, \$3.00; (these are to be given work in the quarry when no work is available on the wharf); car builders \$3.00.

Any man relieving a man drawing higher pay to receive wages of man relieved. Union men to have preference of work at all times. If notified that vessel is to be loaded and sufficient men are not on hand, company may employ non-union men.

Union, while agreement is in force, is to have at least two representatives from employees of the company on the adjustment committee.

Should company require services of any class of labour not specified in the agreement, class to be paid for at rate of wages of previous agreement.

Building and Construction

BROWNSBURG, QUE. — PROPRIETOR OF GRANITE QUARRIES IN CHATHAM TOWNSHIP AND PAVING CUTTERS' UNION No. 39. Agreement for the year 1921 with piece work rates as summarized on page 949 of the LABOUR GAZETTE for July, 1921, has been renewed for the year 1922.

GRANITEVILLE, QUE.—QUARRYMASTERS' AND PAVING CUTTERS' UNION, BRANCH 60. Agreement to be in effect for the year 1922, with 3 months' notice of change prior to expiration. Piece work rates: Blocks 3½"—4½" wide, 4¾"—5¼" deep, 8"—12" long, \$33.00 per thousand; 3½"—4½" wide, 4½"—5" deep, 7"—10" long, \$30.00 per thousand; 3½"—4½" wide, 4"—4½" deep, 7"—10" long, \$27.00 per thousand; 4" cubes \$17.00 per thousand; flange blocks, 3½"—4½" wide, 4¾"—5¼" deep, 9"—10" long, with equal number 5"—6" long, \$47.00 per thousand. Day work, per hour, 87½ cents; hours per day, eight, with four on Saturdays.

Should anything arise so that the average paving cutter cannot make a standard rate of pay through rough stone or other cause, prices to be adjusted while such conditions prevail.

Quarry masters to supply tools and to furnish compressed air, or failing air a 10 per cent increase on above prices.

Prices of other sizes of blocks required to be adjusted by agreement subject to approval of the District Director.

Only union men to be employed. Branch secretary to be informed by masters when more men are required and information to be spread throughout the union.

LONDON, ONT. — LOCAL EMPLOYING FIRM AND THE STONECUTTERS' ASSOCIATION OF NORTH AMERICA. Agreement to be in effect from March 16, 1922, to March 16, 1923, with one month's notice of change.

Wages: per hour, 87½ cents; hours, 8 per day, 4 on Saturdays. Overtime, only when necessary, time and one-half for first two hours; thereafter double time; certain holidays to be observed, others to be optional. Only union men to be employed as stonecutters for pneumatic and hand cutting, if available.

Provision for joint arbitration committee for all differences and grievances. No strike or lockout to take place during arbitration.

One apprentice for five or less journeymen, and one additional for each additional five; never more than three to a shop. Apprentices to serve four years at wages mutually agreed upon.

Carving may be done by day work or sub-contract.

Workmen may work for and employers employ and discharge whomsoever they see fit.

All stonecutters who withdrew from the London union after May 1, 1921, to be reinstated in as good standing as when they left the union upon payment of their back monthly dues.

PEMBROKE, ONT.—CERTAIN LOCAL EMPLOYERS AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS No. 2466. Agreement to be in effect from June 1, 1922, until May 31, 1923, and from year to year thereafter unless thirty days' notice of change is given.

Wages: per hour, journeymen, 65 cents; foremen, 75 cents, for outside construction; inside carpenters and woodworking machine operators with three or more years' experience, 50 cents. Any carpenters receiving more than the minimum not to be reduced; any man incapacitated by old age, accident or other cause may work for any rate mutually agreed upon, if approved by local Union. Overtime, time and one half; Sundays and holidays, double time; work on Labour Day only to save life and property.

Hours per day, outside work, nine; inside work, ten hours. No union member in the employ of a recognized contractor to be allowed to work after hours for any other contractor or private party.

Employees to charge ten cents more per hour to employers of day labour not signatory to this agreement, except civic or government work.

No union member to work for contractors who do not comply with this agreement; and no contractor to employ any carpenter, known to have been expelled from or fined by Union for violation of the agreement.

WINNIPEG, MAN.—GENERAL CONTRACTORS' SECTION, WINNIPEG BUILDERS' EXCHANGE AND THE HOISTING AND PORTABLE ENGINEERS' UNION. Agreement to be in effect from June 26, 1922, to March 1, 1924.

Wages per hour: Engineers operating steam shovels, drag lines, trenching machines, derrick cars, drop-hammer pile drivers, pumps in caissons, clam shells and orange peels, irrespective of motor power, \$1; engineers operating boom, guy and bull-ring derricks, steam hammer pile drivers and cable ways, ir-

respective of motor power, 90 cents per hour; engineers operating all other machines used in building and construction work and all stationary engines and boilers in building and construction work, 85 cents; firemen on above machines, 60 cents.

Hours per day, eight, with four on Saturdays; overtime after 6 p.m. and noon Saturday; time and one half, except work performed outside of building work, where straight time will be paid from noon until 6 p.m. Saturday; holidays, double time; time and one-half on Sunday when machines work on account of necessity. No work on Labour Day except in case of necessity.

Engineers required to steam-up boilers before working hours to be paid one hour straight time, all engineers to be paid time and one-half after working ten hours including steaming-up time. Engineers to be allowed necessary time for washing out boilers and making repairs at regular rates.

Sufficient engineers to be employed so that only one change of engines shall be made in any half day.

When the union cannot supply engineers for gasoline mixers, contractor may employ a man until engineers are available.

Both parties to meet in January to formulate a new agreement.

WINNIPEG, MAN.—GENERAL CONTRACTORS' SECTION, WINNIPEG BUILDERS' EXCHANGE AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, DISTRICT COUNCIL, LOCALS 343 AND 2655. Agreement to be effective from June 19, 1922, to April 30, 1923.

Object of the agreement, to stabilize industry and prevent any lockout or strike and insure peaceable adjustment of grievances and disputes.

Wages per hour, 85 cents.

Hours per day, 8, with 4 on Saturdays. Not more than eight hours in twenty-four to be worked on shift

work. Overtime up to 12 hours, time and one half; thereafter and Sundays and legal holidays double time, no work on Labour Day.

Provision for a joint arbitration committee. "No stoppage of work to take place before the matter under dispute is brought before the Committee and a settlement reached."

Men hired in Winnipeg and sent out of town to have transportation paid.

Both parties to meet during January to formulate a new agreement.

WINNIPEG, MAN.—GENERAL CONTRACTORS' SECTION, WINNIPEG BUILDERS' EXCHANGE AND BRICKLAYERS' INTERNATIONAL UNION No. 1. Agreement to be effective from June 19, 1922, until April 30, 1924.

Object of agreement: to stabilize industry and prevent any lockout or strike and insure a peaceable adjustment of grievances and disputes.

Wages, per hour \$1.10.

Hours per day, 8, with 4 on Saturdays. In case of more than one shift being worked in 24 hours, straight time to be paid. Overtime to be paid time and one-half up to 10 p.m., thereafter, or after 12 noon on Saturdays or Sundays or legal holidays, double time. When consecutive shifts are worked, 7½ hours to constitute a day's work.

No strike or leaving work until matter is brought before joint arbitration committee, provided for in the agreement.

Men hired in Winnipeg and sent out of town to have transportation paid.

Foreman to be a union member in good standing and to receive at least ten cents per hour above journeymen's rate. This to apply if at least three members are employed.

Both parties to meet in January to formulate a new agreement.

Pulp, Paper, Printing

VANCOUVER, B.C.—CERTAIN LOCAL EMPLOYERS AND VANCOUVER BOOKBINDERS' UNION No. 105. Agreement effective from July 4, 1921, to August 31, 1922. Agreement may be extended from year to year provided arrangements can be made adjusting wages and hours by arbitration. Object of agreement: to prevent strikes, lockouts and boycotts.

Wages per week, journeymen, \$39.60.

Hours, 44 per week. Overtime: up to 10 p.m. and Saturday afternoon, time and one half; Sundays and holidays, double time.

Only journeymen union members to perform certain work specified in agreement. No member to do any work under a piece or contract system. Employer to employ non-union men only when union fails to supply competent help.

One apprentice to four men, two to eight men, one to each additional five men. Where four men and only one apprentice employed, an additional boy to be allowed to work in shop on senior apprentice entering his third year. During third year, apprentices to receive not less than one third of journeymen's wage; fourth year, one half; fifth year, two thirds. Apprentices to work overtime only when journeymen are working.

Conciliation and arbitration to govern the adjustment of disputes.

Special provision for women's section of Bookbinders' Union:

Wages per week, journeywomen, \$19.80; junior women, first six months, \$10; second six months, \$11; third six months, \$12; fourth six months, \$13.

Jurisdiction claimed over certain classes of work.

One apprentice to the shop, one to three journeywomen, two to five journeywomen; three to nine; one additional to

each five thereafter. Girls entering the trade serve two years.

FORT FRANCES, ONT.—FORT FRANCES PULP AND PAPER CO. LTD. AND INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, No. 159. Agreement to be in effect from May 1, 1922, to April 30, 1923, and for another year unless 30 days' notice of change be given. The agreement also covers work in mills in International Falls, Minnesota. The sections covering work in Fort Frances, Ontario, are as follows:

Paper machines to operate from 8 a.m. Monday to 8 a.m. Sunday; only certain specified work to be done on Sunday. Tour workers to work eight hours and not to leave post until relieved, but not to be expected to work more than sixteen consecutive hours. Employees not on tour work to work eight hours per day, with time and one half for overtime. Paper machines to be shut down on Dominion Day for 32 hours, Labour Day for 24 hours, Christmas Day for 40 hours. Wages for machine help, per hour on Fort Frances machines: machine tender \$1.14; back tender, 98 cents, 3rd hand, 71 cents; 4th hand, 55 cents; 5th hand, 43 cents.

Labour saving devices that can be installed to improve efficiency of the operation of the plants are desired and before such installation is made an agreement between the union and companies is to be arrived at as to just what saving is accomplished. Any members of the union eliminated by this installation to be given preference for any position that may be open at the same scale of wages.

A vacancy to be considered as existing only in case a member of the union leaves the employ of the company either through dismissal or voluntarily. If such vacancy exists after a two weeks' period, time and one half to be paid to members working overtime until vacancy is filled.

Provisions made for settlement of grievances by superintendent or by president of the company, or his representative, and president of the union, or his representative, or by an arbitration committee, for which, in case of a deadlock, the Provincial Minister of Labour shall select a third man.

FORT FRANCES, ONT.—FORT FRANCES PULP AND PAPER COMPANY, LIMITED, AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS. Agreement to be effective from May 16, 1922, to May 1, 1923, and for another year unless 30 days' notice of change is given.

Union members to be given preference when new men are hired; new employees to join union within fifteen days.

Ground wood and sulphite mill to operate six days a week and a longer period when necessary for the operation of the paper machines.

Hours per day: day workers, 8 hours, 6 days per week. Overtime, time and one half; tour workers (three tours per day), 8 hours. Tour work between 8 a.m. Sunday and 8 a.m. Monday, time and one half. Tour workers working overtime other than tour work, time and one half.

Necessary work done on Dominion Day (32 hours); Labour Day (24 hours); and Christmas Day (40 hours), to be paid at time and one half.

No strike or lockout to occur during life of this agreement.

Rules governing mill employees as issued by the company to be part of the agreement.

When an occupation ceases by reason of shut down, company to endeavour to retain employees at other occupations.

Provisions for installations of labour saving devices as in preceding agreement.

Provisions made for settlement of grievances by superintendent or by pre-

sident of company, or his representatives, and president of organization, or his representative, or by joint arbitration committee.

Wages, per hour.—*Wood room*: night oiler, conveyor man, wood handling river conveyor, wood handling off cars, sawyers' helpers, cleaner, 32 cents; drum barkers, hand barkers, 36 cents; day oiler, slasher sawyer, 37 cents; night foreman, 45 cents. *Ground wood room*: sliver screens, 32 cents; wet machine men, truckers and scale men, 37 cents; screen men helpers, oilers, 38 cents; block handlers, 39 cents; grindermen and ground wood screens, wet machine, stock runners, rack men, 40 cents; repairmen, 54 cents; tour foremen, 59 cents. Boiler-house, hog fuel unloaders, ash handlers, 37 cents; firemen, 54 cents, head fireman, 61 cents; steam engineers, 63 cents. Beater-room, broke beater, 38 cents. *Finishing room*: checker, roll finishers, loaders, wrapper cutter, 40 cents; new men, minimum, 37 cents. *Storehouse*: store labourers 32 cents. *Core department*: 1st coreman, 39 cents; 2nd coreman, 34 cents; labourer, 32 cents. *Yard*: labourers, teamsters, 32 cents. *Mechanical Department*: mechanics, minimum, 65 cents; helpers, minimum, 54 cents; mason's helpers, 32 cents.

Company reserves right to install the apprentice system as provided under the by-laws of the Carpenters and Joiners' Union.

Minimum rate for new employees in the finishing and loading department to be 37 cents per hour.

Company to reserve the right to have any of the day employees work between 7 a.m. and 6 p.m.; but company not to ask any of the day employees to work over eight consecutive hours, between 7 a.m. and 6 p.m. without paying time and one-half for such overtime; exception to be that in the wood-room, when on two tours, overtime rate will not apply until employee has worked his regular eight hours. Overtime rates to

be paid tour workers only after the vacancy has existed for two weeks, or when tour worker works overtime on day work.

IROQUOIS FALLS, ONT. — ABITIBI POWER AND PAPER COMPANY, LIMITED, AND THE INTERNATIONAL BROTHERHOODS OF PAPER MAKERS, STATIONARY FIREMEN AND OILERS, CARPENTERS AND JOINERS AND ELECTRICAL WORKERS AND INTERNATIONAL ASSOCIATION OF MACHINISTS. Agreement to be effective from May 1, 1922, until May 1, 1923, and for another year unless thirty days' notice of change be given.

When men are hired or laid off, preference to be given to union members. Employees whose rates are fixed for the term of this agreement to join the local within fifteen days.

Paper mill not to be operated more than six days a week, from 8 a.m. Monday to 8 a.m. Sunday. No employees to be required to work on paper machine between 8 a.m. Sunday and 8 a.m. Monday, except for certain specified work. Operating paper machines, etc. to be done only by members of Paper Makers' Union except when assistance is necessary from swipers, sweepers, and labourers.

Operation of ground wood and sulphite mills to be six to six and one-half days per week, when pulp is needed, or longer when mutually satisfactory. Hours of employment of day workers working outside the walls of the mill, 8 per day, 6 days per week. Over eight hours straight time up to and including the tenth hour; hours for day workers inside the mill, 8 hours, 6 days per week. Work over eight hours, time and one-half. Tour workers working between 8 a.m. Sunday and 8 a.m. Monday, time and one-half. Tour workers required to work overtime at other than tour work, time and one half. On following holidays no unnecessary work may be performed: Labour Day, 24 hours, Christmas Day, 40 hours, July

1, 32 hours. For necessary work on these holidays, time and one-half.

No strikes or lockouts to occur during the life of this agreement.

Provisions for settlement of grievances by local management or general management and the International Organizations, or by a joint committee.

IROQUOIS FALLS, ONT.—ABITIBI POWER AND PAPER CO., LTD., AND THE INTERNATIONAL BROTHERHOOD OF PULP AND SULPHITE AND PAPER MILL WORKERS. Agreement to be in effect from May 1, 1922, to May 1, 1923. This agreement is similar to that in effect between this Company and the other Unions as summarized above.

It also provides for an apprentice system in the mechanical trades, wage rates being the following percentages of the journeymen's minimum rate: 1st year, 25 per cent; 2nd year, 45 per cent; 3rd year, 65 per cent; and 4th year, 85 per cent; thereafter 100 per cent.

Wages, per hour.—Wood room foreman, 76 cents; assistant foreman and knife changer and drum operators 56 cents; sawyers and oilers, 40 cents, others 37 cents. Grinder-room foreman 76 cents; assistant foreman and jiggerman, 58 cents; others, 40 cents. Sulphite mill, Cooks, 83 cents; acid makers, 77 cents; stock runners, 65 cents; cook's first helper, 59 cents; cook's second helper, 40 cents; riffler men, 54 cents; others, 37 and 40 cents. Wet room: foreman, 76 cents; others, 37 and 40 cents. Electrical Department: operators, 63 to 73 cents; motormen, 65 cents; wheelmen, 54 cents; No. 5 machine men (day) 70 cents; shift, 59 cents; motormen, 59 cents. Finishing room: foreman and head coremaker, 65 cents; electric trucker, 62 cents; others 37-40 cents. Steam plant, head fireman, 76 cents; engineers, 65 cents and 72 cents; coal crusher, 64 cents; fireman, 59 cents; others, 40 and 57 cents. Sanitary Department and miscellaneous: Store-

man, 59 cents; bull gang, 40 cents; broke hustlers, 37 cents. Yard: Engineers and conductors, 76 cents; locomotive firemen and brakemen, 64 cents; teamsters 39 cents. Mechanical Department: minimum for mechanics, 65 cents, for mechanics, helpers, 54 cents.

If the privilege is granted to other companies by the union of withdrawing foreman from the union, this company is to share in the privilege.

Manufacturing—Clothing.

TORONTO, ONT. — ASSOCIATED CLOTHING MANUFACTURERS AND THE AMALGAMATED CLOTHING WORKERS OF AMERICA. Agreement to be effective from May 1, 1922, to May 1, 1925, with ninety days' notice of amendment, abrogation or wage adjustment prior to May 1 in each year.

The union may at the time of any wage discussion bring up the question of an unemployment fund. In case of emergency in the market warranting a discussion of the wage scale during the second half of the first year of the agreement, question may be opened by either side.

No strike, lockout, or stoppage of work to take place.

Hours per week: forty-four, with the exception of one term, in which case the hours will be forty.

Overtime to be dispensed with as far as possible. Necessary overtime to be paid time and a half, with double time on Dominion holidays.

Provision for a board of arbitration to settle controversies and grievances, expenses being borne by both parties.

The employees' association agrees to operate preferential union shops, union to supply additional help when required, and failing which employers may secure workers.

Union to be open to receive non-union workers and employers to place no

obstacles in the way of union recruiting new members.

Union undertakes, in co-operation with the employers, to organize and conduct an efficient employment office, a joint committee to enquire into operation of the same.

Three weeks to be a probationary period for new members regularly employed in the trade; for others five weeks.

Full power of discharge and discipline to be with employer; power to be exercised with justice. Union may investigate cases of discharge without cause and bring same before board of arbitration.

Employees absent from work more than a day without giving reason to forfeit position. Workers absent through sickness to be reinstated.

A market contract shop committee to be established with power to make rules and regulations governing contract shops and in so far as possible work to go to shops accredited by the committee.

Manufacturers to have the privilege of developing workers through the apprentice system on a basis to be determined jointly.

Equal division of work to be observed as far as practicable in slack season, scales of production to be observed.

It is not the intention of the agreement to restrict output but to encourage maximum production and minimum cost.

Manufacturing—Miscellaneous.

ST. CATHARINES, ONT. — ELECTRICAL CONTRACTORS OF THE CITY AND INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, No. 303. Agreement to be in effect from May 1, 1922, to May 1, 1923.

Hours per day, 8, with .4 on Saturdays.

Wages: per hour, qualified electrician, 80 cents; first class wireman, 60 cents; first class helper, 50 cents. Overtime: until midnight, time and one-half; thereafter, and legal holidays and Sundays, double time.

Local to furnish competent union help when required, otherwise non-union men may be employed.

Violation of agreed rules to be taken up by a joint committee.

Manufacturing—Food, Drink, Etc.

LETHBRIDGE, ALTA.—THE LETHBRIDGE BREWERIES, LIMITED, AND THE INTERNATIONAL UNION OF BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, No. 354. Agreement to be in effect from June 1, 1922, to May 31, 1923.

Only good standing union members to be employed; union secretary to supply help when necessary, otherwise during busy season (April 1 to October 1) extra help may be employed on permit cards at minimum wage rates, this not to cause lay-off of union men.

No discrimination for upholding union principles.

Hours per week, 48, 8½ per day, with 5½ on Saturdays. Work after regular hours or on Sundays or legal holidays, time and one-half.

Minimum wages: per hour—operating engineers, 79 cents with 8-hour shifts. In brewing and bottling department, \$34.50 and \$36 per week; new men, first six months, \$27; thereafter excepting soft drink department, \$30; beer drivers per month, \$140; teamsters, \$115; hours (exclusive of stable work) 48 per week. Soft drink department men to receive not less than \$20.

Company may put in one apprentice in each department. Apprentices to serve two years. Minimum wages per week: first year \$18, second year \$21.

In lay-off, extra men to be laid off first, then union men according to seniority.

Provision for a board of arbitration to settle differences.

Transportation—Water

ST. JOHN, N.B.—CERTAIN FIRMS AND INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL No. 272, SCOWMEN AND LUMBER HANDLERS. Agreement to be in effect from May 1, 1922, to December 1, 1922.

Wages: per hour, 45 cents.

Hours: per day, 9.

Men having been ordered out to work and finding their services not required, to be paid a minimum of two hours, except when weather conditions prevent working.

When working on Sundays and holidays, double time from midnight. No work on Labour Day. Overtime after 5 p.m. and after 12 noon on Saturdays; during summer, double time, except when culling, stamping or handling for surveyors alongside of ships, when ordinary rates shall prevail.

When required to work through meal hours, double time until relieved.

Number of men in gang to be at discretion of the foreman and not to be reduced during the day.

MONTREAL, QUE.—HARBOUR COMMISSIONERS AND THE HARBOUR UNION OF MONTREAL. Agreement to be in effect from May 1, 1922, to May 1, 1923, for shops, yard, and elevator system, and for other employees, until the close of navigation season of 1922.

Wages, per hour—*Construction work*: Crane engineers, machinists (cranes) blacksmiths, joiners, construction locomotive engineers, concrete mix engineers, 55 cents; pavers, 50 cents; small concrete mixer, concrete mix runner, 52 cents; pile driver engineer, air compressor engineer, 47 cents; painters, 40 cents; roofers, iron workers, 45 cents; firemen, 38 cents; diver, 75 cents; diver's helpers, trackmen, blacksmith's helper, concrete men, track pavers, con-

crete mix handlers, handymen, 36 cents; wharf labourers, 33 cents; dumpmen, sweepers, 32 cents; carters, \$4.24 per day; teamsters, \$6.50 per day. *Grain Elevator system*: Elevator No. 1 chief weighman, millwright, 58 cents; weighmen, assistant millwright, distributors, 53 cents; feed tenders, marine leg men, main towermen, 48 cents; machinery men, 47 cents; labourers, 32 cents. Elevator No. 2, weighmen, auto scalemen, distributors, trippermen, 53 cents; feed tenders, towerman, 48 cents; carpenters, 47 cents; oilers, 42½ cents; labourers, 32 cents. *Shovellers and baggers*: shovellers, 46 cents, sewers and scalemen and baggers, 42½ cents. *Conveyor system*: millwright, 58 cents; rope splicer, 53 cents; feed tenders, main towerman, 48 cents; conveyormen, 42½ cents; labourers, 32 cents. Harbour yards—machinists, blacksmiths, joiner, 55 cents; assistant plumber, 45 cents; handymen, blacksmith's helper, 36 cents; labourers, 32 cents. *Machine shop and shipyard*: gang steamfitter, 58 cents; gang boiler-maker, 60 cents; patternmaker, 55 and 60 cents; steamfitters, 47 and 55 cents; machinists, first class, sawyer, blacksmith, first class, 55 cents; boilermaker, 55 and 42 cents; riggers, 50 cents, machinists, second class, planers, engineers, 47 cents; carpenters, 45 cents; handymen, 36 cents; setters and filers, 38 cents; labourers, 32 cents. *Dredging Fleet*: Engineers, 54 and 63 cents, and by the month; cranemen, 52 cents; assistant engineers, 44 and 48 cents, and by the month; firemen, 38 cents and by the month; deckhands, 34 cents, and

by the month; oiler, 38 cents; handymen, 36 cents; others by the month. *Round house*: Mechanics, 42, 55 and 60 cents; helpers, 36 cents; apprentices, 32 cents. *Electrical Department*: linemen, 50 cents; power-house operators and winder, 45 cents; machinists, power-house floormen, motor tenders, arc lamp trimmers, assistant operators, 42½ cents; wiremen, 42 cents; hoistmen, 40 cents; wiremen's helpers, 35 cents; labourers and groundmen, 33 cents.

In case of one or more shifts, all work over ten hours, time and one-half. This rate to apply also on Sundays and certain legal holidays in emergency work. Day and night watchmen not to be entitled to overtime for Sundays and holidays.

Public Utilities

LONDON, ONT. — PUBLIC UTILITIES COMMISSION AND LINE EMPLOYEES OF THE SAME. Agreement to be in effect from June 1, 1922, to June 1, 1923, with thirty days' notice of termination. Minimum wages, per hour, foremen, 74 cents; journeymen, 66 cents; others, 50 and 60 cents; labourers, 40 cents.

Hours per day: Nine. The first five hours (until 10 p.m.) overtime, time and one-half; thereafter double time, Sundays and public holidays, double time.

Manager to receive a grievance committee, when satisfaction cannot be obtained from the superintendent.

The commission not to discriminate against union men.

Promotion to be by seniority, other qualifications being equal.

PRICES, RETAIL, AND WHOLE SALE, IN CANADA, JULY, 1922.

THE general movement in prices during July was slight, though both the index number of wholesale prices and the budget retail prices of foods showed slight advances.

In retail prices the average cost of a weekly family budget of 29 staple foods in sixty cities at the beginning of July was \$10.27, as compared with \$10.18 for June; \$10.97 for July, 1921; \$16.84 for July, 1920; \$11.62 for July, 1917; and \$7.42 for July, 1914. The total for food, fuel, and rent averaged \$20.67 for July; \$20.58 for June; \$21.53 for July, 1921; \$26.92 for July, 1920; \$18.41 for July, 1917; and \$14.17 for July, 1914. Most of the items showed small increases, the chief of which were in beef, pork, and sugar. Dairy products were practically unchanged while mutton, flour, and potatoes were slightly lower. Fuel and rent were unchanged.

In wholesale prices the Departmental index number of 271 commodities stood at 225.3 in July as compared with 224.3 in June; 238.6 in July, 1921; 346.8 in July, 1920; 294.0 in July, 1919; 248.7 in July, 1917; and 134.6 in July, 1914. The general decline noted in June in farm products and foods was less apparent in July, though grain and live-stock and meats continued to fall. Dairy products, fish, and miscellaneous foods showed an upward tendency. All the other groups advanced except house furnishings, drugs, chemicals, and sundries in which decreases appeared. The chief increases for the month were in butter, sugar, wool, raw silk, jute, coke, linseed oil, and turpentine, with smaller increases in metals, gasoline, and coal oil. The chief declines were in grains, cattle and beef, sheep and dressed lamb, boots, some chemicals, glassware and and crockery.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices of the

several commodities in relation to the average prices for the base period, 1890-1899, these being therefore, made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month; the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for the corresponding month back to 1913.

An index number of wholesale prices in Canada constructed by the United States Federal Reserve Board is described in another article. This index is third in a series being constructed for various countries to reflect trade conditions, the first two being for the United States and Great Britain.

A special index number (comprising fifty of the more important commodities selected from the 271 articles in the Departmental list) including 20 foods, 15 raw materials, and 15 manufactured goods based upon price levels in 1913 as 100, showed the fourth consecutive advance at 150.7 in July, as compared with 149.3 in June; 148.6 in May; 147.8 in April; 153.3 in July, 1921; and 249.7 in July, 1920.

Professor Mitchell's revised index number of wholesale prices in Canada from 1919 to date, based on 40 articles with prices during 1900 to 1909 as 100, again moved to higher levels. The figure for July stood at 165.3 as compared with 164.9 in June and 160.9 in May. Food-stuffs receded slightly but manufacturer's goods advanced.

The Canadian Bank of Commerce index number of prices of exports rose to 154.23 for July, as compared with 152.25 for June, and 158.47 for July, 1921. The index of imports rose to 161.68, as compared with 154.02 for June and 150.25 for July, 1921.

The table of retail prices and rentals shows the prices at the beginning of July of over one hundred staple food-stuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuel. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family

in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruits, fresh and canned vegetables, etc., so that the comparative expenditure would be little changed.

Retail Prices

Meats at the beginning of July again averaged higher. Sirloin steak was up about $\frac{1}{2}$ c per pound, averaging 32.1c, the increase being fairly general though prices in New Brunswick and Quebec averaged slightly lower. Round steak averaged 27.1c per pound as compared with 26.4c in June. Rib roast was lower in Alberta and British Columbia but averaged slightly higher for the Dominion at 24.4c per pound. Shoulder roast also showed small advance in the average at 17.8c per pound but was down in the Western provinces. Stewing beef and veal were practically unchanged in the average, advances in the east being offset by declines in the west. Mutton averaged 28.0c per pound in July as compared with 29.3c in June, the decline being general except in Manitoba and Saskatchewan where prices averaged higher. Lamb, roast, averaged slightly higher at 35.3c per pound. Pork, roast, advanced from an average of 31.3c per pound in June to 31.8c in July, the increase being fairly general. Mess pork was slightly higher. Bacon averaged about 1c per pound higher at $42\frac{1}{2}$ c, though some localities showed declines. Boiled ham showed a general increase, being up from 63.7c per pound in June to 67.4c in July. In fish, fresh cod, halibut, and whitefish, salt herring, salt cod, and finnan haddie were slightly lower while other varieties were practically unchanged. Canned salmon, sockeye, was down somewhat at 50.9c per pound tin. Lard showed little change in the average. Eggs, fresh, which have showed little change since April, averaged 33.9c per dozen in July as compared with 33.5c in June, and

50.7c in March. Milk was unchanged in the average, increases in Amherst, Belleville, and Victoria being offset by declines in Sydney, Kitchener, and Medicine Hat. Butter showed little change. Dairy solids averaged 35.1c per pound as compared with 35.7c in June, being higher in Ontario and Quebec but lower in the Eastern and Western provinces. Dairy prints were higher in Quebec but generally lower in the other provinces. Creamery prints were unchanged from June in the average at 42c per pound, increases in Quebec and Ontario and Manitoba being offset by declines in the other provinces. Cheese was practically unchanged, old cheese averaging 30c per pound as compared with 29.8c in June, and new cheese 26.2c in July as compared with 26.1c in June. Bread, soda biscuits, flour, and rolled oats were practically unchanged. Barley, rice, and tapioca were steady. Beans showed little change, increases in some cities being offset by declines in others. Onions averaged 10.7c per pound as compared with 12c in June, the decline being general. Potatoes averaged \$1.32 per bag, being down in all the provinces except Ontario. Evaporated apples were up from 24.1c per pound in June to 24.9c in July. Prunes were practically unchanged. Raisins and currants were down slightly. Jam and canned fruits were steady. Marmalade and honey were also down slightly while corn syrup showed a slight advance. Granulated sugar rose in the average from 7.8c per pound to 8.4c, the increase being general. Yellow sugar showed about the same general increase as granulated. Tea advanced somewhat, while coffee remained steady. Laundry starch and soap were practically unchanged.

Anthracite coal was slightly lower in the average, being down in Sherbrooke, Montreal, Peterborough, and Hamilton. Bituminous coal averaged \$11.00 per ton in July as compared with \$10.92 in June. Increases occurred in Belleville, Hamilton, and Brantford, and decreases in Truro, St. John, Three Rivers, and Montreal. Hardwood was practically unchanged. Soft wood, four feet long,

was up in the average from \$9.19 per cord in June to \$9.36 in July. Rentals were steady.

Wholesale Prices

GRAINS AND FODDER.—Wheat, No. 1 Manitoba Northern, at Winnipeg, rose from \$1.33 per bushel in the last week in June to \$1.39 the first week in July and then declined to \$1.29 by the end of the month. New crop Ontario winter wheat came on the market toward the end of July and was reported at Toronto at 90c-95c per bushel. Barley at Winnipeg declined from 65c per bushel at the beginning of the month to 58c in the last week. Western oats also declined, being quoted at Winnipeg at 52c per bushel early in July but by the last week fell to 46c. American corn advanced from 77c per bushel at the end of June to 81c at the end of July. Flaxseed rose from \$2.40 per bushel in the last week in June to \$2.45 the first week in July and then declined to \$2.15 by the end of the month. Hay at Montreal and Toronto was steady. Bran and shorts at Toronto were also unchanged.

ANIMALS AND MEATS.—Cattle at Winnipeg were down from \$7.50 per 100 pounds to \$6.25. Choice steers at Toronto declined from \$8.75 per hundred pounds about the end of June to \$8.00 the last week in July. Dressed beef, hind-quarters fell from 23c per pound to 21c. Live hogs at Toronto rose from \$13.50 per hundred pounds to \$14.25 and later declined to \$13.25. Mutton was steady but dressed lamb declined from 33c per pound to 30c.

DAIRY PRODUCTS.—Creamery butter at Montreal fell from 37c per pound about the end of June to 34c the last week in July. Cheese which had advanced from 14c per pound to 19c in June declined during July to 16c. Eggs were steady. Milk at Victoria advanced from 27c per gallon to 37c, and at Toronto from \$1.50 per 8 gallon can in June to \$1.75 in July.

FISH.—Reports from the Lunenburg fishing fleet indicated that fish were

plentiful on the Grand Banks and the summer's catch of cod was expected to be large. The dried fish market in Europe was somewhat firmer, but the demand from the West Indies was reported rather weak. The market for pickled fish was reported to be poor with mackerel quoted at \$8.00 per barrel and new herring at \$4.00 to \$4.50 per barrel ex-vessel. In canned lobsters the market was weak as the supply was good.

FRUITS AND VEGETABLES.—Raspberries were quoted at Toronto in the first week of July at 25c to 30c per box but declined somewhat toward the end of the month. Cherries were quoted at 65c to \$1.00 per 11 quart basket. Valencia oranges were up from \$9.50 per box to \$10.00. Bananas, lemons, and dried fruits were unchanged. Old potatoes at Montreal were up from 80c per bag to \$1.40. Tomatoes came on the Toronto market at \$2.25 per eleven-quart basket but declined to 60c by the end of the month. Canned peas were down from \$1.85 to \$1.75 per dozen tins.

MISCELLANEOUS FOODS.—Rolled oats declined slightly to \$3.30 per 90-pound bag. Flour, Manitoba patents, at Toronto was unchanged at \$8 per barrel. Granulated sugar at Toronto was up about 45c per hundred pounds to \$7.64. Molasses rose from 64c per gallon to 73c. Honey was quoted at 15c-18c per pound. Salt was slightly lower. Soda bicarbonate was down from \$2.70 per cwt. to \$2.60.

TEXTILES.—Unwashed wool was up 1c per pound at 21c. Yarn and beaver cloth were unchanged. Cottons were steady. Raw silk was 15c per pound higher at \$7.60. Jute was up from 10.90 per pound to 11.80c, but hessians were slightly lower at 13.27c per pound.

HIDES, LEATHER, BOOTS, AND SHOES.—Horsehides were up from \$2.25 each to \$2.75. Beef hides and calfskins were unchanged. Tallow was slightly higher at 5c per pound. The leather market was reported firmer but late spring prices of some boots were down 10c to 15c per pair.

(*) Preliminary figures. (†) Eight commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915. (‡) Revised. (a) The number of commodities varies from month to month.

METALS AND IMPLEMENTS.—Pig iron and steel billets were steady. Bar iron was up 15c per hundred pounds to \$3.15. Black sheets were up from \$4.60 per cwt. to \$4.80. Antimony, copper, and tin were slightly higher. Aluminum, spelter, and nickel were unchanged. Brass was 1c per pound higher at 28¾c. Silver bar at New York was down from 72 1-8c per ounce to 70 3-8c.

FUEL AND LIGHTING.—Connellsville coke was up from \$7 per ton to \$9. Gasoline was 1½c higher per gallon at 35½c. Coal oil also was quoted higher at 21c per gallon.

BUILDING MATERIALS.—Spruce deals at St. John were down from \$27 per M. to \$26. Lath at Ottawa advanced from \$8 per M. to \$10. Birch advanced from \$45 per M. to \$48. Shiplap at Victoria was up \$2 per M. to \$18. White lead

advanced 25c per cwt. to \$13.45. Linseed oil was up from \$1.04 per gallon to \$1.13. Turpentine continued to advance, being up from \$1.45 per gallon to \$1.80. Benzine was higher at 35½c. Paris green fell 2c per pound to 34c. Prepared paints were up 10c per gallon to \$4.05.

HOUSE FURNISHINGS.—Crockery and glassware were down 10 per cent. Sad irons were lower at \$1.62 per set.

DRUGS AND CHEMICALS.—Alum declined from 41¼c per pound to 3¾c. Bleaching powder fell ¼c per pound to 2¾c. Copperas was also slightly lower at \$1.65. Soda ash fell from \$2.60 per hundred to \$2.50.

MISCELLANEOUS.—Raw furs were steady. Raw rubber advanced from 16 7-8c per pound to 17¼c.

PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movement of prices in other countries as compared with Canada.

The index numbers of retail prices which are listed are from official sources unless otherwise stated. The authorities for the wholesale price index numbers are named in all cases.

Great Britain

WHOLESALE PRICES.—The Board of Trade's index number of wholesale prices for June stood at 163.2, on the base 1913=100, a fall of .5 per cent from the May level. Food prices dropped 1.6 per cent and industrial materials increased .2 per cent. The greatest change was in the price of cotton, which rose 4.2 per cent following a 3.6 per cent rise in May and reached the highest level for the present year. Of the 150 items the average prices for June are higher than for May in 57 cases and lower in 60 cases.

The *Statist* index number, in continuation of Sauerbeck's figures, showed an increase on June 30 over May 31 of .07 per cent, the fourth successive monthly increase. The foodstuffs group showed a decline of .5 per cent, an increase in coffee, sugar and tea being more than counteracted by the fall in vegetable and in animal foods. The materials group showed an increase of .6 per cent, the increase in textiles and sundries slightly outweighing the decrease in the minerals sub-group.

The *Economist* index number for June showed the slight increase of .4 per cent, on the level for May. Nearly all changes in foods were downward, excepting a sharp recovery in pork and a rise in barley. Wheat and flour were lower, and there was a seasonal decline in potatoes. There was a decline in tea and coffee, a rise in sugar and a rise in butter. All textiles, excepting Australian wool and hemp which remained unchanged, moved upwards. Iron and steel were unchanged but coal showed a decline.

The *Times* index number of wholesale prices of 60 commodities at the end of July was 158.8, showing scarcely any change from the end of June. Foods decreased 1.5 per cent owing to declines in meat, fish and potatoes. Cereals and sugar rose somewhat.

COST OF LIVING.—The Ministry of Labour index number was 181 for August, a decrease of 1.6 per cent from the July level. Figures for the groups for August were as follows: food, 175; rent, 153; clothing, 240; fuel and light, 190; sundries, 195. The base is prices on July, 1914=100.

Belgium

WHOLESALE PRICES.—An official index number of wholesale prices of 128 articles on the base April 1914=100 has been calculated back to August, 1921. The index numbers published are for seventeen groups and a general index. For the successive months since the beginning of the enquiry the general index is as follows:

1921	1922
August 347	January 366
September ... 368	February 356
October 372	March 350
November 374	April 344
December 369	May 348

The increase for the month of May was due chiefly to rises in the groups of metal products, clay products, textiles and fats. These were partly counterbalanced by decreases in the food products, fuel, tar, petrol, chemical, fertilizer, construction materials, and raw rubber groups. The other groups showed no change.

Poland

WHOLESALE PRICES.—The index number published by the Central Office of Statistics at Warsaw covers the period back to September, 1921, prices in January, 1914, being used as the base. The index for the months of the year 1921 is calculated from prices of 55 commodities, and for the months of the year 1922, for 58 commodities.

The commodities are classified in eight groups: wheat and vegetable products; animal products; colonial products and sugar; hides and leather, raw and finished textiles, metals and coal, construction materials, chemicals and miscellaneous. The monthly index is as follows: 1921—September, 60,203; October, 65,539; November, 58,583; December, 57,046; 1922—January, 59,231; February, 63,445; March, 73,465; April, 75,106. The index for April shows an increase of 5.4 per cent over that for March, the greatest rise being in construction materials, 9.5 per cent, and wheats and vegetable products, 7.1 per cent. The April level is 28.4 per cent above that of January, 1922.

COST OF LIVING.—The Central Office of Statistics at Warsaw publishes an index number of cost of living of a workingman's family of four at Warsaw, including food, clothing, heating and lighting, rent and water rates, and other expenses, on the base expenses in January, 1914=100. The following figures show the general trend of the index: 1921—January, 14,084; April, 17,244; July, 25,709; October, 48,656; 1922—January, 46,883; February, 48,085; March, 52,358; April, 58,627.

Italy

WHOLESALE PRICES.—The index number of wholesale prices compiled by the Chamber of Commerce and industry at Milan (average prices, May—December 1921=100) rose again in June to 97.19, or .9 per cent above the level for May. This is the first monthly increase since December, 1921. The index numbers of the groups are as follows: vegetable foods, 104.71; animal foods, 85.56; textile materials, 116.13; chemicals, 95.90; minerals and metals, 94.54; construction materials, 89.73; miscellaneous vegetable products, 88.16; miscellaneous industrial materials, 93.20.

India

COST OF LIVING IN BOMBAY.—The average level of retail prices of all commodities was the same in June as in the

*For South Africa, Australia and New Zealand base is taken as 1000 instead of 100. a. Average for year. b. Quarter beginning in specified month. c. 230 commodities, 1890-1909; 272, 1910-1914; 271, 1915-1922. d. New index number is joined to old index number (38 commodities, and all converted to base 1913-100. e. The commodities in these two new index numbers are in the one case articles chiefly exported; in the other case, articles chiefly imported. f. First of month. g. Middle of month. h. End of month. j. Monthly average.

previous month. While the index of all food articles was unchanged, there was a general fall in food grains excepting rice and bajri which remained stationary; salt and raw sugar rose owing to a decrease in supply; refined sugar fell slightly, and ghee, milk, tea, beef and mutton remained the same. Potatoes and onions rose in June 41 and 10 per cent respectively.

China

WHOLESALE PRICES.—The index number of wholesale prices in Shanghai compiled by the Bureau of Markets of the Chinese Treasury stood at 145.7 for May on the base average of February 1913=100. Cereals were 148.1; other foods, 134.8; textiles, 146.2; metals, 132.3; fuels, 171.3; building materials, 165.3; miscellaneous industrial materials, 205.2; and sundries, 126.7. The index number shows only slight variations throughout 1921 and up to May, 1922.

United States

COST OF LIVING.—The index number of retail prices of 43 foods in 51 cities compiled by the Bureau of Labour Statistics stood at 141 for June, an increase of 2 points, or 1.5 per cent, on the level of the three previous months. The chief increases were in potatoes, 20 per cent; navy beans, 9 per cent; sugar, 6 per cent. The chief decreases were in onions, 18 per cent, and cabbage, 11 per cent. The table set opposite of changes in the cost of living shows the movement back to 1914.

WHOLESALE PRICES.—The index number for June compiled by the Federal Reserve Board, prices in 1913=100,

stood at 162, an increase of 4 points, or 2.5 per cent, as compared with May. Imported goods, domestic goods, and producers' and consumers' goods each rose 4 points, while raw materials increased 5 points.

The accompanying table of index number of wholesale prices in the United States, shows the index number of the United States Bureau of Labour Statistics as recently revised. The revision consists of a regrouping of the commodities with the addition of several new articles, and the use of the 1919 census data for weighting purposes in place of the 1909 data. In the revised index, certain articles are included in more than one group, for example, among farm products and also among foods; but where such is the case, the article is counted only once in computing the general index number. Publication of the old series was suspended with the April, 1922, figures.

CHANGES IN THE COST OF LIVING IN THE UNITED STATES FROM 1913 TO 1922 AS PUBLISHED BY THE UNITED STATES BUREAU OF LABOUR STATISTICS

** No change.

Bradstreet's general index number for August, was \$12.0688, a decrease of .3 per cent from the previous month. The effect of the strikes of coal miners and railway shopmen was a sharp increase in fuel and iron quotations, but these are not considered permanent changes.

Dun's general index number for August 1 was \$173.558; for July 1, \$173.743; for June 1, \$169.997, and for

May 1, \$168.096. During the month of July the very slight change was due to the decreases in breadstuffs, meats, dairy and garden articles and the "other foods" groups being almost offset by advances in clothing, metals and the miscellaneous group.

Gibson's average index number of the prices of 22 articles of food for July was 72.9, an increase of nearly 1 per cent over the monthly average for June.

THE UNITED STATES FEDERAL RESERVE BOARD'S INDEX NUMBER OF WHOLESALE PRICES IN CANADA, 1919-1922

THE Federal Reserve Board of the United States which administers the Federal Reserve Act, 1913, which established the Federal Reserve banking system, publishes monthly as its official journal the "Federal Reserve Bulletin". This publication contains information as to trade and industrial conditions not only in the United States but throughout the world, including a considerable volume of statistics with statistical analyses. In order to compare price movements in various countries, the Board has undertaken to construct index numbers of wholesale prices for each of the important commercial countries of the world, using so far as is practicable a similar list of commodities and identical methods of computation and analysis for each. Each index is calculated from the prices of about 100 of the most important commodities in the trade and industry of the country, prices in 1913 being taken as the base, and the figures for the various commodities are weighted according to the importance of each article included. The first index to be completed was that for prices in the United States and was published in the *Federal Reserve Bulletin* for May, 1920. The second was that for Great Britain and was published in the *Bulletin* for February, 1922. The third, which is reproduced herewith, is that for Canada and was published in the *Bulletin* for July, 1922, with an explanatory statement, which was in part as follows:

The Canadian index consists of the prices of about 70 different commodities represented by 101 quotations. Of these, 33 are for raw materials, 28 for semi-manufactured or producers' goods, and 38 for finished consumers'

INDEX NUMBER OF WHOLESALE PRICES IN CANADA COMPUTED BY THE UNITED STATES FEDERAL RESERVE BOARD

goods. The index is weighted according to quantity production and trade in 1913, the "all commodities" index representing the aggregate of the individual prices weighted by production plus imports in the pre-war year, the group indexes being weighted similarly—i.e., the index of prices of domestic goods by the quantity of domestic production, the prices of imported goods by the quantity of imports, and the prices of exported goods by the quantity of exports. In all cases where statistics are available, the

final aggregates of prices multiplied by quantity weights have been tested and corrected by the census reports on the value of the output of the industry concerned.

Agricultural raw materials have the heaviest weight of any group in the index, while individual manufacturing industries are of much less importance. In the accompanying table ratios are given showing the representation of different industries in the index in 1913.

RELATIVE IMPORTANCE OF DIFFERENT INDUSTRIES
IN THE CANADIAN INDEX NUMBER OF
WHOLESALE PRICES IN 1913,
THE BASE PERIOD.

	Per cent.
Grains and flour.....	27.9
Live stock meats, and fish.....	12.8
Other foods and drinks.....	10.5
	51.2
Iron and steel.....	6.5
Coal and coke.....	6.7
Other minerals and metals.....	4.5
Textiles.....	11.2
Building materials.....	10.4
Miscellaneous (including leather, paper, and chemicals).....	9.5
	48.8
	100.0

Classifying the commodities according to stage of manufacture instead of by industries, the proportions work out 53 per cent for raw materials, 12 per cent for intermediates, and 35 per cent for finished consumers' goods.

The only group indexes which will be published as a regular monthly feature are:

- (1) Prices of domestic goods.
- (2) Prices of imported goods.
- (3) Prices of exported goods.
- (4) Prices of raw materials.
- (5) Prices of producers' goods.
- (6) Prices of consumers' goods.
- (7) Prices of all commodities—i.e., domestic plus imported goods.

In a considerable number of cases the Federal Reserve Board has used the same commodity quotations as are used by the Canadian Department of Labour and the Dominion Bureau of Statistics in their price work. In other cases prices are being col-

lected directly from trade journals or private firms without any intermediary, but in a few cases quotations are collected from private firms by a representative of the Board in Canada.

The trend of prices in Canada since the war, and especially during the period of deflation, has resembled the situation in England more closely than in the United States. Prices in all three countries reached their post-war peak in the second quarter of 1920 (according to the Indexes of the Federal Reserve Board in May of that year), but in the slump which followed, prices in the United States fell much faster than in Canada and somewhat more rapidly than in England. In the spring of 1921 prices in the United States became stabilized and remained at about the same level for approximately one year. Recently they have been advancing rapidly. In England and Canada, on the other hand, after a period of relative stability during the summer of 1921, the decline began again and has only just recently come to a halt.

In Canada, as in the United States, prices of finished consumers' goods advanced to a higher post-war peak than raw materials or semi-manufactured goods. This was due in the main to the advance in the prices of clothing. Similarly, the present level of prices of finished goods is higher than for producers' goods or raw materials. The decline in the prices of raw materials was more precipitate in 1920 than in the other two groups, but when producers' goods finally began to decline they, too, fell with great rapidity. In the present price advance raw materials have led, both in point of time and in rate of increase.

In view of the comparatively low level of prices in Canada, it might be expected that imports would have advanced more rapidly than exports. This, however, was not the case. In the last quarter of 1921 prices of imports were on a higher level than exports, but during the balance of the period exports have been steadily higher, as compared with the pre-war base, than imports.

Considering Canadian prices by industries we find that there has been great dissimilarity in the trend of prices in different industries.

Grains were very much stimulated during the period of expansion, but declined with unusual severity in 1920 and have since recovered somewhat. Meats and animal products, on the other hand, were relatively little affected by expansion, but declined in 1920 and 1921.

Since autumn of last year they have been advancing along with other agricultural commodities. Metal and fuel and textile prices have been relatively stable since the summer of last year, but have not advanced with agricultural commodity prices.

FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE SECOND QUARTER OF 1922

INFORMATION received by the Department for the second quarter of 1922 shows 254 fatalities in the industries and trades of Canada, as compared with 171 in the previous quarter and 249 in the corresponding quarter of last year. Of these fatalities 92 occurred in April, 73 in May and 89 in June, as against 80 in April, 70 in May and 99 in June of the preceding year. In the transportation and public utilities group there were 81 deaths, in the construction group 43, and in the manufacturing group 42, while the logging industry showed 30 and the mining, non-ferrous smelting and quarrying in-

dustries totalled 25 deaths. Fifty-three lives were reported lost through drowning, 22 of these through the loss of a steamer in Lake Superior; 15 fatalities were due to electric currents, 14 to explosions, and 7 occurred as a result of infection. There were also 15 fatalities reported during this quarter which occurred in the first quarter of the year.

The following table, while it does not necessarily include all the fatal industrial accidents that may have occurred, has been prepared from information received from all sources available.

FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1922

Trade or Industry	Locality	Date	Age	Cause of fatality
AGRICULTURE—				
Farm hand.....	St. François de Salles, Que.	April 14	18	Electrocuted while thawing water supply with electric current.
Farmer	Mount Brydges, Ont....	" 23	Kicked by a horse.
LOGGING—				
Labourer	Chalk River, Ont.....	April 7	50	Kicked by horse.
Labourer	Sullivan Creek, B.C.....	" 15	38	Struck by rolling log.—
Labourer	Kenney, Ont.....	" 22	22	Drowned.—
Logger	Ocean Falls, B.C.....	" 10	32	Carried over hill by tree.—
Logger	Trail, B.C.....	" 15	21	Struck by log.—
Logger	Nakusp, B.C.....	" 16	23	Drowned; boat battered by ice.—
River driver.....	Nesto, Ont.....	" 13	18	Drowned.—
River driver.....	Kings Co., N.B.....	" 18	Drowned.—
River driver.....	North Co., N.B.....	" 21	27	Carried over brow with logs.—
Engineer on railway.....	Orford Bay, B.C.....	" 17	42	Derailment.
Rigging man.....	Vancouver, B.C.....	" 30	45	Slipped while carrying heavy block; strained.
Employee	St. Joseph d'Alma, Que..	May 10	27	Caught in log jam.
River driver.....	Kapuskasing, Ont.....	" 16	21	Drowned.—
River driver.....	Nicholson Siding, Ont....	" 16	Drowned.—
River drivers (2).....	Onaping River, Ont.....	" 17	Drowned.—
Logger	Lund, B.C.....	" 20	41	Struck by falling tree.—
Employees of Forestry Service (2).....	Winnipeg River, Man....	" 23	Drowned—canoe upset.—
River driver.....	Castlegar, B.C.....	" 28	21	Fell off log—drowned.

FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1922.—(Continued).

Trade or Industry	Locality	Date	Age	Cause of fatality
Labourer	Elk Lake, Ont.....	" 29	35	Drowned.~
Chokerman	Myrtle Point, B.C.....	" 29	22	Struck by log.~
Logger	Port Haney, B.C.....	" 29	26	Fell and log rolled over him.~
Logger	Happy Valley, B.C.....	June 4	51	Crushed by log.~
Loader	Cowan Point, B.C.....	" 6	30	Caught between cars.
Room man.....	Magpie River, Ont.....	" 11	50	Fell off boom—drowned.~
River driver.....	Batchewana River, Ont.....	" 12	44	Drowned.~
River driver.....	Naim Centre, Ont.....	" 16	Drowned.~
River driver.....	Smooth Rock Falls, Ont	" 16	Drowned.~
River driver.....	Smooth Rock Falls, Ont	" 19	24	Drowned.~
FISHING AND TRAPPING—				
Fishermen (2).....	Grand Banks (N.S.).....	April 6	Drowned; boat upset.
Fisherman	At Sea, (N.S.).....	May 5	Drowned; boat upset.
Fisherman	At Sea, (N.S.).....	" 24	Fell overboard.
Fisherman	Selkirk, Man.....	" 27	Fell overboard.
Trappers (2).....	Moose Lake, Alta.....	" 9	Drowned.
MINING, NON-FERROUS SMELTING AND QUARRYING—				
<i>Metalliferous mining:</i>				
Electrician at mine.....	Red Mill, Que.....	April 10	Touched wire with wet ladder.
Helper at mine.....	South Porcupine, Ont..	" 11	30	Crushed by rock.
Mucker	Kimberley, B.C.....	May 7	27	Muck pile slid; struck by stone.
Rock-house boss.....	Sullivan, B.C.....	" 7	21	Hand caught in pulley.
Miner	Timmins, Ont.....	" 22	41	Explosion of unfired explosive in rock when breaking rock after blast.
Driller at mine.....	South Porcupine, Ont...	" 28	20	Struck by falling rock.
Employee at gold mine.....	Timmins, Ont.....	June 13	Fell from scaffold.
Helper at mine.....	Schumacher, Ont.....	" 14	Crushed under clay.
Brakeman at mine.....	Anyox, B.C.....	" 24	21	Caught between trains.
Pipe fitter at mine.....	South Lorrain, Ont...	" 28	28	Struck by descending cage.
<i>Coal mining:</i>				
Miners (2).....	River Hebert, N.S.....	April 12	Premature explosion of shot.
Underground boss.....	Taber, Alta.....	" 14	21	Struck a loaded car of rock.
Roller man.....	Sydney, N.S.....	June 12	Struck by runaway trip.
Miner	Stellarton, N.S.....	" 13	21	Fall of stone from roof.
Miners (2).....	Evansburg, Alta.....	" 26	Explosion of gas.
Miner	Carbon, Alta.....	" 29	21	Fall of sand and rock.
Miner	Donalda, Alta.....	" 30	21	Crushed between fall of earth and timbers.
Miner	Cassidy, B.C.....	" 30	47	Blow-out due to gas in coal.
<i>Clay products and structural materials, N.E.S.:</i>				
Employee at cement works...	Montreal, Que.....	May 10	34	Fall of building material.
Employee at brickyard.....	Cooksville, Ont.....	" 10	30	Suffocated under shale pile.
Employee at brickyard.....	Hamilton, Ont.....	June 14	27	Crushed under clay.
Employees at cement works (2)	Port Colborne, Ont.....	" 19	32	Overcome by gas while cleaning tank.
MANUFACTURING—				
<i>Vegetable foods, drink and tobacco:</i>				
Bread deliverer.....	Scarboro, Ont.....	June 23	40	Struck by train.
<i>Animal foods:</i>				
Labourer at packing house..	Ingersoll, Ont.....	May 5	63	Scratched thumb; infection.
Engineer at dairy.....	Calgary, Alta.....	June 1	63	Struck by recoil of blow-off pipe from boiler.
<i>Textiles:</i>				
Spinner at woollen factory..	Hamilton, Ont.....	" 8	Caught in machinery which started unawares.
<i>Clothing, N.E.S.:</i>				
Engineer at knitting factory	Inglewood, Ont.....	April 24	63	Fell—head struck against tank.
<i>Leather:</i>				
Employee at shoe factory....	Montreal, Que.....	" 1	17	Crushed in elevator shaft.
Machinist at tannery.....	Kingston, Ont.....	" 21	22	Electrocuted.

FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1922.—(Continued).

Trade or Industry	Locality	Date	Age	Cause of fatality
<i>Pulp, paper and paper goods:</i>				
Employee at paper mill....	Kenogami, Que.....	May 15	23	Electrocuted; short circuited a lamp while holding it.
Labourer at pulp mill.....	Cartier, Ont.....	" 16	53	Struck by train.
Labourer at paper mill.....	Iroquois Falls, Ont.....	" 23	18	Struck by block from pile.
Labourer with paper co.....	Pulp Siding, Ont.....	" 23	26	Drowned.
Driver for paper mill.....	Iroquois Falls, Ont.....	" 27	21	Strained side. (No particulars).
Employee at paper mill.....	East Angus, Que.....	" 31	Fell into a tank.
Laundry worker at paper mill	Iroquois Falls, Ont.....	June 3	16	Explosion while soldering generator.
Tracker at pulp mill.....	Fort William, Ont.....	" 13	16	Fell off pulp pile.
<i>Saw and planing mills:</i>				
Manager of sawmill.....	West Huntingdon, Ont..	April 3	57	Drawn into saw when trying to release block with hook.
Employee at sawmill.....	Kinburn, Ont.....	" 8	22	Caught in machinery.~
Employee at sawmill.....	Shawinigan Lake, B.C..	" 10	(No particulars).
Mill hand.....	Victoria, B.C.....	" 10	41	Struck by wood rebounding from edger.~
Employee at sawmill.....	Chateau Richer, Que....	" 24	56	Crushed by lumber from car.
Millman.....	Queens Co., N.B.....	" 29	22	Caught in shaft.~
Mill hand.....	Bloomington, N.S.....	May 10	40	Caught in shaft.
Employee at planing mill...	Limoulu, Que.....	" 12	20	Struck by board projecting from plane.~
Labourer.....	Brome Co., Que.....	" 13	48	Fell on circular saw.
Employee at planing mill...	Toronto, Ont.....	" 15	23	Struck by lumber rebounding from saw.
Saw filer.....	Arnprior, Ont.....	" 26	75	Struck by flying stick.~
Mill hand.....	East Wellington, B.C....	June 5	40	Jammed between lumber on rollers.
Wood machinist.....	Port Mann, B.C.....	" 7	38	Struck by plank which rebounded from saw.
Employee at sawmill.....	Hull, Que.....	" 21	63	Struck by edging thrown back from saw.~
Owner of sawmill.....	Commanda, Ont.....	" 30	58	Caught in shaft.~
<i>Wood products:</i>				
Labourer at furniture factory	Cornwall, Ont.....	May 8	31	Collapse of water tank while removing casing.
<i>Iron, steel and products:</i>				
Boilermaker at oil works....	Sarnia, Ont.....	" 9	37	Tank collapsed.
Wood machinist at car shop	Fort Rouge, Man.....	" 25	34	Caught in saw.
Pipefitter.....	Transcona, Man.....	June 15	52	Struck by engine lifting rod.
Operator at metal works....	Oshawa, Ont.....	" 19	46	Crushed finger; infection.
Mechanic.....	Halifax, N.S.....	" 22	Steam shovel skidded when being loaded.
Employee at metal factory...	Fort William, Ont.....	" 28	55	Block fell when cable broke.
Helper at iron foundry.....	Peterboro, Ont.....	" 30	52	Crushed toe; infection.
<i>Chemical and allied products:</i>				
Labourer at explosive factory	Windsor Mills, Que.....	April 21	25	Explosion in covering house.
Foreman at varnish factory	Montreal, Que.....	May 17	22	Fell down elevator shaft.
Engineer at paint works....	Montreal, Que.....	June 22	65	Electrocuted when turning off motor.
<i>Miscellaneous industries:</i>				
Labourer.....	Welland, Ont.....	" 30	Fell on conveyor bar.
<i>CONSTRUCTION—</i>				
<i>Building and structures:</i>				
Carpenter.....	Quebec, Que.....	April 26	45	Fell off a scaffold.
Plasterer.....	Quebec, Que.....	" 26	19	Collapse of concrete flooring.
Labourer.....	Belleville, Ont.....	" 28	Fell on box.
Repairman.....	Montreal, Que.....	May 3	50	Electrocuted; caught hold of wire when ladder slipped.
Roofer.....	Ste. Anne de Beaupré, Que.	" 19	34	Fell from roof.
Plumber.....	Montreal, Que.....	" 20	32	Overcome by gas while repairing pipe.
Workman.....	Montreal, Que.....	" 25	45	Fell from ladder.
Painter.....	London, Ont.....	" 26	67	Fell from ladder.
Mover of building.....	Kingston, Ont.....	June 8	36	Struck by windlass bar.
Workman.....	Montreal, Que.....	" 9	49	Fell from roof of house.
Carpenter.....	Marpole, B.C.....	" 20	60	Fell off end of barn.
Carpenter.....	Windsor, Ont.....	" 23	25	Fell off tower.
Carpenter.....	Mitchell, Ont.....	" 28	62	Beam broke causing fall.
<i>Railway construction:</i>				
Employee.....	St. James, Man.....	April 17	Struck by automobile.
Employee.....	Cochrane, Ont.....	" 14	Drowned.
Conductor.....	Whitney, Ont.....	May 6	Fell between cars.
Labourer.....	Hornepayne, Ont.....	" 24	Struck by tree.
Labourer (Street rly.).....	Toronto, Ont.....	June 6	Fell from car.
Labourer (Street rly.).....	Toronto, Ont.....	" 9	25	Crushed under cement mixer.
Labourer.....	Rossland, B.C.....	" 25	57	Struck by rail while loading.
Brakeman on gravel train...	Gloucester Jct., N.B....	" 8	Run over by train.
Labourer.....	Van Bruyssel, Que.....	" 24	63	Buried under slide of sand in pit.

FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1922.—(Continued).

Trade or Industry	Locality	Date	Age	Cause of fatality
<i>Miscellaneous construction:</i>				
Leveeman	Sumas Lake, B.C.....	April 1	40	Gangway collapsed; drowned.
Labourers with power commission (2)	Queenston, Ont.....	" 18	35—34	Crushed under rock.
Helper and foreman at pier (2)	N. Vancouver, B.C.....	" 19	54—39	Struck by hammer which caught and fell while being lowered.
Commissioner of drainage scheme	Wallaceburg, Ont.....	" 17	Became entangled in pulley while tightening dope cup.
Employee at aqueduct.....	Verdun, Que.....	" 30	50	Electrocuted—hoisting cable touched live wire.
Labourer at sewer.....	Aldershot, Ont.....	May 11	Struck on head.
Employee at canal.....	St. Catharines, Ont.....	" 29	32	Fell from tower.
Well borer.....	Near Parkhill, Ont.....	June 4	23	Gas explosion.
Workman at trench.....	Montreal, Que.....	" 5	35	Earth caved in.
Storeman with contractor.....	Toronto, Ont.....	" 15	24	Drowned.
Carpenter.....	Great Falls, Man.....	" 16	37	Struck by pipe when rope broke.
Labourer.....	Great Falls, Man.....	" 21	28	Drowned; dump car slipped when unloading earth into river.
Powder man.....	Cranbrook, B.C.....	" 22	47	Blasting stumps.
Bridge painter.....	Beaver River, B.C.....	" 23	Collapse of scaffold.
Bridge worker.....	Victoria, B.C.....	" 26	32	Fell from bridge.
Well driller.....	Ste. Anne, Man.....	" 27	Piece of iron fell on head.
Superintendent.....	Port Dalhousie, Ont.....	" 28	49	Broken wrist and ribs (no particulars).
Labourer.....	Mountain, Ont.....	" 29	Fractured skull (no particulars).
Electric construction worker..	Victoria, B.C.....	" 30	Struck by falling pole.
TRANSPORTATION AND PUBLIC UTILITIES—				
<i>Steam railways:</i>				
Brakeman	Saskatoon, Sask.....	April 1	30	Stepped in front of engine.
Switchman	Pt. St. Charles, Que.....	" 3	43	Stepped in front of engine.
Switchman	Winnipeg, Man.....	" 6	Run over by cars.
Conductor and fireman (2) ..	St. Lawrence, S.D., Que.	" 18	40—	Deraiment.
Fireman	Maryfield, Sask.....	" 7	30	Hand car jumped track.
Section foreman.....	Conway, P.E.I.....	" 20	65	Struck by van.
Sectionman	McAdam, N.B.....	" 22	35	Struck by train.
Sectionman	Birch, Ont.....	" 22	40	Fell from train.
Sectionman	East of Boharm, Sask..	" 24	44	Jumped from runaway train.
Engineer	Yalk, B.C.....	" 27	42	Fell from signal tower.
Signalman	Montreal, Que.....	" 29	60	Stepped in front of train.
Labourer	Montreal, Que.....	May 10	41	Struck by train.
Sectionman	Grand Valley, Ont.....	" 18	64	Struck by train.
Sectionman	Gloucester, Ont.....	" 20	Struck by train.
Sectionman	Manotick, Ont.....	" 20	32	Struck by train.
Sectionman	Gladstone, Man.....	" 22	Fell between push car and motor car.
Brakeman	Restigouche, Co., N.B..	" 13	31	Jammed between cars.
Sectionman	Georgetown, Ont.....	" 27	Struck by train.
Brakeman	Weymouth, N.S.....	" 31	Run over by box car.
Yard foreman.....	Toronto, Ont.....	" 30	Collision in yard.
Switchman	Winnipeg, Man.....	June 4	30	Run over by cars.
Ashpitman	Mimico, Ont.....	" 6	28	Caught between cars.
Sectionman	Oba, Ont.....	" 12	62	Train struck motor car.
Sectionman	Milden, Sask.....	" 14	22	Run over by train.
Sectionman	Shilo Pit, Man.....	" 22	22	Sunstroke.
Car cleaner.....	Ottawa, Ont.....	" 13	46	Run over by engine.
Brakeman	Glacé Bay, N.S.....	" 14	Run over by engine.
Employee	Kerrobert, Sask.....	" 13	23	Struck by train.
Engineer	Kylemore, Sask.....	" 14	31	Engine turned over.
Labourer	Mile 43, Long Lake Sub, Ont.	" 10	34	Fractured skull.
Labourer	Foleyet, Ont.....	" 12	62	Struck by train.
Labourer	Verner, Ont.....	" 28	45	Caught between car and engine.
Brakeman	Vancouver, B.C.....	" 17	Run over by cars.
Engineer	Brownville, Me.....	" 23	Train crashed into boulder.
<i>Street and electric railways:</i>				
Watchman	Toronto, Ont.....	June 6	24	Explosion of coal oil.
<i>Water transportation:</i>				
Engineer and mate on oil tanker (2)	Sarnia, Ont.....	April 15	Overcome by gas fumes in oil compartment.
Employees of government steamer (22)	Lake Superior (Caribou Island)	" 19	Drowned.
Sailor	Port Arthur, Ont.....	May 4	Struck by clam when unloading.
Longshoreman	Montreal, Que.....	" 8	60	Struck by iron which fell from sling.
Tug captain.....	Kingston, Ont.....	" 10	67	Fell down cabin stairs.
Longshoreman	Montreal, Que.....	June 9	53	Struck by falling plank.
Wrecker	Port Dalhousie, Ont.....	" 28	Fell through open hatchway.

FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1922.—(Continued).

Trade or Industry	Locality	Date	Age	Cause of fatality
<i>Air service:</i>				
Aviator	Waldemar, Ont.....	April 25	Crash.
<i>Storage and local transportation:</i>				
Teamster	Kaslo, B.C.....	"	1 65	Struck by falling post while unloading.
Driver of wagon.....	Berwick, N.S.....	"	24	Struck by motor car.
Driver of wagon.....	Montreal, Que.....	May 2	70	Fell from wagon.
Teamster	Toronto, Ont.....	"	16	Struck by street car.
Employee of grain elevator..	Fort William, Ont.....	"	15 42	Struck by falling spout when cable broke.
Teamster	Stave Falls, B.C.....	June 11	63	Thrown from wagon when team ran away.
<i>Telegraph and telephones:</i>				
Lineman	Stoney Creek, Ont.....	April 3	30	Electrocuted.
Lineman	Fort William, Ont.....	"	24	Electrocuted—thrown from pole.
Electrician	Harriston, Ont.....	"	5 65	Fell off pole.
Lineman	Toronto, Ont.....	June 17	Fell off pole.
Lineman	Edmonton, Alta.....	"	19 21	Electrocuted.
Lineman	Brantford, Ont.....	"	27 35	Electrocuted when transformer exploded.
<i>Public utilities, n.e.s.:</i>				
Machinist at gas works....	Peterboro, Ont.....	April 12	50	Asphyxiated while repairing leakage.
Labourer at gas works....	Toronto, Ont.....	June 21	Fell off holder.
Lineman with electrical distributors	Windsor, Ont.....	"	28 25	Electrocuted.
<i>TRADE—</i>				
<i>Warehousing:</i>				
Employee	Calgary, Alta.....	April 13	Over 21	Crushed between elevator top and floor.
<i>Retail:</i>				
Woodyard salesman.....	Marpole, B.C.....	April 12	53	Struck by wood from chute.
Foreman with wood company	Orillia, Ont.....	"	26 35	Infection.
Tailor	North Vancouver, B.C.	May 19	30	Automobile collided with truck.
Salesman (book and stationery)	Galt, Ont.....	June 5	16	Fell from third floor of store.
<i>SERVICE—</i>				
<i>Public and municipal:</i>				
Constable	Montreal, Que.....	May 6	Motorcycle collided with auto.
Inspector	Toronto, Ont.....	"	22 38	Burned.
Fireman	Toronto, Ont.....	"	24	Fell from motor truck.
Lineman with fire department	Toronto, Ont.....	June 10	36	Electrocuted when opening high pressure box.
Workman	Toronto, Ont.....	"	1 48	Fell from tree.
Workman	Kitchener, Ont...5.....	"	18 65	Overcome by gas in a manhole.
<i>Custom and repair:</i>				
Mechanic with garage.....	Toronto, Ont.....	April 11	35	Struck by car.
<i>Laundering, dyeing and cleaning:</i>				
Employee of laundry.....	Winnipeg, Man.....	May 4	Kicked by horse.
<i>Personal:</i>				
Messenger	Vancouver, B.C.....	April 19	29	Crushed by elevator.
Domestic servant.....	Nanaimo, B.C.....	May 4	16	Burned when clothing caught fire.
Cook	Rossland, B.C.....	"	5	Fell from automobile.
<i>MISCELLANEOUS—</i>				
Workman	Montreal, Que.....	April 8	33	Scratched finger; infection.
(Unclassified)	Toronto, Ont.....	"	12	Crushed between wagon and elevator
Labourer	Montreal, Que.....	"	15 52	Scalded—hot water valve opened.
Labourer	Montreal, Que.....	May 8	37	Buried under a mass of gypsum.
Engineer	Vancouver, B.C.....	"	19 33	Drowned.
Labourer	Quebec, Que.....	June 14	32	Explosion of volatile constituents of tar—lighted match.
Labourer	Edmonton, Alta.....	"	Over 21	Car started when unloosening brake.
Labourer	Lydiatt, Man.....	"	29	Electrocuted when carrying pole under wire.

SUPPLEMENTARY LIST OF ACCIDENTS DURING THE FIRST QUARTER OF 1922.

Trade or Industry	Locality	Date	Age	Cause of fatality
Labourer with automobile company	Ford, Ont.....	Jan. 5	46	Electric shock.
Whistle blower	Port Alberni, B.C.....	Feb. 7	16	Struck by block when strap broke from stump.
Employee with pulp company	Rivière à Mass, Que....	" 28	Falling tree.
Employee at paper mill	Merritton, Ont.....	" 9	31	Caught in belt.
Fuel foreman	York Co., N.B.....	" 10	56	Jammed by dumping bucket.
Labourer	Hawkesbury, Ont.....	" 19	25	Explosion of gasoline vapour; entered empty tank car with lantern.
Labourer	Restigouche, Co., N.B....	" 22	29	Cut by axe; (anthritis).
Labourer	Vancouver, B.C.....	March 3	30	Hand became infected while handling lumber.
Labourer	Restigouche Co., N.B....	" 14	60	Struck by engine (pneumonia result of accident).
Labourer at farm	Petitcodiac, N.B.....	" 18	Explosion of tractor motor while sawing wood.
Coal handler	St. John, N.B.....	" 6	25	Caught in winch.
Handyman	Yahk, B.C.....	" 17	57	Infection from scratch on thumb from wire.
Logger	Ocean Falls, B.C.....	" 23	60	Struck by falling tree.
Bridge worker	Victoria, B.C.....	" 25	31	Drowned.
Teamster	Hazleton, B.C.....	" 29	40	Thrown from wagon seat and dragged by lines.

IMMIGRATION DURING THE SECOND QUARTER OF 1922.

THE following table compiled from information furnished by the Department of Immigration and Colonization gives some details respecting the total number of immigrants into Canada during the second quarter of 1922. For purposes of comparison the figures for the previous quarter and for the corresponding quarter of 1921 are also given.

The table on page 920 gives the nationality, sex, occupation and destination of all immigrants who entered

Canada during the quarter under review.

IMMIGRATION TO CANADA DURING THE SECOND QUARTER OF 1922.

Period 1922	Great Britain and Ireland	U.S.A.	Other Countries	Totals
April	2,048	3,268	1,282	6,598
May	5,972	2,866	2,361	11,199
June	3,675	2,291	1,329	7,295
Second quarter, 1922..	11,695	8,425	4,972	25,092
First quarter, 1922..	2,480	4,751	2,945	10,176
Second quarter, 1921..	22,458	11,831	7,183	41,472

RECENT LEGAL DECISION AFFECTING LABOUR

THE legal decision which is summarized below has reference to a claim under the Mechanic's Lien Act of Alberta.

Lien for wages granted on leaseholders' interest in mining property in Alberta

A number of men were employed in developing a coal mine in Alberta by a company which had an option to purchase the property from the holders of it under leases from the Crown. Under the terms of the option the prospective buyers were required to provide the necessary labour and material and to erect the necessary buildings for the efficient working of the mines. During the currency of the option the lease holders were to receive a royalty on the output and to have access to the property and plant. As the workmen did not receive their pay they applied to the Supreme Court of Alberta for a mechanic's lien on the lease holders' interest in the property. Judgment was delivered in favour of the plaintiffs, and the defendants appealed against the decision, the case being heard in the appellate division of the Supreme Court. There were seven grounds of appeal:

(1) That the trial judge erred in holding that any work done by the plaintiffs constituted an improvement to the property. It was held by the Court that this ground of appeal failed as the Act provides that "works or improvements" shall include every act or undertaking for which a lien may be claimed under this Act"; and Section 4 of the Act, which specifies the matters that give rise to a lien, deals with the physical nature of the works therein mentioned without reference to any effect they may have in enhancing the value of the property.

(2) That the work done by the plaintiffs was not authorized by the defendants. It was held by the Court that

this ground of appeal failed as under Section 4 of the Act a lien is apparently confined to work done and material supplied at the request of the owner of the land or with his privity or consent or for his direct benefit, "Owner" includes a person having any estate or interest, legal or equitable, in the lands upon or in respect of which the work is done. By Section 11 of the Act "every building or other improvement. . . constructed upon any lands with the knowledge of the owner or his authorized agent. . . shall be held to have been constructed at the request of such owner. . . unless such owner or person shall within three days after he shall have obtained knowledge of the construction. . . give notice that he will not be responsible for the same by posting a notice in writing to that effect". In this case there was knowledge and no notice was posted.

(3) That the reference directed by the trial judge should have been to ascertain how much of such work was an improvement to the property. The Court declared that this ground was dealt with in connection with the first ground and failed.

(4) That the solicitor for the lienholders could not make the affidavit required by the statute in support of the mechanics' lien. The court held that this ground failed as the statute did not require that the affidavit must be made by the lienholder.

(5) That the defendants had no interest in the land to which the mechanics' lien would attach. The Court held that this ground failed as it is suf-

ficient under Section 11 that they have or claim an interest in the land, and their holding of mining leases from the Crown gave them an interest in the land.

(6) That the trial judge erred in holding that the plaintiff A—L— was entitled for a lien for any work done. This plaintiff was described as a “bull cook” for the camp and was engaged in taking care of the bunk houses, hauling coal, and keeping things warm and clean. It was held by the Court that this plaintiff was entitled to a lien. He was employed by the company and it might be assumed that the expense incurred for his services was necessary for the undertaking of opening up the mine. The Act provided that “every. . . labourer doing or causing work to be done. . . or in connection with the excavating, etc., of a mine. . . shall have a lien for the price of such work.” A labourer includes every person doing

labour for wages and the Court held that the work of this man was in connection with the excavating, etc.

(7) That the “trial judge erred in holding that the plaintiffs were entitled by reason of having done work which was not an improvement to revive a lien which had at that time expired for work which might constitute an improvement.” The Court held that the liens were filed within 60 days from July 21, up to which time the development work was continuing, and that if the plaintiffs could be said to have ceased their work at or about the mine, or in connection therewith more than sixty days before the registration of the liens, they were in any event employed on other work within the meaning of the section. In the opinion of the Court this ground also failed. The appeal was therefore dismissed with costs.

(*Alberta—Hutchinson et al vs. Ber-ridge et al*).

THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE JAMES MURDOCK
DEPUTY MINISTER—F. A. ACLAND.

Volume 22

SEPTEMBER, 1922.

Number 9.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST.

This issue in brief

This issue of the LABOUR GAZETTE contains a synopsis of the proceedings at the recent annual convention of the Trades and Labour Congress of Canada, and of the proceedings of the first annual convention of the Confederation of Catholic Workers of Canada. It also contains condensed reports of the Dominion-Provincial Unemployment Conference recently held at Ottawa and the unemployment conference of Western Municipalities held at Calgary in August. In addition to the regular monthly articles and those already mentioned, there are a number of other articles of general industrial interest including one respecting the labour legislation passed at the last session of the Nova Scotia legislature.

At the beginning of August the percentage of unemployment as reported by trade unions stood at 4.1, as compared with 5.3 at the commencement of July, and with 9.1 at the beginning of August of last year. According to returns tabulated from some 6,300 firms, employment showed a further moderate increase during July and conditions continued to be more favourable than in the same month of 1921.

The average cost of the weekly family budget of 29 staple foods was \$10.44 at the beginning of August, as compared with \$10.27 for July; \$11.44 for August, 1921; \$16.42 for August, 1920; and \$7.68 for August, 1914. The total for

food, fuel and rent averaged \$20.88 at the beginning of August, as compared with \$20.67 for July; \$21.98 for August, 1921; \$26.60 for August, 1920; and \$14.41 for August, 1914. In wholesale prices the index number stood at 222.8 for August, as compared with 225.3 for July; 236.4 for August, 1921; 330.2 for August, 1920; and 136.3 for August, 1914.

The time loss due to industrial disputes was greater during August than during either July, 1922, or August of last year. There were in existence during the month 24 strikes involving about 24,006 workpeople with an estimated time loss of 437,017 working days. Five of the strikes were reported as having commenced during August. Three of the strikes commencing prior to August and three of those commencing during August terminated during the month, leaving 18 strikes involving about 15,408 workpeople on record at the beginning of September.

Proceedings under the Industrial Disputes Investigation Act, 1907

During the month of August no reports were received by the Department from Boards of Conciliation and Investigation established under the Industrial Disputes Investigation Act, 1907. On September 1, however, a report was received from a Board established to deal with differences between the leading

railways of Canada, members of the Railway Association of Canada, and their shop crafts employees, members of Division No. 4, Railway Employees' Department, American Federation of Labour.

Three applications were received for the establishment of Boards, and in two of these cases Boards had been established by the end of the month.

Jottings Conventions of the following Canadian and international labour organizations will be held during the months of October and November:

International Brotherhood of Bookbinders at San Francisco, Cal., in October.

Telephone Operators' Department of the International Brotherhood of Electrical Workers, at Montreal, Que., on October 2.

International Brotherhood of Pulp, Sulphite and Paper Mill Workers, on October 5.

United Garment Workers of America, at St. Joseph, Mo., on October 9.

Brotherhood of Railroad Signalmen of America, at Cincinnati, Ohio, on October 9.

Bricklayers, Masons and Plasterers' International Union of America, at Springfield, Mass., on October 9.

Brotherhood of Maintenance-of-Way Employees and Railway Shop Labourers, at Detroit, Michigan, in October.

Canadian Federation of Bricklayers, Masons and Plasterers, in November.

In the July issue of the LABOUR GAZETTE, reference was made to the resignation of the members of the executive board of District 26, United Mine Workers of America, which covers the coal mine areas of Nova Scotia and New Brunswick. The new elections have since been held, resulting in the following officers being chosen: president, Mr. Dan Livingston; international board member,

Mr. A. M. Stewart; secretary-treasurer, Mr. J. B. McLachlan, re-elected. As no candidate for vice-president received an absolute majority of votes, another election will be held for this office.

A bill dealing with employers' liability and workmen's compensation has been drafted by a committee of employers in Saskatchewan, representing certain railways and principal industrial establishments in the province. The proposed measure will, it is stated, be submitted to the Government with a view to future legislation.

The first prosecutions undertaken in Canada under the amendment to the Criminal Code passed in 1920, to prohibit the bribing of railway conductors by persons wishing to secure cheap transportation took place in Montreal during August, two persons being committed for trial.

The provincial police of Saskatchewan have lately secured several convictions under the provincial Masters' and Servants' Act against a number of harvesters who left their work in the harvest fields without notifying their employers. Fines were imposed, in some cases amounting to \$20 and costs.

Prince Edward Island, the last province of the Dominion to take advantage of the Federal Housing scheme has borrowed \$50,000 up to the present time, the total amount to which the province is entitled to borrow, on the basis of its population, being \$406,000. The Population of the Island is for the most part agricultural and the money borrowed will be mostly expended in Charlottetown, it is stated.

The Hon. C. M. Hamilton, minister of agriculture for the province of Saskatchewan recently announced that the provincial government was acquiring on leasehold terms the Matador Ranch, comprising 120,000 acres of federal grazing lands north of the Saskatchewan River, to be used for community grazing purposes.

The Amputation Association of Canada is reported to be taking action in order to secure the passing of a measure in Canada similar to a German law which compels employers to employ disabled men up to 10 per cent of their total number of employees, or to pay a tax in lieu thereof. The Association will hold a convention in Vancouver on September 21 to 24.

Representatives of the smaller towns of Ontario met in Toronto recently for the purpose of forming an organization to attract new industries coming to Canada. It is held that the health of the community would be improved by the building up of the towns and that the cities should not continue to grow indefinitely. The province was divided into districts, and organizers were appointed for the Ottawa Valley district, the Niagara Peninsula district and the Western Ontario district. It is proposed eventually to form a provincial organization, when a permanent managing secretary will be engaged.

A serious shortage of skilled labour in the planing mill industry in North America was reported at a recent convention of the North West Woodwork Association at Portland, Ore., according to the *Canada Lumberman*. The bulk of the men engaged in the detail mills, especially in cabinet making, are men of foreign birth who served their apprenticeship in foreign countries and came to America as trained journeymen. "This class of labour is scarcely obtainable," it is stated, "owing to the return of these men to their own countries prior to the war, and their retirement by reason of age. There are no new men coming along to take the place of those retiring."

The United States National Society of Vocational Education reports that as a result of the Federal Vocational Education Act passed in 1917, every state has now enacted laws establishing vocational training as part of the public school system. The Federal law provided for the payment of a subsidy by the United

States to each State complying with its provisions. Enrolment in the schools thus aided has increased from 164,186 in 1917 to 323,028 in 1921, the greatest increase being shown in schools situated in agricultural districts.

A departmental bonus system has been in force at the plant of the Packard Motor Car Company of Detroit, Mich., for the past four months. A standard of production is fixed at 80 per cent of the maximum efficiency of the department, and the bonus is awarded to the workers of all classes according to the number of points by which this figure is exceeded. Thus a gain of 11 points brings to each man an increase of 11 per cent of his wages. A beginning was made with those departments which had been on a piece-rate basis. The vice-president of the company reported after three months' experience of the plan that it is "the most satisfactory working arrangement for both employees and company that we have known".

Mr. R. A. Rigg, formerly Superintendent of Employment Offices in Western Canada, has been appointed officer in charge of the Employment Service Branch of the Department of Labour, to succeed Mr. Bryce M. Stewart, whose resignation was noted in the last issue of the *LABOUR GAZETTE*. Mr. Rigg has had considerable experience in labour matters; he was in 1916 vice-president of the Trades and Labour Congress of Canada and was for some years secretary of the Winnipeg Trades and Labour Council. Mr. Rigg served on the Winnipeg City Council in 1915 and at the same time represented North Winnipeg in the legislature of Manitoba; he has also been a member of various public bodies such as the Manitoba Hospitals Commission, the Provincial Commission on Technical Education, etc. Mr. Rigg joined the overseas forces of Canada in 1917 and was with the Canadian army until the close of the war. In 1919 he was appointed Western Superintendent of the Employment Service Branch of the Department of Labour.

A correction

At the recent triennial convention of the Brotherhood of Railroad Trainmen held in Toronto, Mr. W. J. Babe, of St. Thomas, Ont., was elected by Canadian delegates as Canadian vice-president in succession to Hon. James Murdock, who, having held the position for many years, retired on his appointment as Minister of Labour. The report of the proceedings of the convention printed in the July issue of the **LABOUR GAZETTE** stated that Mr. A. McGovern, of Toronto, had been elected to the position. This statement, which also appeared widely in the daily press, was incorrect, the election resulting as stated.

**Canadian
delegates to
International
Labour
Conference**

By order-in-council of September 7 the following were designated as Canadian delegates to attend the Fourth International Labour Conference of the League of Nations, which will take place at Geneva in October: The Honourable James Murdock, Minister of Labour, and The Honourable Ernest Lapointe, Minister of Marine and Fisheries, to represent the Federal Government; Mr. W. C. Coulter, of the Booth-Coulter Copper and Brass Company, Limited, Toronto, to represent the employers; and Mr. Tom Moore, of Ottawa, president of the Trades and Labour Congress of Canada, to represent the workpeople. Mr. H. W. Macdonnell of the Canadian Manufacturers' Association, Toronto, was appointed as adviser to the employers' delegate; and Mr. John W. Bruce, of Toronto, Canadian representative of the United Association of Plumbers and Steamfitters, as adviser to the workmen's delegate.

**"Fire
Prevention Day"
for Canada**

A Royal Proclamation issued during August appointed Monday, October 9, 1922, as "Fire Prevention Day". On that date or during the previous week all public buildings, stores, warehouses and factories throughout Canada are to be in-

spected and cleaned of rubbish in order to reduce fire hazards and maintain health and safety. Fire drills are to be held for the children in all schools, for the inmates of all institutions and for the employees in all large stores and factories in order that a greater degree of safety may be insured by acquainting the occupants with the best and most expeditious mode of exit in time of danger. Similar precautions must also be taken for the safety of private dwellings, hotels, institutions, etc. The proclamation sets forth that in Canada during the past decade more than 3,000 persons have lost their lives and insurable property valued at over \$250,000,000, has been destroyed by fire. The loss during 1921 is estimated at \$45,000,000, and during the present year the rate of destruction is declared to be still higher, "despite the praiseworthy efforts of numerous agencies made for its abatement."

**Personnel of
Ontario
Employment
Service
Council**

In accordance with the Ontario Department of Labour Act, 1921, the Provincial Employment Service Council was constituted by the Ontario Government by order-in-council passed on August 4, as follows: Chairman.—Professor Gilbert Jackson, University of Toronto. *Employers' representatives*—Messrs. George Gander, Toronto Builders' Exchange; A. C. Mambert, Canadian General Lumber Company; R. F. Fitzpatrick, of Fitzpatrick and O'Connell, Toronto; and William H. Shapley, Toronto. *Women's representative*.—Mrs. Rose Hodgson, Dundas. *Bankers' representative*.—Mr. Donald Alexander Cameron, Canadian Bank of Commerce. *Farmers' representative*.—Mr. William C. Good, M.P., Paris. *Soldiers' representatives*.—Messrs. Hugh McLeod, G. A. U. V., and William D. Sharpe, Brampton. *Employees' representatives*.—Messrs. John W. Doggett, Building Trades; John A. P. Haydon, Canadian Congress Journal, Ottawa; and Mr. William Tite, London.

The chairman and Messrs. Doggett, Gander, Shapley and Mrs. Hodgson are appointed for a term of three years. Messrs. Cameron, Mambert, Sharpe and Tite are appointed for two years, while Messrs. Fitzpatrick, Haydon, Good and McLeod are chosen for one year. The duties of the Council will be confined to alleviating further unemployment situations and raising the standard of efficiency of employment bureaus.

Quebec measure to prevent unemployment among loggers The Executive Council of the Province of Quebec issued on August 30 the following order which is designed

for the prevention of unemployment among loggers and lumber workers during the approaching winter, by temporarily reducing the dues on lumber:

"Whereas, owing to the financial crisis now prevailing, and especially in the timber industry, it is expedient to modify temporarily the provisions of the Order-in-Council of the 6th of October, 1920, respecting timber cut under the conditions mentioned below, so as to encourage licensees to provide employment for lumbermen (ouvriers forestiers) during the coming winter; That it is expedient, for the same reasons, to cause the exploitation of burnt timber, or timber damaged by insects, and that a reduction of timber dues should be granted; It is ordered that the Order-in-Council of the 6th of October, 1920, be temporarily modified in favour of the licensees who shall cut, from this date to the 1st of May, 1923, at least 25 per cent of the total amount of their respective cuts of timber for the season of 1920-1921, or of their last year's lumbering operations previous to that season, if they have not operated during 1920-1921, and that the dues on the lumber so cut be calculated according to the provisions of the Order-in-Council No. 765 of the 13th June, 1918; That there shall be charged on the burnt timber cut between this date and the 1st of May, 1923, a rate of \$1.75 per thousand feet, board measure, for white pine, of \$1.50

per thousand feet, board measure, for red pine, elm, ash, basswood, maple, birch and tamarac, and of \$1.25 per thousand feet, board measure, for spruce, balsam, gray pine, hemlock, white birch aspen, cedar, etc."

Amendments to Manitoba provincial Fair Wage schedule

The Fair Wage schedule on Provincial public works in Manitoba, which was published in the LABOUR GAZETTE for July (p. 769) has been amended by orders issued during August, the rate of wages fixed for bricklayers and stonemasons being \$1.10 per hour instead of \$1.07 per hour. This rate applies to the entire province including Winnipeg. The change is the result of conditions contained in the agreement, dated June 17, 1922, between the General Contractors' section of the Winnipeg Builders' Exchange and the Bricklayers and Masons' International Union of Manitoba No. 1. (This agreement was noted in the August issue of the LABOUR GAZETTE). The rate of wages of plasterers' helpers is now given as 55 cents instead of 50 cents per hour.

Alberta Drought Area Relief

An order-in-council was issued in Alberta during August under the Drought Area Relief Act, which act, as noted in the LABOUR GAZETTE for July, was among those passed by the provincial legislature at its recent regular session. The order is to the effect that throughout the drought area no action or other legal proceeding in any Court, and no proceeding in the nature of an execution or proceedings leading to the sale or foreclosure of real property, and no proceedings of any sort which may lead to the seizure or sale of the property of any resident of the drought area, shall be taken or continued without the permission of a judge. Moreover the produce of residents which is raised within the drought area during 1922, and the proceeds of its sale, as far as required to provide necessary food and clothing for the resident and his family

until August 1, 1923, are exempted from seizure under any writ of execution or from any cause whatever.

Mine Rescue

Work in
Alberta

The Northern Alberta
Branch of the Canadian
Institute of Mining and
Metallurgy held a suc-

cessful mine rescue contest at Beverly, near Edmonton, on Labour Day. The Workmen's Compensation Board of Alberta lent two mine rescue cars which were used in the demonstration. Four such cars are maintained by the Province at an annual cost of \$40,000 to \$50,000. A competent man is in charge of each car and trains the miners in rescue work. Each car has fifteen sets of proto mine rescue apparatus, or gas masks, with self-contained breathing apparatus. Last year, it is stated, between 800 and 900 men were trained in Alberta for mine rescue work and nearly 1,000 miners were given first aid training under the superintendent of the rescue cars. The purpose of these contests is to stimulate the miners' interest in rescue work. At the recent contest a temporary "mine" was erected and an "accident" was staged, the competing teams being required to act as though in presence of an actual disaster, not knowing its nature until they were actually under way. The teams were subjected to medical tests at different stages of the contest, the coolness of the men as indicated by their pulse, counting as points for their team. The contest was won by a team from the Fraser-McKay mine. The other competing teams were, two from the Great West Coal Company's mines and one each from the Bush mine, the Clover Bar and Humberstone mines, and the Dawson mine. Valuable prizes and trophies for first aid work were offered on the same occasion for competition by ladies' and boy scouts' teams.

Regulations affecting B. C. food workers

The Provincial Board
of Health of British
Columbia issued during
August a series of regu-

lations governing food preserving, canning, storage and packing establishments. Owners or persons in charge of such establishments are to be held responsible for the sanitary conditions of the premises, including yards and grounds. Adequate washing facilities of modern and efficient type must be furnished for the employees, with efficient and separate toilet accommodation for both sexes. Where sleeping or living quarters are furnished for employees ample lighting and ventilation must be provided. The employment of any person afflicted with any infectious disease is strictly prohibited in and about the premises and wherever any doubt exists the person under suspicion must produce a medical certificate from a registered doctor.

Propaganda of the Trade Union Educational League

At the recent convention of the Trades and Labour Congress of Canada reference was made to an organization known as the Trade Union Educational League, which, it was asserted, had been established to destroy the present trade union movement in favour of some form of communism. The September issue of *The Labour Monthly* (London, Eng.) contains an article by William Z. Foster, secretary of the League, giving the history and outlining the purpose of this organization. The League is described as "the latest attempt to draw together the rebel elements in the old craft unions." It was organized in November, 1920; and for the first year consisted only of a few scattered groups. The American labour movement, it is stated, lost its former militant character about the year 1890, when the advanced elements withdrew from the recognized unions and formed rival organizations. The result was a system of "dual unionism," the left wing of labour being represented suc-

cessively by the Socialist Trades and Labour Alliance, the Industrial Workers of the World, the One Big Union, and the Workers' International Industrial Union, while the more moderate unionists continued to adhere to the older organizations. The result of this dual system, according to the promoters of the Trade Union Educational League, has been to "bleed the whole trade union movement of its livest and best elements." Ten years ago an effort was made by the advanced leaders to restore unity to the labour movement by adopting a policy of permeation of existing unions by revolutionary teaching, with the result that the Syndicalist League of North America was formed in 1912. The progress of the latter organization was halted by industrial upheavals led by the I. W. W., and the dual union idea was soon restored. During the past year, according to the League secretary "a most remarkable change took place in the revolutionaries' minds regarding dual unionism. Almost overnight they became convinced of the folly of this policy. For this quick change of front the experience of the Russian revolution is largely responsible. . . . Then the Trade Union Educational League took on remarkable vitality."

"As we write," continues the League secretary, "practically the whole revolutionary union movement, except the die-hards in the I.W.W., W. I. I. U., etc., is swinging rapidly into it. Unless all signs fail the American revolutionaries, extremists like everything else American, will soon be as violently against dual unionism as they were in favour of it a year ago. Quite evidently our movement is going to make a determined experiment with the long condemned tactics of working within the old trade unions."

The first national conference of the Trade Union Educational League was held at Chicago on August 26 and 27 last. According to its secretary, the League has branches in all large cities and districts of the United States and

Canada. "In every important Labour Union in these two countries," he writes, "its workers are to be found carrying on a militant campaign for transforming the antiquated trade union movement into a virile revolutionary organization."

Philadelphia Building Congress organized

Further progress in the organization and direction of building activities in the United States was effected during August when the Construction Conference Group which has been functioning informally at Philadelphia for the past two years was formally organized. The founding of the American Construction Council, a nation-wide organization having similar aims, at a convention held in Washington on June 19 and 20, was described in the last issue of the LABOUR GAZETTE. The Philadelphia Building Congress was created "with the desire to place the construction industries on a high plane of integrity and efficiency, and to correlate all efforts toward betterment now being made by existing organizations." Its aims are stated further as follows:—"to enable the building and construction industry to promote the general welfare by discovering, through scientific surveys, the needs of the public and of the industry; by finding and recommending ways and means of satisfying those needs; by defining group functions and harmonizing group activities through codes of ethics and practice, and by other means, agreeable to, and in the interest of the public and the industry, and conformable to law."

All elements in the industry are represented in the membership, the classification being similar to that adopted by the American Construction Council with groups representative of architects, engineers, general contractors, sub-contractors, construction labour, material and equipment manufacturers, and dealers, financial, surety, accounting, insurance, building, loan and real estate

organizations, chambers of commerce and boards of trade, public utility construction departments, representatives of Federal, State, County and municipal departments concerned with construction, associations of builders' exchanges and building trades employers, and the public.

Special committees will be appointed to recommend measures to cope with the various problems which belong to the industry. Thus the committee on vocational guidance and apprenticeship will co-operate with public educational bodies, with the Y. M. C. A., with employees' organizations, in making the building crafts attractive to learners, and in rendering the training courses more efficient. Another committee will deal with seasonal unemployment, studying local facts, compiling statistics, and devising means of preventing intermittency of employment as far as possible. A third committee will seek to coordinate new construction with maintenance work. It will make a survey of the maintenance requirements of buildings and structures in Philadelphia district, and determine the periods when labour on new con-

struction work is least employed, so that maintenance work may be done at a time when it would least conflict with new construction.

**China's first
National
Labour
Conference**

At the first National Conference of Chinese workers which was held at Canton from May 1 to 6, 1922, there were present 162 delegates from twelve cities, representing over 300,000 workers. The following resolutions were adopted.

(a) That principles for organizing a National Federation of Labour should be formulated.

(b) That a national jinrickshaw coolies' union be formed.

(c) That for the time being the labour movement should be economic rather than political in character.

(d) That the unions should stand for an eight-hour day.

(e) That during strikes all unions should pledge financial support.

(f) That plans should be made for a second National Labour Conference.

GENERAL REVIEW OF THE INDUSTRIAL SITUATION.

The Labour Market, Strikes, Prices.

The Labour Market

EMPLOYMENT as reported by employers showed a further upward movement during July and was again in greater volume than during the corresponding month of 1921. The percentage of idleness registered by trade unions at the end of July showed a further decline as compared with the previous month and a considerably more favourable situation in comparison with July of last year. The volume of business transacted by the offices of the Employment Service showed an increase during the month, the number of applications for work, vacancies notified and placements made all being larger than in the preceding month.

EMPLOYERS' REPORTS

Further increases in activity were indicated by the concerns making returns at the end of July, and conditions continued to be more favourable than at any period of 1921, the index number standing approximately 4 points higher than in July of last year. Improvement was recorded in all provinces, the expansion in Quebec, Ontario and the Prairie provinces being the most pronounced. Employment was in slightly greater volume in every district than during the corresponding period of 1921.

The largest increase in staffs during the month was that of 8,025 persons in iron and steel, the greater part being

due to the re-opening of the railway car shops temporarily closed down at the end of June. [Other branches of the industry, however, were also busier, notably rolling and forging mills at Sydney and New Glasgow, N.S.;] Montreal, Que.; Hamilton, Sault Ste. Marie and Oshawa, Ont. The production of boilers, engines and tanks increased moderately, chiefly at Brantford, Galt and Toronto, Ont. The railway car shops that resumed operations were some of those at London, Stratford, and Montreal. Automobile works at Ford and Leaside, Ont., reduced their staffs, but at Hamilton car concerns were busier. Shipyards at Halifax, Montreal, Collingwood and Victoria were not as fully engaged as in June. Apart from the expansion in the iron and steel group as a whole, which was so largely in the nature of recovery, the most pronounced increases during the month occurred in railroad construction and maintenance, 3,633 persons having been added to the staffs of the divisional superintendents and concerns making returns. These additions were somewhat smaller than those registered during May and June. The Grand Trunk Railway, with an increase of approximately 1,500 men, showed the largest expansion. The Canadian National Railways absorbed over 1,100 additional workers, while the gains on the Canadian Pacific Railway provided for nearly 1,000 persons. The most marked increases occurred in Ontario, but those in Alberta, Saskatchewan and Quebec were also extensive. Considerably more activity was evidenced in railway transportation, approximately 1,800 persons having been added to the staffs of the concerns and divisional superintendents reporting. Of this increase the Canadian Pacific reported over 600, while the Canadian National enlarged its working forces by almost the same number and the Grand Trunk indicated a gain of slightly more than 100 employees, the balance being reported by other railways. Ontario, Manitoba and Saskatchewan absorbed the majority of the additionally employed workers. Further improvement was re-

gistered by sawmills, notably at Chat-ham and St. John, N.B., Buckingham and Restigouche, Que.; Ottawa, Ont.; and Castlegar, B.C. Employment in building construction continued on a high level, increases in personnel being recorded in all provinces except British Columbia. The expansion was particularly large in Montreal, Quebec, Fort William, Ottawa and Toronto. Fruit preserving establishments continued to be busy in Ontario and the re-opening of such factories, caused increases in staffs, especially in the Kelowna region in British Columbia. Sugar manufacturers in Montreal reported increased activity, while the production of biscuits and confectionery in London and Toronto also showed expansion. Telephone operation absorbed a considerably larger working force than in June, especially in Manitoba. Employment in wholesale establishments increased, the gains being of a general character. Street and electric railways reported some improvement in the situation, particularly in Winnipeg and Vancouver. Varying conditions were noted in shipping and stevedoring during July. In the Maritime district, additions to staffs at Sydney, N.S., were more than offset by declines at St. John, N.B. In Quebec the balance of employment was favourable, increased activity being indicated on the whole, especially at Montreal. On the other hand, reductions in employment were recorded in British Columbia, mainly at Vancouver. The volume of employment afforded in the mining industries was somewhat higher, there being moderate increases in the coal fields, in the metallic ores, asbestos and quarrying divisions. The improvement in the first named occurred in Nova Scotia and British Columbia, the tendency in Alberta being unfavourable. The gold mines in Ontario and British Columbia absorbed the majority of the workers additionally employed in the metallic ores division, although there was also increased activity in the silver, lead and zinc division. The Timmins district accounted for the bulk of the expansion in the former province, while in the lat-

ter, increased activity was indicated particularly at Kimberley, Alamo, and Britannia Beach. The production of electrical apparatus showed a further gain, especially at Hamilton, Ont.

The largest contractions during the month were those of a seasonal character which occurred in logging camps, from which over 1,300 persons were released. Quebec firms reported over 50 per cent of the contractions, the declines being registered mainly at Louiseville and in the Gatineau district. Heavy losses were also indicated in Ontario notably at Haileybury, Iroquois Falls, Chapleau and Upper Ottawa points and British Columbia, at Elk and Duncan Bays, Wattsburg and Stillwater. Employment on public highways, chiefly in Ontario, declined very considerably. On the other hand, increased activity was manifested in Nova Scotia, especially in the New Glasgow and Sydney regions. Between season dullness continued to affect employment in the textile industries to a marked degree, especially in garment and personal furnishing factories. Many shut-downs of Toronto concerns were reported, and reduced activity was also indicated at Hamilton, Guelph and other Ontario cities. Improvement was reported, however, in Montreal, Three Rivers and other centres in Quebec. The completion of the season's operations in lobster and fish canneries in the Maritime provinces caused large losses in employment in the edible animal products group. Abattoirs in the Prairie provinces afforded slightly more employment than in June. Activity in boot and shoe factories declined to a considerable degree, partly on account of temporary shut-downs for repairs, holidays and inventories; the largest losses occurred in Montreal, Toronto, Brantford and Vancouver. Contractions in employment, were reported in pulp and paper factories, particularly at Three Rivers, Mont Rolland and Murray Bay in the province of Quebec. Reduced employment was reported by retail establishments, the de-

clines which were of a general character, were most marked in Toronto, Montreal, Winnipeg and Calgary.

As mentioned previously, the level of employment indicated during July was somewhat higher than during the corresponding month of last year. The index numbers in the majority of groups were higher, particularly so in lumber and its products, pulp and paper, textiles, electric current, clay, glass and stone products, in the mining of metallic ores and of non-metallic minerals other than coal, in transportation and construction. Employment in logging, coal mining and in the communication industries continued to be in somewhat less volume than during the same period of last year.

TRADE UNION REPORTS

Unemployment, as indicated by returns tabulated from 1,541 labour organizations with a combined membership of 162,632 persons, showed a further slight decline during July, the percentage standing at 4.1 in comparison with 5.3 at the end of June and with 9.1 on July 31, 1921. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades or who are idle because of sickness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.) Small increases in activity as compared with the preceding month were indicated in every province except Quebec where there was very slightly more slackness. Trade unionists in every district were more fully engaged than in July 1921. No change on the whole was reported in the manufacturing industries during July as compared with June, the percentage of unemployment

being practically the same for both months. Some variation however, was apparent within the manufacturing groups. Sugar refinery, pulp and paper mills, iron and steel and unclassified workers registered smaller percentages of unemployment. Tradesmen in the printing and publishing, furniture and woodworking, textile, leather, jewelry and glass divisions were not as busy. Garment workers recorded approximately the same unemployment as in June. Mine workers in Nova Scotia were considerably busier, while in Alberta and British Columbia employment in the coal fields remained quiet on account of the strike still in existence at the end of July. Quarry workers in Nova Scotia continued to be fully employed. The percentage of unemployment reported by asbestos miners in Quebec was slightly higher than in the preceding month. Unemployment in the building and construction industries showed a further slight decline, the percentage of idleness standing approximately 15 points lower than on July 31, 1921. Bridge and structural iron workers, steam shovel and dredgemen, painters, decorators and paperhangers reported slightly larger percentages of idleness than in the preceding month, while all other tradesmen in the group were more fully engaged. Improvement continued to be recorded in the transportation industries, chiefly by steam railway employees. Practically no change in the situation was recorded in the shipping and stevedoring and local transportation divisions. Fishermen were somewhat busier. Lumber workers and loggers, on the other hand, were hardly as fully employed. Hotel and restaurant, and theatre and stage employees and unclassified workers registered smaller percentages of unemployment than in June. Barbers and stationary engineers

and firemen on the other hand reported a rather less favourable situation.

EMPLOYMENT OFFICE REPORTS During the month of July, 1922, the offices of the Employment Service made 32,076

references to positions and effected a total of 30,146 placements, of which 23,970 were in regular employment and 6,176 in casual work. Of the placements in regular employment 20,904 were of men and 3,066 of women. The number of applications for work registered at the office during the month was 40,486 (31,978 from men and 8,508 from women). Vacancies notified by employers to the Service during the month numbered 36,606, of which 28,649 were for men and 7,957 for women. The reports from the offices during the month indicated a considerable gain in the average number of positions offered and placements made daily as compared with the preceding month, due to the early expansion in the agricultural group in the Prairie provinces. A comparison with the reports of the same period a year ago shows a decline in the average number of applications and vacancies during July of this year, while the average number of placements effected daily showed a slight increase. The following table presents the returns from the offices on the basis of daily average over half-month periods during July, 1922, as compared with the preceding month and with the corresponding month of 1921.

	June, 1922		July, 1921		July, 1922	
	1st half month	2nd half month	1st half month	2nd half month	1st half month	2nd half month
Applications	1,725	1,547	1,612	1,626	1,643	1,710
Vacancies...	1,525	1,313	1,444	1,483	1,466	1,566
Placements..	1,263	1,160	1,192	1,218	1,163	1,233

PRODUCTION REPORTS

According to the monthly reports issued by the Dominion Bureau of Statistics the production of pig iron during July showed an increase of 10.2 per cent over the record for June. A tonnage of 31,705 was reported for the month under review as compared with a production of 28,763 tons in the previous month. The amount of basic pig iron manufactured for further use by the reporting firms increased from 14,714 tons in June to 25,419 tons in July. The output of pig iron in July, 1921, was 54,086 tons, showing a decrease of 41.4 per cent for the month under review. During the seven months ending July 31 last, there was a total production of 223,892 tons, as compared with 363,292 tons produced during the corresponding period of 1921. At the end of the month, there were in operation two furnaces at Sault Ste. Marie and one at Sydney. Seventeen blast furnaces were idle at the end of July.

The production of steel in July amounted to 62,767 long tons as compared with 32,805 in June and about 42,000 in February, which was the month of the next highest production of the year. The cumulative steel production during the first seven months of the present year was 239,847 tons as compared with 349,118 in the corresponding period of last year. The output of open hearth basic ingots in the first seven months of the present year was below the production in the corresponding period of last year by 104,095 tons, and steel castings by 3,918 tons.

BUILDING PERMITS AND CONTRACTS AWARDED

There was another slight decline in the volume of building authorized by 56 cities during July, when the value of the permits issued stood at \$14,275,026, as compared with \$15,799,680 in June. The difference represented a contraction of 9.6 per cent. The volume of building contemplated

during the month, however, was slightly over 40 per cent higher than in July, 1921, when the permits totalled \$10,182,125. Prince Edward Island and Alberta were the only provinces to record gains as compared with the preceding month. Of the decreases elsewhere, that in Ontario of \$683,725, or 8.5 per cent, was the largest actual loss, although the percentage declines were larger in several other districts. All provinces except Manitoba and Saskatchewan reported increases in the value of the building authorized as compared with July of last year. The reductions in those districts were very slight. Ontario, with a gain of over \$2,000,000, or more than 50 per cent, and Quebec with an expansion of over \$1,000,000, or 41 per cent, showed the most pronounced increases. Of the larger cities—Montreal, Toronto, Winnipeg and Vancouver—only the last named, issued permits of a higher value than in June. All four cities, however, showed increases as compared with July, 1921. Of the smaller cities, St. John, Quebec, Brantford, Fort William, Hamilton, Ottawa, St. Thomas, Sault Ste. Marie, Calgary, and New Westminster registered expansion in the volume of building contemplated in both comparisons.

According to the *Canadian Building Review*, issued by MacLean's Building Reports, Limited, the value of the contracts awarded during July amounted to \$26,694,200, as compared with \$35,620,400 in June and with \$17,741,400 in July, 1921. There was, therefore, a decline of 25 per cent in the former and an increase of 50 per cent in the latter comparison. Of the total for the month being reviewed, \$1,318,300 or approximately 5 per cent was to be spent in the Maritime Provinces; \$19,757,700 or 74 per cent in Quebec and Ontario, and \$5,618,200 or 21 per cent in the Western Provinces. Another analysis shows that \$9,434,400 was to be used for residential purposes, \$8,146,400 on business buildings, \$1,397,800 on industrial projects and \$7,715,600 on engineering contracts.

Strikes.

The time loss due to industrial disputes was greater during August than during either July, 1922, or August of last year. There were in existence at some time or other during the month 24 strikes involving about 24,006 workpeople with an estimated time loss of 437,017 working days, as compared with 22 strikes, involving 15,736 workpeople and 261,240 working days in July, 1922; and 31 strikes, 3,442 workpeople and 73,273 working days in August, 1921. On August 1, there were on record 19 strikes, effecting 9,491 workpeople. Five strikes were reported as having commenced during August, as compared with three during July. Three of the strikes commencing prior to August and three of those commencing during August terminated during the month, leaving 18 strikes involving about 15,408 workpeople on record at the beginning of September.

Prices.

Lower prices for grains and livestock caused a fall in the index number of wholesale prices in spite of a substantial increase in coke, while prices of coal were to a great extent nominal. In retail food prices there was an increase due chiefly to seasonal advances in potatoes.

The index number of wholesale prices stood at 222.8 for August as compared with 225.3 for July; 224.3 for June; 236.4 for August, 1921; 330.2 for

August, 1920; 301.1 for August, 1919; 247.3 for August, 1917; and 136.3 for August, 1914. The chief changes for the month were substantial declines in grains, fodders and livestock, with an increase in Connellsville Coke. There were also slight declines in meats, butter, cheese, flour, raw cotton, raw silk, jute, cement, linseed oil, and turpentine; with increases in sugar, potatoes, hides, pig iron, lath, and soil pipe. Some of the metals advanced slightly.

In retail prices the average cost of a weekly family budget of twenty-nine staple foods in some sixty cities was \$10.44 at the beginning of August; \$10.27 for July; \$11.44 for August, 1921; \$16.42 for August, 1920; \$11.68 for August, 1917; and \$7.68 for August, 1914. The total for food, fuel, and rent averaged \$20.88 at the beginning of August as compared with \$20.67 for July; \$21.98 for August, 1921; \$26.60 for August, 1920; \$18.48 for August, 1917; and \$14.41 for August, 1914. No marked changes occurred in foods except a seasonal increase in potatoes. Beef and veal were slightly lower while mutton and pork were up somewhat. Rice and evaporated apples also registered small declines. Most of the other items showed small increases, the chief of which were in dairy products and sugar. Bread and flour were unchanged. Fuel was slightly higher. Rent remained practically at July level.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

Proceedings for the month of August, 1922.

DURING the month of August no reports were received by the Department from Boards of Conciliation and Investigation established under the Industrial Disputes Investigation Act, 1907. On September 1, however, a report, which is given below, was received from a Board established to deal with differences between the leading railways of Canada, members of the Railway Association of Canada, and their shop crafts employees, members of Division No. 4, Railway Employees' Department, American Federation of Labour.

Applications received.

Three applications for the establishment of Boards of Conciliation were received during the month as follows:—

(1) From employees of the Canadian Pacific Railway Company, Western lines, being clerks, checkers, freight handlers, baggagemen, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. By mutual agreement this dispute was brought within the jurisdiction of a Board which had been established to deal with a similar dispute on the Western lines of the Canadian Pacific Railway affecting the same classes of employees. This Board was composed as follows: Mr. Daniel Urquhart, Toronto, chairman, appointed by the Minister on the joint recommendation of the other two members of the Board, Messrs. J. T. Arundel, Oakville, Ont., and J. G. O'Donoghue, To-

ronto, Ont., nominees of the Company and employees respectively.

(2) From employees of the Marconi Wireless Telegraph Company of Canada, Limited, being certificated Marconi wireless operator employees, members of the Commercial Telegraphers' Union of America, System Division No. 59. A Board was established, composed as follows: Mr. E. McG. Quirk, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Melville P. White, Toronto and Thomas Taylor, Toronto, nominees of the Company and employees respectively.

(3) From employees of the British Columbia Lake and River Service of the Canadian Pacific Railway Company, being shipmasters, mates and marine engineers employed in vessels on Lakes Kootenay, Slocan, Arrow and Okanagan, members respectively of the Canadian Navigators' Federation, Pacific Division, and of the National Association of Marine Engineers. A Board had not been established at the end of the month.

Other Proceedings under the Act.

In the case of a dispute between the Canadian Pacific Railway Company and certain of its employees being station agents, assistant agents, telegraph operators, train despatchers and linemen, members of the Order of Railroad Telegraphers, a Board had been established in July, but no hearings of the Board

took place as the matters in dispute were settled through direct negotiations between the parties interested and Board procedure became unnecessary.

In the case of a dispute between the Canadian National Railways and certain of its employees being clerks, freight handlers, roundhouse shop and store labourers, etc., members of the Canadian Brotherhood of Railroad Employees, a Board was completed by the appointment of Mr. F. T. Costello, Alexandria, Ont., as chairman, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Messrs. George D. Kelley, Ottawa and Howard S. Ross, K.C., Montreal, nominees of the Railways and employees respectively.

In the case of a dispute between the Grand Trunk Railway System and certain of its employees, being clerks, freight handlers, stationmen, stationary engineers and firemen, oilers, roundhouse, shop and store labourers, a Board was completed by the appointment of Mr. E. McG. Quirk, Montreal, as chairman, who was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. U. E. Gillen, Toronto and Howard S. Ross, K.C., Montreal, nominees of the Railway and employees respectively.

In the case of a dispute between the Pere Marquette Railway Company and

certain of its employees, being clerks, checkers, greight handlers, baggagemen, etc., a Board was completed by the appointment of Mr. W. T. R. Preston, Ottawa, chairman, who was appointed by the Minister in the absence of a point recommendation from the other two members of the Board, Messrs. Alexander Leslie and Charles B. McClurg, nominees of the Company and employees respectively.

In the case of a dispute between the Canadian Pacific Railway Company (Eastern Lines) and certain of its employees, being clerks, checkers, freight handlers, baggagemen, etc., a Board was completed by the appointment of Mr. Daniel Urquhart, Toronto, chairman, on the joint recommendation of the other two members of the Board, Messrs. J. T. Arundel, Oakville, Ont., and J. G. O'Donoghue, Toronto, nominees of the Company and employees respectively.

In the case of a dispute between the Marconi Wireless Telegraph Company of Canada and certain of its employees, being members of Federal Labour Union, No. 16570, American Federation of Labour, a Board was established composed as follows: Rev. Dr. Clarence Mackinnon, Halifax, chairman, appointed on the joint recommendation of the other two members of the Board, Messrs. Stewart McCawley and William Ulric Cotton, both of Glace Bay, N. S., nominees of the Company and employees respectively.

Report of Board in Dispute Between Various Railway Companies and their Shop Crafts Employees.

THE findings of the Board of Conciliation and Investigation established to deal with differences between the leading railways of Canada and their shop crafts employees were received by the Minister of Labour on September 1, and, because of the large interests involved in the dispute, the text of the report is included in the present (September) issue of the LABOUR GAZETTE. The report was signed by Mr. Alex. Smith, Chairman, and Mr. Isaac Pitblado, K.C., employer member of the Board. A minority report was received from Mr. James Simpson, the workmen member of the Board, which also is printed in the present issue of the LABOUR GAZETTE. Certified copies of the findings and of the minority report were forwarded immediately to the parties to the dispute, but their attitude thereto had not been made known to the Minister up to the time of going to press. The text of the Board's findings and of the minority report is as follows:

Report of Board.

Re: Industrial Disputes Investigation Act, 1907, and of differences between (1) various railways, members of the Railway Association of Canada, including the Canadian National Railways, the Canadian Pacific Railway and the Grand Trunk Railway, and (2) workmen, members of Division No. 4, Railway Employees Department, American Federation of Labour, and being motive power and car department mechanics, helpers and apprentices, in the employ of the said railways.

To the Hon. James Murdock, M.P.,
Minister of Labour.

Sir:

The undersigned members of the Board of Conciliation and Investigation herein beg to report as follows:

Upon application of the employees, dated July 13, 1922, a Board of Conciliation and Investigation was established as of date of July 20, 1922, and on August 3, 1922, the members of the Board were appointed as follows:—Mr. Alexander Smith, Barrister, Ottawa, Chairman; Mr. Isaac Pitblado, K.C., Winnipeg, Man., representing the Employers; Mr. James Simpson, Toronto, Ont., representing the Employees.

On the same day, by telegraph and other correspondence, it was arranged that the first meeting of the Board be held in the city of Ottawa, at 48 Sparks Street, in the forenoon of Tuesday, August 8, 1922.

The Board convened at that time and place, and duly organized for future sittings. Mr. H. V. Attfield of the Department of Labour was appointed Secretary. The Board then adjourned to sit in the City of Montreal in the forenoon of Thursday, August 10, 1922, in the Court House, where public meetings of the Board were held on August 10, 11, 15, 16, 17 and 18. Since that date the Board has met for conference on August 21, 22, 23, 25, 26, 28, 29, 30, 31 and September 1, 1922.

The employees were represented by:—Mr. R. J. Tallon, President, Division No. 4, Railway Employees Department, American Federation of Labour, Montreal, Que.; Mr. Frank McKenna, Vice-

President, Division No. 4, Railway Employees Department, American Federation of Labour, Montreal, Que.; Mr. John Bruce, General Representative of the Plumbers and Steamfitters, Toronto, Ont.; while the employers were represented as follows:—Canadian Pacific Railway Company, Mr. George Hodge, Assistant General Manager, Montreal, Que.; Canadian National Railways, Mr. A. J. Hills, Assistant to President, Toronto, Ont.; Grand Trunk Railway Company, Mr. C. F. Needham, Assistant General Superintendent, Motive Power and Car Department, Montreal, Que.

At the opening of the proceedings Mr. Tallon on behalf of the employees stated that employees were being paid by the railways at the proposed reduced rates, and submitted that this was in violation of Section 57 of the Industrial Disputes Investigation Act, and requested the Board to give a ruling to the effect that the railways should not put the reduced rates in force.

Mr. Hodge contended that the Board had no jurisdiction to give such a ruling, that the question, whether there had been a violation of the law by any party, was for some other tribunal, that the jurisdiction of the Board was merely to deal with the specific dispute disclosed in the application and reply, and to make a report thereon. He, however, contended that the railway companies took the position that they were not violating the law. He also pointed out that the reduced rates, while put in effect by the railways, were only tentative in their character and submitted that in reality all that was being done was that for the protection of the railways a portion of the men's pay was being tentatively withheld pending a final adjustment of rates between the men and the companies.

Mr. Tallon, in reply on behalf of the employees, strongly contended that the withholding of part of the pay was a breach of the Act, and that the employees would not proceed before the Board until this was rectified.

The Chairman announced that the Board was not required to give rulings on purely legal points, but it was prepared to proceed with the duties assigned to it under the powers of the Act. Subsequently the Chairman repeated the opinion of the Board that the Board was prepared to proceed under all the conditions as they existed as it had its own duties to perform.

On the following day, Friday, August 11, 1922, after consultation between the members of the Board and representatives of both parties, the representatives of the employees decided to make representations to the Right Honourable, the Prime Minister of Canada. This they did with the result that a letter was sent by him to the different railways to the effect that the Government concurred with the view which had been expressed by the law officers of the Crown, that any change in wages or conditions prior to the dispute being dealt with by a Board of Conciliation was in violation of Section 57 of the Act, and urged the railways concerned to continue the old rates of pay in the meantime. In transmitting to the Chairman of the Board a copy of the letter of the Rt. Hon. the Prime Minister, the Deputy Minister of Labour and Registrar concluded his communication as follows:

I am to add that it is the intention of the Government to accept the view of the Department of Justice and to support the same in any contingency that may arise.

At a subsequent sitting of the Board the representatives of the railway companies submitted a copy of a reply written by the railway companies to the Prime Minister on August 15, 1922, in answer to the said letter, in which reply the railway companies, after reiterating their view that the course which had been followed by them was not in violation of the law, concluded as follows:

In view, however, of the decision of the Government to accept the opinion of the Department of Justice, we will undertake, pending an anticipated early report of the Board of Conciliation now sitting, that the scale of

shop crafts wages in force prior to July 16th last will be continued, on the understanding that the companies' case before the Board of Conciliation will not be thereby prejudiced, and that the companies shall not thereby be precluded from taking the position in negotiating an agreement during or subsequent to the proceedings of the Board that the new scale should be retroactive to 16th July last.

This matter having thus been disposed of, Mr. Tallon opened the case for the employees with reference to the question in dispute before the Board, and Mr. Hodge, on behalf of the railways, submitted the railways' case, his views being concurred in by Mr. Hills and Mr. Needham. Mr. Tallon, Mr. McKenna and Mr. Bruce then replied on behalf of the employees. Both sides made full representations to the Board in regard to the matters in dispute, and a number of exhibits were put in.

In the course of the proceedings both sides submitted copies of the notice from the railway companies to the employees concerned, as posted in the shops on or about July 13, 1922. This notice contains a fair report of the proceedings up to the time the Board was appointed, and is as follows:—

To:—Mechanics, Carmen, Helpers and Apprentices—Car and Locomotive Departments.

Pursuant to the terms of Wage Agreement made between the Railway Association of Canada and Division No. 4, Railway Employees Department, American Federation of Labour, representing respectively the Railways specified in the agreement and the specified classes of employees in the Car and Locomotive Departments, the required thirty days' notice for a revision of agreement was issued by the Association to the Employees' representatives on June 14, 1922, as follows:—

In accordance with terms of memorandum of agreement dated January 13th, 1922, Notice is hereby given of the Association's desire to revise the existing rates of pay of employees covered by Wage Agreement No. 4, by making the following reductions effective thirty days from date:—

Decrease of

Machinists, boilermakers, blacksmiths, sheet metal workers, electrical workers, (including linemen, groundmen, electrical transfer table operators, coal pier elevator operators and coal pier electric hoist operators), carmen (except freight carmen), moulders, including those with less than four years' experience, all crafts.....	7c per hour
Freight carmen.....	9c per hour
Regular and helper apprentices and helpers, all classes.....	7c per hour
Car cleaners.....	5c per hour

Kindly advise as early as possible upon what date your committee will be prepared to meet the Association's Wage Subcommittee at Montreal to discuss the foregoing.

Pursuant to this notice the representatives of the railways and of the employees met in conference commencing Wednesday, July 5th, and upon opening negotiations a proposition was submitted on behalf of the railways to the employees reading as follows:—

Referring to our letter of June 14th, last. In connection with the application of the revised rates of pay specified, it is proposed that they shall be adopted without prejudice pending further consideration and subject to further negotiations on thirty days' notice from either party to the other.

This proposition was not accepted on behalf of the employees and following further conferences and negotiations another communication was addressed to the employees' representatives on July 10th, 1922, reading as follows:—

Referring to the discussions which have taken place between our respective Committees regarding the proposed revision in rates of pay as specified in my letter to you of June 14th last. Recognizing under existing conditions, quite apart from the rates of pay themselves, that there might be reasons why your Committee could not see their way clear to accept by agreement unconditionally the reductions which the Railways purpose to put into effect on July 16th, next, it was proposed to your Committee in my letter of July 6th that they should be made effective without prejudice pending further consideration and subject to further negotiations on thirty days' notice from either party to the other. This proposition you have not accepted.

With every desire to make it possible to mutually agree with respect to the application of the decreases which the railways find it necessary to put into effect pursuant to their notice, it is further proposed that the revision of rates of pay should be made effective on the basis mentioned and that promptly upon notice from one party to the other, the representatives of both parties will confer further; and also that, except as may be otherwise mutually arranged, any rates of pay finally agreed upon will be effective as from July 16th, 1922, and that adjustments will be made accordingly.

Such an arrangement as that now proposed would have the effect of fully protecting the interests of both the employees and the railways pending the opportunity for further proper consideration of the railways' proposals and it is hoped that upon further reflection on the matter your Committee will recognize its fairness to all interests affected and decide to enter into an agreement which would have the effect of preserving the present relationships.

In reply to this communication a letter was received from the Employees' Committee under date of July 11th stating as follows:—

Our Committee has given your proposal very serious consideration, and I am instructed to advise you that the proposal made by your Committee is not acceptable to them, and unless your Committees are prepared to postpone the putting into effect of the proposed decrease in rates of pay they will proceed to call for a Board of Conciliation. It is hoped your Committee will recognize the justness of our position and give it the serious consideration it warrants.

A further communication was thereupon addressed to the employees' representatives on July 12th, reading as follows:—

Replying to your letter of July 11th advising that the proposal contained in our communication of July 10th regarding revision in rates of pay is not acceptable to your Committee.

Our Wage Sub-Committee have directed me to say that they have no authority to go beyond the proposal made which they had expected in view of its fairness and protecting as it does the interests of the employees would be acceptable to your Committee. The matter is, therefore, being referred to the Association's Operating Committee and you will be promptly advised of their decision.

As a result of this communication a meeting of the Association's Operating Committee was

held and a further communication dated July 13th, was addressed to the Employees' representatives reading as follows:—

The Operating Committee of the Association is in receipt of information from its Wage Sub-Committee that your Committee has been unable to agree with them regarding the proposed revision of rates of pay for employees in the Car and Locomotive Departments of the several Railways involved on the basis of the proposals in communications addressed to you dated respectively June 14th, July 5th, July 10th and July 12th, 1922. I am, therefore, directed to advise you that the Operating Committee is informing the Railways affected of the situation in order that they may be in a position to make effective changes in rates of pay in accordance with the notice served on behalf of each of them dated June 14th, 1922, and the proposal of the Association's Sub-Committee as contained in their letter of July 10th.

It will be observed that the last proposition of the Railways would merely have the effect of withholding under the terms stated the payment of the differences in rates specified from the existing rates of pay pending negotiations, when conditions would probably make it possible for the representatives of the railways and of the employees to reach an agreement which would be mutually satisfactory.

This Company is in receipt of advice that the proposition submitted through the Railway Association of Canada on its behalf has not been accepted by the representatives of the Employees. The Railway is in fairness entitled to protect the effective date of any revision of rates of pay downwards to be agreed upon or determined in the same way as Employees have repeatedly been protected as to the effective date of revisions of rates of pay upwards. Therefore, the Company cannot consistently delay the application, on the basis stated, of the specified reductions in rates of pay and, therefore, they will be put into effect on the payrolls commencing with the second half of July, 1922, with the understanding that adjustments as may be necessary will later be made as from July 16th, 1922, in accordance with the proposal of the Association's Sub-Committee as contained in their letter of July 10th quoted above. Montreal, July 13th, 1922.

On Thursday, August 17, 1922, after the representatives of both parties had presented their cases, the Board consulted with them and subsequently an adjournment was announced until the following day in order to give the parties an opportunity to discuss, and if possible arrive at, a mutual tentative

agreement, as outlined in the notice posted in the shops.

When the Board met on the following day the representatives of both parties reported that they had been unable to come to any such agreement and asked the Board to make an early decision on the material submitted.

From the correspondence and negotiations which took place between the parties, and the proceedings as set out in the said notice, it seems clear to the undersigned that the dispute before the Board is not one in regard to fixed or definite rates of pay, but merely has to do with tentative rates. The railway companies proposed that certain tentative rates should be made effective which would have the effect of withholding payment of the differences in rates (as specified in the notice) from the existing rates of pay "pending negotiations when conditions would probably make it possible for the representatives of the railways and of the employees to reach an agreement which would be mutually satisfactory."

This proposal of the railway companies was refused by the employees. This disagreement constitutes the dispute before this Board.

The tentative rates of pay which were in the proposal of the railway companies embodied the reductions which had been ordered by the United States Railroad Labor Board, applicable to railroads in the United States, and which became effective on the 1st of July, 1922. It was shown in evidence before the Board that the plan suggested by the railway companies in Canada had been followed on four former occasions, namely 1918, 1919, 1920 and in 1921. In 1921 a reduction had been ordered in the United States by the United States Railroad [Labor] Board, effective on 1st July, 1921, and on the 13th July, 1921, an agreement was entered into between the employees concerned in this application and the Canadian railway companies along the lines now suggested. It was further shown that other classes of em-

ployees, both on former occasions and in the present year, had entered into agreements with the railway companies along the lines of the proposed tentative agreement.

On behalf of the employees, Messrs. Tallon, McKenna and Bruce argued that whilst their organization was international in character, yet, that wages and working conditions in Canada should be determined in accordance with the needs and requirements here. They also stated that the acceptance of the wages as fixed for employees in the United States in the year 1920, at the time of the McAdoo Award, had been because the (Canadian) Government of the day had so suggested, although the (Canadian) employees had protested, and asked that changes up or down in the scale of wages in Canada should be determined on conditions in Canada. They contended that the reduction of 8 cents per hour in 1921 was a sufficient reduction and no further reduction was now necessary.

The Board while not laying down the principle that United States conditions should always prevail in every detail is impressed with the bearing which the United States wage adjustments have had on Canadian railway wages during the last five years, and particularly with respect to the class directly concerned in these proceedings. Increases in pay in the United States have resulted in the same increases in Canada. Conditions and wages in the United States always have a bearing on conditions and wages in Canada for railway employees whose duties, responsibilities and services are largely of an identical character. The fact, therefore, that the large majority of the membership of the men's organization have expressed their willingness to resume work at reduced rates in the United States subject to a rehearing by the United States Railroad Labor Board is an argument for the same class of employees on Canadian railways continuing work under the same scale protected as they are by the railways' proposals, under which, in

Canada the reductions are only tentatively withheld.

The view of the undersigned is that the question of permanent rates (the word "permanent" being understood to mean rates embodied in a wage agreement but subject to the usual termination clause included therein) has not yet received sufficient consideration by the parties to the dispute, the railways taking the position that their announced intention was only with respect to tentative withholdings. Only meagre evidence was submitted to the Board which would assist the Board to form a judgment on permanent rates. Therefore, in the opinion of the Board, the parties thereto should confer with respect to permanent rates as soon as conditions would indicate that such an arrangement might reasonably be concluded, and if they fail to reach an agreement, such disagreement would constitute a new dispute for the hearing of which the laws provide ample means.

It seems to the undersigned that the proposed tentative agreement while fully protecting the railway companies in case a definite reduction in rates by mutual agreement became retroactive until 16th July, at the same time fully protected the interests of the employees until such time as such definite agreement could be entered into, and was a fair and reasonable proposal.

Having in view, the fact that the railways by the communication above quoted, undertook, pending a report of the Board, to pay the employees at the old rates of pay on the conditions set out in the communication, the Board recommends that the rates of pay suggested in the notice posted in the shops should be made effective from the 15th August, 1922, on the basis mentioned in such notice, and that promptly upon notice from one party to the other, the representatives of both parties confer further as to definite or permanent rates, provided, however, that in so far as such definite rates are concerned, they should, when agreed upon, be retro-

active to 16th July, 1922, and that notwithstanding the fact that the employees have received, or will receive, pay at the old rates up to the 15th August, 1922, any necessary adjustments, when definite rates are agreed upon, be made as of 16th July, 1922. In negotiating an agreement covering such definite rates, the employees will have the advantage of having actually received the old rates of pay until August 15th, 1922.

Respectfully submitted.

(Sgd.) ALEX. SMITH.

(Sgd.) ISAAC PITBLADO.

Ottawa, Ont., September 1st, 1922.

Minority Report.

Re: Industrial Disputes Investigation Act, 1907, and of differences between (1) various railways, members of the Railway Association of Canada, including the Canadian National Railway, the Canadian Pacific Railway and the Grand Trunk Railway, and (2) workmen, members of Division No. 4, Railway Employees Department, American Federation of Labour, and being motive power and car department mechanics, helpers and apprentices in the employ of said railways.

To the Hon. James Murdock, M.P.,
Minister of Labour.

Sir:

The undersigned member of the Board of Conciliation and Investigation herein begs to report as follows:—

Upon application of the employees, dated July 13, 1922, a Board of Conciliation and Investigation was established as of date of July 20, 1922, and on August 3, 1922, the members of the Board were appointed as follows:—Mr. Alexander Smith, Barrister, Ottawa, Ont., Chairman; Mr. Isaac Pitblado, K.C., Winnipeg, Man., representing the Employers; Mr. James Simpson, Toronto, Ont., representing the Employees.

On the same day, by telegraph and other correspondence, it was arranged

that the first meeting of the Board be held in the City of Ottawa, at 48 Sparks Street, in the forenoon of Tuesday, August 8, 1922.

The Board convened at that time and place, and duly organized for future sittings. Mr. H. V. Attfield of the Department of Labour was appointed Secretary. The Board then adjourned to sit in the City of Montreal in the forenoon of Thursday, August 10, 1922, in the Court House, where public meetings of the Board were held on August 10, 11, 15, 16, 17 and 18. Since that date the Board has met for conferences on August 21, 22, 23, 25, 26, 28, 29, 30 and September 1, 1922.

The employees were represented by:—Mr. R. J. Tallon, President, Division No. 4, Railway Employees Department, American Federation of Labour, Montreal, Que.; Mr. Frank McKenna, Vice-President, Division No. 4, Railway Employees Department, American Federation of Labour, Montreal, Que.; Mr. John Bruce, General Representative of the Plumbers and Steamfitters, Toronto, Ont.; while the employers were represented as follows:—Canadian Pacific Railway Company, Mr. George Hodge, Assistant General Manager, Montreal, Que.; Canadian National Railways, Mr. A. J. Hills, Assistant to President, Toronto, Ont.; Grand Trunk Railway Company, Mr. C. F. Needham, Assistant General Superintendent, Motive Power and Car Department, Montreal, Que.

At the opening of the proceedings Mr. Tallon on behalf of the employees stated that employees were being paid by the railways at the proposed reduced rates, and submitted that this was in violation of Section 57 of the Industrial Disputes Investigation Act, and requested the Board to give a ruling to the effect that the railways should not put the reduced rates in force.

Mr. Hodge contended that the Board had no jurisdiction to give such a ruling, that the question, whether there had been a violation of the law by any party, was for some other tribunal, that the

jurisdiction of the Board was merely to deal with the specific dispute disclosed in the application and reply, and to make a report thereon. He, however, contended that the railway companies took the position that they were not violating the law. He also pointed out that the reduced rates, while put in effect by the railways, were only tentative in their character, and submitted in reality that all that was being done was that for the protection of the railways a portion of the men's pay was being tentatively withheld pending a final adjustment of rates between the men and the companies.

Mr. Tallon, in reply on behalf of the employees, strongly contended that the withholding of part of the pay was a breach of the Act, and that the employees would not proceed before the Board until this was rectified.

The Chairman announced that the Board was not required to give rulings on purely legal points, but it was prepared to proceed with the duties assigned to it under the powers of the Act. Subsequently the Chairman repeated the opinion of the Board that the Board was prepared to proceed under all the conditions as they existed as it had its own duties to perform.

On the following day, Friday, August 11, 1922, after consultation between the members of the Board and representatives of both parties, the representatives of the employees decided to make representations to the Right Honourable, the Prime Minister of Canada. This they did with the result that a letter was sent by him to the different railways to the effect that the Government concurred with the view which had been expressed by the law officers of the Crown, that any change in wages or conditions prior to the dispute being dealt with by a Board of Conciliation was in violation of Section 57 of the Act, and urged the railways concerned to continue the old rates of pay in the meantime. In transmitting to the Chairman of the Board a copy of the letter from the Right Honourable the Prime Minister, the De-

puty Minister of Labour and Registrar concluded his letter as follows:—

I am to add that it is the intention of the Government to accept the view of the Department of Justice and to support the same in any contingency that may arise.

At a subsequent sitting of the Board the representatives of the railway companies submitted a copy of a reply written by the railway companies to the Prime Minister on August 15, 1922, in answer to the said letter, in which reply the railway companies, after reiterating their view that the course which had been followed by them was not in violation of the law, concluded as follows:—

In view, however, of the decision of the Government to accept the opinion of the Department of Justice, we will undertake, pending an anticipated early report of the Board of Conciliation now sitting, that the scale of shop crafts wages in force prior to July 16 last will be continued, on the understanding that the companies' case before the Board of Conciliation will not be thereby prejudiced, and that the companies shall not thereby be precluded from taking the position in negotiating an agreement during or subsequent to the proceedings of the Board that the new scale should be retroactive to 16th July last.

This matter having thus been disposed of, Mr. Tallon opened the case for the employees with reference to the question in dispute before the Board, and Mr. Hodge, on behalf of the railways, submitted the railways' case, his views being concurred in by Mr. Hills and Mr. Needham. Mr. Tallon, Mr. McKenna and Mr. Bruce then replied on behalf of the employees. Both sides made full representations to the Board in regard to the matters in dispute and a number of exhibits were put in.

In the course of the proceedings both sides submitted copies of the notice from the railway companies to the employees concerned, as posted in the shops on or about July 13, 1922. This notice contains a fair report of the proceedings up to the time the Board was appointed, and is as follows:—

To:—Mechanics, Carmen, Helpers and Apprentices—Car and Locomotive Departments.

Pursuant to the terms of Wage Agreement made between the Railway Association of Canada and Division No. 4, Railway Employees Department, American Federation of Labour, representing respectively the Railways specified in the agreement and the specified classes of employees in the Car and Locomotive Departments, the required thirty days' notice for a revision of agreement was issued by the Association to the Employees' representatives on June 14th, 1922, as follows:—

In accordance with terms of memorandum of agreement dated January 13th, 1922, notice is hereby given of the Association's desire to revise the existing rates of pay of employees covered by Wage Agreement No. 4, by making the following reductions effective thirty days from date:

Decrease of

Machinists, boilermakers, blacksmiths, sheet metal workers, electrical workers (including linemen, groundmen, electrical transfer table operators, coal pier elevator operators and coal pier electric hoist operators), carmen (except freight carmen), moulders, including those with less than four years' experience, all crafts.....	7c per hour
Freight carmen.....	9c per hour
Regular and helper apprentices and helpers, all classes..	7c per hour
Car cleaners.....	5c per hour

Kindly advise as early as possible upon what date your committee will be prepared to meet the Association's Wage Sub-Committee at Montreal, to discuss the foregoing.

Pursuant to this notice the representatives of the railways and of the employees met in conference commencing Wednesday, July 5th, and upon opening negotiations a proposition was submitted on behalf of the Railways to the Employees reading as follows:—

Referring to our letter of June 14th, last. In connection with the application of the revised rates of pay specified, it is proposed that they shall be adopted without prejudice pending further consideration and subject to further negotiations on thirty days' notice from either party to the other.

This proposition was not accepted on behalf of the Employees and following further conferences and negotiations another communication was addressed to the Employees' representatives on July 10th, 1922, reading as follows:—

Referring to the discussions which have taken place between our respective Committees regarding the proposed revision in rates of pay as specified in my letter to you of June 14th last. Recognizing under existing conditions, quite apart from the rates of pay themselves, that there might be reasons why your Committee could not see their way clear to accept by agreement unconditionally the reductions which the Railways purpose to put into effect on July 16th, next, it was proposed to your Committee in my letter of July 6th that they should be made effective without prejudice pending further consideration and subject to further negotiations on thirty days' notice from either party to the other. This proposition you have not accepted. With every desire to make it possible to mutually agree with respect to the application of the decreases which the Railways find it necessary to put into effect pursuant to their notice, it is further proposed that the revision of rates of pay should be made effective on the basis mentioned and that promptly upon notice from one party to the other, the representatives of both parties will confer further; and also that, except as may be otherwise mutually arranged, any rates of pay finally agreed upon will be effective as from July 16th, 1922, and that adjustments will be made accordingly.

Such an arrangement as that now proposed would have the effect of fully protecting the interests of both the Employees and the Railways pending the opportunity for further proper consideration of the Railways' proposals and it is hoped that upon further reflection on the matter your Committee will recognize its fairness to all interests affected and decide to enter into an agreement which would have the effect of preserving the present relationships.

In reply to this communication a letter was received from the Employees' Committee under date of July 11th stating as follows:—

Our Committee has given your proposal very serious consideration, and I am instructed to advise you that the proposal made by your Committee is not acceptable to them, and unless your Committee are prepared to postpone the putting into effect of the proposed decrease in rates of pay they will proceed to call for a Board of Conciliation. It is hoped your Committee will recognize the justness of our position and give it the serious consideration it warrants.

A further communication was thereupon addressed to the Employees' representatives on July 12th, reading as follows:—

Replying to your letter of July 11th advising that the proposal contained in our communication of July 10th regarding revision in rates of pay is not acceptable to your Committee.

Our Wage Sub-Committee have directed me to say that they have no authority to go beyond the proposal made which they had expected in view of its fairness and protecting as it does the interests of the employees would be acceptable to your Committee. The matter is, therefore, being referred to the Association's Operating Committee and you will be promptly advised of their decision.

As a result of this communication a meeting of the Association's Operating Committee was held and a further communication, dated July 13th, was addressed to the Employees' representatives reading as follows:—

The Operating Committee of the Association is in receipt of information from its Wage Sub-Committee that your Committee has been unable to agree with them regarding the proposed revision of rates of pay for employees in the Car and Locomotive Departments of the several Railways involved on the basis of the proposals in communications addressed to you dated respectively June 14th, July 5th, July 10th and July 12th, 1922. I am, therefore, directed to advise you that the Operating Committee is informing the Railways affected of the situation in order that they may be in a position to make effective changes in rates of pay in accordance with the notice served on behalf of each of them dated June 14th, 1922, and the proposal of the Association's Sub-Committee as contained in their letter of July 10th.

It will be observed that the last proposition of the Railways would merely have the effect of withholding under the terms stated the payment of the differences in rates specified from the existing rates of pay pending negotiations when conditions would probably make it possible for the representatives of the railways and of the employees to reach an agreement which would be mutually satisfactory.

This Company is in receipt of advice that the proposition submitted through the Railway Association of Canada on its behalf has not been accepted by the representatives of the Employees. The Railway is in fairness entitled to protect the effective date of any revision of rates of pay downwards to be agreed upon or determined in the same way as employees have repeatedly been protected as to the effective date of revisions of rates of pay upwards. Therefore, the Company cannot consistently delay the application, on the basis stated, of the specified reductions in rates of pay, and, therefore, they will be put into effect on the payrolls commencing with the second

half of July, 1922, with the understanding that adjustments as may be necessary will later be made as from July 16th, 1922, in accordance with the proposal of the Association's Sub-Committee as contained in their letter of July 10th quoted above.

Montreal, July 13th, 1922.

On Thursday, August 17, 1922, after the representatives of both parties had presented their cases, the Board consulted with them and subsequently an adjournment was announced until the following day in order to give the parties an opportunity to discuss, and if possible arrive at, a mutual tentative agreement, as outlined in the notice posted in the shops.

When the Board met on the following day the representatives of both parties reported that they had been unable to come to any such agreement and asked the Board to make an early decision on the material submitted.

The railway companies proposed that certain tentative rates should be made effective, which would have the effect of withholding payment of the differences in rates (as specified in the notice) from the existing rates of pay "pending negotiations when conditions would probably make it possible for the representatives of the railways and of the employees to reach an agreement which would be mutually satisfactory."

This proposal of the railway companies was refused by the employees.

The tentative rates of pay which were in the proposal of the railway companies embodied the reductions which had been ordered by the United States Railroad Labor Board, applicable to railroads in the United States, and which became effective on the 1st July, 1922. It was shown in evidence before the Board that the plan suggested by the railway companies had been followed on four former occasions, namely 1918, 1919, 1920 and in 1921. In 1921 a reduction had been ordered in the United States by the United States Railroad Labor Board, effective on 1st July, 1921, and on the 13th July, 1921, an agreement was entered into between the employees con-

cerned in this application and the railway companies along the lines now suggested. It was further shown that other classes of employees, both on former occasions and in the present year, had entered into agreements with the railway companies along the lines of the proposed tentative agreement.

On behalf of the employees, Messrs. Tallon, McKenna and Bruce argued that whilst their organization was international in character, yet, that wages and working conditions in Canada should be determined in accordance with the needs and requirements here. They also stated that the acceptance of the wages as fixed for employees in the United States during the past few years had been because the (Canadian) Government of the day had so suggested, although the (Canadian) employees had protested, and asked that changes up or down in the scale of wages in Canada should be determined on conditions in Canada. They contented that the reduction of 8 cents per hour in 1921 was a sufficient reduction and no further reduction was now necessary.

In presenting this report to you, as Minister of Labour, it is my intention to make it clear that the difference between my colleagues and myself is as to the cause of the dispute and the issue before the Board. My colleagues have contended that the issue is the tentative proposals made by the railway companies to the representatives of the shop trades during the negotiations which followed the companies' notice of the intended reduction in wages to go into effect on the 16th of July, 1922. On the other hand I have maintained the position from the time I was appointed to the Board that the issue before its members was the "Attempt made by railways involved in the dispute to reduce wages 5, 7 and 9 cents per hour." As this difference of opinion, as to the issue before the Board, has an important bearing upon the whole question of wages, it is impossible to render any decision as to the justification of the railways' proposed reductions without hearing evi-

dence from the two parties to the dispute. The evidence submitted by the representatives of the railways was in justification of their tentative proposal to the representatives of the men and at no time did they endeavour to justify the reduction beyond the making of a few general statements. On the other hand the representatives of the men contended that wage reductions were not justifiable, and submitted evidence that their opposition was not only to the tentative proposition submitted by the companies but at all times to the proposed cut of 5, 7 and 9 cents an hour.

In support of my contention that the tentative proposition of the railway companies was not the issue before the Board, let me draw your attention to the notice posted in the shops, and embodied in the previous part of this report, and which gives a record of the negotiations between the two parties to the dispute from the time the notice of a reduction of wages was served on the men until application was made for a Board of Investigation and Conciliation. You will observe that the required thirty days' notice of a revision of agreement was issued by the Railway Association to the Employees' representatives on June 14, 1922. This notice cited wage reductions of 5, 7 and 9 cents per hour to various classes of employees. Pursuant to this notice, representatives of the railways and the employees met in conference on July 5, when the railways submitted a proposition to the employees:—

That the proposed reductions in wages should be adopted without prejudice pending further consideration and subject to further negotiations on thirty days' notice from either party to the other.

This proposition was not accepted on behalf of the employees and following further conferences and negotiations another communication was addressed to the employees' representatives on July 10, 1922, further proposing:—

That the revision of rates of pay should be made effective on the basis mentioned and that promptly upon notice from one party to the other, the representatives of both will confer

further; and also, that, except as may be otherwise mutually arranged, any rates of pay finally agreed upon will be effective as from July 16, 1922, and that adjustments will be made accordingly.

The foregoing was the tentative proposition made by the railways, which was not accepted by the representatives of the men and notice was served on the Railway Association that if the proposed reductions were put into effect application would be made for a Board of Investigation and Conciliation. On July 13, the Operating Committee of the Railway Association addressed a letter to the employees' representatives stating that the reduced rates of pay would be put into effect on the payrolls commencing with the second half of July, 1922, with the understanding that such adjustments as may be necessary would later be made as from July 16, 1922.

This important exhibit shows conclusively that the tentative proposal of the railways was only made during the negotiations, and was no more acceptable to the men than the first proposal of the revision of the agreement.

I, therefore, submit as reasonable argument that if the employees refused to accept the tentative proposal of the companies as a compromise the Board of Investigation and Conciliation were bound by all precedent and good practice to accept the original proposition to reduce wages as the only issue before them for investigation and report. The representatives of the employees had undoubtedly refused to accept any tentative proposition and had adhered strictly to their opposition to a wage reduction.

It was also made clear by the representatives of the employees, in evidence submitted to the Board, that any tentative proposition from the companies, looking toward a later adjustment based upon conditions in the United States would not be in the best interests of the employees involved. The point was emphasized that the acceptance of United States awards by Canadian railway shop trades was merely a war-time concession

to the Canadian Government to guarantee continuance of transportation during the war, but that such a concession was not to be accepted as establishing the precedent that for all time Canadian railway employees would be expected to abide by the awards of United States boards.

This point in itself is exceedingly important in its bearing upon the operations of the Industrial Disputes Investigation Act, a piece of legislation designed to maintain industrial peace between employees and employers in Canada. The war being over it is to be expected that if the Canadian railway shop trades must observe the provisions of the Industrial Disputes Investigation Act they must not be expected to rely entirely upon awards of the United States Wage Boards in the determining of working conditions in Canada.

The representatives of the employees, therefore, have urged the necessity of reverting to the pre-war practice so that "wages and working conditions in Canada should be determined in accordance with the needs and requirements here," and that now is the time to consider the wage rates to obtain in Canada, either by agreement or boards of investigation and conciliation, and independent of the decisions affecting the railways of the United States. They maintain that conditions in the two countries are not identically the same and, therefore, the shopmen on the Canadian roads must have wage agreements based upon Canadian conditions.

The tentative proposal made by the railways, and which my colleagues on the Board affirm is the issue before its members, was not the issue upon which the strike vote was taken prior to the application for the Board and, therefore, was not the issue to be decided in the report submitted. Neither had the strike vote in Division No. 4 of the Railway Shopmen of Canada anything to do with the decision of the United States Labor Board which reduced wages 5, 7 and 9 cents per hour. The strike of the shopmen in the United States, which

resulted from the arbitrary decision of the United States Railway Labor Board, was in effect before the strike vote of the shopmen in District No. 4 had been taken, which goes to show that the issue before the shopmen of Canada was the proposed reduction in wages of 5, 7 and 9 cents per hour, announced by the Canadian Railway Association, following similar reductions put into effect on the United States railways, and not a tentative reduction pending the outcome of the strike in the United States.

The acceptance of the tentative proposition as the issue before this Board of Investigation and Conciliation does not insure industrial peace on the Canadian railways, but, on the other hand, only delays the reaching of amicable understandings between Canadian employers and employees based upon the conditions existing in this country. The representatives of the railway shopmen in Division No. 4 rejected the tentative reduction of wages with its tentative withholding of a part of the men's wages and asked for the appointment of a Board of Investigation and Conciliation to determine the issue as to the justification of further reductions on Canadian railways. The withholding of wages pending future agreements, with the probability of a strike, has not been regarded by the representatives of the employees as good practice, having regard for the fact that should a lockout or strike take place following the award of a Board of Investigation and Conciliation the money withheld from the employees by the companies would no longer be honoured as the property of the employees. Having already accepted a wage reduction of 8 cents an hour with the forfeiture of overtime rates for Sundays and holidays, the railway shopmen of Canada, through their representatives, are now pressing for stability of wage standards and resisting any further wage reductions.

I submit further for your consideration that the issue before the Board of Investigation and Conciliation had to be defined at the time of the application for the Board as a necessary compliance

with the Act, and, therefore, it is unreasonable and unjustifiable to accept a compromised proposal of the railways pending negotiations as the real issue to be determined by our Board. Had the Board performed its duties in dealing with the issue upon which the application for the appointment of the Board was made the railways should have submitted evidence to justify the reduction in wages which they are desirous of putting into effect. Without this evidence it is impossible for a Board of Investigation and Conciliation to report upon the question of wage reductions either tentative or prolonged, and I therefore submit that the issue before the Board has not yet been dealt with.

I am influenced in reporting to you along these lines by the firm conviction that to deal only with the tentative proposal of the railway companies at this time is to invite a strike of the railway shopmen of Division No. 4, which could

only prove disastrous, having regard particularly for the grain situation in the West and the coal situation all over Canada. In my judgment the purpose of the Board, to maintain industrial peace, will have been completely thwarted unless the men involved in the dispute and the general public have reason to believe that the award rendered by the Board is the result of the most thorough investigation of the merits of the railway companies' proposal to reduce wages and the claim of the employees that such a proposal at this time is entirely unjustified by conditions in this country. It is with the hope of averting a strike that I report my objections to the acceptance of a report dealing with the railway companies' tentative proposal.

Respectfully submitted.

(Sgd.) JAMES SIMPSON.

Ottawa, Ont., September 1, 1922.

COST OF LIVING ADJUSTMENT OF WAGES OF VANCOUVER ISLAND COAL MINERS ON AUGUST 1, 1922.

IN the report which appears in the August issue of the LABOUR GAZETTE of the recent finding of the Cost of Living Commission for the adjustment of wages of Vancouver Island coal miners, it was stated that an increase in the cost of food, etc., had been ascertained amounting to 6.3 per cent, with

corresponding wage increases of 1¼ cents and 2 cents per day. It should have been stated that a *decrease* in the cost of foods, etc., had been ascertained amounting to a *decrease* in wages of 1¼ cents per day where the base rate was \$3 per day, and 2 cents per day where the base rate was \$3.15 per day.

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1922.

THE following table shows the number of strikes in existence in Canada at some time or other during August, 1922, together with the number of employees involved and the time loss in working days, as compared with the previous month and with August, 1921:

	Disputes	Employees involved	Time loss in working days
August, 1922.....	24	24,006	437,017
July, 1922.....	22	15,736	261,240
August, 1921.....	31	3,442	73,273

The coal miners' strike in District 18 of the United Mine Workers of America, in Alberta and south-eastern British Columbia was settled in August 28, the miners securing the former rates of pay, and the coal miners' strike in Nova Scotia, was settled early in September, the miners securing an increase of 15 per cent in wages with some other readjustments. A very large part of the time loss for the month was due to these coal strikes which accounted for 173,374 working days and 199,410 working days respectively, or 372,784 days out of the total of 437,017. Five strikes commenced during the month, involving 14,515 employees and a time loss of 206,287 working days, but three of these ended during the month. Of the 22 strikes in existence in July, 19 were carried over into August, these causing a time loss of 230,730 working days during the month under review. Three of these strikes ended during August in addition to the three terminated strikes which had commenced during August, making a total of six strikes which ended during the month. The other disputes which terminated were: coal miners in District 18; structural ironworkers at Edmonton; theatre employees at Calgary; steam shovel operators on the Welland ship canal; shipbuilders at Three Rivers, and freight

handlers at Fort William and Port Arthur.

At the end of the month there were, therefore, still on record 18 strikes, affecting 15,408 workpeople as follows: coal miners, Nova Scotia; photo engravers, Montreal; photo engravers, Ottawa; composers, Hamilton; composers, Montreal; composers, Toronto; composers, Vancouver; composers, Winnipeg; composers and pressmen, Halifax; composers and pressmen, Ottawa; moulders, Galt; moulders, Guelph; narrow gauge enginemen of steel company, Sydney; painters, Toronto; railway employees of steel and coal companies, Sydney; motormen and conductors, Niagara Falls, and restaurant employees at Edmonton.

Disputes by Industries

The following is a review of disputes by industries in the order in which they appear in the statistical table. A brief reference is made to the more important strikes.

MINING, NON-FERROUS SMELTING AND QUARRYING.

The coal miners' strike in District 18 of the United Mine Workers of America, in Alberta and south-eastern British Columbia against a reduction in wages was terminated on August 23, and work resumed on August 28. The men returned to work at the rates of wages in effect from 1920 to March 31, 1922, the agreement providing for such wages to be in effect until March 31, 1923. On August 15, coal miners throughout Nova Scotia, reported to be 13,294 in number, went on strike to secure the 1921 wage scale, which had been reduced from January 1, 1922, in some mines and from later dates in others, by approximately 25 per cent. Towards the end of the month negotiations were entered into and a settlement was effected early in September, the

wages being advanced about 15 per cent, with special increases in certain cases.]

MANUFACTURING.

These coal mining strikes are the subject of a special article in this issue.

Printing and Publishing.—The strikes in the printing trades in ten localities which began in the spring of 1921 continued, affecting 1,764 workpeople and resulting in a time loss of 47,598 working days.

Iron, steel and products.—Three strikes were in existence in this group during the month affecting 37 workpeople and resulting in a time loss of 999 working days. Two strikes—moulders at Guelph and narrow gauge enginemen at Sydney—were carried over from the previous month's record and remained untermiated. A strike of eleven moulders occurred at Galt on August 2, against the introduction of a 9-hour day instead of the regular 8-hour one. This strike remained unsettled at the end of August.

CONSTRUCTION.

Buildings and structures.—The painters' strike in Toronto continued. Structural iron workers at Edmonton who had struck against a reduction in wages from \$1.10 to 85c per hour, resumed work on August 3 at 90c per hour pending a final settlement in wages affecting the same trade in Winnipeg and other western localities.

Shipbuilding.—During August about 670 shipbuilders went on strike at Three Rivers, when demands for a fortnightly pay day instead of a semi-monthly one were refused. Negotiations were carried on between the parties concerned and the strike was finally terminated on August 11, the company granting the demands of the employees.

Miscellaneous construction.—On August 13, a strike of 40 steam shovel operators (engineers, firemen and cranemen) engaged on the construction of the Welland ship canal went on strike for increased wages and a monthly rate of pay to replace the hourly rate. The rates prior to the strike were 87c, 68c and 50c per hour, while the rates demanded were \$250 per month for engineers, \$200 per month for cranemen, and \$6 per day for firemen. Negotiations were carried on with the result that increases varying from 1c to 23c per hour were granted, with further changes to be effected on the revision of the Fair Wages schedule for the District. Work was resumed about the 21st of the month.

TRANSPORTATION.

Steam railway service.—The strike of railway employees of steel and coal companies at Sydney, N. S. was unsettled at the end of the month.

Street railway service.—The strike of motormen and conductors at Niagara Falls in existence during July was carried over from the previous month's record and remained untermiated.

Water transportation.—Freight handlers at Fort William and Port Arthur went on strike during August for an increase of 10c per hour, the existing rates being 35c and 37c per hour. Work was resumed on August 28, at an increase of 5c per hour, that is at 40c and 42c respectively.

SERVICE.

Recreational.—Theatre employees at Calgary who had been on strike since May returned to work on August 14.

Personal.—Forty-three cooks, waiters and waitresses at Edmonton went on strike July 27, against a reduction of 25 per cent. This strike remained untermiated at the end of August.

STRIKES AND LOCKOUTS DURING AUGUST, 1922.

Industry, occupation and locality	Particulars	Number of employees involved	Time loss in working days
(a) Strikes commencing prior to August, 1922.

TRANSPORTATION— <i>Water transportation:</i> Freight handlers, Fort William and Port Arthur, Ont.	Commenced August 19, for an increase of 10c per hour in rates of wages. Work resumed August 31, at 5c increase in wages.	500	5,000

DISPUTES IN COAL MINING INDUSTRY IN CANADA.

Strikes of coal miners in Districts 18 and 26, United Mine Workers of America

IN previous issues of the LABOUR GAZETTE information has been given as to disputes between coal miners and operators in the coal fields in Alberta and Eastern British Columbia, District 18 of the United Mine Workers of America, and also in the principal Nova Scotia fields, (District 26 of the same organization).

In District 18 a strike of miners began on April 1 on the expiration of an agreement as to wages and working conditions which had been in effect from April 1, 1920, a new agreement not being consummated because the operators, members of the Western Canada Coal Operators' Association, proposed a reduction in wages of between 20 per cent and 25 per cent which the miners, members of

the United Mine Workers of America, refused to accept. A Conciliation Board was appointed under the Industrial Disputes Investigation Act and reported to the Minister of Labour on June 13, the report being published in the LABOUR GAZETTE for July. The award of the Board was signed by the Chairman and the representative of the employees and recommended a wage scale 20 per cent below that of June, 1920, the day rates in which were about \$1.15 below those in effect from October, 1920, to March 31, 1922. The minority report signed by the representative of the operators recommended a scale proposed by the operators 25 per cent lower than the previous scale. As neither party was willing to accept either recommendation

the strike continued. Toward the end of August the Minister of Labour met representatives of both parties at Calgary and an agreement was reached to resume work at a wage scale 15 per cent below that on March 31 pending a settlement of the strike in the bituminous mines in the United States. The agreement was as follows:

This agreement made this twenty-third day of August, 1922, between the Western Canada Coal Operators' Association, hereinafter referred to as the operators of the one part, and the United Mine Workers of America, District 18, hereinafter referred to as the Union of the other part; witnesseth that it is mutually understood and agreed between the parties hereto as follows:

1. That the general clauses of the agreement which expired on March 31, 1922, between the Western Canada Coal Operators' Association and the United Mine Workers of America, District 18, shall be continued unchanged to the 31st day of March, 1923.

2. That all Day Wage and Contract Rates in the said agreement and supplement dated October 25, 1920, shall be reduced 15 per cent, effective at once, and shall remain in effect to March 31, 1923;

Provided, that if at any time before the said March 31, 1923 not less than 75 per cent of the Union Miners in the Central Competitive Field, comprising Western Pennsylvania, Ohio, Indiana, and Illinois shall have negotiated through the Executive heads of the United Mine Workers of America a new agreement with the operators in that Field, the day wage and contract rates in District 18 shall, subject to the provisions of Paragraph 3 hereof, be amended so that the same relation shall exist between the new rates and those which expired in this District on March 31, 1922, as exists in the Central Competitive Field between the new rates and those which also expired on the 31st day of March, 1922, there.

3. That the decision as to the time when and the extent to which such an agreement shall have been consummated in the Central Competitive Field shall be left to the Federal Minister of Labour, the Hon. James Murdock, and that amendment of the rates referred to in Paragraph 2 shall become effective as and from the date notification of such decision shall have been received by this Association, and by the United Mine Workers of America, District 18.

4. Respecting the dispute over the construction of the Make-up Clause, it is agreed that the Minimum Wage shall be the same as a miner working on company work, \$7.50 per day. This construction to be effective only from date of this agreement.

5. That the Western Canada Coal Operators' Association and the United Mine Workers of America, District 18, shall meet in conference 30 days prior to March 31, 1923, to consider the terms of a new agreement for this District.

6. This agreement shall be forthwith submitted by the Union for ratification by referendum vote to its membership in District 18, and upon being ratified by a majority voting upon such referendum, this agreement and all and every the provisions hereof shall be deemed to have become and to have been binding on the Union and upon each and every of its members in the said District, as and from the day of the date hereof.

In witness whereof the parties hereto have hereunto set the hands of their proper officers this twenty-third day of August, nineteen hundred and twenty-two.

THE WESTERN CANADA COAL OPERATORS' ASSOCIATION.

(Sgd.) JESSE GOUGE.

Vice-President,

(Sgd.) R. M. YOUNG,
Secretary.

THE UNITED MINE WORKERS OF AMERICA, DISTRICT 18.

(Sgd.) N. McDONALD,

(Sgd.) WILLIAM SEERMAN,

(Sgd.) R. PEACOCK,
Conference Committee.

Witness to all signatures

(Sgd.) F. E. HARRISON.

Work in the mines was resumed on August 28 and on September 1 the Minister of Labour notified the employees and employers that 75 per cent of the miners in the Central Competitive Field had reached an agreement with the operators to resume work at 1921 rates. Accordingly in District 18 the 1921 rates again came into effect from September 1. In addition to the members of the Western Canada Coal Operators' Association the Hillcrest Collieries Limited and the North American Collieries Limited entered into a similar agreement.

In Nova Scotia, District 26, the operators of the largest mines, the British Empire Steel Corporation, controlling the Dominion Coal Company operating mines at Glace Bay and Springhill, the Nova Scotia Steel and Coal Company at Sydney Mines, and the Acadia Coal Company at Stellarton, on the expiration of an agreement reached at Montreal in November, 1920, put into effect on January 1, 1922, a wage reduction of about 35 per cent. The employees objected to the cut and called for a Conciliation Board which was established in January, 1922, and which recommended a wage reduction of about 30 per cent, with a minimum day rate of \$2.85, instead of \$2.42 as proposed. The wage scale basis which figures in these transactions had been laid down in what became known as the MacKinnon award, being the decision of a Board of Conciliation given in 1920 in the case of the Dominion Coal Company, now part of the British Empire Steel Corporation, and the Chairman of the Board being the Rev. Dr. Clarence MacKinnon. The scale set in the MacKinnon award provided for a minimum day rate of \$3.25. The representative of the employees made a minority report recommending a decrease of only 14 per cent from 1921 rates with a minimum daily rate of \$3.50. The operators put into effect the award of the Board and after negotiations with the District Executive of the United Mine Workers agreed to make further slight readjustments in order to effect a settlement of the dispute. The members of the Union, however, by ballot refused to accept this proposal. Meanwhile the situation became acute and the dispute was discussed in Parliament then in session. The Conciliation Board was reconvened in April but reported its inability to proceed and a new Board was appointed. This Board investigated working and housing conditions in all the mining localities and recommended that the wage scale in force, the scale that had been recommended by the previous Board, be revised by making a minimum rate of \$3.00 for all

employees over 18 years of age, with adjustments in certain special rates to secure uniformity. The representative of the miners on the Board recommended a day wage scale 10 per cent below the 1921 scale with a minimum daily rate of \$3.45, with contract rates 13½ per cent below the 1921 rates, which would be one per cent below the MacKinnon Award (January, 1920, rates) and 18½ per cent above 1922 rates. The employees refused to accept the award of the Board so that no agreement was reached and the award of the first Board remained in effect. In the meantime the miners in both the principal bituminous and anthracite fields in the United States struck on April 1 on the expiration of their agreement. The smaller coal mine operating companies in Nova Scotia reduced wages at various dates and a Conciliation Board was appointed to investigate a dispute between the employees of the Inverness Railway and Coal Company and the management, operating the mines on behalf of the bondholders, the Company having defaulted some years before. The Board reported unanimously that the reduced scale in effect (26 to 25 per cent below that of 1921) be continued for the time being as the mines were being operated at a loss in an effort to preserve the property of the bondholders.

In August negotiations for a working agreement between No. 26 District Executive and the British Empire Steel Corporation operating the principal mines were resumed. The President of the United Mine Workers of America had instructed the District Executive to secure an agreement by August 15 or to issue the strike call which had been authorized previously. The Executive agreed to recommend to the miners a scale 10 per cent above that in force with a 40c increase in day rates and a minimum daily rate of \$3.25. This proposal was voted upon by the members on August 15, at the same time as the election of the District officers and members of the Executive. The strike call, however, had already been formally issued and

the recall notice by the officers, issued on the last day, was ineffective. At midnight August 14, the miners struck and and in the district organization elections on the following day elected a new set of officers with the exception of the secretary-treasurer.

In the strike the men operating the pumps, fans, engines, electrical machinery, etc., in some cases, also went off duty. In some cases the officials and office staff of the operators manned the machinery temporarily in order to prevent damage. The local authorities requisitioned military forces from the Dominion Government for the protection of property. Arrangements were shortly made for the manning of pumps, etc., by the regular employees. [The miners on strike included not only the employees of the mines under the control of the British Empire Steel Corporation, approximately 12,000, but those in practically all the coal mines in Nova Scotia, numbering nearly 15,000 in all. In the Inverness mines, however, the men returned to work in a few hours, their wage dispute with the operators having been settled by the Conciliation Board as mentioned above.]

[Negotiations continuing between the representatives of the British Empire Steel Corporation and the Union, the Rev. Dr. Clarence MacKinnon, Chairman of the Conciliation Board which recommended the wage scale of January, 1920, the "MacKinnon Award," was requested by the Union to take part. During these negotiations an agreement was drawn up which provided for a 12½ per cent increase in contract rates, and an increase in the minimum day rate to \$3.25, all day rates being increased by at least 40c per day in the Glace Bay Mines and 52c per day in the Sydney Mines area, thus bringing the datal scale in the latter up to that in the former. The agreement was to be retroactive to July 15 and to continue to January 15, 1924 and thereafter, subject to 45 days notice by either party. There were also other provisions for special cases. This was submitted to the members of the Union by ballot on August 31 and approved by a large majority. Work was, therefore, resumed on September 5. It was expected that the other coal operators in Nova Scotia would enter into agreements for similar increases in wages.]

THE UNITED STATES COAL STRIKE.

WHILE no settlement was reached during August in the dispute affecting anthracite coal miners in the United States, the general strike of bituminous coal miners was practically terminated in August, contracts having been signed by the end of the month by representatives of the United Mine Workers of America and of the great majority of the operators who had previously had agreements with the union. An account of the origin and progress of the dispute has appeared in previous issues of the LABOUR GAZETTE. The agreement was reached at a conference which had been called by President John L. Lewis of the United Mine Workers, and which held sessions at Cleveland, Ohio, from August 7 to August 15.

The agreement which was signed by the operators individually provided for an immediate resumption of work on the terms existing prior to the strike, and for the subsequent appointment of a committee of inquiry to investigate all pertinent facts in regard to the industry for the benefit of the public, the operators and the mine workers. The text of the agreement was as follows:

(1) All mines of operators represented here in this joint conference which are now on strike, are to be opened immediately upon the execution of supplementary contracts extending to March 31, 1923. The terms, provisions and conditions of the contracts affecting such mines are to be as they respectively existed on March 31, 1922, except as to renewal or continuation clauses in such contracts.

(2) The participants of this conference agree to send and this conference invites the bituminous coal operators of the United States to send representative delegates from coal producing districts or from substantial groups of operators, which delegates shall as far as possible be representative of the bituminous coal industry of the United States; such delegates to assemble in joint conference in Cleveland, October 2, 1922. This joint conference shall appoint a commission of equal numbers of representative operators and miners, which commission shall formulate a method to be followed by the bituminous coal industry in the negotiation of wage scale agreements, to become effective April 1, 1923, and the method so formulated shall be reported to the joint conference to be held January, 1923, as hereinafter provided.

(3) The joint conference convening October 2 shall further select a committee of inquiry, the members of which shall be of commanding public reputation for character and ability, and whose personnel shall be approved by the President of the United States. The duty of this committee shall be to develop promptly all of the pertinent facts in regard to the industry for the benefit alike of the public, the operators, and the mine workers. Such investigation shall include every phase of the industry deemed material by the committee of inquiry and such committee shall be furnished with all information desired and aided in every manner possible by the operators and miners alike.

In the event such joint conference shall fail to agree upon the members of such committee of inquiry by October 10, 1922, it shall petition the President of the United States to appoint the members thereof in his discretion, and in the event of a vacancy the President is requested to fill same by appointment. The cost of such committee of inquiry shall be paid by the industry, one-half by the operators participating in the joint conference and one-half by the United Mine Workers of America. Such committee after developing all the facts shall make such recommendations as it may deem proper and advisable and shall so far as possible embody these recommendations in a report to be submitted to the joint conference to be convened January 3, 1923, as hereinafter provided.

In order to reach a final and proper determination of the controversy in the bituminous coal industry for the benefit of the miners and operators and the public as well, the following principal points are presented for consideration by the committee of inquiry: The wage rate in any district shall, as far as reasonable, be properly competitive within the mining industry and shall at the same time be fully compensatory to the

miners, being sufficient to afford not only a living wage but also to allow reasonable opportunity for accumulating savings. The encouragement of a proper spirit of obligation and responsibility on the part of all parties for contractual obligations and the establishment of proper machinery, both local and national, for prompt determination and settlement of any points of dispute and of any local state or district contracts, without resorting to strike or lockout. The determination of a proper policy to encourage efficiency of operation, not only on the part of mine management in the mechanical operation of the mines, but also on the part of individual miners in the performance of their daily work.

4. The participants in this conference agree to send, and this convention invites the bituminous coal operators of the United States to send representative delegates from coal producing districts, or from substantial groups of coal operators, which delegates shall as far as possible be representative of the bituminous coal industry of the United States, such delegates to meet in joint conference January 3, 1923, at such place as may be designated by joint conference held October 2, 1922. This joint conference shall receive the report of the committee appointed in conformity with paragraph 2, and shall finally determine the method to be followed by the participants in the conference in the negotiation of wage scale agreements to become effective April 1, 1923, to the end that new wage scale agreements to be effective April 1, 1923, shall be determined upon as speedily as practicable and further strikes be thereby avoided. The method of negotiating wage scale agreements, which shall be determined upon by joint conference, shall provide that such machinery as is created by it to develop a new wage scale agreement shall commence to function not later than January 8, 1923. The wage scale agreement concluded by such machinery shall be effective April 1, 1923, and shall be in effect during such time as it may determine.

On August 18, President Harding delivered an address at a joint meeting of both Houses of Congress at Washington dealing particularly with the situation arising out of the strikes of coal miners and railway shop employees. After outlining the circumstances that immediately led up to the coal strike and the steps that the Administration had taken in endeavouring to effect a settlement, he summed up some of the difficulties of the problem as follows:

There are fundamental evils in our present system of producing and distribution which make the wage problem difficult. In the bituminous coal fields are vastly more mines than are requisite to the country's needs, and there are 200,000 more mine workers than are needed to produce in continuous employment the country's normal requirements. By continuous employment I mean approximately 280 working days in the year. In many instances last year men were employed less than 150 days, in some cases much fewer than that. In the overmanned sections men divide the working time, and high wages are necessary to meet the cost of the barest living. Interrupted transportation, sorely broken employment, the failure to develop storage against enlarged demands and inadequate carrying—all these present problems bearing on righteous wage adjustment, and demand constructive solution.

He asked authority to create a commission to make a searching investigation

into the whole coal industry with authority to reveal every phase of coal production, sale and distribution, and pointed out that the need for such investigation was revealed by both operators and mine workers in the Cleveland agreement.

In order to restrain profiteering the President recommended "immediate provision for a temporary national coal agency, with needed capital to purchase, sell and distribute coal which is carried in intrastate shipment." The President pointed out that the proposal did not relate to shipments within a state; price control and equitable distribution in intrastate shipments being a responsibility of the State's own government.

THE STRIKE OF RAILWAY SHOP EMPLOYEES IN THE UNITED STATES

ARTICLES describing generally the circumstances leading up to the reductions in wages of certain classes of employees on the principal railways in the United States on July 1, 1922, and the strike of the shop craft employees on that date, and of the features of the strike during July have appeared in recent issues of the LABOUR GAZETTE. Early in August the President of the United States submitted to the railway companies and to the employees' organization the following proposals:

First.—Railway managers and workmen are to agree to recognize the validity of all decisions of the United States Railroad Labour Board, and to faithfully carry out such decisions as contemplated by the law.

Second.—The carriers will withdraw all lawsuits growing out of the strike, and Railroad Labour Board decisions which have been involved in the strike may be taken, in the exercise of recognized rights by either party, to the Railroad Board for re-hearing.

Third.—All employees now on strike to be returned to work and to their former positions with seniority and other rights unimpaired. The representatives of the carriers and the representatives of the organizations especially agree that there will be no discrimination by either party against the employees who did or did not strike.

The railway companies expressed their willingness to accept the first and second conditions but not the third. The President thereupon urged the strikers to return to work and the railway executives to give them employment, leaving the decision as to seniority to the Railroad Labour Board, under whose jurisdiction it fell by law. The majority of the railways agreed to this course but the strikers refused. The question of the restoration of seniority to the strikers therefore became an important issue in the developments during the month. By this time the issues as to the operation of engines and cars alleged to be inadequately repaired and of moving trains in yards, etc., guarded by men under

arms, had become acute, and there was reported to be a probability that the brotherhoods of employees in the running trades would also go on strike, and, in some cases, there were local strikes of this nature. Some passenger trains were stranded and there was difficulty in moving freight cars. The officials of these brotherhoods, however, made arrangements with the executives of the railroads looking to the settlement of these troubles, and later arranged to mediate between the strikers and the railroad executives.

In the meantime the question as to the powers of the United States Railroad Labour Board to enforce its decision had become an important issue and the running trades brotherhoods sent to members of Congress a request that the Board be abolished and that the conditions for mediation and collective bargaining under the Newlands Act be restored. The principal labour organizations had always taken a stand against compulsory arbitration, and it was reported that the American Federation of Labour was supporting this proposal, that body being particularly concerned at the moment because the shop craft employees on strike against the application of a decision of the Board were members of some of the principal unions in the Federation.

On August 18 the President of the United States addressed both Houses of Congress in regard to conditions resulting from both the coal mining and railroad shop crafts strikes. With reference to the latter he pointed out that the statute creating the Railroad Labour Board had not provided means of enforcing the decisions of the Board nor penalties for disobeying them, and that this should be remedied. He then indicated his proposals for settlement and referred to the laws for settling the existing disputes, forbidding conspiracy to hinder interstate commerce and for assuring the highest possible safety in railway service, and that it was his intention to enforce these laws.

On August 12 and again on August 17 and 18 the heads of the brotherhoods of employees in the running trades, as mediators, met the railway executives and proposed the terms of settlement as follows:

First—All men to be reinstated in the position of the class they originally held on June 30, 1922, and as many of such men as possible are to be put to work September 1, at present rates of pay, and all employees who have been on strike to be put to work or under pay not later than October 1 next, except such men as have been proven guilty of destruction of railroad property or convicted of crime; ordinary cases of assault and battery the result of personal encounter are to be disregarded.

Second—If a dispute arises as to the relative standing of an employee or employees that cannot be otherwise adjusted by the carrier and said employee or employees, the matter shall be referred to the United States Railroad Labor Board in accordance with the Transportation Act of 1920 by the organization, the employees or the carrier in the interest of any employee who may be aggrieved.

Third—No intimidation nor oppression shall be practiced or permitted as against any of the employees who have remained or have taken service or as against those who resume service under this understanding.

Fourth—All suits at law now pending as the result of this strike to be withdrawn and cancelled by both parties.

The reply of the committee of railway executives included the following:

The carriers have carefully considered the tentative suggestion you have made to-day.

The use by you in this suggestion of the term "reinstated" goes to the root of the differences between us.

You have repeatedly explained to our committee that this means an acknowledgment on the part of the carriers that the men returning to work under your proposition above quoted will be senior to the new men employed since July 1, 1922, and senior to the old men who remained in the service to the extent that the returning strikers were senior on June 30, 1922.

As this acknowledgment would doubtless control the decision of the labor board on a dispute submitted under your second paragraph as to seniority and oblige it to render a decision against the old men who remained and the new men who entered the service, we cannot accept.

Toward the end of August the Railway Executive announced that while some 400,000 shop craft employees had been employed before July 1, the railways had now in their employ over 300,000, as about 150,000 had not struck and 150,000 had been taken on during the strike, some of whom were strikers returning to work, so that the efficiency of the shops was fast improving. It was, however, reported that some railroads were much better off than others in this respect. Meanwhile the President of the Shop Crafts Federation (Railway Employees Department, American Federation of Labour) met the executives of several of the railroads and negotiated on the lines of the proposals of the train service brotherhoods.

It is of interest to note that early in September, the Attorney General of the United States secured an interim injunction from the Federal Court at Chi-

cago restraining any person from interfering with the operation of the railways.

Early in September it was announced that the Shop Crafts Federation had authorized its committee to make settlements with individual railroads, and that several of these, including several large railways, had agreed to a settlement on the above lines. It was also reported that a number of the largest railway systems had refused to agree to this settlement and had stated that sufficient men in their shops were available.

In Canada the dispute as to wages and working conditions of certain classes of railway employees had been referred to Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act, and information as to these will be found in the article in this issue on the proceedings under the Act during August.

STRIKES AND LOCKOUTS IN GREAT BRITAIN DURING JULY, 1922.

THE British *Labour Gazette* for August contains the following information respecting strikes and lockouts in the United Kingdom during July, 1922, based upon returns from employers and workpeople.

NUMBER, MAGNITUDE AND DURATION.

—The number of trade disputes involving a stoppage of work reported to the Department as beginning in July was 21, as compared with 32 in the previous month, and 40 in July, 1921. In these new disputes about 18,000 workpeople were involved, either directly or indirectly, (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition to the numbers involved in new disputes, about 28,000 workpeople were involved in 36 disputes which began before July and were still in progress at the beginning of that month. The total number of new and old disputes in progress in July was thus

57, involving about 46,000 workpeople, and resulting in a loss during July of nearly 450,000 working days.

The following table classifies the disputes in progress in July by groups of industries:—

Groups of industries	No. of disputes in progress in July			Number of workpeople involved in all disputes in progress in July.	Aggregate duration in working days of all disputes in progress in July.
	Started before July 1.	Started in July.	Total		
Building	5	4	9	2,000	34,000
Mining and quarrying	13	5	18	20,000	149,000
Metal, engineering and shipbuilding	10	6	16	9,000	144,000
Other trades.....	8	6	14	15,000	116,000
Total, July, 1922..	36	21	57	46,000	443,000
Total, June, 1922..	50	32	82	311,000*	2,078,000*
Total, July, 1921..	54	40	94	1,141,000†	4,952,000

*A general dispute in the engineering industry was in progress in June, 1922. †This figure includes over 1,000,000 workpeople involved in a general dispute in the coal-mining industry.

CAUSES.—Of the 21 disputes beginning in July, 9, arose out of proposed reductions in wages, 5 on other wages questions, and 7 on other questions.

RESULTS.—Settlements were effected in the case of 12 new disputes, directly involving about 2,000 workpeople, and 9 old disputes, directly involving about 5,000 workpeople. Of these disputes, 3,

directly involving 400 workpeople, were settled in favour of the workpeople; 9, directly involving 1,800 workpeople, in favour of the employers; and 9, directly involving 4,800 workpeople, were compromised. In the case of 4 disputes, directly involving about 12,000 workpeople, work was resumed pending negotiations.

CONVENTION OF THE TRADES AND LABOUR CONGRESS OF CANADA.

Synopsis of the Proceedings of the 38th Annual Meeting.

THE 38th annual convention of the Trades and Labour Congress of Canada was held in the city of Montreal from August 21-26, the meeting place being L'Assistance Publique Hall. Just previous to the delivery of the opening addresses patriotic selections were rendered by an orchestra, the delegates standing during the playing of the National Anthem and "O Canada." Mr. John T. Foster, president of the Montreal Trades and Labour Council, presided at the opening ceremonies and welcomed the delegates on behalf of organized labour. His Worship Mayor Méderie Martin extended welcome on behalf of the municipality, and the Hon. A. Galipeault, minister of public works and labour, spoke on behalf of the Provincial Government of Quebec. Others who contributed to the opening proceedings were Hon. A. Lacombe, M.P.P., Alphonse Verville, ex-M.P., and Hon. Senator G. D. Robertson, ex-Minister of Labour, who was present as a delegate from the Order of Railroad Telegraphers. The Premier, Right Hon. W. L. Mackenzie King, Hon. James Murdock, Minister of Labour, and the Provincial premier, Hon. L. A. Taschereau, sent letters regretting their inability to be present. Mr. Tom Moore, president of the congress, replied to the addresses of welcome.

The first report received was from the Credential Committee, which, as finally adopted, showed 403 delegates creden-

tialled, two of whom were fraternal delegates representing respectively the American Federation of Labour and the British Trades Union Congress; 42 international organizations, which have affiliated the whole of their Canadian membership were represented by one delegate each; 27 delegates represented trades and labour councils, and 332 local unions.

The customary committees were appointed, and Capt. J. A. P. Haydon, of Ottawa, was named as associate secretary. The proceedings of the convention were conducted in English and French, Mr. Gus Franceq, of Montreal, being the translator.

Report of Executive Council.

The executive council of the congress, which is composed of the president, secretary-treasurer and the three vice-presidents, submitted a report covering the several matters which had engaged their attention during the year and bringing to the notice of the delegates subjects of importance to the organized labour movement. The various subjects were serially arranged as follows: (1) *Legislative Programme, 1922*—This section included matters which were submitted on September 26, 1921, to the Right Hon. Arthur Meighen, then Prime Minister, and the legislative programme which had been presented to the present Government on February 24, 1922. (2) *Legislation*—Under this cap-

tion reference was made to the laws which had been passed at the last session of the Dominion Parliament. Mention was made of the resolutions of particular interest to labour adopted by the House of Commons, some of which had been included in the legislative programme of the congress. (3) *Provincial Federations of Labour*.—This section referred to the efforts made to establish a provincial executive committee for the province of Nova Scotia as well as reporting on the work of other adjuncts of the congress. The executive council recommended that, instead of the present system of printing separate reports for each province, a co-ordinated summary of the legislative activities for the various provinces be prepared by that body. (4) *Matters submitted to Government Departments*.—The executive council reported that, in regard to the complaint of unsatisfactory conditions on the Welland Canal work, action had been secured which it is hoped will remove the grievances. Copies of the correspondence which passed between President Moore and Prime Minister Mackenzie King in reference to the order of President D. B. Hanna forbidding employees of the Canadian National Railways from offering themselves as candidates for political office were presented, and mention made of other subjects which had been brought to the attention of the proper authorities. (5) *Labour Representatives on Advisory Councils*.—Report was made of the bodies on which the Trades and Labour Congress has continued to be officially represented, as well as of the more important matters dealt with by these several councils. Mention was also made of the efforts to have the congress given representation on the Research Council. (6) *International Labour Organizations*.—In this section of the report was contained a statement in reference to the third meeting of the International Labour Office, established under the covenant of the League of Nations, and the draft conventions and recommendations which had been adopted. The full text of the Order-in-Council

of the Federal Government defining which of the conventions and recommendations come within the purview of the provincial legislatures and the Dominion Parliament was also submitted. (7) *International Relationship*.—Report was made of the affiliation of the congress with the International Federation of Trade Unions and the International Federation of Working Women and of the friendly relations existing between the Congress of Canada and the British States labour organizations. (8) *League of Nations Society in Canada*.—Commendation was given to the establishment of the League of Nations Society in Canada and it was recommended that the congress become a member, and that trades and labour councils be urged to become identified with local branches of the society in their respective localities. (9) *Platform of Principles*.—Report was made that the Platform of Principles had been revised and brought into harmony with more recent policies of the congress. (10) *Congress Journal*.—In accordance with the instructions of the 1921 convention, the executive council reported that an official organ (the Canadian Congress Journal) had been established, the advertising contracts for which were originally made by an advertising firm. This arrangement had been subsequently cancelled, the advertising contracts now being controlled by the congress. (11) *Industrial Disputes Investigation Act*.—A brief review of this law was given in order, the executive council stated, that the convention might reach a decision on reaffirming the policy of the congress in regard to the act, or whether in the light of recent experience a change is considered necessary. (12) *Picketing and Injunctions*.—Attention was called to the injunctions issued during the past year designed to prohibit the right of peaceful picketing during trade disputes. The executive council recommended that on this subject the convention reaffirm the demands of the last two years, which are as follows: (a) The re-insertion into the Criminal Code of the sections establishing

the right of peaceful picketing; (b) Repeal of amendments to the Criminal Code passed during the panicky Session of Parliament, 1919, especially the elimination of words "force", "terrorism", and "industrial or economic change", as mentioned in 97b and other sections; (c) Amendments to define sympathetic strikes and bring Canadian law into harmony with the British law on this matter. (13) *Unemployment*.—On this subject the executive council reiterated the declarations of previous conventions of the congress as to the means of meeting the unemployment problem. (14) *Immigration*.—Under this heading the executive council made the following declaration on this subject: "The organized workers of Canada desire to see Canada peopled by a free, enlightened, moral, energetic and law-abiding class of citizens, and recognize that this can be done quickest by an influx of immigrants. This influx, however, should be the spontaneous movement of the immigrants themselves, and false inducements should be prohibited, and the fullest accurate information freely circulated in the countries from which they come. Whilst every regard should be had for the welfare of those who seek our shores, the first consideration should be the Canadian people and the betterment of our common country. This consideration covers the exclusion of certain nationalities and classes of people who either by temperament, non-assimilative qualifications, habits, customs or absence of any permanent good which their coming brings to us, are not a desirable acquisition to our citizenship." (15) *Communist Activities in Canada*.—Attention was called to the two agencies, viz., The Workers' Party of Canada and the Trade Union Educational League, which is was asserted have been established to destroy the present trade union movement in order to give effect to the Communist policies of the Red Trade Union International of Moscow. (16) *Miscellaneous Matters*.—This section dealt with (a) the affiliation of the National Association of Marine Engineers,

(b) issuing of charter to the Associated Federal Employees of Canada, and (c) the solicitation of funds for relief of the Russian famine sufferers.

Reports of Provincial Executive Committees.

The following is a summary of the contents of the reports which were submitted by the various provincial executive committees of the congress:

BRITISH COLUMBIA.—The executive committee for the province of British Columbia, owing to the early session of the Legislature, was unable to present any legislative requests. A number of bills affecting labour had, however, been presented, but they had received little attention. Although originally not accepting any obligation for unemployment relief, the Provincial Government had finally adopted a similar course to other provinces, paying its quota of the money expended by the municipalities and the Dominion Government.

SASKATCHEWAN.—The executive committee for the province of Saskatchewan reported that efforts had been made to secure the passage by the Legislature of a state insurance act for industrial employees, but had not met with success. Neither had other requests for legislation been granted.

MANITOBA.—Requests had been made on the Provincial Government for certain legislation, but owing to the unstable political conditions existing in the province at that time none of the programme presented had been brought before the Legislature.

ONTARIO.—On January 26, 1922, the executive committee of the province had interviewed the Provincial Cabinet and presented a request for desired legislation. The report stated that very little labour legislation had been passed at the 1922 session of the Legislature; the measures enacted were (1) amendment to the Workmen's Compensation Act, (2) an act providing for one day's rest in seven, (3) definition of steam boiler, (4) minimum wage act, and (5) an act

respecting works to relieve unemployment.

QUEBEC.—The committee for the province of Quebec stated that almost all of the unions have had to combat attempts to reduce wages. Only the well organized trades had been able to withstand the battle, the others having had to accept reductions, and as a consequence had lost in membership. Reference was made to the National and Catholic Syndicate movement, which it was stated did not appear to be making headway, although a number of syndicates had been formed in Montreal and towns of lesser importance. In January, 1922, a programme of desired legislation had been laid before the Provincial Government, but none of the proposals had been adopted. The parliamentary representatives reported that a resolution seeking to compel all labour organizations to incorporate had been introduced in the Legislature. An amendment to the resolution was carried by the Legislature inviting labour unions of the province to adopt an essentially Canadian constitution.

Reports from Provincial Federations of Labour.

The two provincial federations operating under charters from the congress presented reports, the following being a synopsis of their activities:

ALBERTA.—The annual convention of the Alberta Federation of Labour was held in January, 1922, at which resolutions were adopted in favour of desired legislation. These proposals were subsequently submitted to the Provincial Cabinet. Legislation directly affecting the workers was adopted by the Legislature as follows: (1) Amendment to the coal mines act, (2) minimum wage act, (3) an act providing for the creation of a bureau of labour, and (4) an act providing for superannuation of civil servants. The federation reported that there had been considerable unemployment, and efforts had been made to reduce wages, but with a few exceptions these attacks had been resisted.

NEW BRUNSWICK.—The New Brunswick Federation had met in February, 1922, and passed a number of resolutions dealing with matters of interest to labour. These were subsequently brought to the attention of the Government. A parliamentary representative was appointed, and his report dealt with the measures which had been adopted by the Legislature, among which was an amendment to the Workmen's Compensation Act.

Reports of Fraternal Delegates.

The executive council also submitted reports which had been prepared by the two fraternal delegates who had attended respectively the conventions of the American Federation of Labour and the British Trades Union Congress.

Report of Committee on Officers' Reports.

The Committee on Officers' Reports approved of the work performed by the executive council during the year, calling particular attention to the more important items, and recommended several of the matters to the careful consideration of the delegates. In reference to the order of President Hanna of the Canadian National Railways, in connection with which a resolution was also introduced, recommendation was made that the attitude of the congress, opposing the order, be reaffirmed. Approval was given by the committee to the publication of the Canadian Congress Journal and to the direct control of the advertising. Some criticism was made of articles which had appeared in the journal and a debate took place. The action of the executive council in defending the international trade union movement and in opposing its opponents in the columns of the official publication was endorsed in convention by a large majority. The committee endorsed the statement of the executive council in regard to Communist activities in Canada, the chairman of the committee pointing out that the adherents of these new movements were endeavouring to use the machinery of the bona fide trade

unions as a means of carrying on their propaganda in Canada. With only one dissenter the report of the committee was adopted. The committee approved, and the convention endorsed, the recommendation of the executive council in regard to amendments to the criminal code in reference to picketing and injunctions.

The committee in dealing with item 13 (Unemployment) of the report of the executive council, also considered resolutions Nos. 10, 11 and 12, and made the following recommendation: "That the executive council of the congress be instructed to make representations before the conference on unemployment to be convened the following week; and that in the opinion of this congress where work cannot be provided by public authorities at trade union rates of pay the Federal Government be called on to provide relief on a scale sufficient to maintain the physical efficiency of those relieved and their dependents." In reference to the complaint concerning the repairing of cars for the Canadian National Railways, the executive recommended that where contracts are given for the repair of rolling stock contracts be awarded only to firms paying fair wages and agreeing to working conditions not less favourable than those recognized by the management of the Canadian National system. The remainder of the report of the executive council and the recommendations of the committee on officers' reports were adopted by the convention. The committee also approved of the reception of the reports of the provincial executive committees and the fraternal delegates, calling special attention to the defeat of the attempt made in the province of Quebec to have trade unions become incorporated.

Report of Secretary-Treasurer.

Mr. P. M. Draper, secretary-treasurer, submitted his report showing total receipts, including the balance from the previous year, of \$25,157.02; total ex-

penditures for the year amounted to \$22,877.11, leaving a balance of \$2,279.91. The membership showed a loss of 41,707, now standing at 132,071. This decrease, it was explained, was occasioned by the lack of employment, large numbers of trade union members being unable to pay their dues, and only those actually in good standing were reported. Three local unions and two trades and labour councils were chartered during the year, there now being 65 of the last-named bodies in affiliation with the congress.

The trustees of the congress building, (which are the executive officers) presented a report showing that the revenue amounted to \$1,749 and expenses to \$1,735.87, leaving a surplus of \$4.13.

The Committee on Audit, to which these statements were referred, reported having found the accounts correct, and the report was adopted.

Appropriations.

The Committee on Ways and Means recommended the payment of the following amounts: To the associate secretary, \$100; translator, \$10 per day; messenger, sergeant-at-arms and janitor of hall, \$50 each; fraternal delegate to the British Trades Union Congress, \$900 and railway fare to Montreal; payment of hotel expenses of fraternal delegates from the American Federation of Labour and the British Trade Union Congress; payment of expenses of congress stenographer attending the convention; and that the salary of the secretary-treasurer and stenographer remain at \$2,000 and \$1,800, respectively. The report was adopted without discussion.

Report of Immigration Committee.

A special committee on immigration was appointed, to which was referred for consideration section 14 of the report of the executive council dealing with the question of immigration. The full report of the committee, which was adopted, was as follows:

We have carefully examined the many documents which have been presented by the executive council, along with a brief prepared by them, dealing with the subject of immigration and containing a synopsis of the decisions of the congress on this matter during the past seven years.

Measures are necessary which will prevent the further aggravation of our unemployment problem by unwarranted immigration to our industrial centres. We are of the opinion that entire prohibition is not practicable or advisable for Canada, except in the case of Orientals, but that our efforts should be towards effective supervision and regulation. Experience has proven that the head tax and monetary provisions have not had much effect in restricting immigration as by the provision of circulating funds amongst certain peoples and financing of others by employers, these regulations have been circumvented to the disadvantage of the worker. We endorse the declaration incorporated in the executive council's report (Item 14, page 52) and to give effect to same particularly recommend:—

Oriental Immigration.—This is no longer a problem of our western provinces, but the yellow menace exists to an ever increasing degree throughout the entire Dominion. We note with pleasure the amendments to the Narcotic Drug Act, providing for the deportation of aliens found guilty under this act, which if rigidly enforced, should materially reduce our Oriental population, according to statistics of previous convictions. We reiterate our demand for total exclusion of all Orientals and recommend that the executive council of the congress and the provincial executives press for legislation which will more effectively control the activities of Orientals already in Canada.

Immigration Act Amendments.—We reiterate our demands for the repeal of Bill 03 and the amendments incorporated in Bill 52 (1919) so as to restore the right of British citizens now liable to arbitrary deportation.

We request legislation to prevent hiring of labour outside of Canada by private employers and closest co-operation with the Employment Service of Canada and of Great Britain.

Your committee endorses the formation of a Dominion Advisory Council of Immigration formed along the lines of the Employment Service of Canada so as to prevent the overlapping of activities of the Federal and Provincial Governments, and that the incoming executive urge for representation of the Trades and Labour Congress of Canada upon such a council, if formed.

In this connection, we call attention to the British Government scheme for immigration, based on resolutions passed at the conference of Prime Ministers held last year, and which provides for expenditure of large sums of money on a proportional basis with overseas Dominions who enter into the scheme of aiding British workers to emigrate.

We note the work of the Canadian National Council of Immigration of Women, and recommend its continuance until larger Immigration Board is formed.

Your Committee further recommends (1) the maintenance of the Immigration Department under a separate Minister of the Crown, and if this Ministry is abolished, then we believe it should be brought under the direction of the Minister of Labour. (2) Provision in the Immigration Act to place amongst the prohibited class labour hired to replace strikers or those hired without the sanction of the Employment Service Council of Canada. (3) Opposition to all bonuses or grants to private agencies. (4) Request the British Government for closer supervision of immigration advertising and control of booking agencies. (5) That in order to relieve congestion in industrial centres, land settlement and colonization schemes should be made available to citizens and others already located in Canada. (6) Medical and other examination of immigrants to take place so far as possible at port of embarkation.

Report of Committee on Union Labels.

The committee on union labels recommended that the executive council be specially instructed to continue its efforts to secure legislation legalizing and assuring protection to recognized trade union labels. It was also recommended that the congress reaffirm its former action in supporting the Cigarmakers' Union against what are termed unfair shops.

Attention was directed to union water-marked paper and a request made that the delegates endeavour to have their respective local unions use such paper. The executive council was also requested to endeavour to have union paper made in Canada.

The committee stated that the union label trades which had suffered most from the open shop campaign are the allied printing trades, cigarmakers, boot and shoe workers, and restaurant em-

ployees, and the delegates were requested to use their purchasing power in the interest of these organizations. It was also recommended that the delegates do all in their power to promote the sale of union label goods of all kinds through bringing them to the attention of members of their respective organizations and friends.

Recommendation was made that the executive of the congress be requested to communicate with all trades and labour councils and all building trades councils in Canada urging upon them the necessity of forming union label leagues for the purpose of promoting the use of the union label on all articles manufactured, and that all label leagues and committees keep the executive council informed of manufacturers using labels. The executive was also asked to encourage women's label leagues.

More loyal support was requested to the authorized labour press, having regard for the fact that the necessity for more accurate information concerning the activities of the trade union movement is one of the most urgent needs at the present time to combat the publicity campaigns being carried on in some of the privately-owned newspapers by the enemies of organized labour. Trade unionists were urged to subscribe to the Canadian Congress Journal and the recognized labour papers in their respective localities, and to give their sympathetic support in the securing of legitimate advertising to meet the financial requirements of labour papers.

The recommendations of the committee were approved.

At the afternoon session of the first day Mr. John Manning, secretary-treasurer of the Union Label Trades Department of the A. F. of L., addressed the convention urging greater support for union label products, and suggested that the congress should use its efforts to secure legislation to protect the bona fide trade union labels. He also referred

to the strikes of coal miners and railway shop employees in the United States.

Ask Withdrawal of Troops from Nova Scotia Coal Fields.

At the afternoon session of August 22, President Moore read a telegram from Mr. Dan Livingston, president of District No. 26 of the United Mine Workers, whose members were on strike against wage reductions, asking that a protest be made against the sending of troops into the district, which, it was asserted, could only be for the purpose of breaking the strike, as not one arrest for lawlessness had been made since the strike was called on August 15.

Delegate John W. Watson, representing the United Mine Workers, made a statement on the demands of the strikers and strongly protested against the militia being sent into the locality, and made a request that a resolution on the subject be prepared and forwarded to the Federal and Provincial authorities.

President Moore explained that the executive council had already sent a message to Premier King in connection with the question of troops being sent into the district. The Prime Minister had replied that no troops had been sent at the instance of the Government; such troops as had been forwarded were requisitioned by the local authorities for the preservation of law and order. The Prime Minister had suggested that the persons who had requested the troops should be asked to withdraw their demand. The president further explained how the congress executive had been ignored by the labour men in the coal fields of Nova Scotia, and not being in touch with the men concerned in the present dispute, they had no one to whom the suggestion of the Prime Minister could be submitted. }

The request for the preparation of a resolution was referred to the Committee on Resolutions, who later presented the following message to be wired to

Premier King, Provincial Premier Murray and to the officers of District 26:

With further reference to the use of troops in the Nova Scotia mining troubles, this congress in annual convention, emphatically approves telegram sent by President Moore on behalf of the executive council protesting against the use of and concentration of troops in industrial mining disputes as intimidation of the workers and as a too ready assistance of the money-grabbers whose only care is their pockets rather than the rights of the public. The presence of troops, particularly where there is no disorder, (property being protected by the workers), and especially where the mayors of the municipalities of Nova Scotia have disowned the necessity for assistance, only leads to serious trouble and rioting, and is subversive of the rights of the people, and makes a mockery of the law, congress asks that you bring strong pressure to bear on parties responsible for presence of troops to have them evacuate the locality at once.

To this telegram the Right Hon. W. L. Mackenzie King, replied reiterating the statement in the earlier message to President Moore that the presence of troops in the district mentioned was due to requisition of local authorities, and stating further that: "Under the circumstances I have given instructions to have contents of your wire communicated through Department of National Defence to officer of the district under whose requisition troops have gone to Nova Scotia, with the request that he advise local authorities of its presentations, at the same time informing them that our Government is most desirous that the troops should be withdrawn just as speedily as may be possible in the opinion of the authorities by whom they have been requisitioned, and who are financially liable for expenditures incurred in connection with their aid to the civil power."

Some discussion took place on the reading of the above message from the Prime Minister. It was decided that an acknowledgement should be forwarded to Mr. King expressing appreciation for the prompt, courteous and sympathetic reply, and expressing the hope that he would continue to do his utmost with a

view of having the troops withdrawn immediately. It was also decided, as no reply had been received from Premier Murray, that a copy of the message received from the Right Hon. Mr. King should be forwarded to him with a request that he acknowledge the message sent to him by the congress on August 22nd. On August 25th a letter was received from the deputy provincial secretary of Nova Scotia, replying to the telegram sent to Premier Murray on August 22nd, in which he stated that the troops were requisitioned by the local authorities to protect the coal areas and workings, which are the property of the people of Nova Scotia, these having been abandoned by those responsible for keeping the mines clear of water and gas.

On the same day another telegram was received from Premier King, in which he informed the convention that "in addition to having made known the attitude of the Federal Government in the manner disclosed in my previous telegram to you, the presence of the Hon. D. D. McKenzie in Nova Scotia at this time is due to the desire of my colleagues and myself to see that the parties concerned are kept fully aware of the position of the Federal Government in this matter, and of the responsibilities and financial liability involved in the calling out and retention of the troops in aid of the civil power."

Subsequent to the receipt of the above messages a resolution was unanimously adopted expressing the unalterable opposition of the congress to the importation of the militia into strike areas until the power of the civil authorities has been exhausted.

A resolution was also approved pledging the "fullest moral support to the striking miners of District 26 in their endeavour to secure a wage sufficient to maintain the Canadian standard of living."

In reference to the strike in the United States of the railway shopmen a

telegram was read from the Railway Employees' Department of the A. F. of L., asking that a resolution be passed by the congress requesting all delegates to urge their respective central bodies to appeal for financial aid from organized labour to assist the strikers who, it was stated, numbered 400,000.

Industrial Disputes Investigation Act.

The following resolution was presented on the action of the railway companies in reducing the wages of certain of their employees pending enquiry before a board of conciliation and investigation under the provisions of the Industrial Disputes Investigation Act:

Whereas, the legality of the Industrial Disputes and Conciliation Act has been called into question by certain Canadian employers of Labor; and, whereas, these employers have violated the letter, spirit and intent of the Act, by reducing wages and changing working conditions before Arbitration Boards have had an opportunity to pass upon the merits of the disputes in question; and, whereas, the said employers have given statements to the Press challenging the constitutional status of the Act; therefore, be it resolved, that the incoming Executive of the Trades and Labour Congress of Canada be instructed to take this phase of the Industrial Disputes and Conciliation Act up with the legal advisers of the Federal Government with the object of ascertaining the legality of the Act; and, be it further resolved, that the Executive Council be empowered to secure legal or other advice to enable them to clear up the present very unsatisfactory state of affairs.

Another resolution declared that a local street railway company had also reduced the wages of its employees without reference to a board, which action the resolution further stated was a violation of section 57 of the act, and asked that efforts be made to have a penalty clause inserted in the law to cover such cases.

The Committee on Resolutions, to which these resolutions were referred, with a minor change in the phraseology, recommended both for adoption. During the debate a suggestion was made by Senator G. D. Robertson that the act should be further amended to compel

the party desiring a change in working conditions to apply for a board. The committee was instructed to further consider the subject, subsequently submitting the following report:

In view of the fact that railway companies have violated section 57 of the Industrial Disputes Investigation Act by putting into effect a reduction in wages to their employees after there was a dispute, and as there is no penalty attached to that section of the act, be it resolved, that the executive council of the congress use its best efforts to have the clause amended by imposing an adequate penalty on companies and corporations violating this section; also that the penalty imposed upon employers for unlawful lockouts be increased to allow for the number of employees involved, as is the case when applied to employees who unlawfully go on strike; and be it further resolved, that the executive council be instructed to urge the Federal Government to amend the act, making it compulsory upon the party seeking a change in wages or conditions to make application for a board in case an agreement is not reached.

The president suggested that a further amendment should be sought to the effect that a declaration that negotiations had failed instead of a strike vote having been taken, would be sufficient grounds on which to apply for a board. This latter suggestion and the report of the committee were adopted.

Conciliation and Arbitration for Civic Employees.

A resolution was submitted asking for the establishment of boards of conciliation and arbitration for municipal employees. The resolution as finally adopted was made to include provincial employees, and read as follows:

Be it resolved that the provincial executives be instructed to ask the governments of their respective provinces to enact legislation providing for the establishment of boards of conciliation and arbitration covering all provincial and municipal employees, and, that the Quebec provincial executive be instructed to ask the Quebec Government to amend the Municipal Arbitration Act so as to make it applicable to all classes of provincial and municipal employees, to all disputes arising from questions of salaries or working conditions, and that the arbitration proceedings cannot be stopped by any other legal proceedings; that the Quebec provincial

executive be instructed to work jointly with the Montreal Federation of Municipal Employees to that end.

Fair Wage Demands.

Three resolutions were introduced on the subject of fair wage clauses being inserted in government contracts. These were referred to the Committee on Resolutions, who after having twice reported and having had the resolutions sent back to be redrafted, finally brought in the following resolution, which was adopted:

That the Trades and Labour Congress urge the Federal and Provincial Governments to enact legislation providing for the insertion of fair wage clauses in all contracts on work performed by any department or branch of either the Federal or Provincial Governments, or any commission elected or appointed by such governments; the legislation so enacted to be the same as the fair wage resolution passed in 1900 and in 1907, and amended by Order-in-Council of the Federal Government on June 7, 1922, and be it further resolved, that pending the enactment of the above mentioned legislation by the Ontario Government that that government be requested to insert the fair wage resolution passed in 1900 in all contracts let by the Government or by any department or commission of the Government or any undertaking subsidized by the Government.

Hours of Labour.

There were nine resolutions on the subject of hours of labour, four of which dealt with the eight-hour day and for which the committee submitted the following substitute, which was adopted:

Whereas, the eight-hour day has been agreed upon in the Treaty of Peace, and at the annual conferences of the International Labour Conference, as the maximum work day for industrial workers, and whereas as a result of mechanical invention labour is being displaced rapidly and wage-earners thrown out of employment, and the burdens of the employed increased, directly or indirectly, in support of these unemployed, be it therefore resolved, that the Dominion and Provincial Governments be urged to implement Canada's obligation as a member of the League of Nations by enacting legislation providing for a maximum work day of eight hours.

The remaining five resolutions on hours of employment, two of which were

combined, and which were also adopted, were as follows: (1) Pledging to the printing trades unions all moral and other helpful support in their fight for the 44-hour week; (2) In favour of the enforcement of the Quebec law limiting to 55 hours the working week for women and children employed in cotton factories; (3) In favour of legislation that will ensure the two-platoon system for all fire fighters in the Dominion; (4) In favour of one day's rest in seven for all wage-earners.

Workmen's Compensation, Old Age Pensions and Mothers' Allowances.

Six resolutions were presented on the subject of workmen's compensation, all of which were approved. These included the following demands:

That the congress reiterate the request for the passage of a workmen's compensation act for the province of Quebec, embodying the proposals submitted by the provincial executive last year.

That the Ontario Workmen's Compensation Act be amended (1) making it compulsory for employers to report all accidents to workmen, no matter how minor they appear at the time of occurrence; (2) to provide more adequate protection to men employed in the painting and wood-finishing trades by including in the occupational diseases sickness caused by the effects of volatile substances; (3) to include benefits for disabilities caused as a result of blood poisoning, ivy poisoning and other forms of poisoning contracted by workmen whilst engaged at their regular occupations; (4) to include all men engaged in the building trades; and (5) to increase the rates of compensation to 100 per cent of the workmen's wages.

Two resolutions asking for the enactment of old age pensions were submitted, the convention approving of the request and instructing the executive council of the congress to press for such legislation.

Two resolutions on the subject of mothers' allowances were also adopted (1) in favour of the Ontario act being amended to include payments to mothers with only one child, and (2) that the executive committees of the provinces where no provision is made for allowances to widowed mothers endeavour to secure the passage of a law providing for such payments.

Health and Safety.

Two resolutions setting forth that the fumes arising from spraying machines used for the application of paint and other poisonous substances were injurious to the health of the workers, and asking for their prohibition, were adopted, as was a request for the appointment of building inspectors for the purpose of having the provisions of the Ontario Building Trades Protection Act enforced throughout the entire province.

A resolution was approved asking the Board of Railway Commissioners to regulate the length of railway sections, and the minimum number of experienced men who shall be employed thereon, taking into consideration the number of switches, public crossings and railway crossings, etc.

Other resolutions endorsed were (1) in favour of proper accommodation in boarding and sleeping cars for railway employees, and such to be subject to inspection, (2) in favour of legislation to prohibit the manufacture or importation of matches which have not been treated for "no after glow", (3) approving of the appointment of sufficient inspectors to enforce the Ontario act respecting stationary and hoisting engineers, and (4) in favour of legislation regulating electrical work and the appointment of properly qualified men to enforce such regulations.

Want Government Control of Coal.

The Alberta Federation submitted a resolution, the preamble of which declared that the coal industry of the province of Alberta is grossly mismanaged,

as a result of which the mines were only producing during half the workable time; that the people were compelled to pay excessive prices for coal, and that the mine workers and their families are living in poverty through enforced idleness. The resolution, which was adopted, protested against these conditions, and asked that they be checked by government supervision and control; further, that no opening up of new mines be allowed in the province until wider markets have been developed to warrant such action, and also that where it is shown that any of the mines in Alberta are failing to pay wages consistent with Canadian living standards they be suspended from operating.

Another resolution dealing with the coal situation, and which was also approved, asked that the Dominion Government be requested to develop the coal fields of the country in order to make Canada independent of foreign coal.

Request Amendments to Naturalization Act.

A resolution asking for the following amendments to the Naturalization Act was adopted without opposition: (1) That provision be made under the Act so that married women in special cases, (deserted wives, husbands insane, permanently injured, etc.), may become naturalized; (2) that the period of residence in the country prior to issuing of citizenship papers be reduced from ten to three years; (3) that the fee for naturalization papers be reduced from \$8 to \$1.

Civil Service Demands.

Several resolutions dealing with conditions of employment in the civil service were referred to the Resolutions Committee, on which the following recommendations were made and adopted: (1) In favour of joint councils and the setting up of departmental councils similar to those established in the Government service of the United Kingdom;

(2) approval of immediate consideration and adjustment of the cases of Government employees now paid so-called prevailing rates with a view of putting these rates on the same basis as rates paid for similar classes of work in commercial establishments; (3) that the office cleaners of Federal Government buildings be paid on an annual salary basis, and allowed the same privileges as permanent employees.

The convention referred to the executive council a resolution condemning the removal of appointment of certain classes of Dominion Government employees from the jurisdiction of the Civil Service Commission, which was characterized as a reversion to political patronage, and asking that the Order-in-Council authorizing such action be rescinded. Another resolution asking for support in the organization of Federal Government employees was also referred to the executive council.

Refuse to Support Loan to Russia.

There was submitted by District No. 26 of the United Mine Workers a resolution seeking the support of the congress for a proposed loan of fifteen million dollars from the Canadian Government for the purchase of wheat seed and grain to help the Russian famine sufferers. The Committee on Resolutions recommended non-concurrence in the proposal. A discussion ensued, in which four of the speakers strongly supported the proposed loan, one of the speakers hinting that the committee had been influenced in reaching its decision by the reports of yellow journals on Russian conditions, and stated that the Russian Soviet Government, since its inception, had been the target of an incessant campaign of persecution by the employers and capitalists of the world. President Moore replied to the arguments, and pointed out that for six months an appeal for aid for the famine stricken in Russia had been made in the Canadian Congress Journal. If the advocates of the loan believed in relief for Russia, he in-

vited them to send in their contributions. Referring to conditions in Russia, which had been mentioned by one of the speakers, President Moore asked, "Do you think you could hold this convention in Russia? Do you think you could have free speech there? If you tried it, you would be stood up against a wall in front of some of the red guard and shot down. When Russia establishes a government that is representative; when it grants the liberty it preaches about to the Russian people; when it removes its soldiers from the throats of the workers, then we will come to the aid of the people of Russia. If Canada has any money to loan, let it be to relieve housing and destitution. Don't think because they have overthrown Czarism in Russia they have overthrown autocracy. Instead of that they have set up the worst kind of an autocracy, a military dictatorship."

To close the debate the previous question was called, the report of non-concurrence by the committee being adopted on a standing vote of 147 to 56.

Another resolution introduced by District 26 of the United Mine Workers parliamentary representation to one of occupational, professional and economic interest basis, was given short shrift by the convention, there being no one present to oppose the report of the committee which was the rejection of the proposal.

Other Resolutions.

There were 69 resolutions presented in accordance with the provisions of the constitution. Some others were submitted beyond the time set for their reception. The president ruled them out of order, but he informed the convention that the subjects contained therein were covered by resolutions regularly submitted. The majority of the resolutions were referred to the Committee on Resolutions, the remainder being sent to committee dealing with special subjects. The subjects of the resolutions adopted, and not dealt with elsewhere, are as follows:

In favour of the enforcement of the Marking Act in accordance as far as possible with the original provisions of the law.

In favour of amendments to the Ontario Mechanics' Lien Act (1) to facilitate the recovery of wages, (2) to make 90 days the period for the issuing of writs for wages, and (3) to extend the act to cover all workers irrespective of the class of occupation or rate of wages.

In favour of legislation similar to that in the United States exempting from taxation union assessments and ordinary dues.

In favour of the abolition at the earliest moment of the tax on purchases and in the meantime there be no increase in the present tax.

In favour of the Dominion Government adopting suitable legislation for the incorporation and regulation of co-operative societies.

Against the repeal of the Ontario Adolescent School Attendance Act.

Against the bonus or premium system being introduced into various trades.

In favour of urging upon the Department of Labour the necessity of publishing an abbreviated semi-annual report on labour organization which will contain an up-to-date directory of labour bodies.

In favour of legislation providing for all workers the right to organize, and that no worker shall be penalized or discharged for joining or affiliating with any bona fide or recognized trade union without a just cause.

A resolution was introduced proposing that the books and accounts of corporations where ten or more workpeople are employed should be available to the permanent employees for their information. The Committee on Resolutions reported non-concurrence, which was subsequently changed by the convention referring the resolution to the executive council.

Resolutions on the following subjects failed to be endorsed: (1) direct representation on the executive council of the American Federation of Labour, (2) Prohibiting persons holding Government positions to which is attached a salary in excess of \$2,000 per annum from being officers of the congress, (3) exemption of trade union supplies from customs duties.

Fraternal Messages.

Mr. Wm. Hulsbeck, of Cincinnati, Ohio, fraternal delegate from the American Federation of Labour, tendered the greetings of that organization to the convention, during which he referred to the good feeling existing between the organized workers in Canada and the United States. He also made mention of the industrial troubles prevailing in the United States and the determination of the miners and railway shopmen to oppose the proposed wage reductions.

Mr. Wm. Carter, M. P., Landsfield, Nottinghamshire, Eng., fraternal delegate from the British Trades Union Congress, in his address made reference to the serious unemployment conditions in Great Britain and the difficulties which confronted the British work people, who had been compelled to accept heavy wage reduction in the settlement of the strikes which, it was stated, had been forced upon them. From the study of the agenda of the Canadian Congress he found that the aspirations and aims of the workers in Canada were the same as those in Great Britain. The speaker stated that organized labour has a far greater problem to face than the mere fight for the proper adjustment of wages and conditions of labour. Its great battle is to fight against war. Mr. Carter in closing urged the Canadian workers to improve their working conditions and to join hands with the workers of the world to stop all wars.

By invitation, Mr. Samuel Gompers, president of the American Federation of Labour, who had been in attendance at the annual convention of the New York

State Federation of Labour being held in Poughkeepsie, N. Y., visited the meeting of the congress and congratulated the Canadian organization on its success. Mr. Gompers stated that from the date of the signing of the armistice the associations of employers in the United States had harassed the workers, and never had such huge sums of money been spent to oppose the organized workers. Reference was made to the "open shop" campaign and the present drive for wage reductions. Mr. Gompers agreed with the sentiments of the fraternal delegate from Great Britain in regard to war. Before the war he was a pacifist, but during the war he was a fighting man, but now was again a pacifist. The members of the American Federation of Labour and the Trades and Labour Congress of Canada were united on labour matters. As citizens they were of separate countries, and the American Federation had never once tried to interfere with the political or legislative affairs of Canada. Mr. Gompers deplored dual unions and appealed for unity in the ranks of the wage-earners irrespective of their religious beliefs.

President Moore replied to the addresses, expressing the hearty goodwill which existed between Canadian labour and the British Trade Union Congress and the American Federation of Labour. Subsequent to the delivery of the addresses the delegate from the British Congress was presented by the delegates with a gold watch and the American Federation delegate with a diamond ring.

Election of Officers.

The election of officers, which was presided over by the fraternal delegate

from the American Federation of Labour, resulted as follows:

President.—Tom Moore, Ottawa, Ont.

Vice-Presidents.—Bert Merson, Toronto, Ont.; Alex. McAndrew, Moose Jaw, Sask.; J. T. Foster, Montreal, Que.

Secretary-Treasurer.—P. M. Draper, Ottawa, Ont.

Provincial Executives. — Quebec: chairman, Gus Francq, Montreal; committee, Arthur Beaulieu, Montreal; Omer Fleury, Quebec; and O. Gauvin, Three Rivers. Ontario: chairman, Jos. Gibbins, Toronto; committee, A. Donald Dear, Ottawa; R. H. Hessel, London; and Jas. Lockwood, Sault Ste. Marie. Manitoba: chairman, Geo. E. Wright, Winnipeg; committee, H. Carr, Winnipeg; G. H. Palmer, Dauphin; and A. J. Williams, Brandon. Saskatchewan: chairman, Gerald Dealtry, Saskatoon; committee, Jas. Somerville, Moose Jaw; G. H. Merlin, Regina; and Harry Perry, Regina. British Columbia: chairman, W. J. Bartlett, Vancouver. The appointment of the members of the committee for British Columbia and of the chairman and committee for Nova Scotia was referred to the executive council.

Fraternal delegate to the British Trades Union Congress:—J. W. Wilkinson, Vancouver, B. C.

No fraternal delegate to the American Federation of Labour was elected, the congress holding its 1923 convention previous to the next meeting of the federation.

Vancouver was chosen as the convention city for 1923.

CONVENTION OF THE CONFEDERATION OF CATHOLIC WORKERS OF CANADA.

THE first annual convention of the Confederation of Catholic Workers of Canada was held in Montreal from August 12 to 16. There were present 109 delegates representing 66 unions out of a total of 80 unions affiliated with the Congress. Amongst the delegates were about twenty chaplains headed by the Rev. Father Edmour Hébert, of Montreal, acting chaplain of the Congress, and Mr. S. Lapointe, of Quebec, legal adviser of the unions. A cablegram from Cardinal Gaspari bestowing upon the Convention the Pope's apostolic blessing was read. Mr. T. Bertrand represented the Dominion Department of Labour, and Mr. A. Robert the Provincial Department.

President Pierre Beaulé in his opening address, maintained that the National and Catholic Unions had in principle the same aim as the international unions, namely, the bettering of conditions for the working man. It was in the means for advancing this purpose that the two movements differed. The Catholic unions never spoke of striking until conciliation, arbitration and all harmonious means had failed.

About forty resolutions were proposed and discussed. The more important were the following:

Requesting the Provincial Government to declare June 24 a legal holiday.

Requesting the Federal Government, in order to protect large families, to increase from \$300 to \$400 per child the amount of exemption from the income tax.

Requesting that preference be given to members of the Catholic unions in the building of structures, the property of Catholic corporations, convents, colleges and Catholic School Boards, and resolving that the congress through the secre-

tariat of the Confederation, the Central councils in each locality, and the local Catholic unions of the building trades and their chaplains try by all possible means to bring the religious institutions, churchwardens and school boards to adopt an adequate scale of wages based on the demands of the unions of the locality, said scale of wages to be included in the contract for work and to be binding on the contractor; that the contracts given by the above-mentioned institutions hold a preferential clause in regard to members of Catholic unions.

Requesting the Federal Government not to alter the existing duty on boots and shoes.

Directing that rural districts be informed of the difficult conditions under which the workers in the cities have to labour in order to induce the farmers to remain on the farm; that lecturers be sent to such localities for that purpose; and that the Legislature be requested to make the taking of a diploma and a period of apprenticeship compulsory in the case of several trades so as to limit the exodus of farmers to the cities.

Requesting the amendment of the Provincial law concerning industrial establishments and prescribing the establishment of drug stores in localities where there is danger of accidents.

Requesting that the Government, either through amendments to the Workmen's Compensation Act or by means of a special law, take means to insure pensions or indemnities to professional workers.

Requesting the grant of scholarships by the Provincial Government for each of the school years of the technical schools.

Requesting that the provincial law respecting early closing of stores be

amended by changing the evening closing hour limit from seven to six o'clock.

Requesting the establishment of training courses for garment workers.

Requesting that the Provincial Government make grants to consumers' co-operative associations.

Requesting the Dominion Government that the Catholic unions be adequately represented at the forthcoming International Conference to be held in Geneva.

Requesting the various unions to urge the contracting employers to form employers' associations through which to negotiate with the workers' associations.

Requesting that the number of hours of work for women and children in the textile industry be 50 per week.

Protesting against the holding of military exercises in schools and requesting that said exercises be replaced by athletics.

Recommending the passing of a law authorizing towns and municipalities to

render compulsory an apprenticeship system for barbers, with examinations, certificates and inspection, and courses in hygiene.

Requesting the establishment of model courses for young delinquents.

Requesting the amendment of the law on money loans for the construction of houses for workers, so that it may be possible for the workers to benefit by it.

Quebec was chosen as the place for the next convention.

Notice was given of a motion to be presented next year to transfer the Headquarters of the Confederation from Quebec to Montreal.

The following officers were elected for the ensuing year:—President, Mr. Pierre Beaulé, Quebec; Vice President, Mr. A. Morin, Hull; Secretary, Mr. J. H. A. Poirier, Quebec; Treasurer, Mr. A. Charpentier, Montreal. Messrs. P. Beaulé and A. Charpentier were nominated as technical advisors for the International Labour Conference to be held at Geneva.

DOMINION-PROVINCIAL CONFERENCE RE UNEMPLOYMENT, ETC.

AT the call of the Government of Canada representatives of the Dominion and Provincial authorities met in conference in the Parliament Buildings at Ottawa on September 5 to 7, "to consider the problem of unemployment, as well as aspects of other industrial and social questions which have been the subject of action at the International Labour Conference." Representatives of various municipalities and other public bodies were present. The proceedings were opened by the Right Honourable W. L. Mackenzie King, Prime Minister. The Honourable James Murdock, Minister of Labour, and the Honourable H. S. Beland, Minister of Soldiers' Civil Re-establishment, were present on behalf of the Dominion Government. The delegates in attendance were as follows:

Nova Scotia: Hon. G. H. Murray, premier; Hon. R. E. Finn, Minister without portfolio; W. B. MacCoy, secretary, Industries and Immigration; Mr. J. C. Tory, M.P.P.

New Brunswick: Hon. Clifford W. Robinson, Minister of Lands and Mines.

Quebec: Mr. Jos. Ainey, General Superintendent of Employment Service; Mr. J. A. Metayer, Deputy Minister of Public Works.

Ontario: Hon. E. C. Drury, Premier; Hon. Walter Rollo, Minister of Labour; Mr. J. H. H. Ballantyne, Deputy Minister of Labour.

Manitoba: Hon. R. W. Craig, Attorney-General; Mr. A. MacNamara, secretary, Bureau of Labour.

Saskatchewan: Hon. J. P. Gardiner, Minister of Highways; Mr. Thos. Molloy, Commissioner of Labour.

Alberta: Hon. Alex. Ross, Minister of Labour.

British Columbia: Mr. J. D. McNiven, Deputy Minister of Labour.

Municipal and other representatives appearing before the Conference were as follows:—

Mr. A. D. Shibley, secretary-treasurer of Union of Canadian Municipalities, Montreal; Mr. Fred Cook, member Advisory Committee, Union of Canadian Municipalities, Ottawa (ex-mayor of Ottawa); Their Worships Mayor S. H. Adams, Calgary; Mayor D. M. Duggan, Edmonton; Mayor W. D. L. Hardie, Lethbridge; Alderman B. W. Bellamy, Medicine Hat; Alderman Fred Crone, Vancouver; Alderman J. A. McKercher, Winnipeg; Alderman W. J. Scribbins, Vancouver; Alderman W. V. Simpson, Winnipeg; Alderman Leon Trepanier, Montreal; Councillor D. W. Grimmett, South Vancouver; Mr. J. Keane, commissioner of Social Service Department, Ottawa; Mr. Tom Moore, president Trades and Labour Congress of Canada, Ottawa; Mr. J. Clarke Reilly, secretary Association of Canadian Building and Construction Industries, Ottawa; Mr. Frank Hawkins, secretary Lumberman's Safety Association, Ottawa.

The sessions of the conference were also attended by Mr. Otto T. Mallory, a member of the United States Unemployment Conference and of the Pennsylvania Industrial Board.

The Honourable James Murdock was requested by the conference to preside as chairman; and Mr. Gerald H. Brown, assistant Deputy Minister of Labour, served as secretary.

The Prime Minister welcomed the delegates to Ottawa, stating that in the view of the Dominion Government a solution of the many present social problems of the country could not be found

by the Dominion government except in co-operation with the provinces, through conference and by personal exchanges of views. He referred to the inevitable centralization evident in Canada as in other countries during the war. The war was now over but this centralizing tendency continued to lead to confusion in the minds of many as to the respective functions of the Dominion and provincial governments in dealing with questions of industry and employment. During the war the Dominion government had to assume some functions which belonged properly to the provinces. The recent Federal measures for the relief of unemployment, for example, were to be understood as taken in discharge of obligations arising out of the war. "I think," he said, "it would be a great mistake from every point of view, if throughout our Dominion there were to grow up in the minds of the public generally the thought that as these different emergencies arise it is only necessary to look to the Federal Government for a solution." Great care should be taken to safeguard Provincial rights, as established by the Constitution, and to see that their corresponding obligations are recognized and fully met. The Federal government already carried a heavy proportion of the liabilities arising out of the war, as compared with the provinces, a fact which should be remembered by those who suggest that the Federal Government should assume liabilities which do not come wholly within its jurisdiction. The Prime Minister recommended that in finding a solution of the unemployment problem the conference should as far as possible encourage the traditional Anglo-Saxon reliance upon self-help in preference to governmental action, on which many people, since the days of the war, were disposed to depend unduly. "I think I do not go too far," he concluded, "when I say that in the interests of our human society as it is to-day, it is desirable that in all our actions we proceed on the basis of individual self-help in the first instance, with community co-operation as the next

step, and government assistance only as the last and inevitable resort."]

The Minister of Labour outlined the objects of the Conference as set forth in a letter of invitation addressed by the Prime Minister to the several Provincial governments, and explained that, in regard to representation at the Conference it had been the desire of the majority of the Provincial governments that the representatives of the Dominion and Provincial governments alone should have the responsibility of ultimately determining measures to be taken in dealing with unemployment. The conference would, however, be very glad to hear from the representatives of such municipal and other organizations as desired to express their views, and also to hear any representations which had been made in writing by municipal bodies that had no representatives present. The Minister alluded to forecasts which had been made by many people that unemployment would be more serious in Canada during the coming winter than ever before. He could discover no grounds for such pessimism. ["At the same time," he proceeded, "we have in two or three parts of Canada a really serious situation, but not a situation, it seems to me, that necessitates the devising of a general nation-wide scheme of relief. The Minister further expressed himself as opposed on general grounds to the handing out of doles, though possibly some practical means might be devised whereby employment under reasonable conditions might be provided through co-operation between the various public authorities.]

[Honourable Dr. H. S. Beland, Minister of Soldiers' Civil Re-establishment, alluded to the four factors of production, natural resources, capital, ability, and labour, all of which Canada possessed. The question rose as to how far the State should be asked to maintain industrial activity during time of depression. The State's function was necessarily limited, and its main activities should be directed to developing trade and com-

merce. But beyond that there was the problem of the relief of working men in times of depression.] Great Britain, where the unemployment problem was even more serious than in Canada, had been compelled to resort to direct relief of the unemployed. Such relief might be an "inducement to loaf," but in England it was the only manner in which the unemployed could be relieved. ["I do not say that because I advocate the system out and out, but I resent any man reproaching public bodies or public authority in this country for having resorted to measures of direct relief of unemployment during the last two years." The speaker concluded with a reference to the work of the Department of Soldiers' Civil Re-establishment on behalf of the returned soldiers.]

On the opening of the proceedings considerable discussion took place as to the status of the representatives of certain western municipalities who had attended the conference in person instead of presenting their views in writing, a course which had been adopted by other municipalities. The western delegates were finally given an opportunity to express their views before the conference, the discussion being mainly directed to the forming of an estimate of the present extent of unemployment and of the probable situation in this respect during the coming winter. The view generally held by the speakers was that the peak of unemployment had been passed, and that employment would be more general next winter than it had been during the past two winters. Most of the speakers were opposed to the policy of doles to the unemployed, on the ground that such a policy tended to perpetuate abnormal conditions by demoralizing the workers who receive temporary benefits.

Mr. Tom Moore, president of the Trades and Labour Congress of Canada, presented the views of organized labour in Canada, these being in line with the resolutions on this subject which were passed at the recent convention of the

Congress at Montreal. The resolutions affirmed,—

First, that the provision of employment is a joint responsibility of the Federal, Provincial and municipal authorities, to be effected by the distribution of public works at the proper places in the slack seasons, by work on public buildings and on roads, by afforestation, and land clearing, by limiting the working day to eight hours, by the restriction of immigration, and by loans for building workmen's houses;

Second, that private industry should be controlled to prevent the engaging by contract of labour outside Canada and the laying-off of workers while orders remain to be filled, or until working hours have been materially reduced, and by equalizing employment, eliminating overtime work, etc.;

Third, that the Employment Service should be developed to the fullest extent;

Fourth, that unemployment insurance should be immediately instituted to be administered by the Dominion Government;

Fifth, that Canadian raw materials should be exported in their highest manufactured form;

Sixth, that the natural resources now held for speculation be released for use;

Seventh, that the home market should be developed by the payment of wages high enough to purchase Canadian products;

Eighth, by the care of the destitute through relief works at trade union rates, or failing them the provision of full maintenance on the scale laid down by the LABOUR GAZETTE.

On the suggestion of representatives of the western municipalities the resolutions of the Unemployment Conference held at Calgary on August 4 and 5 were read. These resolutions are outlined elsewhere in the present issue of the LABOUR GAZETTE.

The present employment situation in Canada was described by Mr. R. A. Rigg, director of the Employment Service of Canada, as being fairly satisfactory, reports both from employers and labour unions showing a steady increase in the number employed. This view found support in the fact that the demand for harvest labour could not be fully met by surplus labour from the eastern provinces. In Ontario, for example, unemployment was reported to be limited to men handicapped by old age or disability, and the orders received by the Provincial Employment Service for farm, bush and railway construction work far exceeded the supply of men available. Serious unemployment, however, was to be looked for in the larger centres of population during the approaching winter, though not to the same extent as during the past two seasons.

A number of resolutions were unanimously passed by the Conference. One of these affirmed "that the problem of unemployment is primarily one of industry and that every effort should be made in industry to prevent the occurrence of unemployment;" further that "it is recognized that the causes of unemployment in some cases may be outside of particular industries and in part due to causes which are international." The conference, however, urged upon these engaged in industry the necessity of regulating employment in the interests alike of employer and employee.

Another resolution was to the effect that the Conference after considering the representations made by municipalities, provincial governments and the Federal government, was of the opinion that at the present time no acute unemployment problem exists throughout the Dominion, and further that if during the approaching winter, abnormal unemployment should materialize, it would be less in extent than during the past winter; also "that the practice of handing out unemployment doles is wrong in principle and often harmful in effect and should not be resorted to

until all other measures have failed." The same resolution also dealt with measures which might be taken to meet conditions incident to any abnormal unemployment which might occur during the coming winter.

Another resolution was as follows: "Whereas in departments of government, both federal and local, there are avenues open for employment; and whereas the Canadian National Railway Board is the manager and operator of the Canadian National Railways and the Canadian government system; and whereas there are boards administering—under legislative authority—special departments of public works in the various provinces; and whereas there are recurring periods of unemployment; Therefore, this conference recommends that the respective governments, the National Railway Board and the boards administering the special departments of public works in the various provinces should regulate and carry on their public work and railway operation so as to distribute the work in such a manner as to relieve unemployment to the greatest possible extent throughout Canada."

Attention was then directed to the second feature of the conference agenda, namely, aspects of other industrial and social questions which have been the subject of action by the International Labour Organization. Mr. Gerald H. Brown, who had represented the government of Canada at the last International Labour Conference, outlined the objects of the International Labour Body of the League of Nations, the methods employed, and indicated the intent of the several draft conventions and recommendations which had been adopted by the organization.

Mr. Tom Moore on behalf of the Trades and Labour Congress of Canada presented a memorandum which suggested that measures be taken to secure for organized labour definite results from Canada's membership in the International Labour Organization. The view of
